By keeping the supplemental purchase limit in effect for the seasonally low-production months of September through November, the pool producers would tend to be protected from carrying the seasonal reserve supply burden of producer-handlers. In addition, if the limit were applied only during such months, it would provide an incentive for producer-handlers to change their breeding program to effect peak production during the market's low-production months and obtain supplemental supplies during the period of higher production in the market. This would tend to lessen the burden of wide seasonal swing in the volume of total reserve supplies in the market and thereby contribute to marketing efficiencies. In addition, it would tend to discourage excess surplus production by producer-handlers. Also, it would facilitate potential marketing efficiency that may be gained by enabling producer-handlers to service nearby ski resort and summer camp accounts.

It therefore is concluded that the limit should be suspended for the months of December 1991 through August 1992, or until such time as the amendatory rulemaking noticed at 55 FR 33915–33918 (August 20, 1990) is completed if that date is earlier.

It is hereby found and determined that thirty days' notice of the effective date hereof is impractical, unnecessary and contrary to the public interest in that:

(a) The suspension is necessary to reflect current marketing conditions and to assure orderly marketing conditions in the marketing area in that unnecessary production of surplus milk by producer-handlers is being encouraged by the limit on purchases of pool milk by producer-handlers and the limit is unduly disrupting the marketing of milk to seasonal recreational sales accounts in the marketing area;

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) The marketing problems that provide the basis for the suspension were fully reviewed at a public hearing and all interested parties had the opportunity of being heard on this matter.

Therefore, good cause exists for making this order effective December 1, 1991.

List of Subjects in 7 CFR Part 1139

Milk.

It is therefore ordered, That the following provisions in § 1139.10 of the Great Basin order are hereby suspended for the months of December 1991 through August 1992 or until such time as the amendatory rulemaking noticed at 55 33915–33918 (August 20, 1990) is completed, if that date is earlier.

PART 1139—MILK IN THE GREAT BASIN MARKETING AREA

1. The authority citation for 7 CFR part 1139 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

§ 1139.10 [Temporarily suspended in part]

2. In § 1139.10(b)(1)(ii), the words "in an amount that is not in excess of the larger of 5,000 pounds or 5 percent of such person's Class I disposition during the month" are suspended for the months of December 1991 through August 1992.

Signed at Washington, DC, on: December 18, 1991.

Jo Ann R. Smith,

Assistant Secretary, Marketing and Inspection Services.

[FR Doc. 91–30744 Filed 12–24–91; 8:45 am]

BILLING CODE 3410–02–M

Animal and Plant Health Inspection Service

9 CFR Part 92

[Docket No. 91–157]

Contagious Equine Metritis

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations regarding horses from countries affected with contagious equine metritis (CEM), so that all paragraph references in the regulations will refer to current paragraph designations. These changes are necessary to clarify the regulations.

EFFECTIVE DATE: December 26, 1991.

FOR FURTHER INFORMATION CONTACT: Dr. Karen James, Senior Staff Veterinarian, Import-Export Animals Staff, VS, APHIS, USDA, room 765, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436–8590.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR part 92, referred to below as the regulations, govern the importation into the United States of specified animals and animal products, to prevent the introduction into the United States of various diseases, including contagious equine metritis (CEM). CEM is a venereal disease of horses that affects fertility and breeding. Section 92.301 of the regulations authorizes the importation of certain horses into the United States from countries affected with CEM, when specific requirements to prevent the horses from introducing CEM into the United States are met. Section 92.304 of the regulations, among other things, sets forth requirements for import permits for horses from countries affected with CEM.

On April 17, 1991, we published in the **Federal Register** a final rule (56 FR 15486–15493, Docket No. 90–160), in which we made a number of amendments to the regulations regarding horses from countries affected with CEM. In that final rule, we added and amended a number of paragraphs, and redesignated other paragraphs as necessary. In certain cases, however, we did not make corresponding changes to paragraph references in the existing regulations. Therefore, following publication of our April 17, 1991, final rule, certain provisions in the regulations referred to outdated paragraph designations. To clarify the regulations, we are amending references to paragraph designations in §§ 92.301 and 92.304 to reflect current paragraph designations. We are also making certain nonsubstantive changes to the regulations to amend paragraph references that appeared incorrectly due to previous typographical errors.

This rule corrects references to paragraph designations in the regulations. Therefore, pursuant to 5 U.S.C. 553, notice of proposed rulemaking and opportunity to comment are not required, and this rule may be made effective less than 30 days after publication in the **Federal Register.** Further, because this rule makes nonsubstantive corrections to the regulations, it is exempt from the provisions of Executive Order 12291. Finally, this action is not a rule as defined by Public Law 96–354, the Regulatory Flexibility Act, and thus is exempt from the provisions of that Act.

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

These programs/activities under 9 CFR part 92 are listed in the Catalog of Federal Domestic Assistance under No. 10.025 and are subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

List of Subjects in 9 CFR Part 92

Animal diseases, Imports, Livestock and livestock products, Quarantine, Transportation.

Accordingly, we are amending 9 CFR part 92 as follows:

PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS; INSPECTION AND OTHER REQUIREMENTS FOR CERTAIN MEANS OF CONVEYANCE AND SHIPPING CONTAINERS THEREON

1. The authority citation for part 92 continues to read as follows:

Authority: 7 U.S.C. 1622; 19 U.S.C. 1306; 21 U.S.C. 102–105, 111, 134a, 134b, 134c, 134d, 134f, and 135; 31 U.S.C. 9701; 7 CFR 2.17, 2.51, and 371.2(d).

§ 92.301 [Amended]

2. In § 92.301, paragraph (c)(2)(vi)(A)(*1*) is amended by removing the reference to "§ 92.4" and adding in its place a reference to "§ 92.304 of this part".

3. In § 92.301, paragraph (c)(2)(vi)(A)(*2*) is amended by removing the reference to "§ 92.17" and adding in its place a reference to "§ 92.314 of this part".

4. In § 92.301, paragraph (c)(2)(vii)(B)(*5*) is amended by removing the reference to "paragraph (c)(2)(vi)(D)" and adding in its place a reference to "paragraph (c)(2)(vii)(D)".

5. In § 92.301, paragraph (c)(2)(vii)(B)(*6*) is amended by removing the reference to "paragraph (c)(2)(vi)" and adding in its place a reference to "paragraph (c)(2)(vii)".

6. In § 92.301, the reference to "paragraph (c)(2)(iv)(B)" is removed and a reference to "paragraph (c)(2)(vii)(B)" is added in its place in the following places:

a. Paragraph (c)(2)(vii)(D), both sentences; and

b. Paragraph (c)(2)(vii)(E).

7. In § 92.301, paragraph (c)(2)(viii)(B)(*2*) is amended by removing the reference to "paragraphs (c)(2)(vii)(B)(*1*)" and adding in its place a reference to "paragraphs (c)(2)(viii)(B)(*1*)".

8. In § 92.301, paragraph (c)(2)(viii)(B)(*7*) is amended by removing the reference to "paragraph (c)(2)(vii)(B)(*6*)" and adding in its place a reference to "paragraph (c)(2)(viii)(B)(*6*)".

9. In § 92.301, paragraph (c)(2)(viii)(C)" is amended by removing the reference to "paragraph (c)(2)(vii)(G)" and adding in its place a reference to "paragraph (c)(2)(viii)(G)".

10. In § 92.301, paragraph (c)(2)(viii)(E)" is amended by removing the reference to "paragraph (c)(2)(vii)(A)" and adding in its place a reference to "paragraph (c)(2)(viii)(A)".

11. In § 92.301, paragraph (c)(2)(viii)(G), the first sentence is amended by removing the reference to "paragraph (c)(2)(vii)" and adding in its place a reference to "paragraph (c)(2)(viii)".

12. In § 92.301, paragraph (c)(2)(viii)(G)" the second sentence is amended by removing the reference to "paragraph (i)(2)(vii)" and adding in its place a reference to "paragraph (c)(2)(viii)".

13. In § 92.301, paragraph (c)(2)(viii)(G)" the second sentence is amended by revising the words "paragraph (c)(2)(vii)(B)(*2*)" of this section; and (*3*) to supervise the cleaning and disinfection required by paragraph (c)(2)(viii)(B)(*6*) of this section." to read "paragraph (c)(2)(viii)(B)(*2*) of this section; and (*3*) to supervise the cleaning and disinfection required by paragraph (c)(2)(viii)(B)(*6*) of this section.".

14. In § 92.301, paragraph (c)(2)(viii)(G), the third sentence is amended by removing the reference to "(c)(2)(viii)(H)" and adding in its place a reference to "(c)(2)(viii)(H)".

15. In § 92.301, the reference to "paragraph (c)(2)(viii)(B)" is removed and a reference to "paragraph (c)(2)(vii)(B)" is added in its place in the following places:

a. Paragraph (c)(2)(viii)(G), sixth sentence; and

b. Paragraph (c)(2)(viii)(H).

§ 92.304 [Amended]

16. In § 92.304, paragraph (a)(1)(i) is amended by removing the reference to "§ 92.2(c)(1)" and adding in its place a reference to "§ 92.301(c)(1)".

17. In § 92.304, the reference to "§ 92.301(c)(2)(vii)" is removed and a reference to "§ 92.301(c)(2)(viii)" is added in its place in the following places:

a. Paragraph (a)(1)(ii), both times it appears; and

b. Paragraph (a)(1)(iii).

18. In § 92.304, the paragraph designation for paragraph (a)(4)(ii) that reads "(4)(ii)" is revised to read "(ii)".

19. In § 92.304, the paragraph designation for paragraph (a)(8)(iii)(A), which appears incorrectly as (a)(8)(iii)(A)(1), is revised by removing the "(1)".

20. Section 92.304 is amended by removing the reference to "§ 92.301(c)(2)(vi)" and adding in its place a reference to "§ 92.301(c)(2)(vii)" in the following places:

a. Paragraph (a)(8)(iii)(B); and

b. Paragraph (a)(8)(iii)(E), the first sentence.

21. In § 92.304, paragraph (a)(8)(iii)(C) is amended by removing the reference to "§ 92.304(a)(8)(iii)(A)" and adding in its place a reference to "§ 92.304(a)(8)(iii)(B)".

22. In § 92.304, paragraph (a)(8)(iii)(D) is amended by revising the words "§ 92.2(c)(2)(vii)" if any specimen required by this section or by "§ 92.2(c)(2)(v)(G)" § 92.2(c)(2)(vi)(F)" or § 92.2(c)(2)(vi)(G)" to read "§ 92.301(c)(2)(vii), if any specimen required by this section or by § 92.301(c)(2)(v)(G), § 92.301(c)(2)(vi)(F), or § 92.301(c)(2)(vi)(G) of this part.

Done in Washington, DC, this 13th day of December 1991.

Robert Melland,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 91-30342 Filed 12-24-91; 8:45 am]

BILLING CODE 3410-34-M

9 CFR Parts 101-108, 109, and 112-118

[Docket No. 90-170]

Viruses, Serums, Toxins, and Analogous Products

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the veterinary biologics regulations by removing all references to "Deputy Administrator" and replacing them with references to "Administrator." We are also removing all references to "Veterinary Services" and replacing them with references to "Animal and Plant Health Inspection Service" (APHIS). These changes are warranted so that regulations will accurately reflect that the Administrator of the Agency holds the primary authority and responsibilities for various decisions under the regulations.

EFFECTIVE DATE: December 26, 1991.

FOR FURTHER INFORMATION CONTACT: Dr. Frank Y. Tang, Biotechnologist, BCTA, BBEP, APHIS, USDA, room 851, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782; 301-436-4833.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR parts 101-118 concern veterinary biologics. Prior to the effective date of this document, these regulations indicated that the Deputy Administrator of the Animal and Plant Health Inspection Service (APHIS) for Veterinary Services (VS) was the official responsible for various decisions under these regulations. We are revising 9 CFR parts 101-118 to indicate that the primary authority and responsibility for various decisions under these regulations belong to the Administrator of the Agency. We are making similar revisions in all other APHIS regulations. These revisions will be published in separate Federal Register documents.

With these changes the term "Deputy Administrator" no longer appears in the text of the regulations. Therefore, we are deleting the definition of "Deputy Administrator." We are also adding a definition of "Animal and Plant Health Inspection Service". In addition, we are making non-substantive wording changes for clarity.

This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, notice of proposed rulemaking and opportunity to comment are not required, and this rule may be made effective less than 30 days after publication in the Federal Register. Further, since this rule relates to internal agency management, it is exempt from the provisions of Executive Order 12291. Finally, this action is not a rule as defined by Public Law 96-354, the Regulatory Flexibility Act, and thus is exempt from the provisions of that Act.

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

List of Subjects

Accordingly, we are amending 9 CFR parts 101 through 109 and 112 through 118 as follows:

Part 101—DEFINITIONS

1. The authority citation for part 101 continues to read as follows:

Authority: 21 U.S.C. 151-159; 7 CFR 2.17, 2.51, and 371.2(d).

2. In § 101.2, the terms are rearranged alphabetically without paragraph designations; the definition of "Deputy Administrator" is removed and the definitions of "Administrator" and "Animal and Plant Health Inspection Service" are added in alphabetical order to read as follows:

§ 101.2 Administrative terminology.

* * * * *

Administrator. The Administrator, Animal and Plant Health Inspection Service, or any person authorized to act for the Administrator.

Animal and Plant Health Inspection Service. The agency in the Department of Agriculture responsible for administering the Virus-Serum-Toxin Act.

§§ 101.2, 101.3, 101.4, 101.5 [Amended]

* * * * *

3. In the following places, the words "Veterinary Services" are removed and the term "Animal and Plant Health Inspection Service" added in their place:

(a) Section 101.2, in the definition of "Inspector";

(b) Section 101.3(k);

(c) Section 101.4(g);

(d) Section 101.5(a); (c); (f).

§§ 101.2, 101.5 [Amended]

4. In the following places, the word "Deputy" is removed:

(a) Section 101.2, in the definition of "Inspector";

(b) Section 101.5(c).

PART 102—LICENSES FOR BIOLOGICAL PRODUCTS

5. The authority citation for part 102 continues to read as follows:

Authority: 21 U.S.C. 151-159; 7 CFR 2.17, 2.51, and 371.2(d).

§§ 102.4, 102.5 [Amended]

6. In the following places, the words "Deputy Administrator, Veterinary Services" are removed and the word "Administrator" is added in their place:

(a) Section 102.4(c);

(b) Section 102.5(c).

7. In the following places, the words "Veterinary Services" are removed and the term "Animal and Plant Health Inspection Service" is added in their place:

(a) Section 102.3(a)(1); (a)(4).

§§ 102.2, 102.3, 102.4, 102.5 [Amended]

8. In the following places, the word "Deputy" is removed:

(a) Section 102.1 heading; introductory text;

(b) Section 102.2;

(c) Section 102.3(a); (b);

(d) Section 102.4(a); (b)(1); (b)(2); (b)(2)(ii); (f); (g); (h); (h)(1);

(e) Section 102.5(a); (b)(5); (d)(1); (d)(3); (e).

PART 103—EXPERIMENTAL PRODUCTION, DISTRIBUTION, AND EVALUATION OF BIOLOGICAL PRODUCTS PRIOR TO LICENSING

9. The authority citation for part 103 continues to read as follows:

Authority: 21 U.S.C. 151-159; 7 CFR 2.17, 2.51, and 371.2(d).

§§ 103.1, 103.2, 103.3 [Amended]

10. In the following places, the word "Deputy" is removed:

(a) Section 103.1 [second and fourth sentences];

(b) Section 103.2(a); (c);

(c) Section 103.3 introductory text [second sentence—twice], [third sentence]; (f); (g); and (h).

§ 103.3 [Amended]

11. In § 103.3(e), the words "the Veterinary Services" are removed and the term "Animal and Plant Health Inspection Service" is added in their place.

PART 104—PERMITS FOR BIOLOGICAL PRODUCTS

12. The authority citation for part 104 continues to read as follows:

Authority: 21 U.S.C. 151-159, 7 CFR 2.17, 2.51, and 371.2(d).

§§ 104.1, 104.2, 104.3, 104.5, 104.6 [Amended]

13. In the following places, the words "Veterinary Services" are removed and the term "Animal and Plant Health Inspection Service" is added in their place:

(a) Section 104.1(b);

(b) Section 104.2(a), introductory text;

(c) Section 104.3(a);

(d) Section 104.5(a)(1); (a)(4); (a)(5); (b)(4);

(e) Section 104.6(a); (b).

§§ 104.1, 104.2, 104.4, 104.5 [Amended]

14. In the following places, the word "Deputy" is removed:

(a) Section 104.1 introductory text;

(b) Section 104.2(b); (c);

(c) Section 104.4(b);

(d) Section 104.5(a)(3); (b)(1); (b)(4).

§ 104.7 [Amended]

15. In § 104.7(a), the words "Veterinary Services" are removed and the word "Administrator" is added in their place.

PART 105—SUSPENSION OF BIOLOGICS LICENSES OR PERMITS

16. The authority citation for part 105 is revised to read as follows:

Authority: 21 U.S.C. 151-159; 7 CFR 2.17, 2.15, and 371.2(d).

§ 105.2 [Amended]

17. In § 105.2, the words "Veterinary Services" are removed and the term "Animal and Plant Health Inspection Service" is added in their place.

§§ 105.3, 105.4 [Amended]

18. In the following places, the word "Deputy" is removed:

(a) Section 105.3(b);

(b) Section 105.4.

PART 106—EXEMPTION FOR BIOLOGICAL PRODUCTS USED IN DEPARTMENT PROGRAMS OR UNDER DEPARTMENT CONTROL OR SUPERVISION

19. The authority citation for part 106 is revised to read as follows:

Authority: 21 U.S.C. 151-159; 7 CFR 2.17, 2.51, and 371.2(d).

§ 106.1 [Amended]

20. In § 106.1, the word "Deputy" is removed.

PART 107—EXEMPTIONS FROM PREPARATION PURSUANT TO AN UNSUSPENDED AND UNREVOKED LICENSE

21. The authority citation for part 107 continues to read as follows:

Authority: 21 U.S.C. 151-159; 7 CFR 2.17, 2.51, and 371.2(d).

§§ 107.1 and 107.2 [Amended]

22. In the following places, the word "Deputy" is removed.

(a) Section 107.1 introductory text;

(b) Section 107.2, paragraphs (a) twice; (c) twice; and (d) once.

§ 107.1 [Amended]

23. In § 107.1(a)(2), the words "Veterinary Services" are removed and the term "Animal and Plant Health Inspection Service" is added in its place.

PART 108—FACILITY REQUIREMENTS FOR LICENSED ESTABLISHMENTS

24. The authority citation in part 108 is revised to read as follows:

Authority: 21 U.S.C. 151-159; 7 CFR 2.17, 2.51, and 371.2(d).

§ 108.1 [Amended]

25. In § 108.1, the word "Deputy" is removed.

§§ 108.6, 108.7, 108.11 [Amended]

26. In the following places, the words "Veterinary Services" are removed and the term "Animal and Plant Health Inspection Service" is added in their place:

(a) Section 108.6 introductory text; (a);

(b) section 108.7 [first and last sentences];

(c) Section 108.11.

PART 109—STERILIZATION AND PASTEURIZATION AT LICENSED ESTABLISHMENTS

27. The authority citation for part 109 is revised to read as follows:

Authority: 21 U.S.C. 151-159; 7 CFR 2.17, 2.51, and 371.2(d).

§§ 109.1, 109.2 [Amended]

28. In the following places, the word "Deputy" is removed:

(a) Section 109.1(a);

(b) Section 109.2.

§ 109.3 [Amended]

29. In § 109.3, introductory text, the words "Veterinary Services" are removed and the term "Animal and Plant Health Inspection Service" is added in their place.

VOL 56 ISS 248 DEC 26 1991 UMI

PART 112—PACKAGING AND LABELING

30. The authority citation for part 112 continues to read as follows:

Authority: 21 U.S.C. 151–159; 7 CFR 2.17, 2.51, and 371.2(d).

§§ 112.2, 112.5, 112.7 [Amended]

31. In the following places, the words "Veterinary Services" are removed and the term "Animal and Plant Health Inspection Service" is added in their places:

(a) Section 112.2(e);
(b) Section 112.5 introductory text; (a); (b); (c); (d)(1)(i); (d)(1)(ii); (d)(4); (f);
(c) Section 112.7(i).

§§ 112.1, 112.2, 112.7, 112.8, 112.9) [Amended]

32. In the following places, the word "Deputy" is removed:

(a) Section 112.1 introductory text;
(b) Section 112.2(a)(8);
(c) Section 112.7(e);
(d) Section 112.8(a)(2);
(e) Section 112.9(c).

PART 113—STANDARD REQUIREMENTS

33. The authority citation for part 113 is revised to read as follows:

Authority: 21 U.S.C. 151–159; 7 CFR 2.17, 2.51, and 371.2(d).

§§ 113.2, 113.3, 113.5, 113.6, 113.8, 113.9, 113.21, 113.30, 113.53, 113.54, 113.64, 113.65, 113.67, 113.106, 113.107, 113.108, 113.109, 113.111, 113.112, 113.119, 113.120, 113.121, 113.208, 113.210, 113.211, 113.212, 113.213, 113.214, 113.302, 113.303, 113.304, 113.305, 113.306, 113.307, 113.308, 113.310, 113.311, 113.312, 113.313, 113.314, 113.315, 113.316, 113.317, 113.318, 113.325, 113.326, 113.327, 113.328, 113.239, 113.330, 113.331, 113.332, 113.406, 113.408, 113.409, 113.453, 113.454, 113.455 [Amended]

34. In the following places, the words "Veterinary Services" are removed and the term "Animal and Plant Health Inspection Service" is added in their place:

(a) Section 113.2(e);
(b) Section 113.3 introductory text; (a)(2); (b)(8); (b)(9); (c)(4);
(c) Section 113.5(c) [twice]; (e);
(d) Section 113.6 heading; (b);
(e) Section 113.8(a)(2); (b); (c) introductory text; (c)(4)(i);
(f) Section 113.9 introductory text;
(g) Section 113.31 introductory text; (a)(1); (b)(2);
(h) Section 113.39(a)(1)(iii);
(i) Section 113.53(e);
(j) Section 113.54(a);
(k) Section 113.64(c);
(l) Section 113.66(b)(3); (b)(7);
(m) Section 113.67(b)(3); (b)(8);
(n) Section 113.106(c)(2);
(o) Section 113.107(c)(2);
(p) Section 113.108(c)(2);
(q) Section 113.109(c)(2);
(r) Section 113.111(c)(1)(iv); (c)(1)(v);
(s) Section 113.112(c)(1)(iv); (c)(1)(v);
(t) Section 113.119(c)(1);
(u) Section 113.120(c)(1);
(v) Section 113.121(c)(1);
(w) Section 113.209(b) [second sentence]; (b)(3)(iv) [twice]; (b)(5);
(x) Section 113.210(c); (d)(2)(iii); (d)(2)(v);
(y) Section 113.211(c); (d)(2)(iii); (d)(2)(v);
(z) Section 113.212(c); (d)(2)(iii);
(aa) Section 113.213(b); (c)(2)(ii); (c)(2)(vi);
(ab) Section 113.214(b)(1) [last sentence]; (b)(2); (b)(3); (b)(5);
(ac) Section 113.302(c)(1); (c)(5);
(ad) Section 113.303(b); (c)(1); (c)(5);
(ae) Section 113.304(c)(3); (c)(5);
(af) Section 113.305(c)(5);
(ag) Section 113.306(c)(3); (c)(5);

(ai) Section 113.308(b)(6);
(aj) Section 113.309(c)(10);
(ak) Section 113.310(c)(9);
(al) Section 113.311(c)(8);
(am) Section 113.312(b); (b)(3)(iv) [first and third sentences]; (b)(7);
(an) Section 113.313(c)(5); (c)(7);
(ao) Section 113.314(c)(3) introductory text; (c)(3)(ii); (c)(5);
(ap) Section 113.315(c)(3); (c)(5);
(aq) Section 113.316(b)(3); (b)(6);
(ar) Section 113.317(b); (c)(3); (c)(5);
(as) Section 113.318(b)(3); (b)(5);
(at) Section 113.325(c)(6);
(au) Section 113.326(c)(3); (c)(6);
(av) Section 113.327(c)(3); (c)(5);
(aw) Section 113.328(c)(3); (c)(4); (c)(7);
(ax) Section 113.329(c)(3); (c)(6); (c)(7);
(ay) Section 113.330(d)(3);
(az) Section 113.331(c)(2); (c)(3); (c)(5);
(ba) Section 113.332(c)(2); (c)(3); (c)(5);
(bb) Section 113.406 introductory text; (c);
(bc) Section 113.408 introductory text;
(bc) Section 113.409 introductory text; (c); (c)(2)(i); (c)(2)(ii);
(bd) Section 113.453(c) introductory text;
(be) Section 113.454(c)(1)(iv); (c)(1)(v);
(bf) Section 113.455(c)(1)(iv); (c)(1)(v);

§§ 113.52, 113.53, 113.55, and 113.408 [Amended]

35. In the following places, the term "VS" is removed and the term "APHIS" is added in its place:

(a) Section 113.52(b)(5); (h);
(b) Section 113.53(b); (c); (c)(2);
(c) Section 113.55(a)(3);
(d) Section 113.408(b); (f).

§§ 113.3, 113.4, 113.6, 113.8, 113.25, 113.26, 113.27, 113.35, 113.47, 113.113, 113.450 [Amended]

36. In the following places, the word "Deputy" is removed:

(a) Section 113.3(a) [twice]; (a)(1)(ii); (b); (c);
(b) Section 113.4(a);
(c) Section 113.6(a);
(d) Section 113.8(a); (c)(4)(i);
(e) Section 113.25(d);
(f) Section 113.26 introductory text;
(g) Section 113.27 introductory text;
(e) Section 113.35(b);
(f) Section 113.47(b) [second and third sentences];
(g) Section 113.113(a)(2) [second and third sentences]; (b);
(h) Section 113.450(b)(2);

§§ 113.52, 113.53, 113.55, 113.408 [Amended]

37. In § 113.52 paragraph (a)(3), § 113.53, introductory text; § 113.55, paragraph (a)(3); and § 113.408, introductory text; the term "Veterinary Services (VS)" is removed and replaced with "Animal and Plant Health Inspection Service (APHIS)".

PART 114—PRODUCTION REQUIREMENTS FOR BIOLOGICAL PRODUCTS

38. The authority citation for part 114 continues to read as follows:

Authority: 21 U.S.C. 151–159, 7 CFR 2.17, 2.51, and 371.2(d).

§§ 114.2, 114.3, 114.5, 114.7, 114.8, 114.9, 114.13, 114.14, 114.17, 114.18 [Amended]

39. In the following places, the words "Veterinary Services" are removed and the term "Animal and Plant Health Inspection Service" is added in their place:

(a) Section 114.2(b)(4);
(b) Section 114.3(d);
(c) Section 114.5;
(d) Section 114.7(a) [first and second sentences];
(e) Section 114.8 introductory text [first and second sentences]; paragraph (a) [first and second sentences]; paragraphs (b); (c); (d); (e)(1);
(f) Section 114.9(a)(3); (a)(7); (b);
(g) Section 114.13 introductory text;
(h) Section 114.14(b); (b)(1);
(i) Section 114.17(d); (e);
(j) Section 114.18(d) [first and second sentences].

§§ 114.1, 114.2, 114.3, 114.5, 114.8, 114.10, 114.15, 114.17, 114.18 [Amended]

40. In the following places, the word "Deputy" is removed:

(a) Section 114.1 [first and second sentences];
(b) Section 114.2 (b); (c); (d)(3);
(c) Section 114.3(c);
(d) Section 114.5;
(e) Section 114.8 (e); (f) [first and second sentences];
(f) Section 114.10(a);
(g) Section 114.15;
(h) Section 114.17 introductory text;
(i) Section 114.18 introductory text.

41. In § 114.2(d)(2), "VS Form14–3" is removed [2 places) and "APHIS Form 2003" is added in its place. In the address in the last sentence the term "VS" is removed.

PART 116—RECORDS

42. The authority citation for part 116 is revised to read as follows:

Authority: 21 U.S.C. 151–159; 7 CFR 2.17, 2.51, and 371.2(d).

43. In the following places, the words "Veterinary Services" are removed and the term "Animal and Plant Health Inspection Service" is added in their place:

(a) Section 116.5;
(b) Section 116.7 [second and third sentences].

§§ 116.2, 116.5, 116.8 [Amended]

44. In the following places, the word "Deputy" is removed:

(a) Section 116.2(b);
(b) Section 116.5;
(c) Section 116.8.

PART 117—ANIMALS AT LICENSED ESTABLISHMENTS

45. The authority citation for part 117 is revised to read as follows:

Authority: 21 U.S.C. 151–159; 7 CFR 2.17, 2.51, and 371.2(d).

§§ 117.1, 117.3, 117.6 [Amended]

46. In the following places, the word "Deputy" is removed:

(a) Section 117.1 (a); (b);
(b) Section 117.3 (c); (e).
(c) Section 117.6(e).

PART 118—DETENTION; SEIZURE, AND CONDEMNATION

47. The authority citation for part 118 is revised to read as follows:

Authority: 21 U.S.C. 151–159; 7 CFR 2.17, 2.51, and 371.2(d).

§§ 118.1, 118.2, 118.3, 118.4 [Amended]

48. In the following places, the word "Deputy" is removed:

(a) Section 118.1;
(b) Section 118.2 introductory text; (b); (c) [first sentence—twice];
(c) Section 118.3(a)—twice; (b);
(d) Section 118.4, [second sentence].

Done in Washington, DC, this 13th day of December 1991.

Robert Melland,

Administrator, Animal and Plant Health Inspection Service.

[FR Doc. 91–30343 Filed 12–24–91; 8:45 am]

BILLING CODE 3410–34–M

9 CFR Part 113

[Docket No. 91–166]

Viruses, Serums, Toxins, and Analogous Products

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the veterinary biologics regulations under part 113 to update cross references to section numbers which inadvertently were not updated when part 113 sections were redesignated. These changes are necessary so that the regulations will accurately reflect the section numbers in part 113.

EFFECTIVE DATE: December 26, 1991.

FOR FURTHER INFORMATION CONTACT: Dr. David A. Espeseth, Deputy Director, Veterinary Biologics, Biotechnology, Biologics, and Environmental Protection, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, room 838, 6505 Belcrest Road, Hyattsville, MD 20782, telephone 301–436–8245.

SUPPLEMENTARY INFORMATION: The regulations in 9 CFR part 113 concern Standard Requirements for the preparation of veterinary biologics. The section numbers in part 113 were redesignated in a final rule published on August 31, 1990. (55 FR 35556–35563, Docket No. 89–151) and effective October 1, 1990. However, cross references in part 113 were not updated to reflect the new section numbers. Updating these cross reference section numbers is necessary in order to accurately reflect the redesignation of these section numbers.

This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, notice of proposed rulemaking and opportunity to comment are not required, and this rule may be made effective less than 30 days after publication in the Federal Register. Further, since this action is not a rule as defined by Public Law 96–354, the Regulatory Flexibility Act, and thus is exempt from the provisions of that Act.

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

List of Subjects in 9 CFR Part 113

Animal biologics, Exports, Imports, Reporting and recordkeeping requirements.

Accordingly, we are amending 9 CFR part 113 to read as follows:

PART 113—STANDARD REQUIREMENTS

1. The authority citation for part 113 continues to read as follows:

Authority: 21 U.S.C. 151–159; 7 CFR 2.17, 2.51, and 371.2(d).

§§ 113.7, 113.101, 113.103, 113.104, 113.105, 113.106, 113.107, 113.108, 113.109, 113.110, 113.111, 113.112, 113.114, 113.115, 113.116, 113.117, 113.118, 113.119, 113.120, 113.121, 113.122, 113.123 [Amended]

2. In the following places, the reference "§ 113.85" is removed and "§ 113.100" is added in its place as follows:

(a) Section 113.7(d);
(b) Section 113.101, introductory paragraph;
(c) Section 113.102, introductory paragraph;
(d) Section 113.103, introductory paragraph;
(e) Section 113.104, introductory paragraph;
(f) Section 113.105, introductory paragraph;
(g) Section 113.106, introductory paragraph;
(h) Section 113.107, introductory paragraph;
(i) Section 113.108, introductory paragraph;
(j) Section 113.109, introductory paragraph;
(k) Section 113.110, introductory paragraph;
(l) Section 113.111, introductory paragraph;
(m) Section 113.112, introductory paragraph;
(n) Section 113.114, introductory paragraph;

VOL 56 ISS 248 DEC 26 1991 UMI

(o) Section 113.115, introductory paragraph;
(p) Section 113.116, introductory paragraph;
(q) Section 113.117, introductory paragraph;
(r) Section 113.118, introductory paragraph;
(s) Section 113.119, introductory paragraph;
(t) Section 113.120, introductory paragraph;
(u) Section 113.121, introductory paragraph;
(v) Section 113.122, introductory paragraph; and
(w) Section 113.123, introductory paragraph.

§§ 113.201, 113.202, 113.203, 113.204, 113.205, 113.206, 113.207, 113.208, 113.209, 113.210, 113.211, 113.212, 113.213, 113.214, 113.216 [Amended]

3. In the following places, the reference "§ 113.120" is removed and "§ 113.200" is added in its place as follows:
(a) Section 113.201, introductory paragraph;
(b) Section 113.202, introductory paragraph;
(c) Section 113.203, introductory paragraph, both places it appears;
(d) Section 113.204, introductory paragraph;
(e) Section 113.205, introductory paragraph, both places it appears;
(f) Section 113.206 (a) and (c), both places it appears;
(g) Section 113.207, introductory paragraph, both places it appears;
(h) Section 113.208, introductory paragraph;
(i) Section 113.209 (a) and (d);
(j) Section 113.210 (a) and (d);
(k) Section 113.211 (a) and (d);
(l) Section 113.212 (a) and (d);
(m) Section 113.213 (a) and (c);
(n) Section 113.214 (a) and (c); and
(o) Section 113.216(c).

§§ 113.8, 113.71, 113.301, 113.302, 113.303, 113.304, 113.305, 113.306, 113.307, 113.308, 113.309, 113.310, 113.311, 113.312, 113.313, 113.314, 113.315, 113.316, 113.317, 113.318, 113.325, 113.326, 113.327, 113.328, 113.329, 113.330, 113.331, 113.332 [Amended]

4. In the following places, the reference "§ 113.135" is removed and "§ 113.300" is added in its place as follows:
(a) Section 113.8(a)(1);
(b) Section 113.71(c);
(c) Section 113.301, introductory paragraph, both places it appears;
(d) Section 113.302 (a) and (d);
(e) Section 113.303 (a) and (d);
(f) Section 113.304 (a) and (d);
(g) Section 113.305 (a) and (d);
(h) Section 113.306 (a) and (d);
(i) Section 113.307 (a), both places it appears, and (d), both places it appears;
(j) Section 113.308 (a) and (c);
(k) Section 113.309 (a) and (d);
(l) Section 113.310 (a) and (d);
(m) Section 113.311 (a) and (d);
(n) Section 113.312 (a) and (d);
(o) Section 113.313 (a) and (d);
(p) Section 113.314 (a) and (d);
(q) Section 113.315 (a) and (d);
(r) Section 113.316 (a) and (c);
(s) Section 113.317 (a) and (d);
(t) Section 113.318 (a) and (c);
(u) Section 113.325 (a) and (d);
(v) Section 113.326 (a) and (d);
(w) Section 113.327 (a) and (d);
(x) Section 113.328 (a) and (d);
(y) Section 113.329 (a) and (d);
(z) Section 113.330(a);
(aa) Section 113.330(d), both places it appears;
(ab) Section 113.331 (a) and (d); and
(ac) Section 113.332 (a) and (d).

Done in Washington, DC, this 13th day of December 1991.

Robert Melland,

Administrator, Animal and Plan Health Inspection Service.

BILLING CODE 3410-34-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Parts 21 and 29

[Docket No. 91-ASW-2; Special Condition 29-ASW-2]

Special Conditions: McDonnell Douglas Model MD-900 Helicopter, Critical Functioning Electrical/ Electronic Systems

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final special condition.

SUMMARY: This special condition is issued for the McDonnell Douglas Model MD-900 helicopter. This helicopter will have a novel or unusual design feature associated with certain engine installations identified as utilizing a Full Authority Digital Engine Control (FADEC). This special condition contains additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that provided by the applicable airworthiness standards.

EFFECTIVE DATE: January 27, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Carroll Wright, FAA, Rotorcraft Standards Staff, Regulations Group, Fort Worth, Texas 76193-0111, telephone 817-624-5121.

SUPPLEMENTARY INFORMATION:

Background

On April 25, 1989, McDonnell Douglas Helicopter Company (MDHC), 5000 East McDowell Road, Mesa, Arizona, submitted an application for a new Type Certificate to include the Model MD-900 Helicopter. This aircraft is an eight-passenger, two-engine, 5,400-pound normal category helicopter. This helicopter will possess several advanced features including a hingeless, bearingless composite rotor system; a composite primary airframe structure; an integrated crew station; a centerline instrument display; the NOTAR antitorque system; and one or possibly more electrical/electronic systems performing functions critical to the continued safe flight and landing of the helicopter.

Type Certification Basis

The certification basis for the Model MD-900 includes: FAR part 27, through Amendment 27-23, effective September 2, 1988; Amendment 27-25, effective December 13, 1989; portions of Amendments 27-26, specifically 27.501; and FAR part 36, appendix H, effective on the date of certification.

Special conditions may be issued and amended, as necessary, as part of the type certification basis if the Administrator finds that the airworthiness standards designated in accordance with § 21.101(b)(2) do not contain adequate or appropriate safety standards because of novel or unusual design features of an aircraft or installation.

Special conditions, as appropriate, are issued in accordance with § 11.49 after public notice, as required by §§ 11.28 and 11.29(b), effective October 14, 1980, and will become a part of the type certification basis, as provided by § 21.101(b)(2).

Discussion

Notice of Proposed Special Condition No. SC-91-2-SW was published in the **Federal Register** on January 31, 1991 (56 FR 3804). No comments were received. Therefore, the special condition is adopted as proposed. The MDHC Model MD-900 helicopter will incorporate one and possibly more electrical/electronic systems and equipment that will be performing functions critical to the continued safe flight and landing of the helicopter. A FADEC is an electronic device which performs the critical function of engine control. The control of the engines is critical to the continued safe flight and landing of the helicopter during all operating flight regimes (both Visual Flight rules (VFR) and Instrument Flight Rules (IFR)). When the design is finalized, MDHC will provide the FAA with a preliminary hazard analysis that will identify any other critical functions performed by electrical/electronic systems and equipment.

If it is determined that this helicopter incorporates other electrical/electronic systems performing critical functions, it will be necessary to show that those systems meet the requirements of this special condition.

Conclusion

This action would affect only certain unusual or novel design features on one series of rotorcraft. This rule is not a rule of general applicability and affects only the manufacturer who applied to the FAA for approval of these features on the rotorcraft identified in this special condition.

List of Subjects in 14 CFR Parts 21 and 27

Aircraft, Air transportation, Aviation safety, Rotorcraft, Safety.

The Authority Citation for these special conditions is as follows:

Authority: 49 U.S.C. 1344, 1348(c), 1352, 1354(a), 1355, 1421 through 1431, 1502, 1651(b)(2); 42 U.S.C. 1857f-10, 4321 et seq.; E.O. 11541, 49 U.S.C. 106(g) (Rev. Pub. L. 97-449, January 12, 1983).

The Special Condition

Accordingly, pursuant to the authority delegated to me by the Administrator of the Federal Aviation Administration, the following special condition is issued as part of the type certification basis for the MDHC Model MD-900 helicopter.

Protection for Electrical/Electronic Systems From High Intensity Radiated Fields

Each system that performs critical functions must be designed and installed to ensure that the operation and operational capabilities of these critical functions are not adversely affected when the helicopter is exposed to high intensity radiated fields external to the helicopter.

Issued in Fort Worth, Texas, on December 13, 1991.

Henry A. Armstrong,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

BILLING CODE 4901-13-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Part 1213

Release of Information to News and Information Media

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: NASA is amending 14 CFR part 1213, "Release of Information to News and Information Media," to update the officials authorized to release and approve release of information. This rule establishes NASA policy, responsibilities, and procedures for the release of information concerning NASA programs and activities to news and information media. The intended effect of this action is to respond to the mandate in NASA's authorizing legislation in which the Congress has instructed the Agency to provide for the widest practicable and appropriate dissemination of information concerning its activities and the results.

EFFECTIVE DATE: December 26, 1991.

FOR FURTHER INFORMATION CONTACT: James W. McCulla, (202) 453-8398.

SUPPLEMENTARY INFORMATION: This revision updates the officials authorized to release and approve release of information. Since this involves administrative and editorial management decisions and procedures, no public comment period is required.

The National Aeronautics and Space Administration has determined that:

1. This rule is not subject to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601-612, since it will not exert a significant economic impact on a substantial number of small entities.

2. This rule is not a major rule as defined in Executive Order 12291.

List of Subjects in 14 CFR Part 1213

New media, Administration practice and procedure.

For reasons set out in the Preamble, 14 CFR part 1213 is amended as follows:

PART 1213—RELEASE OF INFORMATION TO NEWS AND INFORMATION MEDIA

1. The authority citation for 14 CFR part 1213 continues to read as follows:

Authority: 42 U.S.C. 2473(a)(3) and NSDD-84, "Safeguarding National Security Information."

2. Section 1213.102 is amended by revising the introductory text of paragraph (a) to read as follows:

§ 1213.102 Responsibility.

(a) The Associate Administrator for Public Affairs is responsible for the development and overall administration of an integrated Agencywide communications program and determines whether the specific information is to be released. The Associate Administrator for Public Affairs will:

* * * * *

3. Section 1213.103 is amended by revising paragraphs (a) and (b) to read as follows:

§ 1213.103 Procedures for issuance of news releases.

(a) All Headquarters news releases will be issued by the Office of Public Affairs, Media Services Division.

(b) Directors of Field Installations, through their Public Affairs Officer, may release information for which that Field Installation is the primary or sole source, i.e., launch, mission, and planetary encounter commentary; telephone recorded messages; status reports; and releases of local or regional interest. Release of information that has national significance will be coordinated with the Associate Administrator for Public Affairs. Material received from contractors prior to its public release may be reviewed for technical accuracy at the contracting installation.

* * * * *

4. Section 1213.104 is amended by revising paragraphs (a), (b)(1), (2), and (3) to read as follows:

§ 1213.104 Procedures for news release coordination and concurrence.

(a) General. All organizational elements of NASA involved in preparing and issuing NASA news releases are responsible for proper coordination and obtaining concurrences and clearances prior to issuance of the news release. Such coordination will be accomplished through the Associate Administrator for Public Affairs, NASA Headquarters.

(b) * * * (1) The Headquarters Office of Public Affairs will release information after obtaining all necessary concurrences and clearances from the appropriate Program or other Headquarters Office. Field Installations will obtain clearances from the appropriate Institutional Program or other Headquarters Office.

(2) Headquarters issuance of a news release bearing on a Field Installation will be coordinated with the installation through the appropriate Institutional Program Office/Public Affairs Office, Associate Administrator for Public Affairs, or Director, Media Services Division. If Headquarters is the issuing

VOL
56
ISS
248
DE

1991
UMI

Agency for a release for which the primary source is an Installation, the Office of Public Affairs will keep the Installation fully informed.

(3) If the Office of Public Affairs changes, delays, or cancels a release proposed for issuance by a Field installation, the Installation and the appropriate Institutional Program Office affected will be notified of the reasons for the action.

* * * * *

5. Section 1213.105 is amended by revising paragraphs (d) to read as follows:

§ 1213.105 Interviews.

* * * * *

(d) Any attempt by news media representatives to obtain classified information will be reported through the Headquarters Office of Public Affairs or Installation Public Affairs Office to the Installation Security Office. The knowing disclosure of classified information to unauthorized individuals will be cause for disciplinary actions against the NASA employee involved.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 100

[CGD 05-91-51]

Special Local Regulations for Marine Events; New Year's Eve Celebration Fireworks; Norfolk Harbor, Elizabeth River, Norfolk and Portsmouth, VA

AGENCY: Coast Guard, DOT.

ACTION: Notice of Implementation of 33 CFR 100.501.

SUMMARY: This notice implements 33 CFR 100.501 for the New Year's Eve Celebration Fireworks Display. The fireworks display will be launched from the Town Point Park Fireworks Mast Area, Town Point Park, Norfolk, Virginia, on the Elizabeth River, adjacent to "Waterside", between the Norfolk and Portsmouth downtown areas from 10 p.m., December 31, 1991 to 1 a.m., January 1, 1992. The regulations in 33 CFR 100.501 are needed to control vessel traffic within the immediate vicinity of the event due to the confined nature of the waterway and the expected congestion at the time of the event. The regulations restrict general navigation in the area for the safety of life and property on the navigable waters during the event.

EFFECTIVE DATE: The regulations in 33 CFR 100.501 are effective from 10 p.m., December 31, 1991 to 1 a.m., January 1, 1992. If inclement weather causes the postponement of the event, the regulations are effective from 6 p.m. to 8 p.m., January 1, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Stephen Phillips, Chief, Boating Affairs Branch, Boating Safety Division, Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia 23704-5004 (804) 398-6204, or Commander, Coast Guard Group Hampton Roads (804) 483-8559.

SUPPLEMENTARY INFORMATION:

Drafting Information

The drafters of this notice are QM1 Kevin R. Connors, project officer, Boating Affairs Branch, Boating Safety Division, Fifth Coast Guard District, and Lieutenant Monica L. Lombardi, project attorney, Fifth Coast Guard District Legal Staff.

Discussion of Regulation

Norfolk Festevents, Ltd. submitted an application to hold a fireworks display on December 31, 1991 from 10 p.m. to 1 a.m., on January 1, 1992. The fireworks display will be launched from the Town Point Park Fireworks-Mast Area, Town Point Park, Norfolk, Virginia, and will burst over the Elizabeth River. Since many spectator vessels are expected to be in the area to watch the fireworks display, the regulations in 33 CFR 100.501 are being implemented for these events. The fireworks will be launched from within the regulated area. The waterway will be closed during the fireworks display. Since the waterway will not be closed for an extended period, commercial traffic should not be severely disrupted. In addition to regulating the area for the safety of life and property, this notice of implementation also authorizes the Patrol Commander to regulate the operation of the Berkley drawbridge in accordance with 33 CFR 117.1007, and authorizes spectators to anchor in the special anchorage areas described in 33 CFR 110.72aa. The implementation of 33 CFR 100.501 also implements regulations in 33 CFR 110.72aa and 117.1007. 33 CFR 110.72aa establishes the spectator anchorages in 33 CFR 100.501 as special anchorage areas under Inland Navigation Rule 30, 33 U.S.C. 2030(g). 33 CFR 117.1007 closes the draw of the Berkley Bridge to vessels during and for one hour before and after the effective period under 33 CFR 100.501, except that the Coast Guard Patrol Commander may order that the draw be opened for commercial vessels.

Dated: December 16, 1991.

W.T. Leland,

Rear Admiral U.S. Coast Guard, Commander, Fifth Coast Guard District.

BILLING CODE 4910-14-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 89-629; RM-7031]

Radio Broadcasting Services; LaFayette, GA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document allots Channel 298A to LaFayette, Georgia, as that community's first local FM service, at the request of Radix Broadcasting, Inc. See 55 FR 03752, February 5, 1990. Channel 298A can be allotted to LaFayette in compliance with the Commission's minimum distance separation requirements with a site restriction of 5.3 kilometers (3.3 miles) east of the community, in order to avoid a short-spacing to Station WENN(FM), Channel 299C, Birmingham, Alabama, and to Station WJRX(FM), Channel 300A, East Ridge, Tennessee. The coordinates for this allotment are North Latitude 34-42-31 and West Longitude 85-13-33. With this section, this proceeding is terminated.

DATES: Effective February 3, 1992. The window period for filing applications will open on February 4, 1992, and close on March 5, 1992.

FOR FURTHER INFORMATION CONTACT: Nancy J. Walls, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 89-629, adopted December 9, 1991, and released December 19, 1991. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete test of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452-1422, 1714 21st Street, NW., Washington, DC 20036.

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 90-284; RM-7224, RM-7301, RM-7487]

Radio Broadcasting Services; New Sharon and Albia, Iowa, and Memphis, Missouri

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of First Christian Reformed Church, allots Channel 260C3 at New Sharon, Iowa, as its first local FM transmission service (RM-7224). We also allot, as requested by H&H Broadcasting Corporation, Channel 244C3 at Albia, Iowa, as its first local FM transmission service. In order to allot Channel 144C3 at Albia, we will also change Station KMEM(FM), Memphis, Missouri, from Channel 244A to Channel 263A (RM-7487). *See* 55 FR 23953, June 13, 1990. *See* Supplementary Information, *infra*.

DATES: Effective February 3, 1992. The window period for filing applications for Channel 260C3 at New Sharon, Iowa, and Channel 244C3 at Albia, Iowa, will open on February 4, 1992, and close on March 5, 1992.

FOR FURTHER INFORMATION CONTACT: Sharon P. McDonald, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 90-284, adopted December 10, 1991, and released December 19, 1991. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452-1422, 1714 21st Street, NW., Washington, DC 20036.

Channel 260C3 can be allotted to New Sharon in compliance with the Commission's minimum distance separation requirements with a site restriction of 17.4 kilometers (10.8 miles) south to avoid short-spacings to the construction permit for Station KFMH, Channel 259C1, Muscatine, Iowa, and Station KLYF, Channel 262C, Des Moines, Iowa. The coordinates for Channel 260C3 at New Sharon are North Latitude 41-18-49 and West Longitude 92-40-20. Channel 244C3 can be allotted to Albia without the imposition of a site restriction. The coordinates for Channel 244C3 at Albia are North Latitude 41-01-42 and West Longitude 92-48-12. Channel 263A can be allotted to Memphis at Station KMEM(FM)'s licensed site. The coordinates for Channel 263A at Memphis are North Latitude 40-29-59 and West Longitude 92-09-58. With this action, this proceeding is terminated.

Federal Railroad Administration

49 CFR Part 209

[FRA Docket No. RSEP–6, Notice No. 3]

RIN 2130–AA49

Amendment to Railroad Safety Enforcement Procedures; Approval of Information Collection Requirements

AGENCY: Federal Railroad Administration (FRA), DOT.

ACTION: Final rule.

SUMMARY: FRA is amending its railroad safety enforcement regulations (49 CFR part 209) to reflect the Office of Management and Budget's approval of information collection requirements.

EFFECTIVE DATE: This final rule will be effective December 26, 1991.

FOR FURTHER INFORMATION CONTACT: Gloria Swanson, Office of Safety, FRA, 400 Seventh Street, SW., Washington, DC 20590. Telephone: (202) 366–4345.

SUPPLEMENTARY INFORMATION: On October 18, 1989, FRA issued a final rule notice amending 49 CFR part 209, entitled "Railroad Safety Enforcement Procedures," by revising "Subpart A—General" and adding a new "Subpart D—Disqualification Procedures" prescribing procedures for disqualifying railroad employees, including managers, supervisors, and other agents from performing safety-sensitive functions in the rail industry (54 FR 42894, 1989). Since publication of the rule in the **Federal Register**, the Office of Management and Budget (OMB) has approved the information collection requirements of the rule (49 CFR 209.331) under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). This document provides notice of OMB approval of the information collection requirements and amends 49 CFR part 209 to reflect the approval of information gathering requirements contained in that part.

Regulatory Impact

E.O. 12291 and DOT Regulatory Policies and Procedures

This rule has been evaluated in accordance with existing policies and procedures, and is considered to be non-major under Executive Order 12291 and not significant under DOT policies and procedures (44 FR 11034, February 26, 1979).

Regulatory Flexibility Act

FRA certifies that this rule will not have a significant economic impact on a substantial number of small entities. There are no direct or indirect economic impacts for small units of government, businesses, or other organizations.

Paperwork Reduction Act

The rule does not contain information collection requirements.

Environmental Impact

FRA has evaluated these regulations in accordance with its procedures for ensuring full consideration of the potential environmental impacts of FRA actions, as required by the National Environmental Policy Act and related directives. This notice meets the criteria that establish this as a non-major action for environmental purposes.

Federalism Implications

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that the final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

List of Subjects in 49 CFR Part 209

Railroad safety, Railroad safety enforcement procedures.

The Final Rule

In consideration of the foregoing, part 209, title 49, Code of Federal Regulations is amended as follows:

PART 209—[AMENDED]

1. The authority citation for part 209 continues to read as follows:

Authority: 45 U.S.C. 6, 10 and 13, as amended; 45 U.S.C. 34, as amended; 45 U.S.C. 43, as amended; 45 U.S.C. 64a, as amended; 45 U.S.C. 431, 437, 438, and 439, as amended; 49 U.S.C. 103(c); 49 app. U.S.C. 26(h), as amended; 49 app. U.S.C. 1655(e), as amended; Pub. L. 100–342; and 49 CFR 1.49 (c), (d), (f), (g), and (m).

Subparts B and C also issued under 49 app. U.S.C. 1802, 1804, 1808, 1809, and 1810; and 49 CFR 1.49(s).

Subpart D—Disqualification Procedures

2. Subpart D is amended by adding a new § 209.337 to read as follows:

§ 209.337 Information collection.

The information collection requirements in § 209.331 of this part have been reviewed by the Office of Management and Budget pursuant to the Paperwork Reduction Act of 1980, (44 U.S.C. 3501 *et seq.*) and have been assigned OMB control number 2130–0529.

Issued in Washington, DC on December 19, 1991.

Gilbert E. Carmichael,

Federal Railroad Administrator.

[FR Doc. 91–30750 Filed 12–24–91; 8:45 am]

BILLING CODE 4910–06–M

49 CFR Parts 229, 230, 231, and 232

[FRA Docket No. RSEP–6, Notice No. 4]

RIN 2130–AA67

Amendment to Railroad Safety Regulations

AGENCY: Federal Railroad Administration (FRA), DOT.

ACTION: Final rule.

SUMMARY: FRA is amending its railroad safety regulations to ensure that the full range of its enforcement authority is available to address violations of all of the regulations it enforces under the Federal Railroad Safety Act of 1970 or the older safety statutes. This final rule clarifies FRA's authority to bring a non-emergency disqualification action under section 209(f) of the Safety Act for violations of the locomotive, safety appliance, and/or power brake regulations.

DATES: The final rule will become effective January 27, 1992.

FOR FURTHER INFORMATION CONTACT: Daniel C. Smith, Deputy Assistant Chief Counsel for Safety, FRA, Washington, DC 20590 (Telephone 202–366–0628).

SUPPLEMENTARY INFORMATION: Section 3 of the Rail Safety Improvement Act of 1988 ("RSIA") (Pub. L. No. 100–342) added a new section 209(f) to the Federal Railroad Safety Act of 1970 ("Safety Act") (45 U.S.C. 438(f)), which authorizes the Secretary of Transportation, after notice and an opportunity for a hearing, to disqualify an individual from safety-sensitive service in the railroad industry where that individual's violation of any rule or order prescribed "under this title" is shown to make that individual unfit for such service. When FRA issued its procedures for disqualification proceedings, it construed "this title" to mean title 45 of the United States Code. See 54 FR 42894–95 (October 18, 1989). However, it is also possible to read "this title" as referring only to the Safety Act, not all of title 45. Under that reading, the disqualification authority under section 209(f) of the Safety Act would be available only in connection with violations of a rule or order issued under the Safety Act.

Section 202(a) of the Safety Act, 45 U.S.C. 431(a), provides the Secretary with the authority to issue rules or orders covering all areas of railroad safety "supplementing provisions of law and regulations in effect on the date of enactment of this title." The laws in effect when the Safety Act was enacted in 1970, referred to here collectively as the "older safety laws," included the Safety Appliance Acts, 45 U.S.C. 1–14, 16; the Locomotive Inspection Act, 45 U.S.C. 22–34; the Accident Reports Act, 45 U.S.C. 38–43; the Hours of Service Act, 45 U.S.C. 61–64b; and the Signal Inspection Act, 49 app. U.S.C. 26.

FRA has issued the great majority of its safety regulations under the authority of the Safety Act (*e.g.*, the Track Safety Standards, 49 CFR part 213) or the joint authority of the Safety Act and one of the older laws (*e.g.*, the accident reporting regulations at 49 CFR part 225). However, there are four bodies of regulation that have thus far been issued only under the authority of one of the older safety laws: The Locomotive Safety Standards, 49 CFR part 229; the standards for inspection of steam locomotives, 49 CFR part 230; the Safety Appliance Standards, 49 CFR part 231; and the regulations on power brakes, 49 CFR part 232.

Therefore, in order to ensure that the disqualification authority under section 209(f) of the Safety Act is available for violations of those four regulatory parts, it is necessary to reissue them under the joint authority of the Safety Act and the older safety law under which they were previously issued. This is accomplished by a simple technical amendment to the authority sections of the four parts. In this way, FRA uses its Safety Act regulatory authority to supplement the older safety laws by making sure that the full range of Safety Act enforcement authority is available for violations of those older laws and regulations previously issued under them.

This final rule will eliminate the potential for the anomalous situation in which violations of the freight car safety standards (issued under the Safety Act) could provide the basis for disqualification, while violations of the locomotive, safety appliance, or power brake regulations—even if present on the same cars or trains as the freight car safety standards violations—would (assuming "this title" means the Safety Act) not provide the basis for disqualification under section 209(f) of the Safety Act. Of course, even if "this title" does limit section 209(f) disqualification actions to violations of regulations or orders issued under the Safety Act, section 209(f) specifically preserves FRA's authority to disqualify an individual on an emergency basis under section 203 of the Safety Act, which is in no way limited to violations of Safety Act regulations or orders. Therefore, this final rule merely clarifies FRA's authority to bring a non-

VOL

ISS
248
DE
26
1991
UMI

emergency disqualification action under section 209(f) of the Safety Act for violations of the locomotive, safety appliance, and/or power brake regulations. The rule makes one other minor change: It deletes from part 231 an appendix that was inadvertently not deleted when a substitute appendix was issued in 1988.

Congress envisioned in 1970 that such exercises of joint authority under the Safety Act and the older laws would be necessary. H.R. Rep. No. 91-1194, 91st Cong., 2d Sess. at 16 (1970). Moreover, it is clear that Congress, in providing FRA with disqualification authority under section 209(f) in 1988, intended that authority be available to address violations of all of the federal railroad safety regulations. See, *e.g.*, 134 Cong. Rec. H3468 (daily ed. May 23, 1988) (remarks of Cong. Luken).

Public Participation

In taking this action, FRA is not exercising its regulatory authority in a manner that could be informed by public comment. There are no substantive choices to be made. Instead, this is a technical amendment that is being accomplished merely by adding a citation to the Safety Act to the authority citations of four parts of the CFR. Accordingly, notice and comment procedures are "impracticable, unnecessary, or contrary to the public interest" within the meaning of section 4(a)(3)(B) of the Administrative Procedure Act, 5 U.S.C. 553(b)(3)(B).

Regulatory Impact

E.O. 12291 and DOT Regulatory Policies and Procedures

This final rule has been evaluated in accordance with existing policies and procedures. It is considered to be non-major under Executive Order 12291 and non-significant under the DOT policies and procedures. (44 FR 11034; February 26, 1979.)

This rule will not have any direct or indirect economic impact because it does not alter any existing substantive or procedural regulation in such a way as to impose additional burdens. The cost of complying with existing substantive regulations is not being increased. The rule merely clarifies the applicability of FRA's disqualification authority to certain types of regulatory violations. Accordingly, preparation of a regulatory evaluation is not warranted.

Regulatory Flexibility Act

FRA certifies that this rule will not have a significant economic impact on a substantial number of small entities. There are no direct or indirect economic impacts for small units of government, businesses, or other organizations. State rail agencies remain free to participate in the enforcement of FRA's rules but are not required to do so.

Paperwork Reduction Act

There are no information collection requirements contained in this rule.

Environmental Impact

FRA has evaluated this rule in accordance with its procedures for ensuring full consideration of the potential environmental impacts of FRA actions, as required by the National Environmental Policy Act and related directives. This notice meets the criteria that establish this as a non-major action for environmental purposes.

Federalism Implications

This rule will not have a substantial effect on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Thus, in accordance with Executive Order 12612, preparation of a Federalism Assessment is not warranted.

List of Subjects in 49 CFR Parts 229, 230, 231 and 232

Railroad safety.

Therefore, in consideration of the foregoing, parts 229, 231, and 232, title 49 Code of Federal Regulations are amended as follows:

PART 229—[AMENDED]

1. Part 229 is amended as follows:

A. The authority citation for part 229 is revised to read as follows:

Authority: 45 U.S.C. 22–34, as amended; 45 U.S.C. 431, 438, as amended; 49 app. U.S.C. 1655(e), as amended; Pub. L. 100–342; and 49 CFR 1.49(c), (g), and (m).

PART 230—[AMENDED]

2. Part 230 is amended as follows:

A. The authority citation for part 230 is revised to read as follows:

Authority: 45 U.S.C. 22–34, as amended; 45 U.S.C. 431, 438, as amended; 49 app. U.S.C. 1655(e), as amended; Pub. L. 100–342; and 49 CFR 1.49(c), (g), and (m).

PART 231—[AMENDED]

3. Part 231 is amended as follows:

A. The authority citation for part 231 is revised to read as follows:

Authority: 45 U.S.C. 2, 4, 6, 8, 10, and 11–14, 16, as amended; 45 U.S.C. 431, 438, as amended; 49 app. U.S.C. 1655(e), as amended; Pub. L. 100–342; and 49 CFR 1.49(c), (g), and (m).

B. The first appendix A, which is identified by the citation to its source (53 FR 28602, July 28, 1988) that appears just below it, is removed.

PART 232—[AMENDED]

4. Part 232 is amended as follows:

A. The authority citation for part 232 is revised to read as follows:

Authority: 45 U.S.C. 1, 3, 5, 6, 8–12, and 16, as amended; 45 U.S.C. 431, 438, as amended; 49 app. U.S.C. 1655(e), as amended; Pub. L. 100–342; and 49 CFR 1.49(c), (g), and (m).

Issued in Washington, DC, on December 19, 1991.

Gilbert E. Carmichael,

Federal Railroad Administrator.

BILLING CODE 4910-06-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1033

[Ex Parte No. 334 (Sub-No. 8)]

Joint Petition for Rulemaking on Railroad Car Hire Compensation

AGENCY: Interstate Commerce Commission.

ACTION: Final rule.

SUMMARY: The Commission is adopting a final rule allowing railroads to enter into bilateral agreements concerning car hire terms. This will help to encourage efficient use of freight cars and alleviate problems with the existing car hire system. The text of the final rule is set forth below.

EFFECTIVE DATE: This rule is effective January 25, 1992.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar (202–927–5660) [TDD for hearing impaired: 202–927–5721].

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone (202) 289–4357/4359. [Assistance for the hearing impaired is available through TDD services (202) 927–5721.]

List of Subjects in 49 CFR Part 1033

Railroads.

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

Our action will not have a significant impact on a substantial number of small entities. The change will merely permit rail carriers and car leasing companies to reach car hire agreements among themselves.

Decided: December 18, 1991.

By the Commission, Chairman Philbin, Vice Chairman Emmett, Commissioners Simmons, Phillips, and McDonald.

Sidney L. Strickland, Jr.,

Secretary.

For the reasons set forth in the preamble, title 49, chapter X, part 1033 of the Code of Federal Regulations is revised to read as follows:

PART 1033—CAR SERVICE

Sec.

1033.1 Car hire rates.

Authority: 49 U.S.C. 10321, 10326, 11121, and 11122; 5 U.S.C. 553.

§ 1033.1 Car hire rates.

Car hire agreements. Rail carriers are authorized to negotiate and enter bilateral agreements concerning car hire. Cars subject to such agreements are relieved from adhering to the Commission's car hire prescription.

[FR Doc. 91-30802 Filed 12-24-91; 8:45 am]

BILLING CODE 7035-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Parts 25, 32 and 33

RIN 1018-AA71

Refuge-Specific Hunting Regulations

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The Fish and Wildlife Service (Service) amends certain regulations in 50 CFR parts 32 and 33 that pertain to migratory game bird, upland game, and big game hunting on individual national wildlife refuges. In addition, the Service makes an administrative change only in moving all information collection references to part 25. Refuge hunting programs are reviewed annually to determine whether the regulations governing individual refuge hunts should be modified, deleted or added to. Changing environmental conditions, State and Federal regulations, and other factors affecting wildlife populations and habitats may warrant modifications to ensure the continued compatibility of hunting with the purposes for which the individual refuges involved were established and, to the extent practical, make refuge hunting programs consistent with State regulations.

EFFECTIVE DATE: December 26, 1991.

FOR FURTHER INFORMATION CONTACT: Duncan L. Brown, U.S. Fish and Wildlife Service, Division of Refuges, 1849 C Street, NW., MS 670–ARLSQ, Washington, DC 20240; Telephone (703) 358–2043.

SUPPLEMENTARY INFORMATION: 50 CFR parts 32 and 33 contain provisions governing hunting on national wildlife refuges. Hunting is regulated on refuges to (1) ensure compatibility with refuge purposes, (2) properly manage the wildlife resource, (3) protect other refuge values, and (4) ensure refuge user safety. On many refuges, it is necessary to supplement State regulations with more restrictive Federal regulations to ensure that the Service meets its management responsibilities, as outlined under the section entitled "Conformance with Statutory and Regulatory Authorities." Refuge-specific hunting regulations may be issued only after a wildlife refuge is opened to migratory game bird, upland game, or big game hunting through publication in the **Federal Register**. These regulations may list the wildlife species that may be hunted, seasons, bag limits, methods of hunting, descriptions of open areas, and other provisions. Previously issued refuge-specific regulations for migratory game bird, upland game, and big game hunting are contained in 50 CFR 32.12, 32.22, and 32.32 respectively. Many of the proposed amendments to these sections are being promulgated to standardize and clarify the existing language of these regulations.

The policy of the Department of the Interior is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process.

In the August 28, 1991, issue of the **Federal Register** 56 FR 42018 the Service published a proposed rulemaking to amend certain regulations in 50 CFR parts 32 and 33 and invited public comment. The Service's responses to those comments are contained in the following section.

Responses to Comments Received

Written comments on the proposed rule were received from one party, the Humane Society of the United States.

Issue 1: Hunting is a violation of refuge purposes.

Response: The Refuge Recreation Act of 1962, 16 U.S.C. 460K, as amended, allows for recreational uses (e.g., hunting) when such uses do not interfere with the areas' primary purposes. As regulated in 50 CFR parts 32 and 33, hunting does not interfere with the areas' primary purposes.

Issue 2: There is a lack of data supporting the propriety of changes in hunting programs from the standpoints of compatibility, environmental impact under the National Environmental Policy Act (NEPA), endangered species protection, and determinations of surplus wildlife populations.

Response: The specific refuges proposing any changes in their hunting programs are doing so pursuant to a change in their hunting management plans. Such plans must comply with NEPA protections, be compatible with the purposes for which the refuge was established, and allow for any impact on endangered species as mandated by the Endangered Species Act of 1963, 61 U.S.C. 1531–1543, as amended. Determinations of surplus wildlife populations are routinely done through the respective Regional offices and under the direction of the central office in Washington, DC. There have been no reports of a threatened or endangered species or otherwise compromised species being hunted in the refuges proposing changes in their hunting programs.

Issue 3: The proposed regulations illegally transfer administrative authority to the States.

Response: The proposed regulations govern, along with already promulgated hunting regulations (e.g., migratory bird hunting regulations), the administration of hunting programs on specific refuges. Any area not covered by such regulations will follow State hunting regulations which, by law, are not to circumvent or otherwise usurp Federal protections.

Issue 4: The comment period is inadequate to properly analyze changes in hunting programs.

Response: A thirty-day comment period is Departmental policy, although the Service does take comments at any time concerning its rulemakings. While these comments may not receive responses in the Final Rule, they are accepted and filed for further review when appropriate.

Conformance With Statutory and Regulatory Authorities

The National Wildlife Refuge System Administration Act (NWRSAA) of 1966, as amended (16 U.S.C. 668dd), and the Refuge Recreation Act of 1962 (16 U.S.C. 460k) govern the administration and public use of national wildlife refuges. Specifically, section 49(d)(1)(A) of the NWRSAA authorizes the Secretary of the Interior to permit the use of any area within the Refuge System for any purposes, including but not limited to, hunting, fishing and public recreation.

VOL
56
ISS
248
DE
26
1991
UMI

accommodations, and access, when he determines that such uses are compatible with the major purpose(s) for which the area was established.

The Refuge Recreation Act authorizes the Secretary to administer areas within the Refuge System for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary purpose(s) for which the areas were established. The Refuge Recreation Act also authorizes the Secretary to issue regulations to carry out the purposes of the Act. Hunting plans are developed for each refuge prior to opening it to hunting. In many cases, refuge-specific hunting regulations are included in the hunting plan to ensure the compatibility of the hunting programs with the purposes for which the refuge was established. Initial compliance with the NWRSAA and the Refuge Recreation Act is ensured when hunting plans are developed, and the determinations required by these acts are made prior to the addition of refuges to the lists or areas open to hunting in 50 CFR. Continued compliance is ensured by annual review of hunting programs and regulations.

Economic Effect

Executive Order 12291 requires the preparation of regulatory impact analyses for major rules. A major rule is one likely to result in an annual effect on the economy of $100 million or more; or a major increase in costs or prices for consumers, individual industries, government agencies or geographic regions. The Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) further requires the preparation of flexibility analyses for rules that will have a significant effect on a substantial number of small entities, which include small businesses, organizations or governmental jurisdictions.

These amendments to the codified refuge-specific hunting regulations make relatively minor adjustments to existing hunting programs. The regulations are not expected to have any gross economic effect and will not cause an increase in costs or prices for consumers, individual industries, Federal, State, or local governments, agencies, or geographic regions. The benefits accruing to the public are expected to exceed by a large margin the costs of administering this rule. Accordingly, the Department of the Interior has determined that this rule is not a "major rule" within the meaning of E.O. 12291 and would not have a significant economic effect on a substantial number of small entities within the meaning of the Regulatory Flexibility Act.

Paperwork Reduction Act

The information collection requirements contained in parts 25, 32 and 33 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1018–0014. The information is being collected to assist the Service in administering these programs in accordance with statutory authorities which require that recreational uses be compatible with the primary purposes for which the areas were established. The information requested in the application form is required to obtain a benefit.

The public reporting burden for the application form is estimated to average six (6) minutes per response, including time for reviewing instructions, gathering and maintaining data, and completing the form. Direct comments on the burden estimate or any other aspect of this form to the Service Information Collection Clearance Officer, U.S. Fish and Wildlife Service, 1849 C Street, NW., MS 224 ARLSQ, Washington, DC 20240; and the Office of Management and Budget, Paperwork Reduction Project (1018–0014), Washington, DC 20503.

Environmental Considerations

Compliance with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(C)) and the Endangered Species Act of 1973 (16 U.S.C. 1531–1543) is ensured when hunting plans are developed, and the determinations required by these acts are made prior to the addition of refuges to the lists of areas open to hunting in 50 CFR. Refuge-specific hunting regulations are subject to a categorical exclusion from the NEPA process if they do not significantly alter the existing use of a particular national wildlife refuge. The changes proposed in this rulemaking would not substantially alter the existing uses of the refuges involved. Information regarding hunting permits and the conditions that apply to individual refuge hunts and maps of the hunt areas are available at refuge headquarters or can be obtained from the regional offices of the U.S. Fish and Wildlife Service at the addresses listed below:

Region 1—California, Hawaii, Idaho, Nevada, Oregon, and Washington. Assistant Regional Director, Refuges and Wildlife, U.S. Fish and Wildlife Service, Eastside Federal Complex, Suite 1692, 911 NE 11th Avenue, Portland, Oregon 97232–4181; Telephone (503) 231–6214.

Region 2—Arizona, New Mexico, Oklahoma and Texas. Assistant Regional Director, Refuges and Wildlife, U.S. Fish and Wildlife Service, Box 1306, Albuquerque, New Mexico 87103; Telephone (505) 766–1829.

Region 3—Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio and Wisconsin. Assistant Regional Director, Refuges and Wildlife, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnesota 55111; Telephone (612) 725–3507.

Region 4—Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, Tennessee, South Carolina, Puerto Rico and the Virgin Islands. Assistant Regional Director, Refuges and Wildlife, U.S. Fish and Wildlife Service, Richard B. Russell Federal Building, 75 Spring Street, SW., Atlanta, Georgia 30303; Telephone (404) 331–0833.

Region 5—Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia and West Virginia. Assistant Regional Director, Refuges and Wildlife, U.S. Fish and Wildlife Service, One Gateway Center, suite 700, Newton Corner, Massachusetts 02158; Telephone: (617) 965–9222.

Region 6—Colorado, Kansas, Montana, Nebraska, North Dakota, South Dakota, Utah and Wyoming. Assistant Regional Director, Refuges and Wildlife, U.S. Fish and Wildlife Service, Box 25486, Denver Federal Center, Denver, Colorado 80225; Telephone: (303) 236–8145.

Region 7—Alaska (Hunting on Alaska refuges is in accordance with State regulations. There are no refuge-specific hunting regulations for these refuges). Assistant Regional Director, Refuges and Wildlife, U.S. Fish and Wildlife Service, 1011 E. Tudor Rd., Anchorage, Alaska 99503; Telephone: (907) 786–3538.

List of Subjects

50 CFR Part 25

Administrative practice and procedure, Concessions, Safety, Wildlife refuges.

50 CFR Part 32

Hunting, Reporting and recordkeeping requirements, Wildlife, Wildlife refuges.

50 CFR Part 33

Fishing, Reporting and recordkeeping requirements, Wildlife refuges.

Accordingly, parts 25, 32, and 33 of chapter I of title 50 of the Code of Federal Regulations are amended as set forth below:

PARTS 25, 32 AND 33—[AMENDED]

1. The authority citation for parts 25, 32 and 33 continues to read as follows:

Authority: 5 U.S.C. 301; 16 U.S.C. 460K, 664, 668dd, and 715i.

PART 25—[AMENDED]

2. Part 25 is amended by adding § 25.23 to read as follows:

§ 25.23 General regulations and information collection requirements.

The information collection requirements contained in subchapter C, parts 25, 32 and 33 have been approved by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.* and assigned clearance number 1018–0014. The information is being collected to assist the Service in administering these programs in accordance with statutory authorities which require that recreational uses be compatible with the primary purposes for which the areas were established. The information requested in the application form is required to obtain a benefit. The public reporting burden for the application form is estimated to average six minutes per response, including time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments on the burden estimate or any other aspect of this form to the Information Collection Clearance Officer, U.S. Fish and Wildlife Service, MS 224 ARLSQ, Washington, DC 20240; and the Office of Management and Budget, Paperwork Reduction Project (1018–0014), Washington, DC 20530.

PART 32—[AMENDED]

3. Section 32.2 is amended by adding paragraph (j) to read as follows:

§ 32.2 General provisions.

* * * * *

(j) The use or possession of alcoholic beverages while hunting is prohibited.

4. Section 32.12 is amended by revising paragraphs (f)(3), (i)(4), (p)(2), (p)(4)(iii), (p)(5), (s)(2), (u)(1), (y)(2) heading, (i) and (ii), (hh)(4)(i), (hh)(10)(ii), (hh)(11)(ii), (jj)(2), (qq)(4)(ii) and (v), and (qq)(7)(i) and (iii); and by adding paragraphs (hh)(10)(v), (hh)(11)(viii) and (qq)(4)(viii) to read as follows:

§ 32.12 Refuge-specific regulations; migratory game birds.

* * * * *

(f) *California*—* * *

* * * * *

(3) *Delevan National Wildlife Refuge.* Hunting of geese, ducks, coots, moorhens and snipe is permitted on designated areas of the refuge subject to the following conditions:

(i) Firearms must be unloaded while being transported between parking areas and blind sites.

(ii) Snipe hunting is only permitted in the free roam unit.

(iii) Hunters assigned to the spaced blind unit are restricted to their original blind except for retrieving downed birds, placing decoys, or traveling to and from the parking area.

(iv) Hunters must hunt from assigned blinds except when shooting to retrieve crippled birds.

* * * * *

(i) *Florida*—* * *

* * * * *

(4) *Merritt Island National Wildlife Refuge.* Hunting of ducks and coots is permitted on designated areas of the refuge subject to the following condition: Permits are required.

* * * * *

(p) *Louisiana*—* * *

* * * * *

(2) *Boque Chitto National Wildlife Refuge.* Hunting of ducks, geese, coots, and woodcock is permitted on designated areas of the refuge subject to the following condition: Permits are required.

* * * * *

(4) *Delta National Wildlife Refuge.*

* * *

* * * * *

(iii) Camping is permitted in designated areas only.

* * * * *

(5) *Lacassine National Wildlife Refuge.* Hunting of geese, ducks, and coots is permitted on designated areas of the refuge subject to the following condition: Permits are required.

* * * * *

(s) *Michigan*—* * *

(2) *Shiawassee National Wildlife Refuge.* Hunting of geese, ducks, and coots is permitted on designated areas of the refuge subject to the following conditions:

(i) Permits are required.

(ii) Duck and coot hunting is permitted only in Pool 4 and associated marshes.

(iii) Goose hunting in designated cropland fields and areas of the Shiawassee River is permitted until 12 noon with a required check out time of 1 p.m.

* * * * *

(u) *Mississippi*—(1) *Boque Chitto National Wildlife Refuge.* Hunting of ducks, geese, coots, and woodcock is permitted on designated areas of the refuge subject to the following condition: Permits are required.

* * * * *

(y) *Nevada*—* * *

(2) *Pahranagat National Wildlife Refuge.* * * *

(i) Only nonmotorized boats or other motorless flotation devices are permitted on the refuge hunting area during the migratory waterfowl hunting season.

(ii) Hunting of waterfowl, coots, moorhens, and snipe is permitted only on the opening day of the season and alternate days throughout the remainder of the season.

* * * * *

(hh) *Oregon*— * * *

* * * * *

(4) *Cold Springs National Wildlife Refuge.* * * *

(i) Hunting is permitted only on Wednesdays, Saturdays, Sundays, Thanksgiving Day, Christmas Day, and New Years Day.

* * * * *

(10) *Mckay Creek National Wildlife Refuge.* * * *

* * * * *

(ii) Hunting is permitted only on Wednesdays, Saturdays, Sundays, Thanksgiving Day, Christmas Day, and New Years Day.

* * * * *

(v) The refuge may not be entered before 5 a.m.

(11) *Umatilla National Wildlife Refuge.* * * *

* * * * *

(ii) In the McCormack Unit, hunting is permitted only on Wednesdays, Saturdays, Sundays, Thanksgiving Day, and New Years Day.

* * * * *

(viii) Decoys, boats, and other personal property may not be left on the refuge overnight.

* * * * *

(jj) *South Carolina*— * * *

(2) *Carolina Sandhills National Wildlife Refuge.* Hunting of mourning doves and woodcock is permitted on designated areas of the refuge subject to the following condition: Permits are required.

* * * * *

(qq) *Washington*— * * *

* * * * *

VOL 56 ISS 248 DEC 26 1991 UMI

(4) *McNary National Wildlife Refuge.* * * *

* * * * *

(ii) In the McNary Division, hunting is permitted only on Wednesdays, Saturdays, Sundays, Thanksgiving Day, Christmas Day, and New Years Day.

* * * * *

(v) Hunters may not enter or be on the refuge between one hour after sunset and 5 a.m. or leave decoys, boats, and other personal property on the refuge overnight.

* * * * *

(viii) On Youth Hunt Day only youth aged 10 through 17 accompanied by an adult 18 or older may hunt.

* * * * *

(7) *Umatilla National Wildlife Refuge.* * *

(i) In the Paterson Slough Unit, hunting is permitted only on Wednesdays, Saturdays, Sundays, Thanksgiving Day, Christmas Day, and New Years Day.

* * * * *

(ii) The refuge, including parking sites, is closed from 10 p.m. to 5 a.m. Decoys, boats, and other personal property may not be left on the refuge overnight.

* * * * *

5. Section 32.22 is amended by revising paragraphs (e)(2), (e)(4)(i), (e)(10)(i), (p), (q)(2), (v)(1), (dd)(1), (ff)(1)(i) and (iii); (ff)(6) (ii) and (iv), (ff)(8)(ii), (hh)(2), (jj)(4), (nn)(3) and (nn)(5)(ii); and adding paragraph (q)(5)(iv) to read as follows:

§ 32.22 Refuge-specific regulations; upland game.

* * * * *

(e) *California*— * * *

(2) *Develan National Wildlife Refuge.* Hunting of pheasant is permitted only in the free room areas of the refuge subject to the following condition: A special one-day pheasant hunt is permitted in the spaced blind unit on the first Monday after the opening of the State pheasant hunting season.

Proposed Rules

Federal Register
Vol. 56, No. 248
Thursday, December 26, 1991

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1032

[DA-91-022]

Milk in the Southern Illinois—Eastern Missouri Marketing Area; Proposed Suspension of Certain Provisions of the Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed suspension of rule.

SUMMARY: This action invites written comments on a proposal to suspend certain provisions of the Southern Illinois—Eastern Missouri Federal milk marketing order for the months of December 1991 and January 1992. The proposed suspension would reduce the shipping standard for pool supply plants operated by cooperative associations. The action was requested by Prairie Farms Dairy, Inc. (Prairie Farms), a cooperative association that operates supply plants and represents producers who supply the market. Prairie Farms contends that the action is necessary to reflect a reduced need for shipments of milk from supply plants to distributing plants.

DATES: Comments are due no later than January 2, 1992.

ADDRESSES: Comments (two copies) should be sent to USDA/AMS/Dairy Division, Order Formulation Branch, room 2968, South Building, P.O. Box 6456, Washington, DC 20090–6456.

FOR FURTHER INFORMATION CONTACT: John F. Borovies, Marketing Specialist, USDA/AMS/Dairy Division, Order Formulation Branch, room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456 (202) 690–1366.

SUPPLEMENTARY INFORMATION: The Regulatory Flexibility Act (5 U.S.C. 601–612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action would not have a significant economic impact on a substantial number of small entities. Such action would lessen the regulatory impact of the order on certain milk handlers and would tend to ensure that dairy farmers would continue to have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This proposed rule has been reviewed by the Department in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

Notice is hereby given that, pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), the suspension of the following provisions of the order regulating the handling of milk in the Southern Illinois—Eastern Missouri marketing area is being considered for the months of December 1991 and January 1992:

In § 1032.7(b), the words "and at least 75 percent of the total producer milk marketed in that 12-month period by such cooperative association was delivered", and the words "and physically received at".

All persons who want to submit written data, views or arguments about the proposed suspension should send two copies of their views to USDA/AMS/Dairy Division, Order Formulation Branch, room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456 by the 7th day after publication of this notice in the **Federal Register**. The period for filing comments is limited to seven days because a longer period would not provide the time needed to complete the required procedures and include December in the suspension period.

All written submissions made pursuant to this notice will be made available for public inspection in the Dairy Division during regular business hours (7 CFR 1.27(b)).

Statement of Consideration

The proposed suspension would suspend certain provisions of the order for the months of December 1991 and January 1992. The action would reduce the shipping standard for pool supply plants operated by cooperative associations.

Currently the order provides that a supply plant must ship at least 40 percent of its receipts of milk to distributing plants during December, and 50 percent in other months, to be a pool plant under the order. A supply plant that meets the pooling standard during each of the months of September through January is a pool plant during each of the months of February through August. Also, the order provides a monthly shipping standard of 25 percent for a supply plant operated by a cooperative association if at least 75 percent of the cooperatives total milk supply during the preceding months of September through August is received at distributing plants. The proposed suspension would result in reducing the shipping standard for a cooperative association supply plant to 25 percent of receipts during December 1991 and January 1992.

This action was requested by Prairie Farms Dairy, Inc. (Prairie Farms), a cooperative association that operates supply plants under the order and represents producers who supply the market. Prairie Farms contends that the action is necessary because of a reduced need for shipments of milk from supply plants to furnish the fluid milk requirements of distributing plants.

Prairie Farms indicates that the reduction of the fluid milk requirements for the market is a result of the recent loss of two customers to competitors regulated under other Federal orders and the sluggish sales in the area due to layoffs in major defense, tire, and heavy equipment manufacturing firms. Consequently, Prairie Farms contends that the suspension is necessary to reduce the shipping standard to 25 percent of receipts for cooperative associations during December 1991 and January 1992. Absent a suspension, Prairie Farms contends that costly and inefficient movements of milk would have to be made to pool its supply plants and the milk of its producers who have historically supplied the market.

RIN 0581–AA50

Pecan Promotion and Research Plan

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Department proposes to issue a plan establishing a national industry-funded pecan promotion, research, and industry and consumer information program. A national pecan industry organization requested the issuance of such a plan and submitted a proposed plan in response to an invitation to submit proposals. The proposed plan would require pecan growers and importers to pay an assessment which would be used in a national program of pecan promotion, research, and industry and consumer information. No interest was expressed in holding a public meeting to discuss the proposal, so none will be held.

DATES: Comments must be received by January 27, 1992.

ADDRESSES: Interested persons are invited to submit written comments concerning this proposal to: Docket Clerk, Research and Promotion Branch, Fruit and Vegetable Division, Agricultural Marketing Service, USDA, P.O. Box 96456, room 2533–S, Washington, DC 20090–6456. Three copies of all written material should be submitted, and they will be made available for public inspection at the Office of the Docket Clerk during regular business hours. All comments should reference the docket number and the date and page number of this issue of the **Federal Register**. Comments concerning the information collection requirements contained in this action should also be sent to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, Attn: Desk Officer for the Agricultural Marketing Service, USDA .

FOR FURTHER INFORMATION CONTACT: Jim Wendland, Research and Promotion Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2533–S, Washington, DC 20090–6456, telephone (202) 720–9916.

SUPPLEMENTARY INFORMATION: This proposed plan is authorized under the Pecan Promotion and Research Act of 1990 (Subtitle A of title XIX of the Food, Agriculture, Conservation, and Trade Act of 1990; Pub. L. 101–624) approved November 28, 1990, hereinafter referred to as the Act.

This proposal has been reviewed by the U.S. Department of Agriculture (Department) in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

Regulatory Flexibility Act

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this proposed action on small entities.

The most recent available census of agricultural producers indicates that over 21,000 farms in the United States reported having pecan trees. The majority of these producers would be subject to the proposed plan and be classified as small businesses. Producers or growers engaged in the production and sale of pecans would be subject to being assessed under this proposal. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $500,000, and small agricultural service firms, which include pecan handlers and importers, have been defined as those having annual receipts of less than $3,500,000. Also, there are approximately 2,000 pecan handlers, 115 shellers and 10 importers of pecans who would be subject to the provisions of this proposed plan, the majority of whom would also be classified as small entities.

The proposed plan would require each pecan grower and importer to pay an assessment not to exceed $0.02 per pound of inshell pecans. First handlers of pecans, virtually all of whom would be classified as small firms, would be required to collect and remit the assessments. Although the maximum assessment collection is expected to total about $6 million annually, the economic impact of a two cent or less assessment per pound on each grower or importer would not be significant

While the proposed plan imposes certain recordkeeping requirements on first handlers, importers, grower-shellers, and growers, information required under the proposed plan could be compiled from records currently maintained. Thus, any added burden resulting from increased recordkeeping would not be significant when compared to the benefits that should accrue to such businesses. The plan's provisions were carefully reviewed and effort was made to minimize any unnecessary costs or requirements.

Although the plan could impose some additional costs and requirements on first handlers, importers, and some growers who are their own first handlers, it is anticipated that the program under the proposed plan would help to increase the demand for pecans. Therefore, any additional costs should be offset by the benefits derived from expanded markets and sales benefiting growers, importers, and first handlers alike. Accordingly, the Administrator of the AMS has determined that the proposed provisions of the plan would not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. chapter 35) the forms, reporting, and recordkeeping requirements included in this action have been approved by the Office of Management and Budget (OMB) and were assigned OMB No. 0581–0093, except for Board member nominee information sheets that were previously assigned OMB No. 0505–0001. This action sets forth the provisions of a proposed plan to establish a nation-wide program for pecan promotion, research, and information to be funded by pecan growers and importers. Information collection requirements that are included in this proposal include:

(1) A periodic report by each first handler and importer who handles or imports pecans. The estimated maximum number of respondents is 2,010, each submitting an average of 5 responses per year, with an estimated average reporting burden of one-half hour per response. However, these persons may alternatively prepay assessments annually, requiring only an initial report of anticipated assessments and a final annual report of actual handling;

(2) A refund application form for persons who desire a refund of their assessments. The estimated maximum number of respondents is 1,000 each submitting 2 responses per year, with an estimated average reporting burden of .10 an hour per response;

(3) An exemption application for growers, handlers and importers of pecans for non-food uses to be exempt from assessments and recordkeeping requirements. The estimated number of respondents for this form is 5, each

VOL 56 ISS 248 DEC 26 1991 UMI

submitting one response per year, with an estimated average burden of .083 hour per response;

(4) A referendum ballot to be used in 1994 and periodically thereafter to indicate whether growers and importers favor continuance of the plan. The estimated maximum number of respondents for this form is an annual average of 4,400, with an estimated average reporting burden of .10 an hour per response;

(5) A nominee background statement form for Board member and alternate member nominees. The estimated number of respondents for this form is 60 during the first year of plan operations and approximately 20 annually thereafter. Each respondent would submit one response per year, with an estimated average reporting burden of .10 an hour per response; and

(6) A requirement to maintain records sufficient to verify reports submitted under the plan. The estimated maximum number of recordkeepers necessary to comply with the requirement is 2,010, each of whom would have an estimated annual burden of .12 hour.

Comments concerning the information collection requirements contained in this action should also be sent to the Office of Information and Regulatory Affairs; Office of Management and Budget; Washington, DC 20503. Attention: Desk Officer for Agricultural Marketing Service, USDA.

Background

The Act authorizes the Secretary of Agriculture (Secretary) to establish a national pecan promotion, research, and information program. The program would be funded by an assessment on growers and importers not to exceed two cents per pound of inshell pecans.

The Act provides for the submission of proposals for a pecan promotion, research, and information plan by industry organizations or any other interested person. The Act requires that such plan provide for the establishment of a Pecan Marketing Board. The Board would be composed of 15 voting members, including 8 growers, 4 shellers, 1 first handler, 1 importer and 1 public member, with an alternate for each member.

The Department published an invitation in the January 30, 1991, issue of the Federal Register (56 FR 3425) to submit proposals for an initial plan and in the July 3, 1991, issue (56 FR 30517) extended the submission period for proposals to July 10, 1991.

In response to the invitation to submit proposed plans, one letter supporting such a program was received from Oakhurst Ranch, Lindale, Texas; a proposal requesting $600,000 to establish a Pecan Center was received from Mr. James Crump with the Seguin, Texas, Chamber of Commerce; and one proposed plan was received from the Federated Pecan Growers' Associations of the United States (Federated), with unanimous support by all of its State and regional pecan grower associations and the National Pecan Shellers and Processors Association for the proposed plan.

The Department is publishing Federated's proposed plan, with some modification of proposed provisions, including changes to make it consistent with the Act and other similar national research and promotion programs administered by the Department. These modifications include a revision of Federated's proposal that § 1211.30 specify that grower and sheller Board members nominate the first handler member and alternate. This is contrary to section 1910(b)(8)(B) of the Act which requires the "Growers shall be eligible to vote for the nomination of the first handler members of the Board." Also, Federated's proposal specifies that half or less of the total amount of domestic assessments could be spent on the development and expansion of pecan sales in foreign markets. However, section 1911(g) of the Act does not specify any limit. Therefore, the amount of money expended for the development of foreign markets would be determined through the budget process in the same manner as other expenditures. Further, Federated's proposal sets the initial assessment rate as one-half cent per pound for in-shell pecans. However, section 1912(d) of the Act specifies that the assessment rate shall be recommended by the Board and approved by the Secretary, except that the maximum rate shall not exceed one-half cent per pound for in-shell pecans until the date the initial referendum is conducted under section 1916(a).

The Department will consider all written comments received by the deadline, before issuing a final plan.

The proposed plan is summarized as follows:

Sections 1211.1–1211.29 of the proposed plan define certain terms which are used in the plan. Sections 1211.30–1211.39 include provisions relating to the establishment, membership, nomination, appointment, term of office, procedure, reimbursement, powers and duties of the Pecan Marketing Board, which would be the body organized to administer the plan subject to the oversight of the Secretary of Agriculture. Sections 1211.40–1211.42 concern promotion, research and contracts. Section 1211.50 would authorize the Board to incur expenses necessary for the performance of its duties and to recommend an annual budget. Sections 1211.51–1211.56 would authorize the collection of assessments, specify who pays them and how, set forth procedures for the handling of a one-time refund, and for establishing an operating monetary reserve. The initial maximum assessment rate would be one-half cent per pound of in-shell pecans produced domestically or imported into the United States. After the initial continuance referendum, the rate would be a maximum of two cents per pound for in-shell pecans. The assessment sections also outline the procedures to be followed by first handlers and importers for remitting assessments; establish a 10 percent late payment charge and also a one and one-half percent per month interest change for unpaid or late assessments; and provide for refunds of assessments paid if the initial continuance referendum fails.

Sections 1211.60–1211.62 concern reporting and recordkeeping requirements for persons subject to the plan.

Sections 1211.70–1211.78 are miscellaneous provisions including the right of the Secretary; personal liability of Board members and employees; influencing governmental actions; termination of the plan; separability of plan provisions; handling of intellectual property, such as patents, arising from funds collected by the Board; amendments to the plan; and OMB control numbers.

List of Subjects in 7 CFR Part 1211

Administrative practice and procedure, Advertising, Agricultural research, Imports, Marketing agreements, Pecans, Promotion, Reporting and recordkeeping requirements.

The proposal, set forth below, has not received the approval of the Secretary of Agriculture.

It is hereby proposed that title 7 of the Code of Federal Regulations be amended by adding part 1211 to read as follows:

Authority: The Pecan Promotion and Research Act of 1990; 7 U.S.C. 6001 *et seq.*

Definitions

§ 1211.1 Secretary.

Secretary means the Secretary of Agriculture of the United States or any officer or employee of the Department to whom authority has heretofore been delegated, or to whom authority may hereafter be delegated, to act in the Secretary's stead.

§ 1211.2 Act.

Act means the Pecan Promotion and Research Act of 1990. (title XIX, subtitle A of Public Law 101–624, 7 U.S.C. 6001, *et seq.*, 104 Stat. 3838–3854), and any amendments thereto.

§ 1211.3 Board.

Board means the administrative body referred to as the Pecan Marketing Board, established pursuant to § 1211.30.

§ 1211.4 Pecan.

Pecan means the nut of the pecan tree *Carya illinoensis*.

§ 1211.5 Shell.

Shell means to remove the shell from an in-shell pecan.

§ 1211.6 Shelled pecan.

Shelled pecan means a pecan kernel, or portion of a kernel, after the pecan shall has been removed.

§ 1211.7 In-shell pecan.

In-shell pecan means a pecan that has a shell that has not been removed.

§ 1211.8 Person.

Person means any individual, group of individuals, partnership, association, corporation, cooperative, or any other entity.

§ 1211.9 Grower.

Grower means any person engaged in the production and sale of pecans in the United States who owns, or who shares in the ownership and risk of loss of, such pecans.

§ 1211.10 Importer.

Importer means any person who imports pecans from outside of the United States for sale in the United States.

§ 1211.11 First handler.

First handler means the first person who buys or takes possession of pecans from a grower for marketing. If a grower markets pecans directly to consumers, such grower shall be considered the first handler with respect to such pecans.

§ 1211.12 Grower-sheller.

Grower-sheller means a person who:

(a) Shells pecans, or has pecans shelled for such person, in the United States; and

(b) During the immediately preceding year, grew 50 percent or more of the pecans such person shelled or had shelled for such person.

§ 1211.13 Sheller.

Sheller means any person who:

(a) Shells pecans or has pecans shelled for the account of such person; and

(b) During the immediately preceding year, purchased more than 50 percent of the pecans such person shelled or had shelled for such account.

§ 1211.14 Handle.

Handle means receipt of in-shell pecans by a sheller or first handler, including pecans produced by such sheller or first handler.

§ 1211.15 Commerce.

Commerce means interstate, foreign, or intrastate commerce.

§ 1211.16 Conflict of interest.

Conflict of interest means a situation in which a Board member has direct or indirect financial interest in a corporation, partnership, sole proprietorship, joint venture or other business entity dealing directly or indirectly with the Board.

§ 1211.17 Consumer and industry information.

(A) *Consumer information* means information and programs that will assist consumers and other persons in making evaluations and decisions regarding the purchase, preparation, and use of pecans.

(b) *Industry information* means information and programs that will lead to the development of new markets and marketing strategies, increased efficiency, and activities to enhance the image of the pecan industry.

§ 1211.18 Customs Service.

Customs Service means the U.S. Customs Service of the United States Department of Treasury.

§ 1211.19. Department.

Department means the United States Department of Agriculture.

§ 1211.20 To market.

To market means to sell or offer to dispose of pecans in any channel of commerce.

§ 1211.21 Marketing year of fiscal period.

Marketing year or *fiscal period* mean the twelve-month period from October 1 through September 30 each year, or such

VOL 56 ISS 248 DEC 26 1991 UMI

other period as recommended by the Board and approved by the Secretary.

§ 1211.22 Programs and projects.

Programs and *projects* mean those research, development, advertising, or promotion projects developed by the Board pursuant to § 1211.41 of this part.

§ 1211.23 Promotion.

Promotion means any action taken by the Board, pursuant to this part, to present a favorable image of pecans to the public with the express intent of improving the competitive position of pecans in the marketplace and stimulating sales of pecans, including paid advertising.

§ 1211.24 Referendum.

Referendum means the referendum to be conducted by the Secretary pursuant to § 1916 of the Act whereby growers, grower-shellers, and importers shall be given the opportunity to vote to determine whether a majority of the growers, grower-shellers, and importers voting in the referendum, favor continuation, termination, or suspension of this plan.

§ 1211.25 Research.

Research means any type of test, study, or analysis designed to advance the image, desirability, usage, marketability, production, product development, or quality of pecans.

§ 1211.26 State and United States.

(a) *State* means any of the several States, the District of Columbia and the Commonwealth of Puerto Rico.

(b) *United States* means collectively the several States of the United States of America, the District of Columbia, and the Commonwealth of Puerto Rico.

§ 1211.27 District.

District means a geographical area of the United States, as recommended by the Board and approved by the Secretary, in which there is produced approximately one-fourth of the volume of pecans produced in the United States.

§ 1211.28 Plan.

Plan means this Pecan Promotion and Research Plan issued by the Secretary pursuant to section 1908 of the Act.

§ 1211.29 Processor.

Processor means an individual, corporation or entity which starts a series of progressive and independent steps using pecans by which an end product is obtained for final consumer consumption or sale, such as a bakery, ice cream manufacturer or cookie maker.

Pecan Marketing Board

§ 1211.30 Establishment and membership.

(a) There is hereby established a Pecan Marketing Board, hereinafter called the Board. The Board shall consist of fifteen (15) members to administer the terms and provisions of this part. Eight members shall be pecan growers, not exempt from paying assessments under the Act; four members shall be pecan shellers; one member shall be a first handler; one member shall be a pecan importer, not exempt from paying assessments under the Act; and one member shall be a public member. Each member shall have an alternate who shall have the same qualifications as the member for whom such person is an alternate. At the option of the Board, one consultant or advisor representing the views of pecan growers in a country other than the United States may be chosen to attend Board functions as a nonvoting member.

(b) Membership on the Board shall be determined as follows: Two grower members shall represent each of the four districts; two sheller members shall represent shellers whose place of residence is east of the Mississippi River and two sheller members shall represent shellers whose place of residence is west of the Mississippi River; the first handler member shall be selected from among eligible first handlers whose place of residence is in any one of the four districts and derives over 50 percent of such handlers' gross pecan income from buying and selling pecans; one importer member shall be an individual who import pecans into the United States; and the public member shall have no direct financial interest in the commercial production or marketing of pecans except as a consumer and shall not be a director, stockholder, officer or employee of any firm so engaged.

§ 1211.31 Districts.

(a) Districts shall have approximately equal production volume according to the most recent three years' U.S. Department of Agriculture production reports. For the purpose of facilitating initial nominations to the Board, the following districts shall be the initial districts:

District 1—The States of Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, West Texas (West of Highway 277 from Del Rio to Stamford and Highway 6 from Stamford to Quanah and the Oklahoma line), Utah, Washington, and Wyoming.

District 2—The States of Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, Oklahoma, South Dakota, East Texas (East of Highway 277 from Del Rio to Stamford and Highway 6 from Stamford to Quanah and the Oklahoma line) and Wisconsin.

District 3—The States of Alabama, Arkansas, Connecticut, Illinois, Indiana, Kentucky, Louisiana, Maine, Massachusetts, Michigan, Mississippi, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Tennessee, Vermont, and West Virginia.

District 4—The States of Delaware, Florida, Georgia, Maryland, North Carolina, South Carolina, Virginia, the District of Columbia, and the Commonwealth of Puerto Rico.

(b) At least once every three years and not more than once each two years, the Board shall review the geographic distribution of pecan production throughout the United States to determine whether realignment of the districts is necessary. In making such review, it shall give consideration to:

(1) The most recent four years of U.S. Department of Agriculture production reports or Board assessment reports if USDA production reports are unavailable, and such other acceptable sources as determined by the Board;

(2) Shifts and trends in quantities of pecans produced; and

(3) Other relevant factors.

As a result of this review, the Board may recommend realigning the districts subject to the approval of the Secretary. Any such realignment shall be recommended by the Board to the Secretary at least six months prior to the date of the call for nominations and shall become effective at least 30 days prior to such date.

§ 1211.32 Nominations and selection.

The Secretary shall appoint the grower and sheller members and their alternates from nominations to be made in the following manner:

(a) Except for initial Board members whose nomination process shall be conducted by the Secretary, the Board shall issue a call for nominations by January 10th of each year in which an election is to be held, or such other date as approved by the Secretary. The call shall include at a minimum the following information:

(1) A list of the vacancies for which nominations may be submitted and the qualifications for each position;

(2) The date by which the nominees shall be submitted to the Secretary for consideration to be in compliance with paragraph (f) of this section;

(3) A list of those States, by district, or organizations entitled to participate in the nomination process; and,

(4) The date, time, and location of any next scheduled meeting of the Board, national and State grower or sheller associations, and district conventions if any.

(b) Nominations for grower and alternate grower member positions that will become vacant shall be made by district convention in the district entitled to nominate. The following requirements shall apply:

(1) Notice of such convention shall be publicized by the Board to all growers within such district, and to the Secretary, at least ten days prior to said event. The notice shall have attached to it the call for nominations from the Board. Current Board grower members, supported by the Board and its staff, shall be responsible for convening and publicizing district conventions in their respective districts, except for the initial convention, which shall be called and conducted by a representative of the Secretary.

(2) All growers within the district may participate in the convention: *Provided*, That if a grower is engaged in the production of pecans in more than one State or district, the grower shall participate within the State or district in which the grower so elects in writing to the Board and such election shall remain controlling until revoked in writing to the Board.

(3) The district convention shall conduct the nomination process for the nominees in accordance with procedures prescribed by the Department.

(4) There shall be no more than one member from any State in a district, except that the State of Georgia may have two growers from such State representing District 4.

(5) Each grower present shall have one vote for each grower position to be filled in that District.

(c) Nominations for sheller and sheller alternate positions that will become vacant shall be made by any sheller organization(s) recommended by the Board and approved by the Secretary. The following requirements shall apply:

(1) Notice of any such organization's nomination meeting shall be publicized to all shellers within the area (east or west of the Mississippi River), where one or more vacancies exist, and the Secretary, at least ten days prior to said event. The notice shall have attached to it the call for nominations from the Board. Current sheller members on the Board, supported by the Board and its staff, shall be responsible for arranging for and publicizing the meeting.

(2) All shellers within the area may participate in the nominations meeting: *Provided*, That if a sheller has shelling operations on both sides of the Mississippi River, the sheller shall participate within the area in which the sheller so elects in writing to the Board and such election shall remain controlling until revoked in writing to the Board.

(3) The sheller organization(s) shall conduct the nomination process for the nominees in accordance with procedures prescribed by the Department.

(4) Each sheller present shall have one vote for each sheller position to be filled in the applicable area (east or west of the Mississippi River).

(d) The Board shall nominate the importer member and the public member and their respective alternates. Growers shall nominate the first handler member and alternate. All shall be nominated in such manner as may be prescribed by the Secretary.

(e) There shall be two individuals nominated for each vacant position. Each nominee shall meet the qualifications set forth in the call.

(f) Except for the establishment of the initial Board, the nominations shall be certified by the Board and submitted to the Secretary no later than May 1 preceding the commencement of the term of office for Board membership, or such other date as approved by the Secretary.

(g) The Secretary may reject any nominee submitted. If there are insufficient nominees from which to appoint members to the Board as a result of the Secretary's rejecting such nominees, additional nominees shall be submitted to the Secretary in the same manner.

§ 1211.33 Term of office.

(a) The term of office of Board members and their alternates shall be three years, except that the members and alternates of the initial Board shall serve terms as follows: The two growers and their alternates from each of Districts 1 and 4, and the public member and alternate shall serve one-year initial terms; two growers and their alternates from District 3, two shellers and their alternates from east of the Mississippi River and the importer member and alternate shall serve two-year initial terms; and the two growers and their alternates from District 2, two shellers and their alternates from west of the Mississippi River, and the first handler member and alternate shall serve three-year initial terms.

(b) The term of office for the initial Board shall begin immediately following appointment by the Secretary. Time in the interim period, from appointment until the term begins pursuant to this section, shall not count towards the initial term of office. In subsequent years, the term of office shall begin on October 1 or such other period which may be approved by the Secretary.

(c) Board members and alternates shall serve during the term of office for which they are selected and have qualified, and until their successors are selected and have qualified.

(d) No member or alternate shall serve more than two successive terms: except that those members and alternates serving initial terms of one year may serve two full succeeding three-year terms following the one-year initial term.

§ 1211.34 Acceptance.

Each person nominated for membership on the Board shall qualify by filing a written acceptance with the Secretary. Such written acceptance shall accompany the nominations list required by § 1211.32 of this part.

§ 1211.35 Vacancies.

(a) In the event any member of the Board ceases to be a member of the category of members from which the member was appointed to the Board, such position shall automatically become vacant.

(b) If a member of the Board consistently refuses to perform the duties of a member of the Board, or if a member of the Board engages in acts of dishonesty or willful misconduct, the Board may recommend to the Secretary that the member be removed from office. If the Secretary finds the recommendation of the Board shows adequate cause, the Secretary shall remove such member from office. Further, without recommendation of the Board, a member may be removed by the Secretary upon showing of adequate cause, if the Secretary determines that the person's continuing services would be detrimental to the purposes of the Act.

(c) To fill any vacancy caused by the failure of any person selected as a member of the Board to qualify, or in the event of the death, removal, resignation, or disqualification of any member, the alternate of that member shall automatically assume the position of said member. A replacement for said alternate shall be nominated and selected in the manner specified in § 1211.32 of this part. Should the positions of both a member and such member's alternate become vacant, successors for the unexpired terms of such member and alternate shall be nominated and selected in the manner qualified in § 1211.32 of this part.

VOL
56
ISS
248
DE
26
1991
UMI

Nomination and replacement shall not be required for any vacancy where the unexpired term of office is less than six months. In the event of failure to provide nominees for such vacancies the Secretary may appoint other eligible persons.

§ 1211.38 Procedure.

(a) Eight Board members, including alternates acting in place of members of the Board, shall constitute a quorum: *Provided*, That such alternates shall serve only when the member is absent from a meeting or is disqualified. Any action of the Board shall require the concurring votes of a majority of those present and voting. At assembled meetings, all votes shall be cast in person.

(b) In lieu of voting at a properly convened meeting, and when in the opinion of the chairperson of the Board such action is considered necessary, and for matters of an emergency nature when there is not enough time to call an assembled meeting, the Board may act upon a majority of concurring votes of its members cast by mail, telegraph, telephone, facsimile, or by other means of communication: *Provided*, That each member or alternate acting for a member receives an accurate, full, and substantially identical explanation of each proposition. Telephone votes shall be promptly confirmed in writing. All votes shall be recorded in the Board minutes.

§ 1211.37 Compensation and reimbursement.

Board members shall serve without compensation but shall be reimbursed for reasonable and necessary expenses incurred by them only in the performance of their Board duties under this subpart.

§ 1211.36 Powers.

The Board shall have the following powers:

(a) To administer the provisions of this Plan in accordance with its terms and conditions;

(b) To recommend to the Secretary rules and regulations to effectuate the terms and conditions of this Plan;

(c) To receive, investigate, and report to the Secretary complaints of violations of this Plan;

(d) To recommend to the Secretary amendments to this Plan; and

(e) With the approval of the Secretary, to invest in risk-free, short term, interest-bearing accounts, pending disbursement pursuant to a program or project, funds collected through assessments authorized under § 1211.51 of this part. The investment can only be in obligations of the United States or any agency thereof, in any interest-bearing account or certificate of deposit of a bank that is a member of the Federal Reserve System, or in obligations fully guaranteed as to principal and interest by the United States. Income from any such invested funds may be used for any purpose for which the invested funds may be used.

§ 1211.39 Duties.

The Board shall, among other things, have the following duties:

(a) To meet not less than annually, organize, and select from among its members, a chairperson and such other officers as may be necessary; to select committees and subcommittees of Board members; to recommend for Department approval such rules and bylaws for the conduct of Board business as it may deem advisable; and it may establish special working committees that may include persons other than Board members, and reimburse the necessary and reasonable expenses and fees of such persons serving on such committees;

(b) To employ such individuals as it may deem necessary and to determine the compensation and define the duties of each; and to protect the handling of Board funds through fidelity bonds or any other form of bonding permitted by statute and/or approved by the Secretary;

(c) To prepare and submit for the Secretary's approval, at least 60 days prior to the beginning of each fiscal period, a recommended rate of assessment and a fiscal period budget of the anticipated income and expenses for the administration of this Plan, including the projected costs of all programs and projects;

(d) To develop programs and projects, which must be approved by the Secretary before becoming effective, and enter into contracts or agreements, with the approval of the Secretary, for the development and carrying out of programs or projects of research, promotion or information. The cost of such programs and projects will be paid with funds collected pursuant to this Plan;

(e) To keep minutes, books, and records which clearly reflect all of the acts and transactions of the Board. Minutes of all meetings shall be promptly provided to the Secretary;

(f) To appoint and convene, from time to time, working committees drawn from growers, grower-shellers, first handlers, shellers, importers, and the public to assist in the development of research, promotion, industry information, and consumer information programs for pecans;

(g) To establish an interest bearing escrow account with a bank which is a member of the Federal Reserve System and to deposit into such account an amount equal to the product obtained by multiplying the total amount of assessments collected by the Board during the period prior to the initial referendum by 10 percent. If continuance of the Plan is favored by a majority voting in the initial referendum conducted under the Act, all funds in the escrow account shall be returned to the Board for use by the Board;

(h) To prepare and submit to the Secretary such reports as may be prescribed for appropriate accounting with respect to the receipt and disbursement of funds entrusted to the Board monthly, or at such times as prescribed by the Secretary. Monthly financial statements shall be submitted to the Department and shall include at least:

(1) A balance sheet, and

(2) An expense budget comparison showing expenditures during the month, year-to-date expenditures, and an unexpended budget. Upon request, a summary of checks issued by the Board is to be made available. Reports shall be submitted within 30 days after the end of each month.

(i) To cause the books of the Board to be audited by an independent certified public accountant at the end of each fiscal period, and at such other times as the Board or the Secretary may deem necessary. The report of such audit shall show the receipt and expenditure of funds collected pursuant to this part.

(j) To investigate violations of the Plan and report the results of such investigations to the Secretary for appropriate action to enforce the provisions of this Plan;

(k) To periodically prepare, make public, and make available to growers, grower-shellers, shellers, first handlers, importers, and the Secretary, reports of its activities, including an annual report which should be submitted to the Secretary within 90 days after the end of the fiscal period.

(l) To give the Secretary the same notification, written or oral, as provided to Board members concerning all conference calls and meetings, including executive, advisory, subcommittee, and other meetings related to Board matters, and to grant the Secretary access to all such calls and meetings;

(m) To act as intermediary between the Secretary and any grower, grower-sheller, sheller, first handler, or importer;

(n) To furnish the Secretary such information as the Secretary may request;

(o) To notify pecan growers, grower-shellers, shellers, first handlers, and importers of all Board meetings through press releases or other means;

(p) To develop and recommend such rules and regulations to the Secretary for approval as may be necessary for the development and execution of programs or projects to effectuate the declared purpose of the Act; and

(q) To follow the Department's equal opportunity/civil rights policies.

Research and Promotion

§ 1211.40 Policy and objective.

It shall be the policy of the Board to carry out an effective, continuous, and coordinated program of pecan promotion, research, and industry and consumer information in order to:

(a) Strengthen pecans' competitive position in the marketplace;

(b) Maintain and expand existing domestic and foreign markets and uses for pecans; and

(c) Develop new or improved markets and uses for pecans.

It shall be the objective of the Board to carry out programs and projects which will provide maximum benefit to the pecan industry.

§ 1211.41 Programs and projects.

The Board shall receive and evaluate, or on its own initiative develop, and submit to the Secretary for approval any programs or projects authorized in this section. Such programs or projects shall provide for:

(a) The establishment, issuance, effectuation and administration of appropriate programs or projects for industry and consumer information, advertising, and promotion of pecans designed to strengthen the position of the pecan industry in the marketplace and to maintain, develop, and expand markets for pecans and pecan products;

(b) The establishment and implementation of research and development projects and studies to the end that the acquisition of knowledge pertaining to pecans or their consumption and use may be encouraged or expanded, or to the end that the marketing and use of pecans may be encouraged, expanded, improved, or made more efficient: *Provided*, That quality control, grade standards, supply management programs or other programs that would otherwise limit the right of the individual pecan grower to produce pecans shall not be conducted under, or as a part of, this Plan;

(c) The development and expansion of pecan sales in foreign markets;

(d) A prohibition on advertising or on any program or project that makes any reference to a variety, brand, trade name, state or regional identification of pecans or uses false or unwarranted claims on behalf of pecans or false or unwarranted statements with respect to the attributes or use of another product; but this does not preclude tie-ins with other non-pecan branded or non-branded products; and

(e) Periodic evaluation by the Board of each program or project authorized under this Plan to insure that each program or project contributes to an effective and coordinated program of research, education, and promotion and at least an annual submission of such evaluation to the Secretary. If the Board or the Secretary finds that a program or project does not further the purpose of the Act, then the Board shall terminate such program or project.

§ 1211.42 Contracts.

To ensure efficient use of funds, the Board, with the approval of the Secretary, may enter into contracts or make agreements for the development and submission of programs or projects authorized by the Plan and for carrying out such programs or projects and pay for the costs of such contracts or agreements with funds collected pursuant to §§ 1211.51 or 1211.50(g). Requirements include the following:

(a) Contractors shall develop and submit to the Board a plan or project together with a budget or budgets that shall show estimated costs to be incurred for such plan or project;

(b) Plans and projects shall only become effective upon approval of the Secretary;

(c) Contractors shall keep accurate records of all transactions, account for funds received and expended, make periodic reports to the Board of activities conducted, and make such other reports as the Board or the Secretary may require;

(d) Subcontractors who enter into contracts or agreements with Board contractors and who receive or otherwise utilize funds allocated by the Board shall be subject to the same provisions as the contractors;

(e) The records of contractors and subcontractors shall be subject to audit by the Secretary.

Expenses and Assessments

§ 1211.50 Budget and expenses.

(a) At least 60 days prior to the beginning of each fiscal period, or as may be necessary thereafter, the Board shall prepare and recommend a budget on a fiscal period basis of its anticipated income and expenses in the administration of this Plan, including probable costs of research, promotion, and industry and consumer information. The Board shall also recommend a rate of assessment calculated to provide adequate funds to defray its proposed expenditures and to provide for a reserve as set forth in § 1211.56 of this part.

(b) Each budget shall include:

(1) A statement of objectives and strategy for each program or project, including reasons for significant changes from the preceding budget period,

(2) A summary of anticipated revenue, with comparative data for at least the preceding year,

(3) A summary of proposed expenditures by each program or project, with comparative data for at least the preceding year, and

(4) Staff and administrative expense breakdown with comparative data for at least the preceding year. Comparative data reporting will not apply to the initial budget.

(c) The Board is authorized to incur such expenses for research, promotion, and industry and consumer information concerning pecans, such other reasonable expenses for the administration, maintenance, and functioning of the Board as may be authorized by the Secretary and those costs incurred by the Department specified in paragraph (d) of this section. The funds to cover such expenses shall be paid from assessments collected pursuant to § 1211.51 of this part. Expenses for programs and projects may also be paid with funds received pursuant to paragraph (g) of this section.

(d) The Board shall reimburse the Department for all expenses incurred in implementing and administering the Plan, except for salaries of Federal Government employees incurred in conducting any referendum. The Board shall pay those costs incurred by the Department for the conduct of Department duties under the plan as determined periodically by the Secretary. The Department will bill the Board monthly and payment shall be due promptly after the billing of such costs.

(e) The Board may accept voluntary contributions but these shall only be used to pay expenses incurred in the conduct of programs and projects. However, such contributions shall only be accepted from persons not subject to assessments under this Plan: *Provided*, That such contributions shall be free from any encumbrances by the donor

VOL
56
ISS
248
DE
26
1991
UMI

and the Board shall retain complete control of their use.

(f) Any amendment(s) or addition(s) to an approved budget shall be approved by the Secretary, including shifting of funds from one program or project to another, except such shifts that are consistent with governing bylaws need not have prior approval by the Secretary.

(g) Effective 3 years after the date of the establishment of the Board, the Board shall not spend in excess of 20 percent of the assessments collected under section 1912 of the Act for administration of the Board.

§ 1211.51 Assessments.

(a) *General.* During the effective period of this Plan, assessments shall be levied on all pecans produced in, and all pecans imported into, the United States and marketed, except as otherwise provided in this part pursuant to § 1911(h) of the Act. No more than one assessment on a first handler, grower-sheller or importer shall be made on any lot of pecans.

(b) *Rates.* Assessment rates shall not exceed a maximum of one-half cent per pound for in-shell pecans during the period prior to the initial referendum required by § 1916(a) for the Act and may be up to a maximum of two cents per pound thereafter, as recommended by the Board and approved by the Secretary. The rate of assessment of shelled pecans shall be twice the rate established for in-shell pecans.

(c) *Time of payment.* The assessment shall become due at the time the pecans are first handled, or entered, or withdrawn, for consumption, into the United States.

(d) *Responsibility for payment and due dates.* (1) Except as provided in subparagraphs (2) and (3) of this paragraph, the first handler and grower-sheller shall be responsible for payment of assessments to the Board on all pecans handled.

(i) Such assessments shall be deducted from the payment made to a grower for all pecans sold to the first handler.

(ii) All such assessments shall be remitted to the Board no later than the last day of the month following the month that the pecans being assessed were purchased by or marketed by the handler. To avoid late payment charges, the assessments must be mailed to the Board and postmarked by such last day.

(2) Grower-shellers shall pay to the Board the assessment on the pecans for which they act as first handler.

(i) Each first handler who is a grower-sheller shall remit such assessments to the Board, to the extent practicable, in payments of one-third of the total annual amount of such assessment due to the Board on January 31, March 31, and May 10, or such dates as may be recommended by the Board and approved by the Secretary, during the fiscal year that the pecans being assessed were harvested. To avoid late payment charges, the assessments must be mailed to the Board and postmarked by the required due dates.

(3) Importers of pecans shall pay the assessment to the Board through the Customs Service. The Customs Service will collect assessments on all pecans imported at the time of entry, or withdrawal for consumption, and forward such assessments as per agreement between the customs Service and the Department.

(e) *Remittance.* First handler and grower-sheller remittance shall be by check, draft, or money order payable to the Pecan Marketing Board and shall be accompanied by a report specified in § 1211.60.

(f) *First handler prepayment of assessments.* (1) In lieu of the assessment payment and reporting requirements of this section and § 1211.60, the Board may permit first handlers to make advance payment of their total estimated assessments for the crop year to the Board prior to their actual determination of assessable pecans. If any such estimate appears unreasonably low, the Board may request additional evidence from that first handler to justify such estimate. If, after reviewing any additional evidence, the Board concludes that such estimate is not reasonable, it shall notify that handler that it is withdrawing that individual's privilege of prepaying such assessment, unless a reasonable estimate is submitted. Any handler whose prepayment is consistently and significantly under the final assessment due shall be subject to provisions of paragraph (g) of this section on the deficient amounts. The Board shall not be obligated to pay interest on any advance payment.

(2) First handlers prepaying assessments shall provide a final annual report of actual handling. First handlers shall remit any unpaid assessments not later than the last day of the month following the last month the first handler purchased or marketed pecans or at the end of each fiscal period if such first handler purchases or markets assessable pecans on a year-round basis.

(3) First handlers prepaying assessments shall, after filing a final annual report, receive a reimbursement of any overpayment of assessments.

(4) First handlers prepaying assessments shall, at the request of the Board, provide the Board with a handling report on any and all growers for whom the first handler has provided handling services but has not yet filed a handing report with the Board.

(5) Specific requirements, instructions, and forms for making such advance payments shall be provided by the Board on request.

(g) *Late payment charges and interest.* (1) A late payment charge shall be imposed on any first handler or grower-sheller who fails to make timely remittance to the Board of the total assessments. Such late payment shall be imposed on any assessments not received before the tenth day after the assessment is due. This one-time late payment charge shall be ten (10) percent of the assessments due before interest charges have accrued.

(2) In addition to the late payment charge, one and one-half percent per month interest on the outstanding balance, including the late payment charge and any accrued interest, will be added to:

(i) Any first handler accounts delinquent beyond 30 days after the last day of the month following the month that the assessments became due; and

(ii) Any grower-sheller accounts delinquent beyond 30 days after the assessments became due.

Such interest will continue monthly until the outstanding balance is paid to the Board.

(h) *Special state assessment.* (1) The Board shall, subject to approval of the Secretary and if authorized by State law and requested by such State's pecan marketing board or commission, collect a one-quarter cent special assessment for in-shell pecans, and a one-half cent special assessment for shelled pecans to be remitted by the Board to such State pecan marketing board for use by the State board in funding research projects to promote pecans pursuant to State law.

(2) The Board shall, upon receipt of such assessments, remit such assessments to the State, within a time period mutually agreed upon between the State and the Board and approved by the Secretary.

(3) In the collection of such State assessments, neither the Board nor the Secretary shall in any manner enforce the collection or remittance of any such payment of such State assessments or investigate nonpayment of such State assessments, except to provide the State board with the names of growers from whom such assessments were and were not collected and the respective amounts of assessments that were and were not collected.

(4) The Secretary may make such procedures or regulations as may be necessary to carry out the provisions of this subsection.

(i) *Payment through cooperating agency.* The Board may enter into agreements, subject to approval of the Secretary, authorizing other organizations, such as a State pecan board, to collect assessments in its behalf. In any State or area in which the Board has entered into such an agreement, the first handler and grower-sheller shall pay the assessment to such agency in the time and manner, and with such identifying information as specified in such agreement. Such an agreement shall not provide any cooperating agency with authority to collect confidential information from growers. To qualify, the cooperating agency must on its own accord have access to all information required by the Board for collection purposes. If the Board requires further evidence of payment than provided by the cooperating agency, it may acquire such evidence from individual first handlers and grower-shellers. All such agreements are subject to the requirements of the Act, Plan, and all applicable rules and regulations under the Act and the Plan.

§ 1211.52 Failure to remit and report.

Any first handler, grower-sheller, or importer who failes to submit remittances and reports as required by this part shall be subject to appropriate action by the Board which may include one or more of the following actions:

(a) Audit of the first handler's, grower-shellers, or importer's or books and records to determine the amount owed the Board.

(a) Establishment of an escrow account for the deposit of assessments collected. Frequency and schedule of deposits and withdrawals from the escrow account shall be determined by the Board with the approval of the Secretary.

(c) Referral to the Secretary for appropriate enforcement action.

§ 1211.53 Determination of first handler.

The following examples are provided to aid in the identification of first handlers:

(a) Grower sells pecans of own production to a handler. The handler is the first handler and is responsible for payment of the assessments.

(b) Grower sells pecans of that grower's own production from the orchard, roadside stand, or storage to a consumer or other buyer who is not a handler of pecans. The grower is the first handler and is responsible for payment of the assessments.

(c) Grower sells pecans to a sheller. The sheller is the first handler and is responsible for payment of the assessment.

(d) Grower delivers in-shell pecans to a sheller for shelling and the sheller returns the shelled pecans to the grower who sells the pecans to a consumer or other buyer who is not a handler of pecans. The grower is the first handler and is responsible for payment of the assessments.

(e) Grower delivers in-shell pecans to a sheller for shelling and the sheller returns the shelled pecans to the grower who sells the pecans to a handler. The handler is the first handler and is responsible for payment of the assessments.

(f) Handler buys pecans from a grower and sells the pecans to another handler. The handler who buys the pecans from the grower is the first handler and is responsible for payment of the assessments.

(g) Grower supplies pecans to a cooperative marketing association which sells the pecans and makes an accounting to the grower, or pays the proceeds of the sale to the grower. The cooperative marketing association becomes the first handler and is responsible for payments of the assessments.

(h) Grower sells pecans to a processor. The processor is the first handler and is responsible for payment of the assessments.

(i) Broker receives pecans from a grower and sells such pecans in the broker's company name. The broker is the first handler, regardless of whether the broker took title to such pecans, and is responsible for payment of the assessments.

§ 1211.54 Authority to borrow.

The Board is authorized to borrow funds, as approved by the Secretary, for capital outlays and start-up costs including the payment of administrative expenses subject to the same fiscal, budget, and audit controls as other funds of the Board.

§ 1211.55 Refunds.

(a) Subject to the provisions of this section, any grower, grower-sheller, or importer shall have the right to personally demand and receive from the Board a one-time refund of assessments paid by or on behalf of such grower, grower-sheller, or importer during the period beginning on the effective date of this Plan and ending on the date the initial referendum specified in the Act is conducted: *Provided,* That:

(1) Such grower, grower-sheller, or importer makes application and provides proof of payment as required in paragraphs (b), (c), and (d) of this section;

(2) Such grower, grower-sheller, or importer does not support the program established under this Plan; and

(3) This Plan is not approved pursuant to the initial referendum conducted under § 1916(a) of the Act.

(b) Application form. A grower, grower-sheller, or importer shall obtain a refund application form from the Board by written request which shall bear the grower's grower-sheller's, or importer's signature. For partnerships, corporations, associations, or other business entities, a partner or an officer of the entity must sign the request and indicate his or her title.

(c) Submission of refund application to the Board. Any grower, grower-sheller, or importer requesting a refund shall mail the refund application on the prescribed form to the Board. Such application shall be considered if received prior to the conduct of the initial referendum. The refund application shall show the following:

(1) Grower's, grower-sheller's, or importer's name and address;

(2) First handler's or handlers' name(s) and address(es);

(3) Number of pounds of pecans on which refund is requested;

(4) Total amount to be refunded;

(5) Proof of payment as described below; and

(6) Grower's, grower-sheller's, or importer's signature.

Where more than one grower, grower-sheller, or importer shared in the assessment payment, the refund application shall show, in addition to other required information, the names, addresses and proportionate shares of such growers, grower-shellers, or importers and the signature of each. Any request for refund of assessments paid may be in part or total.

(d) Proof of payment of assessment. Evidence of payment of assessments satisfactory to the Board, such as the receipt or accounting given to the grower or importer by the collecting person or a copy thereof, or in the case of a grower-sheller the handling report or a copy therof, shall accompany the grower's, grower-sheller's or importer's refund application. Evidence submitted with refund applications shall not be returned to the applicant.

(e) Payment of refund. (1) If the initial referendum required by § 1916(a) of the Act shows that a majority of those

VOL
56
ISS
248
DE
26
1991
UMI

voting do not favor continuation of this Plan, the Board shall pay refund requests within 90 days of the date the results of the referendum are released by the Secretary. Should the amount of funds in the account required by § 1912(f) of the Act not be sufficient to refund the total amount of assessments demanded by eligible growers, grower-shellers, or importers, the Board shall prorate the amount of such refunds among all eligible growers, grower-shellers, and importers who demand such refund. Names of individuals obtaining refunds shall be kept confidential and made available only to the Secretary and the Board employees essential to refund processing.

(2) No refunds shall be paid to any grower, grower-sheller, or importer making demand for such refund if this Plan is approved by a majority of those voting in the initial referendum required by § 1916(a) of the Act, and all funds in the escrow account established pursuant to § 1912(f) of the Act shall be returned to the Board for use by the Board in funding approved programs and projects.

§ 1211.58 Operating reserve.

The Board may establish an operating monetary reserve and carry over to subsequent fiscal periods excess funds in a reserve so established: *Provided*, That funds in the reserve shall not exceed approximately two fiscal periods' expenses. Such reserve funds may be used to defray any expenses authorized under this subpart.

Reports, Books, and Records

§ 1211.60 Reports.

(a) Each first handler, grower-sheller, and importer who is subject to this Plan shall be required to report to the Board, at such times and in such manner as is prescribed by the regulations, such information as may be considered necessary by the Secretary for the Board to perform its duties and to ensure compliance with the Act and with this part.

(b) Each first handler and grower-sheller shall maintain a separate record with respect to each grower for whom 5,000 pounds or more pecans were handled in a single lot.

(c) First handlers shall file with the Board a report for each month that pecans were handled, along with any assessment payments due under § 1211.51(d)(1) of this part, and grower-shellers shall file with the Board a report, along with the assessment payment, by the payment due dates provided in paragraph (d)(2)(ii) of § 1211.51 of this part. All such reports shall contain at lest the following information:

(1) The first handler's or grower-sheller's name, address, and telephone number;

(2) Date of report (which is also the date of any payment to the Board);

(3) Period covered by the report;

(4) Total quantity of pecans handled during the reporting period;

(5) Total quantity of pecans from the reporting period for which assessments are remitted;

(6) For first handlers only, the total quantity of pecans from previous reporting periods for which assessments are remitted;

(7) Date of last report remitting assessments to the Board;

(8) Listing of all periods for whom the first handler or grower-sheller handled pecans, their addresses, pounds handled, and total assessments remitted for each grower. In lieu of such a list, the first handler or grower-sheller may substitute copies of settlement sheets given to each person or computer generated reports, provided such settlement sheets or computer reports contain all the information listed above; and

(9) For first handlers only, a listing of all persons, including the reporting date, for whom the first handler previously reported by for whom assessments are remitted with the current report. In lieu of such a list, the first handler may substitute a copy of the applicable handler's report appropriately marked to identify those persons for whom assessments are currently being remitted.

(d) The words "final report" shall be shown on the last report at the close of the first handler's and grower-sheller's marketing season or at the end of each fiscal period if such first handler or grower-sheller markets pecans on a year-round basis.

(e) Each importer shall file with the Board, no later than the last day of the month following the month that the assessments because due, a monthly report containing at least the following information:

(1) Importer's name, address, and telephone number;

(2) Quantity of pecans entered, or withdrawn, for consumption into the United States;

(3) Amount of assessments paid on pecans entered, or withdrawn, for consumption into the United States to the Customs Service at the time of entry, or withdrawal, for consumption and the port of ports of entry; and

(4) Amount of any pecans on which the assessment was not paid to the Customs Service at the time of entry, or withdrawal, for consumption into the United States and the port or ports of entry.

(f) In the event of a first handler's grower-sheller's, or importer's death, bankruptcy, receivership, or incapacity to act, the representative of the first handler, grower-sheller, or importer of such individual's estate, shall be considered the first handler, grower-sheller, or importer for the purposes of this part.

§ 1211.61 Books and records.

Each first handler, grower-sheller, and importer subject to this Plan shall maintain, and during normal business hours make available for inspection and copying by authorized employees of the Board or Secretary, such books and records as are necessary to carry out the provisions of this Plan and the regulations issued thereunder, including such records as are appropriate and necessary to verify all reports required under this subpart. All such books and records and reports required by this subpart shall be maintained and retained for at least two years beyond the fiscal period of their applicability.

§ 1211.62 Confidential treatment of books, records, and reports.

(a) Except as otherwise provided in the Act and this subpart, all information obtained from the books, records, or reports required to be maintained shall be kept confidential and shall not be disclosed to the public or Board members by any person. Only such information as the Secretary deems relevant shall be disclosed to the public and then only in a suit or administrative hearing brought at the direction, or on the request, of the Secretary, or to which the Secretary or any other officer of the United States is a party, and involving this Plan: Except that nothing in this subpart shall be deemed to prohibit:

(1) Issuance of general statements based on the reports of a number of first handlers, grower-shellers, or importers subject to this Plan if such statements do not identify the information furnished by any person; or

(2) Publication by direction of the Secretary of the name of any person violating this Plan together with a statement of the particular provisions of this Plan violated by such person; or

(3) Release of information obtained under this subpart to another agency of the Federal Government for a civil or criminal law enforcement activity if the activity is authorized by law and if the head of the agency has made a written request to the Secretary specifying the particular activity for which the information is sought.

(b) Any disclosure of confidential information by any Board member or employee of the Board, except as required by law or allowed by the Act, shall be considered willful misconduct and a violation of the Act.

Miscellaneous

§ 1211.70 Right of the Secretary.

All fiscal matters, programs or projects, by-laws, rules or regulations, reports, or other substantive actions proposed and prepared by the Board shall be submitted to the Secretary for approval.

§ 1211.71 Personal liability.

No member or employee of the Board shall be held personally responsible, either individually or jointly with others, in any way whatsoever to any person for efforts in judgment, mistakes, or other acts, either of commission or omission, as such member or employee, except for acts of dishonesty or willful misconduct.

§ 1211.72 Influencing government action.

(a) The Board shall not engage in any action to, nor shall any funds received by the Board under this Plan be used to influence legislation or governmental action, other than recommending to the Secretary amendments to this Plan.

(b) The Board is not precluded from providing factual information to Government officials, if the information is presented in an unbiased manner and does not state a specific course of action. Persons in their official capacity representing the Board may not appear before Congress, unless authorized by the Secretary.

§ 1211.73 Suspension or termination.

(a) Whenever the Secretary finds that this Plan or any provision thereof obstructs or does not tend to effectuate the declared policy of the Act, the Secretary shall terminate or suspend the operation of this Plan or such provision thereof.

(b) After the initial referendum, the Secretary may conduct a referendum at any time, and shall hold a referendum on request of the Board or of 10 percent or more of the total number of pecan growers, grower-shellers, and importers, to determine if pecan growers, grower-shellers, and importers favor termination or suspension of this Plan. The Secretary shall terminate or suspend this Plan whenever the Secretary determines that its termination or suspension is favored by a majority of the pecan growers, grower-shellers, and importers voting in such referendum who, during a representative period determined by the Secretary, have been engaged in the production or importation of pecans. Any such referendum shall be conducted at county Agricultural Stabilization and Conservation Service offices.

(c) If, as a result of any referendum conducted under the Act, the Secretary determines that suspension or termination of this Plan is favored by a majority of the growers, grower-shellers, and importers voting in the referendum, the Secretary shall:

(1) Within six months after making such determination, suspend or terminate, as the case may be, collection of assessments under this Plan; and

(2) As soon as practicable, suspend or terminate, as the case may be, activities under this Plan in an orderly manner.

§ 1211.74 Proceedings after termination.

(a) Upon the termination of this Plan, the Board shall recommend not more than five of its members to the Secretary to serve as trustees for the purpose of liquidating the affairs of the board. Such persons, upon designation by the Secretary, shall become trustees of all funds and property then in possession or under control of the Board, including claims for any funds unpaid or property not delivered or any other claim existing at the time of such termination.

(b) The said trustees shall:

(1) Continue in such capacity until discharged by the Secretary;

(2) Carry out the obligations of the Board under any contracts or agreements entered into by it pursuant to § 1211.42 of this part;

(3) From time-to-time account for all receipts and disbursements and deliver all property on hand, together with all books and records of the Board and of the trustees, to person or persons as the Secretary may direct; and

(4) Upon the request of the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person or persons full title and right to all the funds, property, and claims vested in the Board or the trustees pursuant to this section.

(c) Any person to whom funds, property, or claims have been transferred or delivered pursuant to this section shall be subject to the same obligations imposed upon the Board and upon the trustees.

(d) Any residual funds not required to defray the necessary expenses of liquidation shall be turned over to the Department to be used, to the extent practicable in the interest of continuing one or more of the pecan promotion, research, consumer or industry information programs authorized under the Plan or be disposed of in such manner as the Secretary may determine to be appropriate.

§ 1211.75 Effect of termination or amendment.

Unless otherwise expressly provided by the Secretary, the termination of this Plan or any regulation issued pursuant thereto, or the issuance of any amendment to either thereof, shall not:

(a) Affect or waive any right, duty, obligation, or liability which shall have arisen or which may thereafter arise in connection with any provision of this Plan or any regulation issued thereunder; or

(b) Release or extinguish any violation of this Plan or any regulation issued thereunder; or

(c) Affect or impair rights or remedies of the United States, or of the Secretary, or of any other person with respect to any such violation.

§ 1211.76 Separability.

If any provision of this Plan is declared invalid or the applicability thereof to any person or circumstance is held invalid, the validity of the remainder of this Plan or applicability thereof to other persons or circumstances shall not be affected thereby.

§ 1211.77 Patents, copyrights, inventions, product formulations and publications.

Any patents, copyrights, inventions, product formulations, or publications developed through the use of funds collected under the provisions of this Plan shall be the property of the United States Government as represented by the Board. Funds generated by such patents, copyrights, inventions, product formulations, or publications shall be considered income subject to the same fiscal, budget, and audit controls as other funds of the Board. Upon termination of this part, § 1211.74 of this part shall apply to determine the disposition of all such property.

§ 1211.78 OMB control numbers.

The control number assigned to the information collection requirements by the Office of Management and Budget pursuant to the Paperwork Reduction Act of 1980, Public law 96–511, is OMB number 0581–0093, except Board member nominee information sheets are assigned OMB number 0505–0001.

Dated: December 19, 1991.

Daniel Haley,

Administrator.

[Docket No. 91-ASW-4; Notice No. SC-91-4-SW]

Special Conditions: Aerospatiale Model AS-365N2 "Dauphin" Helicopter, Electronic Flight Instrument System

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This notice proposes special conditions for the Aerospatiale Model AS-365N2 "Dauphin" helicopter. This helicopter will have a novel or unusual design feature associated with the Electronic Flight Instrument System. The applicable airworthiness regulations do not contain appropriate safety standards for the requirements to protect critical function systems from the effects of external radio frequency energy sources. This notice contains proposed additional safety standards that the Administrator considers necessary to ensure that critical functions of systems in the Aerospatiale Model S-365N2 "Dauphin" helicopter would be maintained.

DATES: Comments must be received on or before January 15, 1992.

ADDRESSES: Comments on this proposed special condition may be mailed in duplicate to: Federal Aviation Administration, Office of the Assistant Chief Counsel, Attention: Docket No. 91-ASW-4, Fort Worth, Texas 76193-0007, or delivered in duplicate to the Office of the Assistant Chief Counsel, Building 3B, room 158, 4400 Blue Mound Road, Fort Worth, Texas.

All comments must be marked Docket No. 91-ASW-4. Comments may be inspected in the Office of the Assistant Chief Counsel, at the address specified above, between 8 a.m. and 4 p.m., weekdays except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Carroll Wright, FAA, Rotorcraft Standards Staff, Regulations Group, Fort Worth, Texas 76193-0111; telephone (817) 624-5121.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of these proposed special conditions by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Administrator before taking action on this proposal. The special conditions proposed in this notice may be changed in light of comments received. All comments received will be available, both before and after the closing date for comments, in the Regional Rules Docket for examination by interested parties. A report summarizing each substantive public contact with FAA personnel concerning this rulemaking will be filed in the docket. Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must include a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 91-ASW-4." The postcard will be date/time stamped and returned to the commenter.

Background

On September 27, 1991, Keystone Helicopter Corporation, West Chester, Pennsylvania, applied for a Supplemental Type Certificate for installation of an Electronic Flight Instrument System and Flight Management System in an Aerospatiale AS-365N2 "Dauphin" helicopter. The Model AS-365N2 "Dauphin" is a 13 passenger, two engine, 9,370 pound transport category helicopter.

Type Certificate Basis

The certification basis established for the Model AS-365N2 includes: FAR 21.29 and FAR 29 effective February 1, 1965, Amendments 29-1 through 29-11; Airworthiness Criteria for Helicopter Instrument Flight, dated December 15, 1978 for IFR certification; and Longitudinal Static Stability FAR 29.173. Aerospatiale has elected to comply with FAR 29 Amendments 29-12 through 29-16 except for FAR 29.397 as concerns rotorbrake.

Special conditions may be issued and amended, as necessary, as a part of the type certification basis if the Administrator finds that the airworthiness standards designated in accordance with § 21.101(b)(2) do not contain adequate or appropriate safety standards because of novel or unusual design features of an aircraft or installation. Special conditions, as appropriate, are issued in accordance with § 11.49 after public notice, as required by §§ 11.28 and 11.29(b), effective October 14, 1980, and will become a part of the type certification basis, as provided by § 21.101(b)(2).

Discussion

The Aerospatiale Model AS-365N2 helicopter, at the time of application, was identified as incorporating one and possibly more electrical/electronic systems that will be performing functions critical to the continued safe flight and landing of the helicopter. The Electronic Flight Instrument System performs the function of display of attitude. The display of attitude, altitude, and airspeed to the pilot is critical to the continued safe flight and landing of the helicopter for instrument flight rules (IFR) operations in Instrument Meteorological Conditions. When the design is finalized, Keystone Helicopter Corporation will provide the FAA with a preliminary hazard analysis that will identify any other critical functions performed by electrical/electronic systems.

Recent advances in technology have given rise to the application in aircraft designs of advanced electrical and electronic systems that perform functions required for continued safe flight and landing. These advanced systems are responsive to the transient effects of induced electrical current and voltage caused by the high intensity radiated fields (HIRF) incident on the external surface of the helicopter. These induced transient currents and voltages can degrade the performance of electronic systems by damaging the components or by upsetting the system's functions.

Furthermore, the electromagnetic environment has undergone a transformation not envisioned by the current application of the § 29.1309(a) requirement. Higher energy levels radiate from transmitters that are used for radar, radio, and television. Also, the number of transmitters has increased significantly.

Existing aircraft certification requirements are inappropriate in view of the aforementioned technological advances. In addition, the FAA has received reports of some significant safety incidents and accidents involving military aircraft equipped with advanced electronic systems when they were exposed to electromagnetic radiation.

The combined effects of the technological advances in helicopter design and the changing environment have resulted in an increased level of vulnerability of electrical and electronic systems required for the continued safe flight and landing of the helicopter. Effective measures against the effects of exposure to HIRF must be provided by the design and installation of these systems. The primary factors that have contributed to this increased concern are: (1) The increasing use of sensitive electronics that perform critical functions; (2) the reduced electromagnetic shielding afforded helicopter systems by advanced technology airframe materials; (3) the adverse service experience of military aircraft using these technologies; and (4) the increase in the number and power of radio frequency emitters and the expected increase in the future.

The FAA recognized the need for aircraft certification standards to keep pace with the developments in technology and environment and, in 1986, initiated a high priority program to: (1) Determine and define the electromagnetic energy levels; (2) develop and describe guidance material for design, test, and analysis; and (3) prescribe and promulgate regulatory standards. The FAA participated with industry and airworthiness authorities of other countries to develop internationally recognized standards for certification.

At this time, the FAA and airworthiness authorities of other countries have established a level of HIRF environment that a helicopter could be exposed to during IFR operations.

While the HIRF requirements are being finalized, the FAA is adopting special conditions for the certification of aircraft that employ electrical/electronic systems performing critical functions. The accepted maximum energy levels in which civilian helicopter system installations must be capable of operating safely are based on surveys and analysis of existing radio frequency emitters. This special condition would require that the helicopter be evaluated under these energy levels for the protection of the electronic system and its associated wiring harness. These external threat levels are believed to represent the worst-case exposure for a helicopter operating IFR.

The defined HIRF environment specified in this proposed special condition is based on many critical assumptions; among these is that with the exception of takeoff and landing at an airport, the aircraft would be not less than 500 feet above ground level (AGL). Helicopters operating under visual flight rules (VFR) routinely operate at less than 500 feet AGL and perform takeoffs and landings at locations other than controlled airports. Therefore, it would be expected that the HIRF environment experienced by a helicopter operating VFR may exceed the given environment by twice or more.

This special condition would require qualification of systems that perform critical functions, as installed in aircraft, to either a defined HIRF environment or to a fixed value using laboratory tests.

The applicant may demonstrate that the operation and the operational capability of the installed electrical and electronic systems that perform critical functions are not adversely affected when the aircraft is exposed to the HIRF environment. The FAA has determined that the environment defined in table I is acceptable for critical functions in helicopters operating not less than 500 feet above ground level (AGL). For critical functions in helicopters operating at altitudes less than 500 feet (AGL), additional considerations must be given.

The applicant may demonstrate by a laboratory test that the electrical and electronic systems that perform critical functions withstand a peak electromagnetic field strength in a frequency range of 10 KH_z to 18 GH_z. If a laboratory test is used to show compliance with the HIRF requirements, no credit would be given for signal attenuation due to installation. A level of 100 v/m and further considerations such as an alternate technology backup that is immune to HIRF are appropriate at this time for critical functions during IFR operations. A level of 200 v/m and further considerations such as an alternate technology backup that is immune to HIRF are more appropriate for critical functions during VFR operations.

For helicopters, the primary electronic flight displays are critical for IFR operations and a full authority digital engine control (FADEC) is an example of a critical functioning system for all operations (both IFR and VFR).

A preliminary hazard analysis must be performed by the applicant for approval by the FAA to identify electrical and/or electronic systems that perform critical functions. The term "critical" means those functions whose failure would contribute to or cause a failure condition that would prevent the continued safe flight and landing of the helicopter. The systems identified by the hazard analysis that perform critical functions are candidates for the application of HIRF requirements.

A system may perform both critical and noncritical functions. Primary electronic flight display systems and their associated components perform critical functions such as attitude, altitude, and airspeed indication. The HIRF requirements would only apply to critical functions.

Compliance with HIRF requirements would be demonstrated by tests, analysis, models, similarity with existing systems, or a combination thereof. Service experience alone would not be acceptable since such experience in normal flight operations may not include an exposure to the HIRF environmental condition. Reliance on a system with similar design features for redundancy as a means of protection against the effects of external HIRF is generally insufficient since all elements of a redundant system are likely to be exposed to the fields concurrently.

The modulation should be selected as the signal most likely to disrupt the operation of the system under test, based on its design characteristics. For example, flight control systems may be susceptible to 3 H_z square wave modulation while the video signals for electronic display systems may be susceptible to 400 H_z sinusoidal modulation. If the worst-case modulation is unknown or cannot be determined, default modulations may be used. Suggested default values are a 1 KH_z sine wave with 80 percent depth of modulation in the frequency range from 10 KH_z to 400 MH_z and 1 KH_z square wave with greater than 90 percent depth of modulation from 400 MH_z to 18 GH_z. For frequencies where the unmodulated signal would cause deviations from normal operation, several different modulating signals with various waveforms and frequencies should be applied.

Acceptable system performance would be attained by demonstrating that the system under consideration continues to perform its intended function during and after exposure to required electromagnetic fields. Deviations from system specification may be acceptable and would need to be independently assessed by the FAA for each application.

TABLE 1.—FIELD STRENGTH VOLTS/METER

Conclusion

This action would affect only certain unusual or novel design features on one series of rotorcraft. It would not be a rule of general applicability and would affect only the applicant who applied to the FAA for approval of these features on the rotorcraft.

List of Subjects in 14 CFR Parts 21 and 29

Aircraft, Air transportation, Aviation safety, Rotorcraft, Safety.

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 1344, 1348(c), 1352, 1354(a), 1355, 1421 through 1431, 1502, 1651(b)(2); 42 U.S.C. 1857f-10, 4321 et seq., E.O. 11541, 49 U.S.C. 106(g) (Rev. Pub. L. 97-449, January 12, 1983).

The Proposed Special Conditions

Accordingly, the Federal Aviation Administration (FAA) proposes the following special conditions as a part of the type certification basis for the Aerospatiale Model AS-365N2 "Dauphin" helicopter.

Protection for Electrical/Electronic Systems From High Intensity Radiated Fields

Each system that performs critical functions must be designed and installed to ensure that the operation and operational capabilities of these critical functions are not adversely affected when the helicopter is exposed to high intensity radiated fields external to the helicopter.

Issued in Fort Worth, Texas, on December 13, 1991.

Henry A. Armstrong,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 91-NM-232-AD]

Airworthiness Directives; McDonnell Douglas Model DC-9-20, -30, -40, -50, and C-9 (Military) Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to supersede an existing airworthiness directive (AD), applicable to certain McDonnell Douglas Model DC-9 series airplanes, which currently requires repetitive inspections to detect cracks of the forward slat drive drums' bellcrank shafts, and replacement, if necessary. This action would require replacement of the slat drive drums' bellcrank shafts with an improved part, thus terminating the need for repetitive inspections. This proposal is prompted by a number of reports of slat drive bellcrank failures resulting in slat malfunction. This condition, if not corrected, could result in slat asymmetry and potential reduction of lift and lateral control of the airplane at takeoff rotation, as well as the potential for rejected takeoffs from speeds beyond V_1 (the critical engine failure speed).

DATES: Comments must be received no later than February 18, 1992.

ADDRESSES: Submit comments on the proposal in triplicate to the Federal Aviation Administration, Northwest Mountain Region, Transport Airplane Directorate, ANM-103, Attention: Airworthiness Rules Docket No. 91-NM-232-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

The service information referenced in the proposed rule may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Business Unit Manager of Technical Publications—Technical Administrative Support, C1-L5B (54-60). This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington. Comments may be inspected at this location between 9 a.m. and 3 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Mr. David Hempe, Aerospace Engineer, Los Angeles Aircraft Certification Office, Airframe Branch ANM-120L, FAA, Northwest Mountain Region, 3229 East Spring Street, Long Beach, California 90806-2425; telephone (310) 988-5224.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 91-NM-232-AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM-103, Attention: Rules Docket No. 91-NM-232-AD, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

Discussion: On June 5, 1991, the FAA issued AD 91-13-09, Amendment 39-7040 (56 FR 28479, June 21, 1991), to require more stringent repetitive inspection intervals to detect cracks of the forward slat drive drums' bellcrank shafts on McDonnell Douglas Model DC-9 series airplanes, and to require the use of an improved visual inspection procedure. That action was prompted by reports of 22 instances of slat drive drum bellcrank failures and the results of the investigation of those failures, which demonstrated the need for a reduction of previously mandated inspection intervals (reference AD 84-24-03, Amendment 39-4956, (49 FR 48057, December 10, 1984)) in order to detect the cracks in a timely manner. Failure of the slat drive drum bellcrank could result in slat asymmetry and potential reduction of lift and lateral control of the airplane at takeoff rotation, as well as the potential for rejected takeoffs from speeds beyond V_1 (the critical engine failure speed).

Additionally, the FAA issued AD 90-18-03, Amendment 39-6701 (55 FR 34704, August 24, 1990), as part of the "Aging Aircraft Program." That AD requires the removal and replacement of the slat drive drums bellcrank shafts on Model DC-9 series airplanes prior to the accumulation of 100,000 landings or within four years after September 24, 1990, whichever occurs later.

The FAA has recently reassessed the possible consequences of failure of the slat drive drums bellcrank shafts. Based on this reassessment and the numerous reports of findings of cracked slat drive drums bellcrank shafts, the FAA has determined that removal and replacement of the slat drive drums bellcrank shaft must be accomplished within a shorter time period than is currently required by AD 90-18-03, in order to assure the continued airworthiness of these airplanes.

The FAA also considers that long term continued operational safety will be better assured by actual modification of the airframe to remove the source of the problem, rather than by repetitive inspections. Long term inspections may not be providing the degree of safety assurance necessary for the transport airplane fleet. This coupled with a better understanding of the human factors associated with numerous repetitive inspections, has led the FAA to consider placing less emphasis on special procedures and more emphasis on design improvements. The FAA's determination that replacement of the slat drive drum bellcrank shaft must be accomplished in order to terminate the need for the currently required repetitive inspections is in consonance with that policy decision.

The FAA has reviewed and approved McDonnel Douglas Alert Service Bulletin A27-250, Revision 3, dated May 15, 1991, which describes procedures for the visual inspection of the slat drive drum bellcrank shafts to detect cracks, and necessary repair. This service bulletin also describes procedures for replacement of the slat drive drum bellcrank shaft with a new improved part; once this new part is installed, the need for repetitive inspections is eliminated.

Since this condition is likely to exist or develop on other airplanes of this same type design, and AD is proposed which would supersede AD 91-13-09 with a new airworthiness directive that would add a requirement to replace the slat drive drums' bellcrank shafts with new improved parts (P/N 5920212-505) within 18 months. This action would be required to be accomplished in accordance with the service bulletin previously described. Replacement of the subject part would constitute terminating action for the repetitive inspections.

The FAA is aware of the inconsistency regarding compliance times for replacement of the bellcrank shafts as set forth in this proposed rule and as currently required by AD 90-18-03. However, McDonnell Douglas Report Number MDC-K1572, "DC-9/MD-80 Aging Aircraft Service Action Requirements Document," which is the subject of AD 90-18-03, will be revised to reflect a compliance time for removal and replacement of the slat drive drums bellcrank shafts consistent with the compliance time of this proposed AD action.

There are approximately 685 Model DC-9-20, -30, -40, -50, and C-9 series airplanes of the affected design in the worldwide fleet. It is estimated that 422 airplanes of U.S. registry would be affected by this AD, that it would take approximately 124 work hours per airplane (62 work hours per slat drive unit) to accomplish the required actions, and that the average labor cost would be $55 per work hour. Required parts would cost approximately $7,658 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $6,109,716.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket.

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—[AMENDED]

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing amendment 39-7040 and by adding the following new airworthiness directive:

McDonnell Douglas: Docket No. 91-NM-232-AD. Supersedes AD 91-13-09, Amendment 39-7040.

Applicability: Model DC-9-20, -30, -40, -50, and C-9 (Military) series airplanes, which correspond to factory serial numbers listed in McDonnell Douglas Service Bulletin 27-196, Revision 1, dated September 28, 1984, or Revision 2, dated December 17, 1990; Service Bulletin 27-250, dated August 29, 1984, or Revision 1, dated October 18, 1984, or Revision 2, dated January 3, 1990; and Alert Service Bulletin A27-250, Revision 3, dated May 15, 1991, certificated in any category.

Compliance: Required as indicated, unless previously accomplished.

To detect cracks and prevent failure of the slat drive mechanism and its interrelated structure, accomplish the following:

(a) Within 20 days or 135 landings, whichever occurs first after January 10, 1985 (the effective date of AD 84-24-03, Amendment 39-4956), inspect the left and right actuator slat drive mechanism in accordance with McDonnell Douglas Service Bulletin 27-196, Revision 1, dated September 28, 1984, or Revision 2, dated December 17, 1990.

(1) If no cracks are found, no further inspection is required.

(2) If a crack is found, and the crack is less than one inch in length, continue to inspect the actuator slat drive shaft at intervals not to exceed 1,600 landings in accordance with the service bulletin.

(3) If a crack is found, and the crack is one inch or greater in length, prior to further flight, replace the actuator slat drive shaft in accordance with Condition II specified in the service bulletin. Such replacement constitutes terminating action for the inspections required by paragraph (a)(2) of this AD.

(b) Within 20 days or 135 landings, whichever occurs first after January 10, 1985, inspect the forward slat drive drums' bellcrank shafts that have accumulated 4,000 or more landings since new or last overhaul.

(1) If no cracks are detected, continue to inspect the slat drive drum bellcrank shaft for cracks at intervals not to exceed 1,500 landings as shown in Figure 1 of McDonnell Douglas Service Bulletin 27-250, dated August 29, 1984; Revision 1, dated October 18, 1984; or Revision 2, dated January 3, 1990.

(2) If cracks are found, prior to further flight, replace the slat drive drum bellcrank shaft in accordance with Condition II of the service bulletin. Such replacement constitutes terminating action for the repetitive inspection requirements of paragraph (b)(1) of this AD.

(c) Within 500 landings after July 8, 1991 (the effective date of AD 91-13-09, Amendment 39-7040), or at the next scheduled inspection in accordance with paragraph (b) of this AD, whichever occurs earlier, inspect the slat drive drums' bellcrank shafts for cracks, in accordance with McDonnell Douglas Alert Service Bulletin A27-250, Revision 3, dated May 15, 1991. This inspection constitutes terminating action for the repetitive inspection requirements of paragraph (b)(1) of this AD.

(1) If no cracks are found, repeat the inspection of the slat drive drum bellcrank

VOL 56 ISS 248 DEC 26 1991 UMI

shaft for cracks at intervals not to exceed 750 landings, in accordance with the alert service bulletin.

(2) If cracks are found, prior to further flight, replace the slat drive drum bellcrank shaft with a new drum shaft, P/N 5020213–505, in accordance with Condition II specified in the alert service bulletin. Such replacement constitutes terminating action for the repetitive inspection requirements of paragraph (c)(1) of this AD.

(d) If cracks are found in locations in the slat drive shaft(s) other than those specified in McDonnell Douglas Service Bulletin 27–198, Revision 1 or 2; and Alert Service Bulletin A27–250, Revision 3; prior to further flight, replace or rework the cracked component(s) in a manner approved by the Manager, Los Angeles Aircraft Certification Office, FAA, Transport Airplane Directorate.

(e) Replacement of both the actuator slat drive mechanism and the slat drive drum bellcrank shaft in accordance with Condition II of the following service bulletins, as applicable, constitutes terminating action for the requirements of this AD:

McDonnell Douglas service bulletin number	Revision level	Dated
27–198	Revision 1	September 28, 1984
	Revision 2	December 17, 1990
27–250	Original	August 29, 1984
	Revision 1	October 18, 1984
	Revision 2	January 3, 1990
A27–250	Revision 3	May 15, 1991

(f) Within 18 months after the effective date of this AD, replace the slat drive drum bellcrank shaft with a new drum shaft, P/N 5020212–505, in accordance with Condition II specified in McDonnell Douglas Alert Service Bulletin 27–250, Revision 3, dated May 15, 1991. Such replacement constitutes terminating action for the repetitive inspection requirements of paragraphs (b)(1) and (c)(1) of this AD.

(g) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base in order to comply with the requirements of this AD.

(h) An alternative method of compliance or adjustment of the compliance time, which provides an acceptable level of safety, may be used when approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate. The request shall be forwarded through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Los Angeles ACO.

(i) Upon the request of an operator, an FAA Maintenance Inspector, subject to prior approval by the Manager, Los Angeles Aircraft Certification Office, FAA, Northwest Mountain Region, may adjust the inspection times specified in this AD to permit compliance at an established inspection period of that operator if the request contains substantiating data to justify the change for that operator.

Issued in Renton, Washington, on December 16, 1991.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 1515–AA95

Proposed Amendments to the Customs Regulations Regarding International, Landing Rights and User Fee Airports

AGENCY: Customs Service, Department of the Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document proposes to amend the Customs Regulations to set forth the circumstances in which permission to land at a landing rights airport may be denied or withdrawn and to set forth the circumstances in which status as a user fee airport may be terminated. The document also updates the list of designated user fee airports and proposes certain organizational or editorial changes to improve the layout of the present regulations insofar as they deal specifically with international airports, landing rights airports and user fee airports.

DATES: Comments must be received on or before February 24, 1992.

ADDRESSES: Written comments (preferably in triplicate) may be addressed to and inspected at the Regulations and Disclosure Law Branch, room 2119, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: Mike Lovejoy, Office of Inspection and Control (202–566–5807).

SUPPLEMENTARY INFORMATION:

Background

On March 22, 1988, Customs at 53 FR 9285 published a final rule revising the air commerce regulations previously set forth as part 6 of the Customs Regulations (19 CFR part 6). The revised regulations, set forth as part 122 of the Customs Regulations (19 CFR part 122), among other things restructured the regulatory provisions concerning specific types or classes of airports at which aircraft could land when arriving from points outside the United States.

Subpart B of those regulations concerns international airports which are designated jointly by the Secretary of the Treasury or Commissioner of Customs (as a port of entry for aircraft and for merchandise carried thereon), by the Attorney General (as a port of entry for aliens), and by the Secretary of Health and Human Services (as a place for quarantine inspection). Section 122.34 of those regulations (set forth in subpart D, which is entitled "Landing Requirements") concerns landing rights airports which are currently defined in § 122.1(f) as airports, other than international airports, at which flights from a foreign area may be allowed to land. In addition, in order to implement section 236 of the Trade and Tariff Act of 1984 (Pub. L. 98–573), as amended (codified at 19 U.S.C. 58b), on March 31, 1988, Customs published at 53 FR 10370 a final rule amending part 122 by inserting in subpart D a new § 122.39 entitled "User fee airports." A user fee airport is specifically designated as such by the Commissioner of Customs based on a Memorandum of Agreement between the concerned airport authority and Customs and with the approval of the governor of the State in which the airport is located. Following such designation, flights from a foreign area may be granted permission to land there in lieu of landing at an international airport or at a landing rights airport. Thus, there are three types or classes of airports which serve as entry points for international air commerce under the Customs laws and regulations.

Section 122.12(a) provides that international airports are open to all aircraft for entry and clearance at no charge by Customs (however, certain arrival and related user fees must be paid to Customs under part 24 of the Customs Regulations). Thus, Customs is required to supply Customs personnel at an international airport, and all aircraft arriving from foreign points have a right to land there without first obtaining permission to land from Customs. Section 122.11(c) requires that each international airport provide, without cost to the Federal Government, proper office and other space for the sole use of Federal officials working at the airport as well as a suitable paved aircraft loading area convenient to that office space. Section 122.11(b) sets forth four reasons for which the designation as an international airport may be withdrawn, i.e., insufficient business to justify maintenance of inspection equipment and personnel, failure to provide or maintain proper facilities, failure to follow the rules and regulations of the Federal Government, or if another location would be more useful. The majority of designated international airports are smaller municipal or regional airports. The use of the word "international" in the name of a large airport in the U.S. does not necessarily signify that the airport is an international airport within the meaning of the Customs Regulations.

Landing rights airports are not designated as such on an across-the-board basis for all aircraft arriving from foreign points. Rather, a landing rights airport becomes such by usage, *i.e.*, when Customs under § 122.34(a) specifically gives a party permission to land at an airport which has not been designated as an international airport or user fee airport. Such permission to land may be given on a one-time basis (*e.g.*, for a private aircraft or for a charter or other unscheduled flight) or on a recurring basis according to a fixed schedule submitted to and approved by Customs (e.g., in the case of a scheduled airline or charter operator). Under § 122.34(b), Customs is required to notify other interested Federal agencies when permission to land is given at a landing rights airport so that they may also perform their clearance or inspection duties, although in some cases those duties are performed by Customs officers cross-designated for that purpose. Unlike international airports, there is no provision in § 122.34 or elsewhere in the Customs Regulations which requires that landing rights airports provide office and other space to Customs and other Federal agencies. Such space has traditionally been provided to Customs and other Federal agencies by the airport authorities on a voluntary basis on the understanding that (1) the presence of Customs and other Federal officers at the airports operates essentially as a convenience to the aircraft, airport and surrounding community and (2) Customs could deny or revoke landing rights if the facilities for clearance and inspection were inadequate to ensure compliance with Federal law. Thus, a landing rights airport exists for the purpose of handling international traffic only to the extent that Customs and other interested agencies specifically determine that one or more international flights may land there. This determination is based in significant part on the willingness and ability of Customs and other Federal officers to staff the airport, on the availability of adequate facilities to enable those Federal officers to carry out their functions, and on the willingness of the airport users to defray part of the cost of the Customs presence there. Most of the major U.S. airports handling international traffic are, in fact, landing rights airports.

Section 122.34(c) states that the owner, operator or person in charge of the aircraft shall pay any added charges for inspecting the aircraft, passengers, employees and merchandise when landing rights are given, except in the case of scheduled aircraft of a scheduled airline where a charge may be made only for the overtime expenses of Customs officers. However, as a consequences of the imposition of user fees covered by part 24 of the Customs Regulations, these charges now must be paid only in the case of arrivals at locations outside the limits of a port of entry.

Section 122.39(a) states that the procedures for landing at a user fee airport are the same as those set forth in § 122.34 for landing rights airports. Section 122.39(b) sets forth a list of designated user fee airports. Although there are no other regulatory provisions which deal specifically with user fee airports, each memorandum of Agreement, under which each user fee airport is established, sets forth certain responsibilities of both Customs and the airport. For a flat fee paid by the airport (currently estimated at $73,350 for the first year of operation and $50,112 for the second year) to cover the salary and benefits costs of one full-time inspector, plus any related costs for travel, transportation, per diem and cost-of-living allowances, Customs agrees to provide 8 hours of service per day, Monday through Friday, for a total of 40 hours; however, the party requesting the Customs services is responsible for paying the full costs of any overtime services of Customs officers as determined under 19 U.S.C. 267. In addition to the payment of the above inspectional costs, each user fee airport agrees to provide, at no cost to Customs, sufficient office space, utilities, office furniture and equipment, including costs for installation and maintenance thereof. Each Memorandum of Agreement further provides that the agreement will continue in effect until terminated by either party, that either party may terminate the agreement upon 120 days written notice to the other party, and that the agreement will be automatically terminated if any amounts due under the agreement are not paid to Customs on a timely basis.

Customs believes that the current regulations regarding international, landing rights and user fee airports, as discussed above, could be significantly improved.

With regard to landing rights airports, Customs believes that the regulations should spell out the circumstances in which landing rights may be denied or withdrawn, both to protect the rights of the public against an arbitrary use of such action and to clarify that the existence of landing rights of an airport is always contingent upon both commercial need and the ability of Customs and other Federal agencies to ensure proper enforcement of the law. This regulatory change would not amount to a substantive change in present practice but would simply put landing rights airports on a regulatory footing more parallel to that of international airports for which the same general considerations, as reflected in the present regulations, apply.

As regards user fee airports, Customs believes that the regulations should set forth the circumstances in which a user fee airport designation may be withdrawn, as specified in the Memorandum of Agreement under which each user fee airport is established. Moreover, the regulations should be amended to reflect the fact that eleven additional user fee airports have been designated since the user fee airport provision was originally promulgated. The currently designated user fee airports, and the telephonic contacts for each for obtaining information regarding service, are as follows:

Airport	Contact
Natrona County International Airport, Casper, Wyoming.	Airport Authority, (307) 472–6688.
Rickenbacker Airport, Columbus, Ohio.	Chairman, Rickenbacker Airport, (614) 491–1401.
Santa Teresa Airport, Santa Teresa, New Mexico.	Airport Manager, (505) 589–1200.
Hector International Airport, Fargo, North Dakota.	Airport Authority, (701) 241–1501.

Sanford Regional Airport, Sanford, Florida.	Airport Authority, (407) 322-7771.

Customs also believes that some organizational and editorial amendments should be made in part 122. It is noted in this regard that present §§ 122.34 and 122.39 concern principally the legal status or establishment of landing rights and user fee airports rather than "landing requirements" which is the title of subpart D; the remainder of the provisions in subpart D, on the other hand, are general provisions which apply equally to international landing rights and user fee airports. Accordingly, it would appear appropriate to transfer §§ 122.34 and 122.39 to subpart B which would be retitled to reflect its broader scope. Moreover, certain consequential and other editorial changes should be made to the existing texts within part 122. The proposed amendments are discussed in detail below.

Discussion of Proposed Amendments

Section 122.1 General Definitions

It is proposed to amend paragraph (f), which defines "landing rights airport", by inserting after "international airport" the words "or user fee airport". This change is necessary to clarify that landing rights airports do not include user fee airports which are established under totally separate statutory authority. It is noted in this regard that "user fee airport" is already separately defined in paragraph (m) of this section, which would also be amended by changing the reference to "§ 122.39" to reflect the proposed transfer of that section to subpart B.

Subpart B Classes of Airports

It is proposed to retitle subpart B (presently "International Airports") as "Classes of Airports" to reflect the broader scope resulting from the proposed transfer of present §§ 122.34 and 122.39 to this subpart.

Section 122.14 Landing Rights Airports

This proposed new section would be identical to present § 122.34 except that present paragraph (c) has been revised (simply to clarify that inspection charges are payable only when the arrival takes place outside a port of entry) and a new paragraph (d) has been added to set forth the circumstances in which landing rights may be denied or withdrawn. Proposed new paragraph (d) is primarily based on present § 122.11(b), which sets forth the four circumstances in which designation as an international airport may be withdrawn; new paragraphs (d)(2)–(5) are identical to §§ 122.11(b)(1)–(4). In addition, new paragraph (d)(1) has been included to refer to the unavailability of Federal Government personnel in sufficient numbers to perform clearance and inspection duties, in consideration of the fact that an adequate Federal presence is a prerequisite to both the initial and the continued granting of permission to land at a landing rights airport.

Section 122.15 User Fee Airports

This proposed new section replaces present § 122.39 but with amendments to present paragraphs (a) and (b) and with the addition of a new paragraph (c). The proposed amendment to paragraph (a) involves (1) replacing the word "landing" with the words "obtaining permission to land" to reflect the true content of present § 122.34(a) and (2) replacing the reference to "§ 122.34" to reflect the transfer of that section to subpart B. The proposed amendment to paragraph (b) involves updating the list of designated user fee airports. New paragraph (c), which has been added to set forth the circumstances in which designation as a user fee airport will be terminated, is based on the standard terms of the Memorandum of Agreement under which each user fee airport is designated and thus sets forth only two conditions: (1) If either Customs or the airport authority gives 120 days written notice of termination to the other party, and (2) if any amounts due to be paid to Customs are not paid on a timely basis. It should be noted that paragraph (c) states that the designation "shall" be terminated because each Memorandum of Agreement mandates termination of the agreement (and thus termination of user fee airport status) if either of these conditions arises.

Section 122.33 Place of First Landing

It is proposed to amend this section (1) to change the cross-reference to reflect the proposed renumbering of present §§ 122.34 and 122.39 and (2) to set forth the regulatory requirements in a clearer and more logical order. These changes do not affect the substance of the regulation.

Comments

Before adopting the proposed amendments, consideration will be given to any written comments timely submitted to Customs. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9 a.m. and 4:30 p.m. at the Regulations and Disclosure Law Branch, room 2119, U.S. Customs Service Headquarters, 1301 Constitution Avenue, NW., Washington, DC.

Executive Order 12291

This document does not meet the criteria for a "major rule" as specified in E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

Regulatory Flexibility Act

Pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), it is certified that, if adopted, the proposed amendments will not have a significant economic impact on a substantial number of small entities. Accordingly, they are not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Drafting Information

The principal author of this document was Francis W. Foote, Regulations and Disclosure Law Branch, U.S. Customs Service. However, personnel from other offices participated in its development.

List of Subjects in 19 CFR Part 122

Customs duties and inspections, Imports, Air carriers, Air transportation, Aircraft, Airports.

Proposed Amendments to the Regulations

Accordingly, it is proposed to amend part 122, Customs Regulations (19 CFR part 122), as set forth below:

PART 122—AIR COMMERCE REGULATIONS

1. The authority citation for part 122 is revised to read as follows:

Authority: 5 U.S.C. 301, 19 U.S.C. 58b, 66, 1433, 1436, 1448, 1590, 1594, 1624, 1644, 49 U.S.C. App. 1509.

2. Section 122.1, paragraphs (f) and (m), are revised to read as follows:

§ 122.1 General definitions.

* * * * *

(f) *Landing rights airport.* A *landing rights airport* is any airport, other than an international airport or user fee airport, at which flights from a foreign area may be allowed to land.

* * * * *

(m) *User fee airport.* A *user fee airport* is an airport so designated by Customs and listed in § 122.15. Flights from a foreign area may be granted permission to land at a user fee airport rather than at an international airport or a landing rights airport.

3. The heading of Subpart B is revised to read as follows:

Subpart B—Classes of Airports

§§ 122.34 and 122.39 [Redesignated as §§ 122.14 and 122.15]

4. Sections 122.34 and 122.39 are redesignated as §§ 122.14 and 122.15 respectively in subpart B.

5. In newly redesignated § 122.14, paragraph (c) is revised and paragraph (d) is added to read as follows:

§ 122.14 Landing rights airports.

* * * * *

(c) *Payment of expenses.* In the case of an arrival at a location outside the limits of a port of entry, the owner, operator or person in charge of the aircraft shall pay any added charges for inspecting the aircraft, passengers, employees and merchandise when landing rights are given.

(d) *Denial or withdrawal of landing rights.* Permission to land at a landing rights airport may be denied or withdrawn for any of the following reasons:

(1) Federal Government personnel are no available in sufficient numbers to perform clearance and inspection duties;

(2) The amount of business clearing through the airport does not justify maintenance of inspection equipment and personnel;

(3) Proper facilities are not available at, or maintained by, the airport;

(4) The rules and regulations of the Federal Government are not followed; or

(5) Some other location would be more useful.

6. Newly redesignated § 122.15 is revised to read as follows:

§ 122.15 User fee airports.

(a) *Permission to land.* The procedures for obtaining permission to land at a user fee airport are the same procedures as those set forth in § 122.14 for landing rights airports.

(b) *List of user fee airports.* The following is a list of user fee airports designated by the Commissioner of Customs in accordance with 19 U.S.C. 58b. Information concerning service at any of these airports can be obtained by calling the airport or its authority directly.

Location	Name
Casper, Wyoming	Natrona County International Airport.
Columbus, Ohio	Rickenbacker Airport.
Santa Teresa, New Mexico.	Santa Teresa Airport.
Fargo, North Dakota	Hector International Airport.
Fort Myers, Florida	Southwest Florida Regional Airport.
Lebanon, New Hampshire.	Lebanon Municipal Airport.
Lehigh Valley, Pennsylvania.	Allentown-Bethlehem-Easton Airport.
Midland, Texas	Midland International Airport.
Wilmington, Ohio	Airborne Air Park.
Fort Wayne, Indiana	Fort Wayne-Allen County Airport.
Morristown, New Jersey	Morristown Municipal Airport.
Jackson, Mississippi	Jackson Municipal Airport.
Rockford, Illinois	Greater Rockford Airport.
Waukegan, Illinois	Waukegan Regional Airport.
Klamath Falls, Oregon	Kingsley Field.
St. Paul, Alaska	St. Paul Airport.
Lexington, Kentucky	Bluegrass Airport.
Oakland, Michigan	Oakland-Pontiac Airport.
Yakima, Washington	Yakima Air Terminal.
Sanford, Florida	Sanford Regional Airport.

(c) *Withdrawal of designation.* The designation as a user fee airport shall be withdrawn under either of the following circumstances:

(1) If either Customs or the airport authority gives 120 days written notice of termination to the other party; or

(2) If any amounts due to be paid to Customs are not paid on a timely basis.

7. Section 122.33 is revised to read as follows:

§ 122.33 Place of first landing.

The first landing of an aircraft entering the U.S. from a foreign area shall be:

(a) At a designated international airport (see § 122.13);

(b) At a landing rights airport if permission to land has been granted (see § 122.14); or

(c) At a designated user fee airport if permission to land has been granted (see § 122.15).

Permission to land at a landing rights airport or user fee airport is not required for an emergency or forced landing (see § 122.35).

Approved: November 22, 1991.

Carol Hallett,

Commissioner of Customs.

John P. Simpson,

Acting Assistant Secretary of the Treasury.

BILLING CODE 4820-02-M

DEPARTMENT OF LABOR

Office of Workers' Compensation Programs

20 CFR Part 10

RIN 1215-AA 67

Claims for Compensation Under the Federal Employees' Compensation Act, as Amended

AGENCY: Office of Workers' Compensation Programs, Labor.

ACTION: Notice of proposed rulemaking; request for comment.

SUMMARY: The Secretary of Labor proposes to revise the regulations regarding the availability of lump-sum payments of compensation benefits under the Federal Employees' Compensation Act (FECA). The proposed rule sets forth the Secretary's determination that, in the exercise of discretion afforded the Secretary in section 8135(a), lump sum payments of compensation benefits will no longer be made except for payments of schedule awards. In making this determination, the Secretary has taken into consideration a number of factors, including: the fact that FECA is intended as income replacement, large lump sum payments of benefits are often detrimental to claimants and lump sum payments are not a fiscally responsible method of fulfilling the government's obligations under the FECA for wage-loss compensation. This rule also indicates that it will generally not be in the best interest of the claimant to make lump-sum payment of schedule award benefits where the schedule award is a substitute for lost wages.

DATES: Written comments must be submitted on or before February 10, 1992.

ADDRESSES: Send written comments to Thomas M. Markey, Director for Federal Employees' Compensation, Employment Standards Administration, U.S. Department of Labor, room S-3229, Frances Perkins Building, 200 Constitution Avenue NW., Washington, DC 20210; Telephone (202) 523-7552.

SUPPLEMENTARY INFORMATION:

Introduction

The Federal Employees' Compensation Act (FECA), 5 U.S.C. 8101 *et seq.*, is the workers' compensation law for Federal employees. The FECA provides a range of benefits for covered work-related injuries, including payment of wage loss compensation, schedule awards for permanent loss or loss of use of specified members of the body, and related medical costs.

FECA wage-loss benefits are paid where the injured employee is disabled. Benefits for temporary total disability are payable when a claimant is unable to work at all and partial benefits are payable if the claimant is able to perform some work but unable to earn the wages earned at the time of injury. A totally disabled employee receives 66⅔% or 75% (if there are dependents) of the salary earned as of the date of injury, with a partially disabled employee receiving an appropriate proportion of such benefits.

Schedule awards are available for a permanent loss or loss of use of a specified organ or member of the body, such as an arm, leg, eye or kidney. These benefits are paid in addition to (but not concurrently with) wage-loss benefits and are paid upon a medical determination that the condition is permanent and will not improve.

The Secretary of Labor is charged with adjudicating claims, administering the payment of benefits and deciding all questions arising under the FECA (see section 8145). Pursuant to statutory authority, the Secretary has delegated the adjudication and administrative responsibility to the Director of the Office of Workers' Compensation Programs (OWCP), which is part of the Department of Labor's Employment Standards Administration.

Compensation benefits are generally made through regular, periodic payments for as long as the disability remains. The statute also authorizes the Secretary to grant lump-sum payment of compensation benefits, but only where one of three statutory criteria have been met. Except in cases where the monthly payment is less than $50 or the individual is about to become a nonresident of the United States, a lump sum payment may not be made unless the Secretary determines that it is in the individual's best interest.

The discretionary authority regarding lump-sum payments which the statute gives the Secretary is very broad. It includes the discretion to determine, in the first instance, whether or not to fulfill the government's monetary obligations under the FECA through a lump-sum payment, since the statute authorizes but does not require such a form of payment. Of course, if the Secretary determines that a lump sum payment is otherwise appropriate, a determination must also be made whether one of the three statutory criteria have been met, since a lump-sum payment is prohibited where they have not been met.

In the past, the Secretary has, in exercising the discretion afforded by the statute, determined that every lump-sum request will be evaluated on a case-by-case basis and a determination made on the basis of whether a lump-sum payment would be in the beneficiary's best interest. Although all applications have in the past been considered, lump-sum payments have been granted only rarely over most of the life of the program. Nevertheless, neither the existing rule nor (until recently) the procedures reflected the limited extent to which lump-sum payments have been made. Moreover, the practice of considering every lump-sum request and deciding each on its own merits has required extensive (and sometimes expensive) preparation by a claimant.

Accordingly, the Secretary, in the exercise of the discretion granted by statute, has now determined that lump-sum payments of wage-loss benefits are not advantageous for the government, nor are they consistent with the primary purpose of workers' compensation and therefore will not be substituted for wage-loss benefits under any circumstances, except where such payments are required by statute (that is, where a surviving spouse entitled to compensation remarries before age 55). Since the Secretary has determined that the government will fulfill its obligation for wage-loss benefits by means of periodic rather than lump-sum payments, there is no need to exercise further discretion in an individual case.

The proposed rule thus establishes a simpler and more direct process which is consistent with the discretionary authority granted to the Secretary by the statute, and lessens the administrative burden on both claimants and the Department. By making it clear that lump-sum payments will not be made for wage-loss benefits, the proposed rule eliminates needless substantive development of a lump-sum application.

Where a claimant is entitled to a schedule award, however, the Secretary has determined that a request for a lump-sum payment will still be considered. The determination will be made on a case-by-case basis, using the statutory criterion of whether the payment would be in the best interest of the claimant. It will generally not be considered in the claimant's best interest to grant a lump sum where the individual depends on the schedule award as a substitute for wage-loss.

Background

The FECA's lump-sum provision, found at section 8135 (5 U.S.C. 8135) is consistent with most workers' compensation statutes. The lump-sum provision reads as follows:

(a) The liability of the United States for compensation to a beneficiary in the case of death or of permanent total or permanent partial disability may be discharged by a lump-sum payment equal to the present value of all future payments of compensation commuted at 4 percent true discount compounded annually if—

(1) The monthly payment to the beneficiary is less than $50 a month;

(2) The beneficiary is or is about to become a nonresident of the United States; or

(3) The Secretary of Labor determines that it is for the best interest of the beneficiary.

The probability of the death of the beneficiary before the expiration of the period during which he is entitled to compensation shall be determined according to the most current United States Life Tables, as developed by the United States Department of Health, Education and Welfare, which shall be updated from time to time, but the lump-sum payment to a widow or widower of the deceased employee may not exceed 60 months' compensation. The probability of the happening of any other contingency affecting the amount or duration of compensation shall be disregarded.

(b) On remarriage before reaching age 55 a widow or widower entitled to compensation under section 8133 of this title, shall be paid a lump sum equal to twenty-four times the monthly compensation payment (excluding compensation on account of another individual) to which he was entitled immediately before the marriage.

5 U.S.C. 8135

Legislative History

This first part of the lump sum section has remained essentially unchanged since the Federal Employees' Compensation Act (originally titled the Employees' Compensation Act) was first enacted in 1916. The FECA was the second workers' compensation law covering Federal employees. The first such law, passed in 1908, quickly proved unsatisfactory. Several proposals for revamping the law were introduced in Congress in the years preceding passage of the FECA.

An early version of what was eventually to became the Federal Employees' Compensation Act was introduced in 1916 by Congressman Daniel McGillicuddy of Maine (H.R. 15316). The lump sum provision found at section 14, has remained essentially unchanged.[1] Although the legislative history of the FECA is extensive, very little mention is made of the lump-sum provision. Most of the discussion in testimony and in committee reports highlights the other changes contained in the bill, the most significant of which were the expansion of coverage, the increased benefits provided by the bill, and the creation of an independent Employees' Compensation Commission to administer the program and adjudicate claims.[2] The Employees' Compensation Act passed both houses of Congress and was signed into law on September 7, 1916.

The lump sum provision, although amended a few times, remains essentially the same. The most significant changes were made in 1966, when the existing language in this provision was redesignated as paragraph (a) and a new paragraph (b) was added, providing for a mandatory lump-sum payment of benefits equal to 24 months of compensation payment to widows or widowers who remarry before the age of 60 (this age was recently lowered to age 55 (see Pub. L. 101–303)). Title 5, United States code was also revised and recodified (Pub. L. 89–554; 80 stat. 378) in 1966; the lump sum provisions at section 14 became new section 8135 and the order of paragraph (a) was modified so that the last sentence was moved to the opening of the paragraph. The history of this recodification indicates that no substantive changes were intended by the rewriting. Like the history of the original lump sum provision, the respective legislative histories of these changes are very thin.

Agency Practice

As noted earlier, the longstanding administrative practice has been to make lump-sum payments only rarely. The Employees' Compensation Commission, which was the first agency charged with administering the 1916 Act, was reticent to make lump-sum payments from the beginning, as shown in its annual reports. The Commission reported in its First Annual Report that it was "* * * opposed to lump-sum settlement on principle, as likely to defeat the very purpose of the compensation act as against the best interests of the beneficiary in nearly all cases." (Report at p. 19). The Commission began to make lump-sum payments more frequently during the 1920's, although there is no discussion in the reports of how the decisions were made.[3] By 1929, however, the position again changed and payment of lump-sum benefits had virtually ceased. The Commission explained in its Fourteenth Annual Report that it had:

> * * *learned from experience that in the great majority of cases injured workmen have not sufficient experience to wisely use large sums of money. There is great danger that if such sums are granted they may be lost. It is considered that the safest and most effective means of affording relief to disabled employees is the payment of compensation in periodic installments. Accordingly, the commission's practice is to make lump-sum settlements only in very exceptional cases, where it is clearly demonstrated that such settlement will be for the best interest of the claimant.

Fourteenth Annual Report of the Employees' Compensation Commission, p. 51. (1930).

Succeeding administrators have consistently applied this principle, recognizing that the FECA is a wage-loss replacement system and a periodic payment is the most reliable method of wage replacement.

The Employees' Compensation Appeals Board (ECAB) was created in 1946, to review the decisions of the administrative body, called the Bureau of Employees Compensation.[4] ECAB decisions further illustrate how the lump-sum provisions have been interpreted. In *Manny Korn* (1 ECAB 78), the Board first addressed the lump sum issue, noting that section 14 of the FECA "*authorizes* payment in a lump sum of compensation for permanent disability if it should be determined that such a manner of payment is 'for the best interest of the beneficiary.'" (Emphasis added). That decision also concurred with the principle that the matter was an exercise of discretion, and its review of such determinations was limited to whether or not the decision constituted an abuse of discretion.

In a much later case (*Bruce Hickey*, 20 ECAB 253 (1969)), the Board emphasized that the Secretary's discretion extends beyond a determination of what is in the claimant's best interest. The case involved a denial of a request for a lump-sum payment from an individual who was moving out of the country, one of the three alternative reasons for which lump-sum payments are authorized. There is no requirement, however, for considering the claimant's best interest; the statute says merely that such a payment may be made when an individual is about to become a nonresident. The Bureau of Employees' Compensation denied the request and the claimant appealed to the Board, arguing that the statute mandated that lump sums be made when this event were about to occur. After noting that the legislative history is silent as to the intent of the non-resident provision on lump sums, the board stated:

> * * * giving ordinary words their ordinary meaning, the Board construes 5 U.S.C. 8135 (a)(2) as giving the Bureau discretion to grant or reject applications of claimants who are about to become nonresidents of the United States. The section specifically provides that a lump sum settlement "may" be paid under any of the 3 alternatives described there. The word "may" clearly implies discretion. * * * "

The Board accurately pointed out that the Department has complete discretion in determining whether or not to fulfill the government's obligations under the FECA through a lump-sum payment.

Statutory Discretion

While section 8135(a) merely authorizes lump-sum payments, while giving the Secretary broad discretion to

[1] The language is almost identical to that which appears in many state workers' compensation laws, and apparently was based on prototypical language suggested by the American Association for Labor Legislation (AALL), a labor law reform group. Indeed, the legislative history indicates that the AALL actually drafted the McGillicuddy bill. See Federal Employees' Compensation Hearings before the Committee on the Judiciary, H.R., 63rd Cong., 2nd Sess., Serial 16—part 1, March 31, 1914; Cong. Rec.—House, 63rd Cong., 2nd Sess., 10485 (June 15, 1914); H.R. Rept No 476, 64th Cong., 2nd Sess. (January 28, 1916); Cong. Rec.—Senate, 64th Cong., 1st Sess., 12887–12888 (August 19, 1916).

[2] At the time the FECA was being considered, the 1908 workers' compensation law as administered by the Department of Labor. In 1946, pursuant to the Reorganization Act of 1945 (59 Stat. 613), the President proposed and the Congress approved Reorganization Plan No. 2 of 1946, which abolished the Employees' Compensation Commission and transferred its functions to the Federal Security Agency. By Reorganization Plan No. 19 of 1950, these functions were transferred to the Secretary of Labor. The reorganization plans were not intended to change the scope of authority transferred from one agency to a new one.

[3] The Sixth Annual Report of the Commission notes that lump sum payments were not broken out of the total benefits paid until 1930. In 1922, $415,000 in injury compensation benefits were paid in lump sums, out of a total of $1,585,340.

[4] Reorganization Plan No. 2 of 1946 abolished the United States Employees' Compensation Commission and transferred the functions to the Federal Security Agency. Reorganization Plan No. 19 of 1950 transferred the Bureau of Federal Employees' Compensation (now OWCP) and the ECAB to the Department of Labor.

determine whether to grant a request for lump-sum payments, the Secretary has until now chosen to exercise that discretion by deciding that each individual request should be reviewed. The Secretary, however, can exercise her very broad discretionary authority and decide not only whether a lump-sum payment is appropriate in a particular case, but also that no lump-sum payments will be made.

The United States Court of Appeals for the District of Columbia Circuit has held that similar language in the Trade Adjustment Assistance (TAA) provision of the Trade Act of 1974, should be read to authorize rather than require discretionary action. *International Union, UAW* v. *Dole*, 919F.2d 753 (DC Cir. 1990). The TAA authorizes states to pay benefits and recoup overpayments of benefits pursuant to regulations prescribed by the Secretary of Labor. Similar to the discretion granted under section 8135 of the FECA, the TAA provides that a state "may waive" an overpayment, and like the FECA, then goes on to specify the circumstances in which the states could exercise the discretionary authority to grant a waiver. 19 U.S.C. 2315(a)(1).

The Secretary of Labor interpreted the "may waive" provision as meaning waiver was a purely discretionary action which was available to the states, but that its use was not mandatory. Regulations were issued which provided, *inter alia*, that the states could refuse to entertain waiver applications at all. The rules were challenged by appellant UAW, which argued that the Secretary's interpretation of the "may waive" provision was contrary to the intent of Congress, and that the statutory language required states to at least consider waiver of an overpayment.

The court decided the question under the standard for review applicable to an administrative body's interpretation of a statute set out in the Supreme Court's decision in *Chevron USA, Inc.*, v. *Natural Resources Defense Council, Inc.*, 467 U.D. 837 (1984). Under this two-part test, a court first looks to see whether Congress had a clearly discernible intent on the precise question at issue; if so, the agency's interpretation must be consistent with that intent. Where Congress does not make its intention clear, however, then the court looks to see whether the agency's interpretation is "a permissible construction of the statute." *Chevron*, 467 U.S. at 842–43.

The court in *International Union* found the "may waiver" requirement was purely discretionary and that the Secretary's interpretation—that the states could simply choose not to waive such overpayments under any circumstances—was a permissible construction of the statute. In reaching this conclusion, the court found that the discretion granted under the statute included the authority not to perform the function at all.

Appellant argued that the states must consider waiver, and that where the criteria set forth were met, then the waiver must be granted. The court rejected that interpretation, noting that "merely listing waiver as one eventuality that would ward off a deduction does not come even close to suggesting that states are obliged to consider waiver requests." 919 F2d at 755. The court further stated that:

> Appellant's interpretation * * * puts an intolerable strain on the ordinary meaning of the text. Effectively, appellants read the word "may" as if it were "shall", despite the usual presumption that "may" confers discretion while "shall" imposes an obligation to act. 919 F.2d at 756.

In determining that section 8135(a) of the FECA merely authorizes but does not require granting lump-sum payments, the Department closely examined the legislative history to discern Congressional intent. As noted earlier, the history is largely silent on the lump-sum provision, and there is no clearly discernible Congressional intent indicating that the statutory language should not be read consistently with the "usual presumption." Is this then "a permissible construction of the statute?" *Chevron*, 467 U.S. at 842–43. The Secretary believes it is, given the wording of the statute, the general purpose of the FECA and the largely silent legislative history.

The purpose of workers' compensation is to provide a substitute for the wages lost because of an on-the-job injury. Regular, periodic payments, providing for cost-of-living increases safe from speculation or economic fluctuations and free from creditors, generally more nearly provide the measure of security that the Act was designed to afford. See *Garth M. Crosby*, 37 ECAB 228 (1985). The determination to end lump-sum payments for wage-loss compensation is thus consistent with the overall purpose of the statute.

The legislative history of the 1916 Act reveals that Congress was concerned with providing fair and equitable benefits to injured Federal employees. The history also shows that Congress charged the administrator with the responsibility to look out for the interest of the government, and also that Congress was concerned with the cost of the program. This proposed rule is consistent with all of these purposes.

Congress charged the new Commission to look out for the interests of the government. Under the FECA the administrator (now the Secretary) both adjudicates claims and administers the program. While an impartial adjudicator, the Department is not simply a neutral administrator in the same sense as in many states, where the benefit costs are met by insurance policies. The legislative history shows that the administrator is specifically charged with protecting the government's interest, including the government's financial interest. Commenting on the creation of the Employees' Compensation Commission, the House Report noted:

> It seemed (to the Committee) especially unwise to place the administration in the hands of the Department of Labor because that department in large measure represents * * * the side of labor, whereas the administrative body having charge of the proposed Act should represent, and should constantly be alert to safeguard, the interests of the Government. * * *
>
> * * * * *
>
> The Commission each year, therefore, will have not only to pass upon the claims received during the year but will be under the necessity of vigilantly watching the payment of compensation for injuries occurring in past years in order to protect the interests of the Government. * * *

H.R. Rept. No. 678, 64th Cong., 1st Sess. (May 11, 1916), p. 12. [5]

Although the history on the lump-sum provision itself is thin, the proposed rule is consistent with this clearly enunciated responsibility of the administrator to look out for the government's interest and with the expression of concern about cost.

Any interpretation of section 8135(a) which disregards the discretionary nature of lump sum awards would "put an intolerable strain on" the meaning of section 8135(a) by effectively defining "may" as "shall." Such an interpretation would be directly contrary to Congressional intent so clearly expressed.

Congress clearly knows the difference between the two words and how to direct an action where it wants to. This is amply illustrated within section 8135 itself, for when Congress amended this section in 1966 and added the new paragraph (b), it ensured that lump-sum payments would be made to widows or

[5] As for concern with costs, see for example, Federal Employees' Compensation Hearings before the Committee on the Judiciary, H.R., 63rd Cong., 2nd Sess., Serial 16—part 1, March 31, 1914, 13, 24–28; House Report No. 678 (May 11, 1916) at page 11.

widowers who remarried before a certain age (now 55) by directing that such lump-sums "shall be paid." Even when it so directed an action in section (b), it left alone the discretionary wording in paragraph (a). The reports of the Commission and the ECAB decisions made clear to Congress that lump-sum payments have been made only under exceptional circumstances; Congress chose not to change the discretionary authority of the Secretary. Nor did Congress make, or even consider, such a change when extensively amending the FECA in 1974.

Basis of the Determination

The Secretary has, based on the experience over the life of the program and the history related above, determined that benefits for wage loss will be made only in the form of periodic payments. Lump-sum payments will neither be made nor considered, and it will, thus, be unnecessary to exercise any further discretion beyond what is reflected in this rule.

As described earlier, in the past OWCP has considered every lump-sum application, examined each on its merits and made a determination strictly on the basis of whether such a payment would be in the "best interest of the beneficiary." Since this proposal to end consideration of lump-sum payments for wage-loss benefits represents a change in this practice, it is important that the principal reasons for this change be set forth.

Foremost among the reasons for the change is the reason expressed in the early Commission Reports quoted above: Regular, periodic payments most closely approximate the wages the benefits are designed to replace. This method most resembles the wages that an injured worker must forgo during the period of disability, even if that disability lasts a lifetime. The periodic payments are adjusted once a year to keep pace with cost-of-living and thus remain a viable, accurate approximation of the lost wages. This form of payment reasonably places the injured individual in the position he or she would be in but for the injury.

In addition to the equitable nature of regular payments, periodic payments made by the United States Treasury are secure. They are not subject to economic downtown, the uncertainties of investments or the abuses of fraud such as would be a lump-sum payments, no matter how generous. The early commission reports expressed deep concern with the danger presented by lump sums where individuals are disabled and thus not readily able to provide for their livelihood. Through error, waste or fraud a lump-sum payment might be lost and the disabled claimant would then have no recourse. The same concerns which motivated the commission to effectively end lump sum payments in the 1920's are valid today, for no source is as secure as the United States Treasury.

Such periodic payments are also consistent with government accounting and budgeting practices, while lump sum payments are directly counter to those practices. In addition, this proposed rule represents sound fiscal policy, since the cost of lump-sum payments is generally greater than periodic payments where interest rates are above four percent and the claimant does not live longer than the life tables project.

The Federal government budget process is based on a fiscal year. Obligations incurred in each year are generally met out of the Congressional appropriation to an agency for that year. Under the chargeback system, OWCP pays out of the Employees' Compensation Fund the costs of benefits paid under the FECA for each injured employee. With limited exceptions, the agencies pay that chargeback bill once a year out of the funds appropriated by Congress for that year, based on the bills previously charged by DOL. Each agency is appropriated a set amount of money to be used for specified purposes, including salaries and expenses. In practical terms, the dollars to pay the agency's workers' compensation costs through charges paid in their behalf by the Department of Labor (chargeback) come out of this account first. What is left over goes to pay the salaries and benefits to the other employees.

Compensation liability can vary. Chargeback bills, nevertheless, can generally be anticipated and normally provided for out of the appropriation since regular compensation benefits about equal the salary which would be paid if the employee had not been injured. Lump-sum payments, on the other hand, cannot be accounted for in the appropriation process with similar ease. If an agency receives a chargeback bill which reflects a lump sum payment, that agency's budget could be stretched beyond expected limits. Instead of the 20 to 30 thousand dollars which is the usual charge for each injury, the agency might have to absorb a lump-sum payment of several hundred thousand dollars in one year. Since many agencies now charge down to the lowest budgetary level the costs associated with the chargeback bill, a small office within an agency could see most of its entire salary and expense budget wiped out through one lump sum compensation payment which could not be readily absorbed. The result would be that another part of the budget for that agency would have to absorb the charge.

Another reason for ending the use of lump-sum payments, touched on earlier, is the added cost to the government which lump-sum payment represent. The statute provides that benefits paid in a lump sum may be discounted at a rate of four percent, while the cost to the government of borrowing the funds to make these payments has historically been much greater than this discount. While currently, the rates at which the government has had to borrow money has averaged around six percent for short term and eight percent for 30-year notes, over the past ten years, the average rate for 30-year Treasury bonds has been around 10 percent. By contrast, the yearly increase in benefit payments due to the cost-of-living adjustment has averaged around four percent since 1981. Simple math illustrates that borrowing money at a higher rate than the discount rate provided in the statute in order to make lump-sum payments is not a prudent method by which to fulfill the government's obligations under the Act.

This point is readily illustrated. An employee who is 57 years old (the average age of a FECA long-term roll recipient) and whose compensation benefits are $18,000, has an average life expectancy of 23 years (the average for both males and females). The lump-sum payment for that individual, calculated according to the formula established by law (23 x $18,000 discounted at four percent) would be $278,120. The cost to the government of borrowing that amount would be $789,861 at eight percent interest. By contrast, over life the claimant would receive a total of $659,121 in periodic payments (23 x $18,000, using a four percent cost-of-living rate). The difference between the amount which have to paid out over 23 years in periodic payments and the amount which would have to be paid in interest to borrow a lump-sum payment is $130,740, which represents the additional cost to the government of using a lump-sum payment to fulfill its obligations under the FECA. As this example illustrates, it would cost more for the government to make the lump-sum payment, unless the claimant exceeded his/her life expectancy. See the Appendix to this document which will not be codified in the Code of Federal Regulations (CFR).

Lump-Sum Payments of Schedule Awards Distinguished

Although the Secretary has determined that wage-loss benefit payments will not paid in a lump sum, payments of schedule awards may be made in this form where the schedule award is not a substitute for wage-loss. Section 8107 of the FECA provides compensation for permanent loss or loss of use of specified members and organs. The Act specifies the maximum awards for these benefits, expressed in numbers of weeks of benefits. The amount of an award where there is less than 100 percent loss is prorated, so that the award for 50 percent loss of use of the leg would be one-half the specified amount, or 144 weeks.

Schedule awards are paid for permanent loss or loss of use of a organ or body member. They are paid whether or not an individual becomes disabled—that is unable to earn the wages earned at the time of injury. An award is paid in addition to wage-loss benefits (but cannot be paid concurrently with such benefits) and is not therefore a wage substitute. A schedule award can be paid to individuals who have returned to work, or have retired and are receiving an Office of Personnel Management (OPM) annunity, and therefore have not wage loss. In such instances, the individual might not be dependent upon the schedule award for basic living expenses and so there might not be a need for periodic payments.

The consideration underlying the Secretary's determination not to grant lump-sum awards generally simply does not apply to schedule awards. Schedule awards are in part distinguishable from wage-loss benefits because they most often cover a short period of time. The average period of an award is 20.54 months, much less than the 20 or 30 years often involved in a lump sum in wage-loss claims. Given this shorter period, the amount of the award is much smaller. Keeping in mind that periodic payments of schedule awards are eligible for cost-of-living increases, and that the cost of short-term borrowing is lower, the difference in cost to the government between lump sums and periodic payments is minimized. When the administrative costs saved by not processing checks on a monthly basis are included, the difference in cost to the government is in most cases negligible.

In addition, the budget impact on individual agencies is not as severe as with the large lump-sum payments associated with wage-loss benefits. The cost of benefits paid by OWCP is charged back to agencies at the end of the year. Since many of the awards are for periods of a year or less, the amount each agency would have to absorb during that year would be the same. Even for the average 20 month schedule award, the amount the agency would have to absorb for a lump sum would not be so significantly different as would the hundreds of thousands of dollars which have to be absorbed for wage-loss lump sums.

Lump-sum payments will not be automatic, however, and no claimant has an absolute right to such a payment. While schedule awards may still be paid in a lump sum, the Secretary must still determine in every case whether such a payment would be in the beneficiary's best interest. OWCP practice and ECAB decisions over the years provide insight into what criteria are to used be in making this determination. In general, as provided in the proposed rules, it is not in the claimant's best interest to receive a lump sum where the schedule award payments are relied upon by the claimant as a substitute for lost wages. Thus, lump sums may be considered where, for example, an individual has returned to work (and there does not appear a likelihood that a disability will recur), or where the individual is eligible for OPM benefits which would be at a level which could provide for the basic living expenses. The lump sum would not then be relied on as a substitute for the wages lost because of the injury and the regular, periodic payment would not be necessary. As noted above, periodic payments, providing for cost-of-living increases safe from speculation or economic fluctuations and free from creditors, generally more nearly provide the measure of security which the Act was designed to afford. See *Garth M. Crosby*, 37 ECAB 228 (1985).

Cost Benefit Analysis

The rule should bring no additional costs to the government. The benefits prescribed by the FECA must be paid where appropriate. By making clear that lump-sum payment of wage loss benefits will not be considered, considerable administrative savings may be expected.

Classification—Executive Order 12291

The Department of Labor has concluded that the regulatory proposal does not constitute a "major rule" under Executive Order 12291, because it is unlikely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in cost or prices for consumers, individual industries, Federal, state or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. The rule applies only to Federal employees, their families and the Federal agencies which employ them. Accordingly, no regulatory analysis is required.

Paperwork Reduction Act

None.

Regulatory Flexibility Act

The Department believes that the rule will have "no significant economic impact upon a substantial number of small entities" within the meaning of section 3(a) of the Regulatory Flexibility Act, Public Law 96–354, 91 stat. 1164 (5 U.S.C. 605(b)). The proposed regulations apply primarily to Federal agencies and their employees. No additional burdens are being imposed on small entities. The Secretary has certified to the Chief Counsel for Advocacy of the Small Business Administration to this effect. Accordingly, no regulatory impact analysis is required.

List of Subjects in 20 CFR Part 10

Claims, Government employees, Archives and records, Health records, Freedom of Information, Privacy, Penalties, Health profession, Workers' compensation, Employment, Administrative practices and procedures, Wages, Health facilities, Dental health, Medical devices, Health care, Lawyers, Legal services, Student, X-rays, Labor, Insurance, Kidney disease, Lung diseases, and Tort claims.

For the reasons set out in the preamble, it is proposed that part 10 of chapter I of title 20 of the Code of Federal Regulations be amended as follows:

PART 10—CLAIMS FOR COMPENSATION UNDER THE FEDERAL EMPLOYEES' COMPENSATION ACT, AS AMENDED

1. The authority citation for 20 CFR part 10 continues to read as follows:

Authority: 5 U.S.C. 301; Reorg. Plan No. 6 of 1950, 15 FR 3174, 64 stat. 1263; 5 U.S.C. 8145, 8149; Secretary's Order 1–89; Employment Standards Order 90–02.

2. Section 10.311 is revised to read as follows:

§ 10.311 Lump sum awards.

(a) In exercise of the discretion afforded by section 8135(a), and taking into consideration among other factors:

(1) The fact that FECA is intended as a wage-loss replacement program;

(2) The general advisability that such benefits be provided on a periodic basis; and

(3) The high cost associated with the long-term borrowing that is necessary to pay out large lump sums, the Director has determined that lump-sum payments will no longer be made to individuals whose injury in the performance of duty as a federal employee has resulted in a loss of wage-earning capacity.

Accordingly, where applications for lump-sum payments for wage-loss benefits under section 8105 and 8106 are received, the Director will not exercise further discretion in the matter.

(b) Notwithstanding the determination set forth in paragraph (a) of this section, a lump sum payment may be made to a claimant whose injury entitles him or her to a schedule award under section 8107. Even under these circumstances, a claimant possesses no absolute right to a lump-sum payment of benefits payable under section 8107, and such a payment may be granted only where the Director determines, acting within his or her discretion, that such a payment is in the claimant's best interest. Lump-sum payments of schedule awards generally will not be considered in the claimant's best interest where the compensation payments are relied upon by the claimant as a substitute for lost wages.

(c) On remarriage before age 55, a surviving spouse entitled to compensation under 5 U.S.C. 8133, shall be paid a lump sum equal to 24 times the monthly compensation payment (excluding compensation payable on account of another individual) to which the surviving spouse was entitled immediately before the remarriage.

Signed at Washington, DC, this 19th day of December 1991.

Lynn Martin

Secretary of Labor.

APPENDIX

[Not to be codified in the CFR]

Number	Lump sum value for $24,000 salary at ¾ rate	Cost of borrowing funds at 6% interest	Cumulative compensation	Annual comp w/4% CPIs

VOL 56 ISS 248 DEC 26 1991 UMI

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 83

RIN 3067-AB67

Federal Crime Insurance Program

AGENCY: Federal Emergency Management Agency.

ACTION: proposed rule; correction and extension of comment period.

SUMMARY: This correction to a proposed rule published on November 15, 1991, relates to the Federal Crime Insurance Program (FCIP) rate tables which apply to commercial properties located in eligible states that are set forth in § 83.25(e).

DATES: The comment period for the proposed rule is extended. Comments must be received on or before February 24, 1992.

ADDRESSES: Persons wishing to comment should submit comments in duplicate to the Rule Docket Clerk, Office of General Counsel, Federal Emergency Management Agency, Washington, DC 20472. Telephone Number: (202) 646-4107.

FOR FURTHER INFORMATION CONTACT: Kimber A. Wald, Federal Emergency Management Agency, Federal Insurance Administration, 500 C Street, SW., Washington, DC 20472. Telephone Number (202) 646-3440.

SUPPLEMEMENTARY INFORMATION: On November 15, 1991, the Federal Emergency Management Agency (FEMA) published a proposed rule (56 FR 58019-58020) with the intent of revising the Federal Crime Insurance Program (FCIP) rate tables which apply to commercial properties located in eligible states. However, the amendatory language was incorrect and the revised tables were not shown. Accordingly, in FR Doc. 91-28128, appearing on pages 58019-58020 in the issue of November 15, 1991, the following corrections are made:

1. On page 58019 in the third column, the SUMMARY: section should read "This proposed rule revises the Federal Crime Insurance Program (FCIP) rates which apply to commercial properties located in eligible states. This proposed rule is necessary to offset heavy losses under commercial coverage and the higher-than-average administrative expenses associated with operating a single-line residual market program.",

2. On page 58020 in the first column, in the first paragraph the word "proposed" should appear after the word "These" and before the word "amendments".

3. On page 58020 in the last paragraph of the first column, the word "final" should be changed to the word "proposed".

4. On page 58020 in the second column, amendatory instructions no. 2 and the regulatory text following it should be corrected to read as follows:

2. Section 83.25 is proposed to be amended by revising paragraph (e) to read as follows:

§ 83.25 Commercial crime insurance rates.

* * * * *

(e) The following tables shall be used to determine rates for commercial risks:

Federal Crime Insurance Program, Commercial Crime Insurance Rates—1991

[Annual Premiums—Class 1]

Amount of insurance	Gross receipts: Less than $100,000, option 1	Less than $100,000, option 2	$100,000 to $199,999, option 1	$100,000 to $199,999, option 2	$200,000 to $299,999, option 1	$200,000 to $299,999, option 2	$300,000 to $499,999, option 1	$300,000 to $499,999, option 2	$500,000 to $999,999, option 1	$500,000 to $999,999, option 2	$1,000,000 or greater, option 1	$1,000,000 or greater, option 2
1,000	90	137	135	206	135	206	180	274	225	343	360	548

15,000	525	826	787	1239	787	1239	1049	1652	1312	2065	2099	3304

Option 1: Burglary only.
Option 2: Roobery only.
Option 3: A combination of coverages under options 1 and 2 in uniform or varying amounts. The premium for option 3 is the sum of the rates for amounts of coverage selected under options 1 and 2.
Discounts on these rates are afforded for businesses with alarm systems/safes. A discount of 10% is given for policies with option 3.

FEDERAL MARITIME COMMISSION

46 CFR Part 552

[Docket No. 91-51]

Financial Reports of Common Carriers by Water in the Domestic Offshore Trades

AGENCY: Federal Maritime Commission.

ACTION: Advance Notice of Proposed Rulemaking; extension of time for comments.

SUMMARY: On November 8, 1991, the Federal Maritime Commission published (56 FR 57298) an Advance Notice of Proposed Rulemaking soliciting comments and information from the public on the issues which should be addressed in a proposed rule concerning substantive guidelines for determining what constitutes a just and reasonable rate of return or profit for common carriers by water in the FMC-regulated portion of the domestic offshore trades. Time for filing comments was set at January 7, 1992. The Puerto Rico Maritime Shipping Authority has requested an extension of time for filing comments to February 21, 1992. The Commission determined to grant the request.

DATE: Comments (original and 15 copies) due on or before February 21, 1992.

ADDRESSES: Comments are to be submitted to: Joseph C. Polking, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573-0001, (202) 523-5725.

FOR FURTHER INFORMATION CONTACT: Austin L. Schmitt, Director, Bureau of Trade Monitoring and Analysis, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573-0001, (202) 523-5787.

By the Commission.[1]

Joseph C. Polking,

Secretary.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 90-651; RM-7544]

Radio Broadcasting Services; Bald Knob and Clarendon, AR

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; denial of.

SUMMARY: This document denies a petition filed by Capps Rado Company, licensee of Station KKSY(FM), Channel 296A, Bald Knob, Arkansas, seeking the substitution of Channel 296C3 for Channel 296A and modification of its license accordingly, for failure to demonstrate that its proposal would provide an unobstructed 70 dBu signal from its specified transmitter location over the entire principal community of license, as required by § 73.315 of the Commission's Rules. Petitioner also requested the substitution of Channel 281A for Channel 296A at Clarendon, Arkansas, for which a permit has been issued to B and H Broadcasting Company for Station KXRC(FM), to accommodate the Bald Knob proposal. See 56 FR 2486, January 23, 1991. With this action, this proceeding is terminated.

DATES: This proceeding is terminated February 3, 1992.

[1] Chairman Koch and Commissioner Heu would deny the request.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 90-651, adopted December 11, 1991, and released December 19, 1991. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452-1422, 1714 21st Street, NW., Washington, DC 20036.

47 CFR Part 73

[MM Docket No. 90-373; RM-7287]

Radio Broadcasting Services; Cusseta, GA

AGENCY: Federal Communications Commission.

ACTION: Proposed rule; denial of.

SUMMARY: This document denies the request of Gary P. Albarez proposing the allotment of Channel 267A to Cusseta, Georgia, as the community's first local FM service. Albarez's petition is denied because there is no transmitter site available for Channel 267A at Cusseta. With this action, this proceeding is terminated.

DEPARTMENT OF AGRICULTURE

Forest Service

Big Valley Federal Sustained Yield Unit; Public Advisory Hearing

The Modoc National Forest will sponsor two public advisory hearings at 2 PM and again at 7 PM on Tuesday, January 21, 1992 at the Adin Community Hall in Adin, California. The purpose of the public advisory hearings are to consider the advantages and/or disadvantages of the Big Valley Federal Sustained Yield Unit in the light of a reduction of more than 20 percent in the potential yield (Allowable Sale Quantity).

The public is invited to attend the hearing to obtain further information and/or to participate by giving advisory testimony. Written comments will be accepted from the date of hearing through March 6, 1992.

Dated: December 17, 1991.

Douglas G. Smith,

Forest Supervisor.

APPALACHIAN REGIONAL COMMISSION

Agency Form Under Review by the Office of Management and Budget

The Appalachian Regional Commission (ARC) has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act, section 3504(h) (44 U.S.C. chapter 35).

Agency: Office of Inspector General, Appalachian Regional Commission.

Title: President's Council on Integrity and Efficiency (PCIE) Survey on How to Improve the Single Audit Process.

Form Number: ARC–OIG–1.

Type of Request: Initial collection of information.

Burden: 425 respondents; 850 reporting hours.

Average Time Per Response: 2 hours.

Needs and Uses: The survey collects information on the Single Audit process and potential areas for improving the efficiency and effectiveness of audits of Federal financial assistance provided to State and local governments.

Affected Public: State and local governmental units, State auditors, and independent public accountants.

Frequency: One time.

Respondents Obligation: Voluntary.

Copies of the above information collection proposal can be obtained by calling or writing Terry Livingston, (816) 891–7981, Office of Inspector General, Department of Education, 10220 N. Executive Hills Boulevard, 2nd floor, Kansas City, MO 64153.

Written comments and recommendations for the proposed information collection should be sent to Office of Information and Regulatory Affairs of OMB, attention: Desk Officer for Appalachian Regional Commission, Office of Management and Budget, Washington, DC 20503.

Dated: December 17, 1991.

Hubert N. Sparks,

Certifying Officer, Office of Inspector General.

[FR Doc. 91–30741 Filed 12–24–91; 8:45 am]

BILLING CODE 6130–01–M

DEPARTMENT OF COMMERCE

Agency Information Collection Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: National Oceanic and Atmospheric Administration.

Title: South Pacific Tuna Act of 1988.

Form Number: No form numbers; OMB–0648–0218.

Type of Request: Request for extension of the expiration date of a currently approved collection without any change in the substance or method of collection.

Burden: 40 respondents; 290 reporting hours; average hours per response—.73 hours.

Needs and Uses: The U.S. government, in order to meet its obligations under a Treaty on Fisheries Between the Governments of Certain Pacific Island States and the United States of America, is required to collect fish catch and vessel logbook information from masters of participating U.S. tuna purse seine vessels.

Affected Public: Businesses or other for-profit, small businesses or organizations.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Ronald Minsk, 395–7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW., Washington, DC 20230. Written comments and recommendations for the proposed information collection should be sent to Ronald Minsk, OMB Desk Officer, room 3208, New Executive Office Building, Washington, DC 20503.

Dated: December 19, 1991.

Edward Michals,

Departmental Clearance Officer, Office of Management and Organization.

Agency Information Collection Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: National Oceanic and Atmospheric Administration.

Title: Licensing of Private Remote Sensing Space Systems.

Form Number: No form; OMB 0648–0174.

Type of Request: Request for extension of the expiration date of a currently approved collection without any change in the substance or method of collection.

VOL 56 ISS 248 DEC 26 1991 UMI

Burden: 1 respondents; 16 reporting. hours; average hours per response—16 hours.

Needs and Uses: Persons under U.S. jurisdiction who wish to operate a private remote-sensing space systems must obtain a license. The information provided in the application is used to determine if U.S. security and international obligations are protected, and that the applicant will provide access to unenhanced data on a nondiscriminatory basis.

Affected Public: Businesses or other for-profit, Federal agencies,or employees.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Officer: Ronald Minsk, 395–7340.

Copies of the above information collection proposal can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW., Washington, DC 20230. Written comments and recommendations for the proposed information collection should be sent to Ronald Minsk, OMB Desk Officer, room 3208, New Executive Office Building, Washington, DC 20503.

Dated: December 19, 1991.

Agency Form Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: Administrative Record Information System (ARIS)—State and Selected Local Data.

Form Number(s): ARIS–1.

Agency Approval Number: None.

Type of Request: New Collection.

Burden: 443.

Number of Respondents: 443.

Avg Hours Per Response: 1 hour.

Needs and Uses: The Program and Policy Development Office maintains an Administrative Records Information System (ARIS) database which contains information on Federal administrative records systems. This data collection will expand the ARIS database to include the following state and local administrative records systems: drivers licenses, food stamps, automobile registration, birth records, death records, state tax records, unemployment insurance records, workers compensation records, medical assistance records, energy and other supplemental welfare programs, school enrollment records, property tax records, and property assessment records. The ARIS database will be used by Census Bureau personnel to research activities related to the Year 2000 census and other Census programs.

Affected Public: State or local governments.

Frequency: Annually.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Maria Gonzalez, 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Edward Michals, DOC Forms Clearance Officer, (202) 377–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Maria Gonzalez, OMB Desk Officer, room 3208, New Executive Office Building, Washington, DC 20503.

Dated: December 20, 1991.

BILLING CODE 3510–07–F

Bureau of the Census

[Docket No. 911209–1309]

Motor Freight Transportation and Warehousing Survey

AGENCY: Bureau of the Census, Commerce.

ACTION: Notice of determination.

SUMMARY: In accordance with title 13, United States Code, sections 131, 182, 244, and 225, I have determined that 1991 operating revenue and expenses are needed for the for-hire trucking and public warehousing industries to provide a sound statistical basis for the formation of policy by various governmental agencies and that these data also apply to a variety of public and business needs. Effective with the 1991 survey, this program will provide data for additional categories of operating expenses. These include, for all firms, a breakout of employer contributions to legally required and other employee benefit plans; for trucking firms, data on the cost of drug and alcohol testing and rehabilitation programs; and for warehousing firms, data on taxes and licenses, and the cost of insurance. The data are not publicly available from nongovernment or other governmental sources.

ADDRESSES: Director, Bureau of the Census, Washington, DC 20233.

FOR FURTHER INFORMATION CONTACT: Thomas E. Zabelsky on (301) 763–5528.

SUPPLEMENTARY INFORMATION: The Census Bureau is authorized to take surveys necessary to furnish current data on subjects covered by the major censuses authorized by title 13, United States Code. This survey will provide continuing and timely national statistical data on motor freight transportation and warehousing services for the period between economic censuses. The next economic census will be conducted for 1992. The data collected in this survey will be within the general scope and nature of those inquiries covered in the economic censuses. The Census Bureau will select a probability sample of trucking and warehousing firms in the United States (with revenue size determining the probability of selection) to report in the 1991 Motor Freight Transportation and Warehousing Survey. The sample will provide, with measurable reliability, national level statistics on operating revenue and expenses for these industries. We will mail report forms to the firms covered by this survey and require their submission within 30 days after receipt.

This survey has been submitted to the Office of Management and Budget, in accordance with the Paperwork Reduction Act, Public law 96–511, as amended. We will provide copies of the forms upon written request to the Director, Bureau of the Census, Washington, DC 20233. Based upon the foregoing determination, I have directed that an annual survey be conducted for the purpose of collecting these date.

Dated: December 18, 1991.

Barbara Everitt Bryant,

Director, Bureau of the Census.

BILLING CODE 3510–07–M

[Docket No. 911208–1308]

Service Annual Survey

AGENCY: Bureau of the Census, Commerce.

ACTION: Notice of determination.

SUMMARY: In accordance with title 13, United States Code, sections 131, 182, 224, and 225, I have determined that 1991 service sector data on receipts and revenue are needed to provide a sound statistical basis for the formation of policy by various governmental agencies and that these data also apply to a variety of public and business needs. Selected services include personal, business, automotive, repair, amusement, health, and other professional and social service industries. This survey will yield 1991 and 1990 estimates of the dollar volume of receipts for taxable firms and revenue of firms and organizations exempt from Federal income taxes. Effective with the 1991 survey, this program also will provide data on major sources of receipts for computer and data processing services, management and consulting services, equipment rental and leasing, automotive rental and leasing, amusement parks, and offices and clinics of health practitioners. In addition, this survey will provide estimates of total expenses for tax exempt organizations in selected kinds of businesses. These data are not publicly available from nongovernment or other governmental sources.

ADDRESSES: Director, Bureau of the Census, Washington, DC 20233.

FOR FURTHER INFORMATION CONTACT: Thomas E. Zabelsky on (301) 763–5528.

SUPPLEMENTARY INFORMATION: The Census Bureau is authorized to take surveys necessary to furnish current data on subjects covered by the major censuses authorized by title 13, United States Code. This survey will provide continuing and timely national statistical data on selected service industries for the period between economic censuses. The next economic census will be conducted for 1992. The data collected in this survey will be within the general scope and nature of those inquiries covered in the economic censuses. The Census Bureau will select a probability sample of service firms and organizations in the United States (with receipts or revenue size determining the probability of selection) to report in the 1991 Service Annual Survey. The sample will provide, with measurable reliability, national level statistics on receipts and revenue for these industries. We will mail report forms to the firms covered by this survey and require their submission within 30 days after receipt.

This survey has been submitted to the Office of Management and Budget in accordance with the Paperwork Reduction Act, Public Law 96–511, as amended. We will provide copies of the forms upon written request to the Director, Bureau of the Census, Washington, DC 20233. Based on the foregoing determination, I have directed that an annual survey be conducted for the purpose of collecting these data.

BILLING CODE 3510–07–M

International Trade Administration

[A–570–814]

Preliminary Determination of Sales at Less Than Fair Value: Certain Carbon Steel Butt-Weld Pipe Fittings From the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 26, 1991.

FOR FURTHER INFORMATION CONTACT: Steve Alley or Lori Way, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377–0656, respectively.

PRELIMINARY DETERMINATION: We preliminarily determine that imports of certain carbon steel butt-weld pipe fittings ("pipe fittings") from the People's Republic of China (PRC) are being, or are likely to be, sold in the United States at less than fair value, as provided in section 733 of the Tariff Act of 1930, as amended (the Act). The estimated margins are shown in the "Suspension of Liquidation" section of this notice. If this investigation proceeds normally, we will make our final determination no later than March 2, 1992.

Case History

Since the publication of the notice of initiation on June 17, 1991 (56 FR 27730), the following events have occurred. On July 8, 1991, the International Trade Commission (ITC) preliminarily determined that there is a reasonable indication that an industry in the United States is being materially injured or threatened with material injury by reason of imports of pipe fittings from the PRC.

On July 26, 1991, we sent a letter to the Embassy of the PRC, requesting that it address the question of whether the PRC is a nonmarket economy country (NME) relative to the industry under investigation. No response to this letter has been received as of this date. As discussed below under "Foreign Market Value," we are continuing the treatment of the PRC as an NME within the meaning of section 771(18) of the Act, as we have done in all past cases involving the PRC.

On July 12, 1991, the Department issued a survey to interested parties requesting information on procedures and exporters of pipe fittings in the PRC, for purposes of identifying potential respondents to our antidumping duty questionnaire. We received responses to this survey on July 24 and August 7, 1991. Based on this information, we issued our antidumping questionnaire to the following exporters, which account for more than 60 percent of exports of the pipe fittings from the PRC to the United States during the period of investigation (POI):

(1) China North Industries Corporation (China North);

(2) Jilin Provincial Machinery & Equipment Import & Export Corporation (Jilin Michinery);

(3) Liaoning Machinery & Equipment Import & Export Corporation (Liaoning Machinery);

(4) Liaoning Metals (Liaoning);

(5) Liaoning Metals & Minerals Import & Export Corporation (Liaoning Metals) (based on information available at this time, we understand this entity to be distinct from the previously named entity known as "Liaoning Metals");

(6) Shandong Metals & Minerals Import & Export Corporation (Shandong);

(7) Shenyang Billiongold Pipe Fittings Co., Ltd. (Billiongold);

(8) Shenyang Machinery & Equipment Import & Export Corporation (Shenyang Machinery); and

(9) Shenzhen Machine and Industrial Co. (Shenzhen Machine).

We received questionnaire responses and supplemental information from seven of the respondents in September, October, and November 1991. Two respondents, Liaoning and Shenzhen Machine, did not respond to our antidumping questionnaire or any other request for information.

On September 13, 1991, the petitioner, the U.S. Fittings Group, requested that the preliminary determination be postponed until no later than December 18, 1991, pursuant to section 733(c)(1) of the Act. We granted this request on September 24, 1991 (56 FR 48517, September 25, 1991).

On November 1, 1991, petitioner alleged that critical circumstances exist with regard to imports of pipe fittings from the PRC. We requested information from respondents regarding petitioner's allegation of critical circumstances on November 8, 1991.

VOL 56 ISS 248 DEC 26 1991 UMI

On December 6, 1991, Weldbend Corporation, a domestic producer of the subject merchandise, indicated its opposition to this proceeding and challenged the standing of the petitioner in this investigation. Petitioner submitted its rebuttal to the standing challenge on December 13, 1991. Since this issue was raised for the first time less than two weeks before the due date of the preliminary determination, we were unable to consider the standing issue for this determination, but will address it in the final determination.

Separate Rates

Each party which has responded to the antidumping questionnaire has argued that it is entitled to a separate dumping margin. In order to determine whether company-specific dumping margins should be calculated in these investigations, we asked respondents to provide information on company ownership and relationships, sources of inputs, manufacturing processes, distribution channels, involvement of trading companies, controls on external trade, profit retention, and other facets of their production and sale of pipe fittings. As stated in the Final Determination of Sales at Less than Fair Value: Sparklers from the People's Republic of China ("Sparklers") (56 FR 20588, May 6, 1991), we will issue separate rates if respondents can demonstrate both a *de jure* and *de facto* absence of central control. Evidence supporting, though not requiring, a finding of *de jure* absence of central control would include: (1) An absence of restrictive stipulations associated with an individual exporter's business and export licenses; and (2) any legislative enactments devolving central control of export trading companies. Evidence supporting a finding of *de facto* absence of central control with respect to exports would include: (1) A finding that each exporter sets its own export prices independently of the government and other exporters; and (2) a finding that each exporter can keep the proceeds from its sales.

The seven participating respondents have submitted information for the record in this investigation attempting to show that they meet the Sparklers criteria described above. Based on our analysis of this information, each of these seven respondents meets the Sparklers criteria. Although the respondents appear to be wholly or partly owned by local or state authorities, or by collectives, all seven of these respondents state that their businesses operate independently of the central government and other trading companies. Consequently, we are issuing company-specific dumping margins for these seven participating respondents for purposes of the preliminary determination.

Since no response to our questionnaire was received from Liaoning or Shenzhen Machine, and since we have no evidence of their independence from one another or the government, we presume that they are related and subject to a single rate. This issue will be re-examined in the final determination and in any future administrative reviews if an antidumping duty order is issued. Furthermore, because Liaoning and Shenzhen Machine have not demonstrated their independence, the dumping margin assigned to them will also serve as the PRC-wide rate for all companies not receiving a separate rate in this determination.

Scope of Investigation

The products covered by this investigation are carbon steel butt-weld pipe fittings, having an inside diameter of less than 360 millimeters (14 inches), imported in either finished or unfinished form. these formed or forged pipe fittings are used to join sections in piping systems where conditions require permanent, welded connections, as distinguished from fittings based on other fastening methods (*e.g.*, threaded, grooved, or bolted fittings). Carbon steel butt-weld pipe fittings are currently classified under subheading 7307.93.30 of the Harmonized Tariff Schedule (HTS). Although the HTS subheadings are provided for convenience and customs purposes, or written description of the scope of this proceeding is dispositive.

We received from the petitioner (letter dated June 18, 1991) and Silbo Industries, Inc., an interested party, (letter dated June 20, 1991) comments regarding the scope of the investigation as defined in the Department's notice of initiation. We contacted the ITC and the Customs Service National Import Specialist responsible for the subject merchandise. Based on these communications, we have deleted the following sentence from the scope as published in the notice of initiation: "Unfinished butt-weld pipe fittings that are not machined, not tooled, and not otherwise processed after forging are not included in the scope of this investigation." For a detailed discussion of this issue, see the Department's memorandum of June 27, 1991 (Memorandum from Richard W. Moreland to Francis J. Sailer).

Period of Investigation

The POI is December 1, 1990 through May 31, 1991.

Fair Value Comparisons

To determine whether sales of pipe fittings from the PRC to the United States were made at less than fair value, we compared the United States price to the foreign market value (FMV), as specified in the "United States Price" and "Foreign Market Value" sections of this notice, except for Liaoning, Shenzhen Machine, and Shenyang Machinery.

Liaoning and Shenzhan Machine did not respond to our antidumping questionnaire, and Shenyan Machinery did not report a significant percentage of its U.S. sales during the POI. Therefore, we have based the margins for these companies on the best information available (BIA) in accordance with section 776(c) of the Act. In deciding what to use as BIA, both the statute and the regulation, 19 CFR 353.37(b), provide that the Department may take into account whether a party refused to provide requested information. When a company refuses to provide the information in a timely manner, or otherwise significantly impedes the Department's investigation, the Department normally assigns to that company the higher of either: (1) The highest margin alleged in the petition; or (2) the highest calculated margin for any respondent that supplied an adequate response. See, e.g., Final Determinations of Sales at Less Than Fair Value: Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From the Federal Republic of Germany (54 FR 18992 19033, May 3, 1989).

By not responding to our questionnaire, Liaoning and Shenzhen Machine have significantly impeded this investigation. We have assigned to Liaoning and Shenzhen Machinery a margin of 182.90 percent, which is the highest margin alleged in the petition. Although Shenyang Machinery attempted to comply with all our requests for information, it failed to report a significant percentage of its U.S. sales. Shenyang Machinery brought this omission to the Department's attention and is attempting to correct its data. We have provided Shenyang Machinery until the date of this preliminary determination to correct its deficiency, but we may still have to resort to BIA in our final determination. Consequently, we have assigned Shenyang Machinery a margin of 149.65 percent, which is the highest margin calculated for a respondent in this determination. The selection of the most adverse BIA rate (*i.e.*, the highest petition rate) was not warranted under these circumstances.

Several respondents did not report factors of production data for some models sold to the United States during the POI. As BIA, we assigned to those sales the highest non-aberrational margin calculated for the company in question.

Billiongold provided estimated factor of production information for some U.S. sales when it purchased finished pipe fittings from another PRC manufacturer, and for merchandise sold but not yet produced and shipped. Rather than rely on estimates, we based the margin for Billiongold on Billiongold's U.S. sales for which we had actual, as opposed to estimated, factors of production.

United States Price

For all respondents except Liaoning, Shenzhen Machine, and Shenyang Machinery, we based United States price on purchase price where sales were made directly to unrelated parties prior to importation into the United States, in accordance with section 772(b) of the Act. We used purchase price as defined in section 772(b) of the Act, both because the pipe fittings were sold to unrelated purchasers in the United States prior to importation into the United States, and because exporter's sales price (ESP) methodology was not indicated by other circumstances.

For the six companies which responded substantially to our questionnaire, we calculated purchase price based on packed, CIF prices to unrelated customers in the United States. We made deductions, where appropriate, for foreign inland freight, ocean freight, and marine insurance.

We based the deduction for foreign inland freight on freight rates in Pakistan, as the respondents reported the use of PRC transportation services in incurring this charge. Respondents were unable to report the actual packed weight for individual pipe fitting models. Therefore, as the best available information, we used the gross weight of the steel inputs as an estimate of the packed weight of the pipe fittings.

The respondents reported the use of PRC-based providers for ocean freight and marine insurance. Since no surrogate country information was available for these expenses, we used the reported U.S. dollar charges for those expenses as the best available information, pursuant to section 773(c)(1) of the Act, for this preliminary determination.

For Billiongold, in addition to the deductions noted above, we made deductions, where appropriate, for discounts, containerization expenses, U.S. brokerage and handling, U.S. customs duties, U.S. unloading costs, and U.S. demurrage charges.

Shandong reported a commission paid to its unrelated U.S. customer. Our analysis of this adjustment, however, indicates that the "commission" appears instead to be a discount from the gross unit selling price to the U.S. customer. Therefore, in addition to the deductions noted above, for Shandong, we deducted the reported commission amount as a discount from U.S. price.

Foreign Market Value

Section 773(c)(1) of the Act provides that the Department shall determine FMV using a factors of production methodology if (1) the merchandise is exported from an NME country, and (2) the information does not permit the calculation of FMV using home market prices, third country prices, or constructed value under section 773(a).

Pursuant to section 771(18) of the Act and based on determinations in prior proceedings, the PRC is an NME. See e.g., Final Determination of Sales at Less than Fair Value: Natural Menthol From the PRC (46 FR 24614, May 1, 1981); Final Determination of Sales at Less than Fair Value: Chrome Plated Lug Nuts from the PRC (56 FR 46153, September 10, 1991) (Lug Nuts); and Final Determinations of Sales at Less Than Fair Value: Oscillating Fans and Ceiling Fans from the PRC (56 FR 55271, October 25, 1991) (Fans).

In Lug Nuts, we stated that we will value FMV based entirely on NME data only if we find that all costs incurred by a producer of the subject merchandise are market-determined. We stated further that where some costs are market-driven, we will value those inputs based on the cost incurred by the NME producer. For inputs whose costs are not shown to be market-driven, we will rely on surrogate values.

As noted above, we continue to find that the PRC is an NME. No party has suggested that the PRC is no longer an NME. Therefore, the presumption remains that the inputs used by the pipe fittings producers which are sourced in the PRC are not purchased at market prices. A respondent asserting that it purchases inputs at market-oriented prices must provide significant documentary evidence to overcome this presumption.

The seven participating respondents have claimed that many of the inputs were purchased at market-driven prices and that, accordingly, we should use the actual PRC prices for valuing these inputs. Of these respondents, only Billiongold has submitted PRC price data which would permit such a valuation. However, Billiongold has not provided sufficient documentation to show that market forces were operating in its input purchases. Billiongold has merely asserted that its inputs are purchased at market-oriented prices. Such an assertion, without sufficient documentary support, is not enough to establish market behavior.

Therefore, for this preliminary determination, we have not accepted the respondents' assertions and we have used surrogate values in calculating FMV, as discussed below. At verification, we will examine further whether the evidence submitted supports Billiongold's assertion regarding the market orientation of its input prices.

In accordance with section 773(c)(4) of the Act, as amended by the Omnibus Trade and Competitiveness Act of 1988, we have calculated FMV based on the market valuation of the factors of production used in producing the subject merchandise, as reported by each respondent. These factors are valued in market economy countries that are at a level of economic development comparable to that of the PRC and that are significant producers of the subject merchandise.

Of the countries that are known producers of pipe fittings, we determined that Pakistan, Indonesia and India, are the most comparable to the PRC in terms of overall economic development, based on per capita gross national product (GNP), the national distribution of labor, and growth rate in per capita GNP. We attempted to obtain information for valuing factors of production from these three countries either as supplied by U.S. diplomatic posts in response to information requests for this investigation and other recent Department proceedings, or from publicly available statistical references at the Department. With respect to the latter sources, we adjusted the factor values to the POI using wholesale price indices published by the International Monetary Fund.

Since the most useable surrogate value data for this case came from Pakistan, we used Pakistani values where available. The next most useable data came from Indonesian sources and we used those surrogate values for inputs where no Pakistani value was available.

For those companies that reported the distance between steel suppliers and the pipe fittings factory, we calculated the

VOL 56 ISS 248 DE 26 1991 UMI

cost of raw material input freight based on the weight of the steel pipe input and freight rates as valued in Pakistan. For companies that did not report the distance between suppliers and factories, as BIA, we used the highest average distance derived from the public versions of questionnaire responses submitted by respondents who provided the information.

For the six companies which substantially responded to our questionnaire, we calculated an FMV for each model of pipe fitting sold to the United States during the POI using the material factors reported. We added an amount for the material factors reported which we valued in Indonesia and Pakistan. We added an amount for labor and for variable electricity consumption, both of which we valued in Pakistan. To the resulting sum, we added an amount for factory overhead based on Indonesian experience.

For selling, general, and administrative expenses (SG&A), we added an amount based on the information received from Indonesian pipe fittings producers because this amount was greater than the statutory minimum of ten percent. Finally, we added an amount for profit based on the experience of Indonesian pipe fittings producers because the profit percentage was higher than the statutory eight percent minimum.

In Lug Nuts and Fans, no circumstance of sale adjustments were made because the only data available to calculate corresponding FMV adjustments was based, in whole or part, on PRC nonmarket economy expenses. No surrogate country data was available for these expenses, and we did not believe it was fair or that the statute directed us to make these deductions on one side of the margin calculation and not the other. We did not make circumstance of sale adjustments in this investigation for the reasons cited above.

To this constructed FMV, we added an amount for packing. We were unable to find sufficient useable surrogate value data for all of the packing material inputs reported. For purposes of the preliminary determination, we assigned a value to the reported packing materials based on public information submitted in the concurrent investigation of certain Carbon Steel Butt-Weld Pipe Fittings from Thailand.

As in past cases involving NMEs (*e.g.*, Fans), we have made no adjustment to FMV for U.S. selling expenses since we had no information on the specific amount of direct selling expenses included in the surrogate countries used as the basis for determining FMV.

We made currency conversions in accordance with 19 CFR 353.60(a).

Critical Circumstances

On November 1, 1991, petitioner alleged that "critical circumstances" exist with respect to imports of pipe fittings from the PRC. Section 733(e)(1) of the Act provides that critical circumstances exist if we determine that there is a reasonable basis to believe or suspect:

(A)(i) There is a history of dumping in the United States or elsewhere of the class or kind of merchandise which is the subject of the investigation, or

(ii) The person by whom, or for whose account, the merchandise was imported knew or should have known that the exporter was selling the merchandise which is the subject of the investigation at less than its fair value, and

(b) There have been massive imports of the class or kind of merchandise which is the subject of the investigation over a relatively short period.

On November 8, 1991, we asked the respondents to supply monthly shipment volume data from January 1990 through October 1991. We received the information from Billiongold and Jilin Machinery on November 21, 1991. No data was received from the other respondents.

Pursuant to section 733(e)(1)(B) of the Act, we generally consider the following factors in determining whether imports have been massive over a short period of time: (1) The volume and value of the imports; (2) seasonal trends if applicable); and (3) the share of domestic consumption accounted for by imports. See, *e.g.*, Final Determination of Sales at Less Than Fair Value: Certain Internal-Combustion Industrial Forklift Trucks from Japan (53 FR 12552, April 15, 1988).

Normally, we compare the export volume for a period of not less than three months beginning with the month the petition was filed, with a previous period of the same length, in accordance with 19 CFR 353.16(g). Since the petition was filed on May 22, 1991, (*i.e.*, toward the end of the month), we compared shipments, for Jilin, during the three-month period following the filing of the petition, June through August 1991, to shipments during the three-month period prior to and including the month in which the petition was filed, March through May 1991. Since Billiongold provided shipment data through October 1991, we compared Billiongold's shipments from June through October 1991 to its shipments from January through May 1991.

Under 19 CFR 353.16(f)(2), unless the imports in the comparison period have increased by at least 15 percent over the imports during the base period, we will not consider the imports "massive". Our analysis indicates that shipments from Billiongold and Jilin Machinery have increased by considerably more than 15 percent.

Since these companies show evidence of massive imports over a relatively short period of time, we need to consider whether there is a history of dumping or whether there is reason to believe or suspect that importers of this product knew or should have known that it was being sold at less than fair value. We examined recent antidumping cases and found that there are currently no findings of dumping in the United States or elsewhere of the subject merchandise by PRC manufacturers. However, it is our standard practice to impute knowledge of dumping under section 733(e)(1)(A)(ii) of the Act when the estimated margins in our determinations are of such a magnitude that the importer should realize that dumping exists with regard to the subject merchandise. Normally, in purchase price sales we consider estimated margins of 25 percent or greater to be sufficient. See, *e.g.*, Fans. In this investigation, because all companies sell only on a purchase price basis, the 25 percent threshold applies.

We have found the preliminary margins for Billiongold and Jilin Machinery to be sufficiently high for the purposes of a critical circumstances determination under the criteria described above. Therefore, we find that the requirements of section 733(e)(1) are met for these companies and we preliminarily determine that critical circumstances exist with respect to imports of pipe fittings from the PRC that are exported by Billiongold and Jilin Machinery.

Of the remaining seven respondents in this investigation, five responded to our antidumping questionnaire, but did not submit shipment data as requested. The remaining two, Liaoning and Shenzhen Machinery, did not respond to the questionnaire. Thus, we must rely on BIA in making our critical circumstances determination for all of these respondents.

In accordance with section 776(c) of the Act, as BIA, we assume that the increase in imports has been "massive" since the filing of the petition. We impute knowledge of dumping because, for all of these companies, the preliminary determination margin is greater than 25 percent. Therefore, we find that critical circumstances also exist with respect to imports from these companies.

Suspension of Liquidation

In accordance with section 733(d)(1) of the Act, we are directing the Customs Service to suspend liquidation of all entries of pipe fittings from the PRC that are entered, or withdrawn from warehouse, for consumption on or after the date which is 90 calendar days prior to the date of publication of this notice in the **Federal Register**. The Customs Service shall require a cash deposit or posting of a bond equal to the estimated preliminary dumping margins, as shown below. The suspension of liquidation will remain in effect until further notice. The weighted-average dumping margins are as follows:

Manufacturer/producer/exporter	Weighted average margin percentage
China North Industries Corporation (China North)	149.65
Jilin Provincial Machinery & Equipment Import & Export Corp. (Jilin Machinery)	112.47
Liaoning Machinery & Equipment Import & Export Corporation (Liaoning Machinery)	115.16
Liaoning Metals & Minerals Import & Export Corporation (Liaoning Metals)	99.02
Shenyang Billiongold Pipe Fitting Co. Ltd. (Billiongold)	115.65
Shandong Metals & Minerals Import & Export Corporation (Shandong)	99.76
Shenyang Machinery & Equipment Import & Export Corporation (Shenyang Machinery)	149.65
Liaoning Metals (Liaoning), Shenzhen Machine and Industrial Co. (Shenzhen Machine), and All Others	132.90

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonproprietary information relating to this investigation. We will allow the ITC access to all privileged and business proprietary information in our files, provided the ITC confirms in writing that it will not disclose such information, either publicly or under administrative protective order, without the written consent of the Deputy Assistant Secretary for Investigations, Import Administration.

If our final determination is affirmative, the ITC will determine whether these imports are materially injuring, or threaten material injury to, the U.S. industry before the later of 120 days after the date of this preliminary determination or 45 days after our final determination.

Public Comment

In accordance with 19 CFR 353.38, case briefs or other written comments in at least ten copies must be submitted to the Assistant Secretary no later than February 3, 1992, and rebuttal briefs no later than February 10, 1992. In accordance with 19 CFR 353.38(b), we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. Tentatively, the hearing will be held on February 12, 1992, at 9:30 a.m. at the U.S. Department of Commerce, room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Parties should confirm by telephone the time, date, and place of the hearings 48 hours before the scheduled time.

Interested parties who wish to participate in the hearing must submit a written request to the Assistant Secretary for Import Administration, U.S. Department of Commerce, room B-099, within ten days of the publication of this notice in the **Federal Register**. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. In accordance with 19 CFR 353.38(b), oral presentations will be limited to issues raised in the briefs.

This determination is published pursuant to section 733(f) of the Act (19 U.S.C. 1673b(f)) and 19 CFR 353.15.

Dated: December 18, 1991.

Francis J. Sailer,

Acting Assistant Secretary for Import Administration.

[FR Doc. 91-30855 Filed 12-24-91; 8:45 am]

BILLING CODE 3510-DS-M

International Trade Administration

[A-549-807]

Preliminary Determination of Sales at Less Than Fair Value: Certain Carbon Steel Butt-Weld Pipe Fittings From Thailand

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 26, 1991.

FOR FURTHER INFORMATION CONTACT: Michelle A. Frederick or Steve Alley, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-0186 and 377-3773, respectively.

PRELIMINARY DETERMINATION: We preliminarily determine that certain carbon steel butt-weld pipe fittings from Thailand are being, or are likely to be, sold in the United States at less than fair value, as provided in section 773 of the Tariff Act of 1930, as amended (the Act). The estimated margins are shown in the "Suspension of Liquidation" section of this notice. If this investigation proceeds normally, we will make our final determination no later than March 2, 1991.

Case History

Since the publication of our notice of initiation on June 17, 1991 (56 FR 27730), the following events have occurred.

On July 8, 1991, the International Trade Commission (ITC) preliminarily determined that there is a reasonable indication that an industry in the United States is materially injured, or threatened with material injury, by reason of imports of certain carbon steel butt-weld pipe fittings from Thailand.

On July 31, 1991, the Department presented questionnaires to three Thai producers of the subject merchandise: TTU Industrial Corp., Ltd.; Awaji Sangyo (Thailand) Co., Ltd. (AST); and Thai Benkan Co. These three manufacturers account for all sales of carbon steel butt-weld pipe fittings from Thailand during the period of investigation (POI). TTU and AST have responded to the Department's requests for information; Thai Benkan has not.

On September 9, 1991, having already determined that TTU's home market was not viable, the Department determined that sales made by TTU to Australia during the POI provided the most appropriate basis for the calculation of TTU's foreign market value (FMV). Based on an allegation make by petitioner, on October 4, 1991, the Department initiated an investigation into whether TTU sold carbon steel butt-weld pipe fittings to Australia at less than the cost of production (COP). Accordingly, on October 7, 1991, the Department issued a cost questionnaire to TTU pursuant to section 773(b) of the Act. On November 25, 1991, TTU responded to the Department's requests for information regarding its production costs.

Upon review of the revised computer data output submitted by TTU on November 25, 1991, we found that the data was not in a form usable by the Department for the preliminary determination. Based on the lack of usable data, we were precluded from performing the COP test for TTU and making U.S. comparisons to third country sales. On December 17, 1991, we

VOL

ISS
248
DE
26
1991
UMI

requested that TTU resubmit its November 25, 1991, computer submission of U.S. sales in a form usable to the Department. Upon receipt of TTU's revised sales data, we will analyze and verify TTU's response for use in the final determination. In addition, on December 10, 1991, TTU requested that the Department examine all third country sales when performing the cost test. We are currently reviewing TTU's request. In the meantime, we are using the September 13, 1991, U.S. and third country sales data for purposes of the preliminary determination.

On September 13, 1991, the petitioner, the U.S. Fittings Group, an *ad hoc* trade association, requested that the preliminary determination be postponed until not later than December 16, 1991, pursuant to section 733(c)(1) of the Act. We granted this request on September 18, 1991 (56 FR 48517, September 25, 1991).

Based on a separate allegation made by petitioner, on October 31, 1991, the Department initiated an investigation into whether AST sold the Subject merchandise in the home market at less than the COP. Accordingly, on November 18, 1991, the Department issued a cost questionnaire to AST pursuant to section 773(b) of the Act. AST submitted its response to the cost questionnaire on December 16, 1991, too late to be considered for purposes of the preliminary determination. We will analyze and verify AST's cost response for use in the Department's final determination.

On November 19, 1991, petitioner alleged that AST did not fully or accurately report its sales in the United States during the POI and argued that the inaccuracies require the use of best information available (BIA). Specifically, petitioner alleged that (1) AST's reported prices to a U.S. importer are inaccurate since they are higher than the prices charged by this U.S. importer to its customer, and (2) AST did not report all U.S. sales for the POI. Petitioner provided purchase orders of a U.S. importer and the importer's customer, and AST's packing lists for the shipments of the merchandise to support its claim.

AST argues that it has accurately reported its sales to the United States. It does not have knowledge of the resale price the U.S. importer charges its customer. AST also contends that it reported all sales to the United States. AST explains that it did not report the sales petitioner alleged were made during the POI since price and quantity were fixed prior to the POI by a "pilot order," which is a type of purchase order.

The Department has accepted AST's information for purposes of the preliminary determination and will examine these issues at verification.

On December 6, 1991, Weldbend Corporation, a domestic producer of the subject merchandise, indicated its opposition to this proceeding and challenged the standing of the petitioner in this investigation. Petitioner submitted its rebuttal to the standing challenge on December 13, 1991. Since this issue was raised for the first time less than two weeks before the due date of our preliminary determination, we were unable to consider the standing issue for this determination, but will address it in the final determination.

Scope of the Investigation

The products covered by this investigation are carbon steel butt-weld pipe fittings, having an inside diameter of less than 360 millimeters (14 inches), imported in either finished or unfinished form. These formed or forged pipe fittings are used to join sections in piping systems where conditions require permanent, welded connections, as distinguished from fittings based on other fastening methods (*e.g.*, threaded, grooved, or bolted fittings). Carbon steel butt-weld pipe fittings are currently classified under subheading 7307.93.30 of the Harmonized Tariff Schedule (HTS). Although the HTS subheadings are provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

We received from the petitioner (letter dated June 18, 1991) and Silbo Industries, Inc., an interested party, (letter dated June 20, 1991) comments regarding the scope of the investigation as defined in the Department's notice of initiation. We contacted the ITC and the Customs Service National Import Specialist responsible for the subject merchandise. Based on these communications, we have deleted the following sentence from the scope as published in the notice of initiation: "Unfinished butt-weld pipe fittings that are not machined, not tooled, and not otherwise processed after forging are not included in the scope of this investigation." For a detailed discussion of this issue, see the Department's memorandum of June 27, 1991 (Memorandum from Richard W. Moreland to Francis J. Sailer).

Period of Investigation

The POI is December 1, 1990 through May 31, 1991.

Such or Similar Comparisons

We have determined that certain carbon steel butt-weld pipe fittings constitute one such or similar category of merchandise.

Fair Value Comparisons

For AST and TTU, to determine whether sales of certain carbon steel butt-weld pipe fittings from Thailand to the United States were made at less than fair value, we compared the United States price to the FMV, as specified in the United States Price" and "Foreign Market Value" sections of this notice.

For AST we compared merchandise sold in the United States to identical and non-identical merchandise sold in the home market. For TTU, we compared merchandise sold in the United States to identical merchandise sold in a third country (Australia). For a detailed discussion of this issue, see the Department's memorandum of September 9, 1991 (Memorandum from Richard W. Moreland to Francis J. Sailer).

Best Information Available

The Department issued a questionnaire to Thai Benkan, however, it did not respond to the Department's requests for information. Accordingly, we used BIA to assign a margin to that company, pursuant to 19 CFR 353.37(b). The Department's normal practice for a non-cooperative respondent is to assign the higher of either the margin alleged in the petition or the highest margin calculated for another responding company. See, e.g., Final Determinations of Sales at Less Than Fair Value: Antifriction Bearings (Other Than Tapered Roller Bearings) and Parts Thereof From the Republic of Germany, 54 FR 18992 (May 3, 1989). We have assigned Thai Benkan the petition margin of 52.60 since it is higher than the calculated margins.

United States Price

A. TTU

For TTU, we based U.S. price on purchase price, in accordance with section 772(b) of the Act, because all sales were made directly to unrelated parties prior to importation into the United States and because exporter's sales price methodology was not indicated by other circumstances. We calculated purchase price based on CIF or C&F prices, duty unpaid. We made deductions, where appropriate, for foreign inland freight, foreign brokerage and handling, ocean freight, and marine insurance. In accordance with section 772(d)(1)(B) of the Act, we increased U.S. price by the amount of import duties imposed by Thailand on inputs for the subject merchandise which have not been collected by reasons of the exportation of the subject merchandise to the United States.

TTU reported amounts for rebated taxes. We did not increase U.S. price by the amount of any taxes imposed in Thailand which have been rebated, or which have not been collected, by reason of the exportation of the merchandise to the United States because we are calculating FMV based on third country prices. In this circumstance, where the sales used to calculate FMV are tax free (since any taxes imposed in Thailand on merchandise that is shipped to third countries are rebated or uncollected by reason of the exportation of the merchandise), there is no basis for any tax adjustment to U.S. price.

B. AST

For AST, we based U.S. price on purchase price, in accordance with section 772(b) of the Act, because all sales were made directly to unrelated parties prior to importation into the United States and because exporter's sales price methodology was not indicated by other circumstances. AST submitted revised shipment and payment dates, and movement charges for U.S. sales on December 11, 1991, too late to be considered for purposes of this preliminary determination. We calculated purchase price based on CIF, duty unpaid, prices. We made deductions, where appropriate, for foreign inland freight, foreign brokerage and handling, ocean freight, and marine insurance. In accordance with section 772(d)(1)(B) of the Act, we increased U.S. price by the amount of import duties imposed by Thailand on inputs for the subject merchandise which have been rebated by reason of the exportation of the subject merchandise to the United States. In accordance with section 772(d)(1)(C) of the Act, we increased U.S. price by the amount of taxes imposed in Thailand directly upon the exported merchandise and components thereof, which had been rebated, or which had not been collected, by reason of the exportation of the merchandise to the United States. Since there is a companion countervailing duty administrative proceeding on the subject merchandise, the rebate of indirect taxes is limited to the amount of the rebate of indirect taxes on inputs that are physically incorporated into the exported merchandise. See, Final Determination of Sales at Less Than Fair Value: Silicon Metal From Argentina, 56 FR 37691 (August 9, 1991). For those U.S. sales with unreported payments dates and shipment dates, we recalculated credit based on the average credit days incurred for other U.S. sales and AST's short-term interest rate for the POI.

Foreign Market Value

In order to determine whether there were sufficient sales of certain carbon steel butt-weld pipe fittings in the home market to serve as a viable basis for calculating FMV, we compared the volume of home market sales in the such or similar category to the volume of third country sales in the such or similar category in accordance with section 773(a)(1) of the Act.

A. TTU

For TTU, we determined that the home market was not viable. In selecting which third country market to use for comparison purposes, we first determined which third country markets had "adequate" sales volumes within the meaning of 19 CFR 353.49(b) (1) and (2). We determined that the volume of sales to a third country market was adequate if the sales of such or similar merchandise exceeded, or was equal to, five percent of the volume sold to the United States. Of the third country markets having an adequate sales volume of such or similar sales, we selected Australia as the most appropriate market for comparison purposes in accordance with 19 CFR 353.49(b).

We calculated FMV based on CIF and C&F duty unpaid prices to unrelated customers in Australia. We made deductions, where appropriate, for foreign inland freight, foreign brokerage and handling, ocean freight, and marine insurance. In accordance with 19 CFR 353.56(a)(2), we made circumstance of sale adjustments, where appropriate, for differences in credit, bank charges, and fumigation costs. We deducted third country packing costs and added U.S. packing costs. In accordance with 19 CFR 353.56(b)(1), we deducted third country commissions and added indirect selling expenses incurred in the U.S. market up to the amount of the third country commission. In order to make a fair comparison with U.S. sales, we added the amount of import duties imposed by Thailand on inputs for the subject merchandise which have not been collected by reason of the exportation of the subject merchandise to Australia.

B. AST

For AST, we determined that the home market was viable. We calculated FMV based on delivered prices to unrelated customers in the home market. We disregarded sales to a related party because those sales did not appear to be at arm's length. We made deductions, where appropriate, for foreign inland freight. In accordance with 19 CFR 353.56(a)(2), we made circumstance of sale adjustments, where appropriate, for differences in credit.

For sales with unreported payment dates and shipment dates in the home market, we calculated a weighted-average credit expense based on the expense reported for AST's home market transactions. We deducted home market packing costs and added U.S. packing costs. In accordance with 19 CFR 353.56(b)(1), we deducted home market commissions. Because AST did not report U.S. indirect selling expenses, we made an upward adjustment to FMV for the amount reported for home market commissions. We also made circumstance-of-sale adjustments for the differences between taxes incurred on home market sales and imputed to export sales.

Currency Conversion

In accordance with 19 CFR 353.60, we converted foreign currency into the equivalent amount of United States currency using the official exchange rates in effect on the appropriate dates. All currency conversions were made at rates certified by the Federal Reserve Bank.

Verification

As provided in section 776(b) of the Act, we will verify the information used in making our final determination.

Suspension of Liquidation

In accordance with section 733(d)(1) of the Act, we are directing the Customs Service to suspend liquidation of all entries of certain carbon steel butt-weld pipe fittings from Thailand (except for those of AST) that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Normally, we would instruct the U.S. Customs Service to require a cash deposit or the posting of a bond equal to the weighted-average amount by which the foreign market value of pipe fittings from Thailand exceeds the U.S. price, which in this investigation is 7.95 percent for TTU, 0.00 percent for AST, 52.60 percent for Thai Benkan, and 40.90 percent for all other manufacturers, producers, and exporters of pipe fittings from Thailand. However, Article VI.5 of the General Agreement on Tariffs and Trade (GATT) provides that "[n]o * * * product shall be subject

VOL
56
ISS
248
DE
26
1991
UMI

to both antidumping and countervailing duties to compensate for the same situation of dumping or export subsidization." This provision is implemented by section 772(d)(1)(D) of the Act which prohibits assessing dumping duties on the portion of the margin attributable to an export subsidy.

In this case, the product under investigation is subject to a concurrent countervailing duty administrative review. The Department has yet to assess countervailing duties, however. To fulfill our international obligations arising under the GATT, under these circumstances, we are subtracting the bonding rate attributable to the export subsidies found in the initial countervailing duty investigation from the antidumping bonding rate. See, Final Determination of Sales at Less Than Fair Value: Ball Bearings and Parts thereof From Thailand, 54 FR 19117 (May 3, 1989). Accordingly, for duty deposit purposes, the net antidumping bonding rates are shown below. This suspension of liquidation will remain in effect until further notice.

Producer/manufacturer/exporter	Weighted-average margin percentage
TTU	5.42
AST	0.00
Thai Benkan [1]	52.60
All Other	40.90

[1] Since Thai Benkan's margin is based on BIA, no offset for export subsidies was made.

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination. If our final determination is affirmative, the ITC will determine whether these imports are materially injuring, or threaten material injury to, the U.S. industry before the later of 120 days after the date of this preliminary determination or 45 days after our final determination.

Public Comment

In accordance with 19 CFR 353.38, case briefs or other written comments in at least ten copies must be submitted to the Assistant Secretary for Import Administration no later than February 3, 1992 and rebuttal briefs no later than February 10, 1992. In accordance with 19 CFR 353.38(b), we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. Tentatively, the hearing will be held on February 12, 1991, at 3 p.m. at the U.S. Department of Commerce, room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

Interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Import Administration, U.S. Department of Commerce, Room B-099, within ten days of the publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. In accordance with 19 CFR 353.38(b), oral presentations will be limited to issues raised in the briefs.

This determination is published pursuant to section 733(f) of the Act (19 U.S.C. 1673(f)) and 19 CFR 353.15.

Dated: December 16, 1991.

Francis J. Sailor,

Acting Assistant Secretary for Import Administration.

Drycleaning Machinery From Germany; Final Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On August 12, 1991, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on drycleaning machinery from Germany. The review covers two manufacturers/exporters of this merchandise and the period November 1, 1989 through October 31, 1990.

We gave interested parties an opportunity to comment on the preliminary results. At the request of Boewe Reinigungs und Waschereitechnik GmbH (Boewe) we held a public hearing. Based on our analysis of the comments received and the correction of certain clerical errors, we have changed the margin for Boewe and Seco Maschinenbau & Co. GmbH (Seco) to 0.64 and 4.44 percent, respectively.

EFFECTIVE DATE: December 26, 1991.

FOR FURTHER INFORMATION CONTACT: Arthur N. DuBois or Thomas F. Futtner, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, telephone: (202) 377-8312/3814.

SUPPLEMENTARY INFORMATION:

Background

On August 12, 1991, the Department of Commerce (the Department) published in the **Federal Register** (56 FR 38112) the preliminary results of its administrative review of the antidumping finding on drycleaning machinery from Germany (37 FR 23715, November 2, 1972). The Department has now completed that administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act).

Scope of the Review

Imports covered by the review are shipments of German drycleaning machinery currently classifiable under item number 8451.10.10 of the Harmonized Tariff Schedules (HTS). The HTS item number is provided for convenience and Customs purposes. The written description of the scope of the finding remains dispositive.

The review covers two manufacturers/exporters of this merchandise to the United States, Boewe and Seco, and the period November 1, 1989 through October 31, 1990. Since Seco did not respond to our questionnaire, we have used best information available in determining Seco's rate in these final results of review.

Analysis of Comments Received

We invited interested parties to comment on the preliminary results. We received comments from Boewe and, at the request of Boewe, held a public hearing on October 23, 1991.

Comment 1

Boewe contends that for Model P200 we should base foreign market value (FMV) on third-country sales rather than on constructed value (CV). Boewe says that it originally reported third-country sales to Italy because Italy was the largest market for the P200, even though the sales were to a related firm. Boewe asserts that 19 CFR 353.45, regarding sales to related parties, permits the use of sales to related parties in third countries as long as there is no reason to conclude that the price is not comparable to prices to an unrelated party.

In its supplemental response, Boewe reported third-country sales to Spain in addition to reporting the CV information requested by the Department, and claimed that the Department's regulations, specifically 19 CFR 353.48(b), express a preference for the use of third-country sales over CV. In the hearing, Boewe also argued that the sales to Spain would be preferable for determining FMV over the sales to Italy for two reasons: (1) The sales to Spain were made to unrelated parties, and (2) the majority of the U.S. sales were made at the same level of trade (LOT), *i.e.*, to distributors.

Department's Position

We disagree with the respondent. In cases such as this where the home market is determined to be viable and there are no home market sales of a particular model, our practice is to use CV rather than third-country sales to determine FMV for that model. See High Information Flat Panel Displays and Display Glass Therefor from Japan, Final Determination; Recision of Investigation and Partial Dismissal of Petition (56 FR 32376, July 16, 1991). In this review, Boewe's home market was viable, but there were no home market sales of the P200 model. Therefore, we correctly used CV to determine FMV for the P200.

Comment 2

Boewe claims that the Department should reduce FM by the full value of the Consorba anti-emission machines that are required for all drycleaning machines sold in the home market, rather than limiting the adjustment to only the cost differences. Boewe asserts that Consorba machines are not drycleaning machines or drycleaning options, but are separate machines. Boewe contends that if the invoice had shown separate prices for the drycleaning machine and for the Consorba, instead of a combined price, the Department would have used only the price of the drycleaning machine and ignored the price of the Consorba.

Department's Position

We agree. Since the Consorba is clearly not a drycleaning machine, an attachment, or an option for a drycleaning machine, we have recalculated the FMV of the drycleaning machines by using the selling price of the drycleaning machines only. See Certain Electric Motors from Japan, Final Results of Administrative Review of Antidumping Duty Order (49 FR 32627, August 15, 1984). To do this, we allocated the discounted unit price of the combined drycleaning machine/Consorba based upon the ratio of the unit prices of the drycleaning machines and Consorba sold separately. We then used for FMV the portion of the discounted drycleaning machine/Consorba unit price represented by the drycleaning machine alone.

Comment 3

Boewe claims that advertising in the home market should be allowed in full as a direct expense, or, alternatively, two-thirds should be allowed as direct selling expenses and one-third should be allowed as an LOT adjustment.

Department's Position

We disagree. In its original response, Boewe said that all or substantially all of its home market advertising was on a product-line basis but it was not able to demonstrate that this was the case. Therefore, we do not consider this as a direct selling expense. Further, Boewe's estimate that one-third of this expense would be assumed by home market distributors if there were such distributors is mere conjecture and unsupported by any evidence on the record, and is thus not allowable as an LOT adjustment. However, we note that we have allowed the full amount of the home market advertising expense as an indirect selling expense in ESP comparisons.

Boewe submitted unsolicited factual information in its pre-hearing brief dated October 9, 1991, supporting its claim for advertising as a direct expense and several other claims. At the hearing Boewe proffered a document, which it termed backup material, to support claims previously made. The Department did not accept this information from Boewe.

At the hearing, the hearing examiner explained that the Department does not accept such information after the time limits specified in our regulations (19 CFR 353.31). To the extent that we deem unsolicited data or information submitted after these dates to be new factual information, whether characterized as supplementing, explaining, or supporting previously submitted data or information, and whether submitted in case briefs, at a hearing, or otherwise, it is untimely and may not be considered in this review.

Comment 4

Boewe claims the Department should have allowed trade-in allowances as a circumstance-of-sale adjustment, as an indirect selling expense, or as a LOT adjustment.

Department's Position

We disagree. We consider the trade-in allowance to be equal to the value of a traded-in machine and, therefore, permitting a COS adjustment, or treating the trade-in allowance as an indirect selling expense, or as an addition to the LOT adjustment, would be inappropriate.

Comment 5

Boewe says that home market headquarters sales department and order entry and control expenses should be treated as a COS adjustment, or, alternatively, as a LOT adjustment.

Department's Position

We disagree. Because these expenses are overhead expenses, we are continuing to treat them as indirect. We are also unconvinced that these expenses should be added to the LOT adjustment because it is unclear whether Boewe would have incurred most or all of these expenses if it had sold through distributors instead of directly to end-users in the home market.

Comment 6

Boewe claims that expenses for technical publications should be treated as direct expenses. It argues that it is difficult to imagine any expense category which relates more directly to the machines under consideration than expenses for preparing technical publications for these machines.

Department's Position

We disagree. Boewe failed to provide sufficient timely evidence that the expenses claimed were directly related to the sales under consideration. Certain information respondent sought to use that purportedly supported this argument was untimely submitted. (See Department's Position on Comment 3.) We cannot discern from the record that these expenses are anything other than general technical services expenses, and that they would have been incurred regardless of whether any particular sale had been made.

Comment 7

Boewe claims that the Department should have allowed certain general and administrative (G&A), management, and traffic/shipment department expenses as direct or as indirect selling expenses.

Department's Position

We disagree. Boewe has failed to demonstrate that these expenses are sales expenses and, therefore, we continued to treat G&A, management, and traffic/shipment department expenses as overhead.

Comment 8

Boewe contends that one U.S. "exhibit sale" should be excluded from our margin calculations. Boewe claims it is common in the industry for exhibit machines to be marked down when sold as "floor samples." It, therefore,

VOL 56 ISS 248 DEC 26 1991 UMI

requests that the Department not include this machine in its dumping calculations.

Department's Position

We disagree. There is no basis in the statute or in the regulations for excluding such sales.

Comment 9

Boewe requests that negative margins be used to offset any positive dumping margins calculated.

Department's Position

We disagree. Under section 731 of the Tariff Act, dumping duties are imposed in an amount equal to the amount by which the FMV exceeds the U.S. price. The Tariff Act does not provide for offsets for negative margins. To provide for offsets would permit a foreign producer to mask dumped prices with prices above FMV and to engage in selective dumping. Thus, except in instances where the Department has conducted reviews of seasonal merchandise which has very significant price fluctuations due to perishability (see Final Results of Antidumping Administrative Review, Certain Fresh Cut Flowers from Colombia (55 FR 20495, May 17, 1990)), the idea of averaging U.S. prices has been rejected. See Final Results of Antidumping Administrative Review, Pressure Sensitive Plastic Tape from Italy (54 FR 13091, March 30, 1989).

Comment 10

Boewe claims that the Department made certain clerical errors that should be corrected, including omissions or errors involving options, miscellaneous expense deductions, sale dates, exchange rates, physical differences, and inventory carrying charges for ESP sales.

Department's Position

We agree and have recalculated our results accordingly.

Final Results of the Review

We preliminarily found margins of 6.00 percent for Boewe and for Seco. Seco's best information available (BIA) rate, based on its own highest previous rate, is 4.44 percent. Because Boewe's non-BIA rate was greater than 4.44 percent in the preliminary results of review, we assigned Boewe's rate to Seco. However, since Boewe's margin fell below 4.44 percent in these final results, we have assigned Seco its own BIA rate of 4.44 percent.

As a result of the comments received and the correction of certain clerical errors, we have revised our preliminary results, and we determine that the following weighted-average margins exist:

Manufacturer/ exporter	Time period	Margin (percent)
Boewe	11/1/89–10/31/90	0.64
Seco	11/1/89–10/31/90	4.44

The Department will instruct the Customs Service to assess antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions directly to the Customs Service.

Furthermore, the following deposit requirements will be effective upon publication of these final results for all shipments of drycleaning machinery from Germany entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided for by section 751(a)(1) of the Tariff Act: (1) The cash deposit rate will be 0.64 percent for Boewe, and 4.44 percent for Seco; (2) for merchandise exported by manufacturers or exporters not covered in this review but covered in previous reviews or the final determination in the original less-than-fair-value investigation, the cash deposit rate will continue to be the rate published in the most recent final results or determination for which the manufacturer or exporter received a company-specific rate; and (3) the cash deposit rate for any future entries from all manufacturers or exporters who are not covered in this or prior administrative reviews and who are unrelated to the reviewed firms or any previously reviewed firm, will be 0.64 percent. This is the most current non-BIA rate for any firm in this proceeding.

This administrative review and this notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: December 12, 1991.

Alan M. Dunn,

Assistant Secretary for Import Administration.

Steel Wire Strand for Prestressed Concrete From Japan; Final Results of Antidumping Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On October 1, 1991, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on steel wire strand for prestressed concrete from Japan. These final results of review cover one explorer of this merchandise, Mitsui & Co., Ltd., and the periods from December 1, 1985 through November 30, 1987, and December 1, 1987 through November 30, 1988. The review indicates no shipments of the subject merchandise during the review periods. We gave interested parties an opportunity to comment on the preliminary results and we received timely comments from the petitioners. Based on our analysis of comments received, the final results remain unchanged from the preliminary results.

EFFECTIVE DATE: December 26, 1991.

FOR FURTHER INFORMATION CONTACT: Fred Baker or Robert Marenick, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone (202) 377-5255.

SUPPLEMENTARY INFORMATION:

Background

On October 1, 1991, the Department of Commerce (the Department) published in the **Federal Register** (56 FR 49745) the preliminary results of its administrative review of the antidumping finding on steel wire strand for prestressed concrete from Japan (43 FR 57599, December 8, 1978). The Department has now completed the administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act).

Scope of the Review

Imports covered by this review are shipments of steel wire strand, (strand) other than alloy steel, not galvanized, which are stress-relieved and suitable for use in prestressed concrete. During the review periods such merchandise was classifiable under Tariff Schedules of the United States Annotated (TSUSA) item number 642.1120. Such merchandise is currently classifiable under Harmonized Tariff Schedule (HTS) item number 7312.10.30.15. The TSUSA and HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers one exporter of Japanese steel wire strand to the United States, Mitsui & Co., Ltd. (Mitsui), and the periods December 1, 1985 through November 30, 1987, and December 1, 1987 through November 30, 1988.

Analysis of Comments Received

We invited interested parties to comment on the preliminary results. We received a comment from the petitioners.

Comment: The petitioners question the Department's decision to apply a zero percent estimated cash deposit rate to future entries of steel wire strand for any new exporters or manufacturers. Rather, they argue, we should apply the 15.8 percent rate found for Mitsui in this review. The zero rate is derived from an administrative review of the period December 1, 1980 through November 30, 1982, a period five years prior to the current review. That zero rate was subsequently applied in two administrative reviews covering the periods December 1, 1982 through November 30, 1985 (51 FR 30894 (1986); 54 FR 4373 (1987)).

This review of Mitsui covers the period ending November 1988 and, as such, 15.8 percent is the most recent rate for exports of Japanese strand. That Mitsui's last rate was a best information available (BIA) rate (due to deficiencies and delays in Mitsui's submission of data in the prior review) should not affect the Department's decision about the most appropriate rate to apply to future entries from other producers or exporters. In such circumstances, it unfairly penalizes petitioners to assume that a BIA rate applied to a respondent in the most recent review is somehow different from a rate calculated based on pricing data submitted by the respondent in the most recent review. As a matter of policy, it is reasonable to apply the most current rate to future entries from any company not previously reviewed. Whether that rate was determined based on pricing data submitted by the respondent in the most recent review, or was a BIA rate based on the best information the Department had, should be legally irrelevant in determining the future cash deposit rate for new exporters.

Department's Position: We disagree. It is inappropriate to base future deposit rates for companies not previously reviewed on a BIA rate. (See, e.g., Brass Sheet and Strip from Canada; Final Results of Antidumping Duty Administrative Review (55 FR 31414, August 2, 1990)). It is our standard practice to use the highest rate for a responding firm with shipments in the current or most recent period reviewed as the all-other rate. For this review, in accordance with our general practice, we determined future estimated cash deposits based upon the highest non-BIA rate for a firm with shipments in the most recent review period. The most recent review for a firm with shipments was the period December 1, 1980 through November 30, 1982. (See Steel Wire Strand for Prestressed Concrete from Japan; Final Results of Antidumping Duty Administrative Review and Revocation in Part (51 FR 30894, August 29, 1986)). Thus, as the petitioners stated, the zero deposit rate used in this review for all others is taken from a review five years prior to the present review. However, the source of the BIA rate of 15.8 percent for Mitsui is the less-than-fair-value investigation, a period 10 years prior to this present review.

Final Results of Review

Based on our analysis of the comment received and as a result of our review, we determine that for the consecutive periods between December 1, 1985 and November 30, 1988, the final results of review are unchanged from the preliminary results. Since Mitsui had no shipments of merchandise subject to the finding, we determine a dumping margin of 15.80 percent based on the final results of the last adminstrative review with shipments.

Furthermore, the following deposit requirements will be effective upon publication of these final results of administrative review for all shipments of steel wire strand for prestressed concrete from Japan entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rate for Mitsui will be that established in the final results of this administrative review; (2) for merchandise exported by manufacturers or exporters not covered in this review but covered in previous reviews or in the original less-than-fair-value investigation, the cash deposit rate will continue to be the rate published in the most recent final results or determination for which the manufacturer or exporter received a company-specific rate; and (3) the cash deposit rate for any future entries from all other manufacturers or exporters who are not covered in this or prior administrative reviews and who are unrelated to the reviewed firm or any previously reviewed firm will be zero percent. This is the most current non-BIA rate for any firm in this proceeding.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: December 17, 1991.

Francis J. Sailer,

Acting Assistant Secretary for Import Administration.

[A-588-015]

Television Receiving Sets, Monochrome and Color, From Japan; Final Scope Ruling

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Final scope ruling.

SUMMARY: On March 9, 1989, the Department of Commerce Received a request to exclude hand-held, portable televisions with liquid crystal display screens under six inches in size from the antidumping duty order on television receiving sets, monochrome and color, from Japan.

On January 30, 1990, we published a preliminary scope ruling that found such merchandise to be within the scope of the subject antidumping order, and invited comments from the public.

After reviewing the comments received, we reaffirm our preliminary determination that hand-held, portable televisions with liquid crystal display screens under six inches in size are within the scope of the antidumping order on television receiving sets, monochrome and color, from Japan.

EFFECTIVE DATE: December 26, 1991.

FOR FURTHER INFORMATION CONTACT: Melissa Skinner or Amy Beargie, Office of Antidumping Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-4851.

SUPPLEMENTARY INFORMATION:

Background

In 1971, the U.S. Tariff Commission (predecessor of the International Trade Commission (ITC)) conducted an injury investigation with regard to Japanese television imports into the United States. As part of the investigation, the Commission defined the imported product as:

> television sets from Japan [that] cover the broad range of types and sizes sold in the U.S. market. Both monochrome and color receivers in nearly all screen sizes are imported into the United States from Japan in large volumes.

36 FR 4576 (March 9, 1971). The final injury determination encompassed virtually all TVs without mentioning any specific characteristics.

VOL
56
ISS
248
DE
26
1991
UMI

The Treasury Department (the pre-1980 administering authority) published a corresponding antidumping determination which contained a similarly broad product description, "television receiving sets, monochrome and color, from Japan." 34 FR 4597 (March 10, 1971). That finding served as both the final notice in the sales at less than fair value investigation and the antidumping duty order.

In June 1979, the Treasury Department ruled that the subject antidumping order applies to any unit which is generally capable of receiving a broadcast television signal and producing a video image. In all succeeding reviews of this finding conducted by the Department of Commerce (the Department), the following definition of the scope has been consistently applied:

> Television sets include, but are not limited to, units known as projection television, receiver monitors, kits (containing all parts necessary to assemble a complete television receiver) and subassemblies containing the components necessary to receive a broadcast television signal and produce a video image. Not included are monitors not capable of receiving a broadcast television signal . . . and subassemblies not containing the components essential for receiving a broadcast television signal and producing a video image.

Final Results of Administration Review: Television Receiving Sets, Monochrome and Color, from Japan, 46 FR 30163 (February 13, 1981).

Three prior determinations are relevant to the instant scope review. On July 10, 1984, Casio Computer Co., Ltd. (Casio) filed a request with the Department to exclude the Casio TV–10, a small-screen liquid crystal display television (LCD TV), from the scope of the subject order. In response to Casio's request, the Department defined that "(t)he Casio TV–10 is capable of receiving a broadcast television signal and producing a video image, and is thus within the scope of the finding on television receiving sets from Japan." Letter to Harold Evans from Leonard M. Shambon, Director, Office of Compliance (June 24, 1985).

On December 5, 1986, Matsushita Electric Industrial Co., Ltd. (Matsushita) filed a request with the Department to exclude model CT–333S—a portable combination unit consisting of an LCD TV receiver and an AM/FM stereo radio—from the scope of the subject order.

On June 18, 1987, the Department notified Matsushita of its determination that model CT–333S is within the scope of the subject antidumping order. The Department based its determination on the four criteria set forth in *Diversified Products Corp.* v. *United States*, 6 CIT 155, 572 F. Supp. 883 (1983). Letter to Charles H. Bayar from Timothy N. Bergan, Director, Office of Compliance (June 18, 1987).

On May 11, 1987, various parties (the Casio Group) filed a request with the ITC to modify the antidumping order on Japanese television receivers to exclude LCD TVs from the scope thereof. After conducting an investigation, the ITC ruled that LCD TVs are the same like product as other television receivers. Liquid Crystal Display Television Receivers from Japan, USITC Pub. No. 2042 (December 1987) at 1.

On March 9, 1989, the Department received a request to exclude hand-held, portable televisions with LCD screens under six inches in size, from the antidumping order on television receiving sets, monochrome and color, from Japan. The request was filed on behalf of Casio Computer Co., Ltd., Casio, Inc., Citizen Watch Co., Ltd., Hitachi, Ltd., Hitachi Sales Corporation of America, Hitachi Sales Corporation of Hawaii, Inc., Matsushita Electrical Industrial Co., Ltd., Matsushita Electric Corporation of America, NEC Corporation, NEC Home Electronics (USA), Inc., Seiko Epson Corporation, Toshiba Corporation, and Toshiba America, Inc. (the Requesting Parties).

Although we received various comments on the request, we were unable to consider those submitted by U.S. firms that were not interested parties within the meaning of section 771(9) of the Tariff Act of 1930, as amended (the Tariff Act). As a result of the significant interest in the request, we found it appropriate to provide an opportunity for wider participation in this proceeding. Therefore, we published a preliminary ruling that the subject merchandise was within the scope of the order and invited comments from the public. 55 FR 3075 (January 30, 1990).

We received comments opposing exclusion from Zenith Electronics Corporation (Zenith comments of March 1, 1990) and Thomson Consumer Electronics, Inc. (Thomson comments of February 26, 1990), both domestic manufacturers of television receivers. The Requesting Parties and Sharp Electronics Corporation, a U.S. subsidiary of a Japanese manufacturer of televisions, submitted comments supporting exclusion. (Requesting Parties' comments of February 28, 1990 and Sharp comments of March 1, 1990). We also received comments supporting exclusion from Corning Incorporated (Corning comments of March 1, 1990), a domestic manufacturer of specialty glass used in the manufacture of LCDs.

Criteria

For purposes of determining whether the merchandise in question is within the scope of the antidumping duty order on television receiving sets, monochrome and color, from Japan, we referred to § 353.29 of the Department's regulations on antidumping scope determinations. 19 CFR 353.29 (1990).

On matters concerning the scope of an antidumping duty order, our primary bases on determining whether a product is covered by such an order are the descriptions of the product contained in the petition, the initial investigation, and the prior determinations of the Department and the International Trade Commission. If these descriptions are not dispositive, the Department refers to the remaining provisions of § 353.29, as appropriate. In this case, the parties requesting exclusion contend that LCD TVs are later-developed products and therefore a scope ruling should be based on the criteria contained in § 353.29(h), which provides:

> (h) Later-developed products—(1) In general. For purposes of determining whether a product developed after an antidumping investigation is initiated (hereafter in this paragraph referred to as the "later-developed merchandise") is within the scope of an order, the Secretary will consider whether:
>
> (i) The later-developed product has the same general physical characteristics as the merchandise with respect to which the order was originally issued (hereafter in this paragraph referred to as the "earlier merchandise");
>
> (ii) The expectations of the ultimate purchasers of the later-developed product are the same as of the earlier merchandise;
>
> (iii) The ultimate use of the earlier merchandise and the later-developed product are the same;
>
> (iv) The later-developed product is sold through the same channels of trade as the earlier merchandise; and
>
> (v) The later-developed product is advertised and displayed in a manner similar to the earlier merchandise.

19 CFR 353.29(h)(1). With respect to later-developed products which incorporate a significant technological advance or significant alteration of an earlier product, prior to issuing a ruling to include products within the scope of an order pursuant to § 353.29(h), the Secretary will notify the Commission in writing of the proposing inclusion in accordance with section 781(e) of the Tariff Act of 1930, as amended, 19 U.S.C. 1677j(e). See also 19 CFR 353.29(d)(7)(iii).

Further, the statute provides that the Department may not exclude later-developed products from an order merely because the products:

> (i) Are classified under a tariff classification other than that identified in the petition or the Secretary's prior notices during the proceeding; or
>
> (ii) Permit the purchaser to perform additional functions, unless such additional functions constitute the primary use of the products and the cost of the additional functions constitute more than a significant portion of the total cost of production of the products.

19 U.S.C. 1677j(d)(2) and 19 CFR 353.29(h)(2).

Documents from the underlying proceeding deemed relevant by the Department to the scope of the outstanding order were made a part of the record in the instant scope review. In completing its analysis, the Department considered any written arguments that interested parties submitted within the specified time limits. Documents that were not presented to the Department or placed by it on the record do not constitute part of the administrative record attendant to this scope proceeding.

Arguments

The Requesting Parties base their arguments for exclusion of small-screen LCD TVs on the criteria set forth in the later-developed merchandise provision of the Omnibus Trade and Competitiveness Act of 1988 (the 1988 Act), and claim that the Department is not free to ignore this legal standard, as it did in the preliminary scope ruling. (Requesting Parties at 2.) The Requesting Parties state that there is no question that small-screen LCD TVs were developed after the issuance of the subject antidumping order. (Requesting Parties at 3.) As a result, the Department committed a legal error by basing its preliminary scope ruling on an obsolete definition of a television and ignoring the criteria set forth in the 1988 Act. (Requesting Parties at 3.) According to the Requesting Parties, small-screen LCD TVs have different physical characteristics and end uses, move through different channels of trade, give rise to different consumer expectations, and are displayed and advertised in a manner different than conventional televisions with cathode ray tubes (CRTs). (Requesting Parties at 4–5.) As a result, the Requesting Parties claim that hand-held, portable LCD TVs must be excluded from the scope of the subject order pursuant to the criteria set forth in the 1988 Act.

Sharp and Corning claim that Corning, a U.S. manufacturer of the fusion-formed flat glass currently used in the production of LCD televisions, is being injured by the application of the antidumping order to small-screen LCD TVs. Sharp states that it has decided not to import small-screen LCD televisions from Japan because of the adverse economic effects of antidumping duties, and contends that other companies have been similarly affected. (Sharp at 1.) Since LCD TVs are not currently produced in the United States, Sharp supports Corning's contention that demand for Corning's fusion-formed flat glass has fallen as a result of the application of the antidumping order to small-screen LCD TVs from Japan, and argues that demand in Japan for Corning's glass would increase if small-screen LCD televisions were excluded from the scope of the order. (Sharp at 2.)

Corning renews its October 10, 1989 request for a review under section 751(b) of the Tariff Act. Corning cites five changed circumstances: the development of fusion-formed flat glass; the invention of small-screen LCD TVs; the emergence of Corning as the supplier of choice for Japanese manufacturers of small-screen LCD TVs; the failure of U.S. television manufacturers to develop LCD technology; and the restrictive effects of the antidumping order on imports of small-screen LCD TVs containing glass manufactured by Corning. (Corning at 2.) Corning contends that, as a result of these circumstances, the application of the antidumping order to small-screen LCD TVs causes it considerable harm, and fails to benefit the domestic industry which does not produce such merchandise. (Corning comments of October 10, 1989 at 2.)

Corning offers to modify the request to exclude only LCD TVs with the following characteristics: A screen size of four inches or less, color picture, portable, self-powered, and containing fusion-formed flat glass manufactured by Corning. (Corning at 3.) Corning states that it has offered to narrow the scope of its request for a changed-circumstances review in an attempt to address concerns that it claims were expressed informally by the domestic industry. (Corning at 3.) Corning believes that modification of its request for a changed-circumstances review will allow the Department to act affirmatively on its request as a result of no interest by the domestic industry. (Corning at 3.)

The Requesting Parties support Corning's request for a changed-circumstances review. According to the Requesting Parties, Corning fully supports the exclusion of small-screen LCD TVs from the scope of the order, despite the fact that it has been a longstanding supporter of the domestic television industry. (Corning at 5.) Requesting Parties argue that the statute does not specify that requests for review under section 751(b) of the Tariff Act must be made by an interested party. (Requesting Parties at 6.) However, if the Department reaffirms that Corning lacks standing to request such a review, the Requesting Parties adopt Corning's request for a changed-circumstances review as their own. (Requesting Parties at 6.)

Zenith and Thomson support the Department's preliminary determination not to exclude small-screen LCD televisions from the scope of the finding.

Zenith states that the Department has determined that LCD TVs are within the scope of the finding of three separate occasions, and that the ITC has also ruled that there is no justification for removing LCD TVs from the scope of the order. (Zenith at 2–3) Thomson supports the determinations by the Department, the ITC, and the Treasury Department that any unit generally capable of receiving a broadcast signal and producing a video image is a television covered by the antidumping order. Thomson states that consistent application of this standard has served both the domestic industry and the U.S. government well, and that the scope of the subject order should not be narrowed by a decision to exclude small-screen LCD TVs. (Thomson at 1.)

Zenith argues further that the Requesting Parties have improperly used the "later-developed products" provision of the 1988 Act as the basis for their request. According to Zenith, both the legislative history and the title of the section of the legislation containing this provision clearly demonstrate that it was not intended to provide respondents with an alternative means of requesting that a product be excluded from the scope of an order, but rather was intended to be a means of clarifying and codifying the Department's authority to take action against the circumvention of orders. (Zenith at 17–18.)

Zenith also notes that the criteria specified in this provision parallel those set forth in *Diversified Products Corp.* v. *United States*, 6 CIT 155, 572 F. Supp. 883 (1983). According to Zenith, the Department denied one previous request for exclusion of small-screen LCD TVs from the scope of the subject order using these criteria, and refused to even consider these criteria in denying another exclusion request because the existing scope descriptions were sufficient to make a ruling. (Zenith at 20.) Zenith states that the ITC also relied on similar criteria in determining that the scope should not be modified to exclude small-screen LCD televisions. (Zenith at 20.) Zenith argues that, as a result of these determinations, small-

VOL
56
ISS
248
DE
26
1991
UMI

screen LCD TVs are not later-developed products within the meaning of the statute. (Zenith at 19–20.)

Zenith claims that the only motive behind the instant request is the Japanese manufacturers' desire to dominate the U.S. television market. (Zenith at 22.) Zenith contends that, despite their assertions to the contrary, Japanese manufacturers are developing televisions with larger LCD screens that will compete directly with conventional televisions (Zenith at 22.) However, the development of television incorporating larger LCDs is dependent on the successful application of LCD technology to small-screen televisions, which is currently hindered by the high cost of manufacturing LCDs. (Zenith at 23.) According to Zenith, Japanese manufacturers must increase production of small-screen LCDs to reduce costs to a profitable level. (Zenith at 24.) If small-screen LCD TVs were to be excluded from the scope of the subject order, Zenith fears that Japanese manufacturers would be able to reduce costs by increasing production of small-screen LCD TVs, thereby generating the revenue and gaining the manufacturing knowledge required to pursue the development of larger LCD TVs. (Zenith at 22–24.)

Finally, Zenith states that Corning lacks standing to request a changed-circumstances review because it is not a manufacturer of televisions and, therefore, is not an interested party in this proceeding, as defined in the statute. (Zenith at 21.) Zenith argues, therefore, that the Department should reject Corning's request for a changed-circumstances review, as it did in the preliminary scope ruling.

Analysis

The purpose of a scope ruling is to determine whether the product in question is of the same class or kind of merchandise as other products known to be within the scope of an antidumping order. The motives of the parties requesting a scope ruling and the economic effects of an order on a particular domestic industry or firm are irrelevant to a scope proceeding. As a result, we have not considered those factors in making this final scope ruling.

In the Department's preliminary scope ruling we found it unnecessary to examine LCD TVs in light of the later-developed products provision, finding instead that the product descriptions are dispositive. In doing so, we relied exclusively on the first prong of the Department's two-prong scope test; i.e., the descriptions of the merchandise contained in the petition, the initial investigation, and the determinations of the Department and the ITC. 19 CFR 353.29(i)(1). An examination of LCD TVs indicates that this technology did not exist at the time the original product descriptions were developed in 1971. As such, the Department has concluded that it would be inappropriate to rely solely on the first prong of its scope test, and that application of the second prong, the later-developed products provision, is appropriate in this case. Accordingly, we have analyzed the subject merchandise pursuant to the later-developed guidelines set forth in 19 U.S.C. 1677j(d)(1) and 19 CFR 353.29(h).

Pursuant to § 353.29(h)(1), the Department must consider the physical characteristics, expectations of the ultimate purchaser, ultimate use, channels of trade, and manner of advertising and display when making a scope determination involving a later-developed product. (See Criteria section, *supra* for text of 19 CFR 353.29(h)(1).)

Physical Characteristics

The Requesting Parties argue that the inherent features of LCD technology lead to differences in physical characteristics between TVs incorporating small-screen LCDs and those incorporating CRTs.

According to the Requesting Parties, the subject LCD TVs are much thinner and more compact than conventional and small-screen CRT TVs due to the additional depth required to accommodate the shape of the CRT. (Requesting Parties at 11–12). Furthermore, the Requesting Parties state that most currently available hand-held LCD TVs weigh less than one pound, which contrasts sharply with the substantially heavier CRT TVs. (Requesting Parties at 12.) Finally, the Requesting Parties note that the subject LCD TVs require relatively little power, thereby allowing for the incorporation of an internal power source or the use of a portable power supply. (Requesting Parties at 13.) In contrast, CRT TVs require 110 volts and an AC electrical wall outlet in order to function. (Requesting Parties at 13.)

Although the Department acknowledges that LCD and CRT TVs differ in terms of size, weight, and power requirements, the two product types share several significant physical characteristics. Specifically, as noted in the language contained in the ITC report on the investigation of LCD TVs:

> [D]ifferent types of televisions require different types of parts and components, but, in general, all must have a tuner, intermediate frequency amplifier, audio processing circuitry, color separation circuitry, speaker(s), and a display device, as well as a housing, user controls, power source, and an antenna.

Liquid Crystal Display Television Receivers from Japan, USITC Pub. No. 2042 (December 1987) at A–8. These components are essential to the fundamental use and purpose of a TV—receiving a broadcast signal and producing a video image. Because LCD TVs feature the components enumerated above, the Department concludes that such similarity in physical characteristics significantly outweighs the aforementioned differences raised by the Requesting Parties.

Expectations of Ultimate Purchasers

The Requesting Parties argue that the ultimate purchasers of a hand-held LCD TVs expect to be able to carry the unit on their person in order to view it anywhere and anytime. (Requesting Parties at 13.) Such expectations of portability are discernible from the miniature size and light weight of the unit, the product's ability to function on an internal or mobile power source, and the fact that the LCD TV produces a brighter picture in an outdoor setting. (Requesting Parties at 14.) Despite these advantages, the Requesting Parties note that hand-held LCD TVs have limited broadcast reception, and that, given the small screen size, they can only be viewed by one person at close range for limited periods of time. (Requesting Parties at 14–15.) Conversely, CRT TVs function better indoors and can be viewed for extended periods of time by several people at once. (Requesting Parties at 14–15.) Accordingly, the Requesting Parties assert that purchaser expectations conform to the inherent limitations of hand-held LCD TVs.

We acknowledge that purchasers of small-screen LCD TVs may expect to use the product outdoors or in other locations in which use of a larger CRT TV is impractical. However, the setting in which the subject LCD TV is viewed does not lead to significantly different expectations among the ultimate purchasers of the two product types. Rather, as discussed below, the ultimate purchaser of a small-screen LCD TV expects to use it for the same purpose as the purchaser of a CRT TV.

Ultimate Use

The Requesting Parties state that the unique characteristics of small-screen LCD TVs result in ultimate uses different from those associated with conventional TVs. Because the subject LCDs are compact, lightweight, and can function from an internal or mobile power source, the Requesting Parties claim that the subject product is truly portable. (Requesting Parties at 13–14.) Conversely, CRT TVs function better indoors and are mostly used for stationary, in-home viewing due to their comparatively heavier frame and standard power requirements. (Requesting Parties at 13–14.) Therefore, in terms of ultimate use, it is the feature of portability which, in the opinion of the Requesting Parties, distinguishes hand-held LCD TVs from CRT TVs.

We recognize that LCD technology allows for a lighter and more compact product than those TVs which incorporate CRTs. However, certain CRT TVs are also portable and operate from a self-contained power source. Therefore, a difference in degree of portability does not significantly distinguish LCD TVs from CRT TVs. Moreover, even assuming portability did constitute a distinction, such portability would not distinguish the product in terms of ultimate use. Both product types are ultimately used to view programming received from a broadcast signal. The feature of portability is rendered meaningless without the capability of broadcast reception and, therefore, the fact that a viewer might be outdoors does not alter the fundamental use of the product. Accordingly, we determine that hand-held LCD TVs and CRT TVs have the same ultimate use. The similarity in ultimate use also generates similarity in the purchaser expectations discussed *supra*.

Channels of Trade

According to the Requesting Parties, small-screen LCD TVs can be sold through such diverse retail outlets as drugstores, jewelry stores, and specialty gift shops, which do not sell CRT TVs. (Requesting Parties at 16.)

Although we acknowledge that the distribution channels for LCD TVs may be broader than those for CRT TVs, we also recognize that the two product types share similar channels of trade. First, notwithstanding the fact that LCD TVs may be sold at various outlets, both products are principally distributed through retail channels to consumers. Second, in its investigation of LCD TVs, the ITC found that "some retailers advertise both CRT TVs (of many sizes) and LCD TVs together." Liquid Crystal Display Television Receivers from Japan, USITC Pub. No. 2042 (December 1987) at A–17. In light of these similarities, the Requesting Parties have not furnished sufficient evidence that LCD TVs have significantly different channels of trade then CRT TVs.

Advertising and Display

The Requesting Parties claim that small-screen LCD TVs are exhibited in counter display cases along with watches and small appliances, and are advertised with specialty gifts items, thereby differentiating them from CRT TVs, which are normally advertised and displayed with major consumer electronics products. (Requesting Parties at 16–17.)

Once again, we acknowledge that the size and relative novelty of small-screen LCD TVs may, in certain circumstances, allow them to be advertised and displayed in a different manner than CRT TVs. However, as with the channels of trade, the Requesting Parties have offered no evidence that the manner in which small-screen LCD TVs are advertised and displayed differs significantly from that of CRT TVs. Moreover, the evidence cited above in reference to channels of trade also shows that small-screen LCD TVs can be advertised and displayed along with CRT TVs.

Summary

In the foregoing analysis, we applied the five criteria set forth in section 781(d) of the Tariff Act to determine whether small-screen LCD TVs are within the scope of the antidumping order on television receivers, monochrome and color, from Japan. Based on this analysis, we determine that such LCD TVs are similar to conventional television receivers in terms of physical characteristics, purchaser expectations, ultimate use, channels of trade, and manner of advertisement and display. Accordingly, we reaffirm our preliminary ruling that hand-held, portable televisions with LCD screens under six inches in size are within the scope of the antidumping duty order on televisions, monochrome and color, from Japan.

ITC Consultation

Pursuant to § 353.29(d)(7)(iii), the Department must notify the ITC of the proposed inclusion of a later-developed product which incorporates a significant technological advance or significant alteration of an earlier product. Because the subject LCD TVs is a later-developed product which incorporates a significant technological advance or significant alternation of an earlier product, we contacted the ITC and informed the Commission of the proposed inclusion of the subject merchandise. By letter of December 11, 1991, the ITC advised the Department that it "does not believe that consultation between Commerce and the Commission are necessary."

Changed Circumstances Determination

We reaffirm our preliminary determination that Corning is not an interested party within the meaning of the statute and, therefore, lacks standing to request a changed circumstances review. However, since the Requesting Parties have adopted Corning's request as their own, and since they are interested parties within the meaning of the statute, we have examined the alleged changed circumstances.

The alleged changed circumstances that involve the development and production of LCD televisions have been the subject of previous rulings by both the Department and the ITC. We determined on June 24, 1985, that small-screen LCD televisions are within the scope of the antidumping finding on Japanese televisions, and the ITC, in Investigation 751–TA–14, determined that small-screen LCD TVs are the same like product as other televisions, despite the fact that the domestic industry does not produce LCD TVs. (USITC Pub. 2042, December 1987.) The argument concerning the alleged failure of the domestic industry to develop LCD technology for use in television receivers has already been addressed by the ITC. As a result of the determination by the ITC, as well as the Department's previous rulings, we find that the development of small-screen LCD TVs does not constitute a changed circumstance within the meaning of the statute.

The other alleged changed circumstances include the development of fusion-formed flat glass, the emergence of Corning as the supplier of choice of this type of glass for Japanese manufacturers of small-screen LCD televisions, and the restriction on imports of small-screen LCD televisions made in Japan caused by the antidumping finding. Although we acknowledge that these conditions could have potentially adverse effects on Corning, we find that they are not changed circumstances within the meaning of the statute with respect to the order on Japanese television receivers.

Corning narrowed the scope of its original request in the hope that the domestic industry would express no interest in the continued application of the subject order to small-screen LCD TVs. However, members of the domestic industry opposed modification of the finding to exclude televisions with LCD screens under four inches in size during the ITC's 1987 investigation of LCD TVs, and have not made an affirmative statement of no interest since them.

Therefore, we determine that changed circumstances sufficient to warrant a review do not exist, and we deny the request for review under section 751(b) of the Tariff Act.

BILLING CODE 3510-DS-M

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of opportunity to request administrative review of antidumping or countervailing duty order, finding, or suspended investigation.

Background

Each year during the anniversary month of the publication of an antidumping or countervailing duty order, finding, or suspension of investigation, an interested party as defined in section 771(9) of the Tariff Act of 1930 may request, in accordance with § 353.22 or 355.22 of the Commerce Regulations, that the Department of Commerce ("the Department") conduct an administrative review of that antidumping or countervailing duty order, finding, or suspended investigation.

Opportunity to Request a Review

Not later than January 31, 1992, interested parties may request administrative review of the following orders, findings, or suspended investigations, with anniversary dates in December for the following periods:

	Period
Antidumping Duty Proceedings:	
Brazil: Brass Sheet & Strip, (A-351-603)	01/01/91-12/31/91
Canada: Brass Sheet & Strip, (A-122-601)	01/01/91-12/31/91
Canada: Color Picture Tubes, (A-122-605)	01/01/91-12/31/91
France: Anhydrous Sodium Metasilicate, (A-427-098)	01/01/91-12/31/91
Japan: Color Picture Tubes, (A-588-609)	01/01/91-12/31/91
Singapore: Color Picture Tubes, (A-559-601)	01/01/91-12/31/91
Spain: Potassium Permanganate, (A-469-007)	01/01/91-12/31/91
South Africa: Low-Fuming Brazing Copper Wire and Rod, (A-791-502)	01/01/91-12/31/91
Taiwan: Certain Stainless Steel Cooking Ware (A-583-603)	01/01/91-12/31/91
The Peoples Republic of China: Potassium Permanganate, (A-570-001)	01/01/91-12/31/91
The Republic of Korea: Brass Sheet & Strip, (A-580-603)	01/01/91-12/31/91
The Republic of Korea: Color Picture Tubes, (A-580-605)	01/01/91-12/31/91
The Republic of Korea: Stainless Steel Cooking Ware, (A-580-601)	01/01/91-12/31/91
Suspension Agreements:	
Canada: Potassium Chloride, (A-122-701)	01/01/91-12/31/91
Canada: Certain Red Raspberries, (A-122-504)	01/01/91-12/31/91
Colombia: Miniature Carnations, (A-301-601)	01/01/91-12/31/91
Colombia: Roses and Other Cut Flowers, (A-301-003)	01/01/91-12/31/91
Costa Rica: Certain Fresh Cut Flowers, (A-223-601)	01/01/91-12/31/91
Hungary: Truck Trailer Axle and Brake Assemblies, (A-437-001)	01/01/91-12/31/91
Countervailing Duty Proceedings:	
Argentina: Non-Rubber Footwear, (A-357-0052)	01/01/91-12/31/91
Brazil: Brass Sheet & Strip, (A-351-604)	01/01/91-12/31/91
Ecuador: Fresh Cut Flowers, (A-331-601)	01/01/91-12/31/91
The Republic of Korea: Stainless Steel Cookware, (A-580-602)	01/01/91-12/31/91
Spain: Stainless Steel Wire Rod, (A-469-004)	01/01/91-12/31/91

Thailand: Butt-weld Pipe Fittings, (A-549-804)	01/01/91-12/31/91

In accordance with § 353.22(a) of the Commerce regulations, an interested party may request in writing that the Secretary conduct an administrative review of specified individual producers or resellers covered by an order, if the requesting person states why the person desires the Secretary to review those particular producers or resellers. If the interested party intends for the Secretary to review sales of merchandise by a reseller (or a producer if that producer also resells merchandise from other suppliers) which was produced in more than one country of origin, and each country of origin is subject to a separate order, then the interested party must state specifically which reseller(s) and which countries of origin for each reseller the request is intended to cover.

Seven copies of the request should be submitted to the Assistant Secretary for Import Administration, International Trade Administration, room B-099, U.S. Department of Commerce, Washington, DC 20230. Further, in accordance with § 353.31 of the Commerce Regulations, a copy of each request must be served on every party on the Department's service list.

The Department will publish in the **Federal Register** a notice of "Initiation of Antidumping (Countervailing) Duty Administrative Review", for requests received by January 31, 1992.

If the Department does not receive by January 31, 1992 a request for review of entries covered by an order or finding listed in this notice and for the period identified above, the Department will instruct the Customs Service to assess antidumping or countervailing duties on those entries at a rate equal to the cash deposit of (or bond for) estimated antidumping or countervailing duties required on those entries at the time of entry, or withdrawal from warehouse, for consumption and to continue to collect the cash deposit previously ordered.

This notice is not required by statute, but is published as a service to the international trading community.

Dated: December 18, 1991.

Joseph A. Spetrini,

Deputy Assistant Secretary for Compliance.

Carbon Steel Wire Rod From Saudi Arabia; Preliminary Results of Countervailing Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of countervailing duty administrative review.

SUMMARY: The Department of Commerce had conducted an administrative review of the countervailing duty order on carbon steel wire rod from Saudi Arabia. We preliminarily determine that total bounty or grant to be 0.01 percent *ad valorem* for the period January 1, 1990 through December 31, 1990. In accordance with 19 CFR 355.7, any rate less than 0.50 percent *ad valorem* is *de minimis*. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: December 26, 1991.

FOR FURTHER INFORMATION CONTACT: Philip Pia or Michael Rollin, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION:

Background

On February 1, 1991, the Department of Commerce (the Department) published in the **Federal Register** a notice of "Opportunity to Request Administrative Review" (54 FR 5102) of the countervailing duty order on carbon steel wire rod from Saudi Arabia. During February 1991, Georgetown Steel Corporation, Northstar Steel Texas, Inc., Raritan River Steel Company and Atlantic Steel Company, petitioners in this proceeding, and the Saudi Iron Steel Company (HADEED), the respondent, requested an administrative review covering the period January 1, 1990 through December 31, 1990. We initiated the review on March 22, 1990 (55 FR 10842). The Department has now conducted this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act).

Scope of Review

Imports covered by the review are shipments of Saudi carbon steel wire rod. Carbon steel wire rod is a coiled, semi-finished, hot-rolled carbon steel product of approximately round solid cross section, not under 0.20 inch nor over 0.74 inch in diameter, tempered or not tempered, treated or not treated, not manufactured or partly manufactured, and valued over or under 4 cents per pound. Such merchandise is classifiable under item numbers 7213.20.00, 7213.31.30, 7213.31.60, 7213.39.00, 7213.41.30, 7213.41.60, 7213.49.00 and 7213.50.00 of the Harmonized Tariff Schedule (HTS). The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers the period January 1, 1990 through December 31, 1990, and four programs. During the review period, there was only one Saudi producer and/or exporter of the subject merchandise, the Saudi Iron and Steel Company (HADEED).

Analysis of Programs

(1) Public Investment Fund Loan to HADEED

The Public Investment Fund (PIF) was established in 1971 as one of five specialized credit institutions set up by the Government of Saudi Arabia. The other specialized credit institutions are the Saudi Industrial Development Fund (SIDF), the Saudi Agricultural Bank the Saudi Credit Bank and the Real Estate Development Fund. These specialized credit institutions are funded completely by the Saudi government and were the only sources of long-term financing in Saudi Arabia during the review period.

The respondent has contended that PIF and SIDF are "integrally linked" as defined in § 355.43(b)(6) of the Department's proposed regulations. Should the Department determine that PIF and SIDF are integrally linked, they would be considered together in determining whether loans provided by these two entities are limited to a specific enterprise or industry, or group of enterprises or industries. We stated in the final results of the previous review that documented information on the inception of the two funds that explicitly ties PIF and SIDF as complementary parts of an overarching governmental policy directive had not been presented. In this review, we conducted a verification of the factual information presented in the respondent's questionnaire responses regarding the issue of integral linkage. We examined all of the documentation presented by respondents at verification which included various annual reports of the administering agencies of both funds, Saudi Five-Year Development Plans, as well as verbal and written statements of Saudi government officials. Nothing we examined contained specific references indicating that PIF and SIDF had been conceived as complementary programs or that any direct connection existed between the two funds at either the operational or administrative levels. Therefore, we preliminarily determine that PIF and SIDF are not integrally linked as defined by the Department's regulations. We will continue to consider PIF as a single and separate program.

The PIF was established in 1971 to provide financing to large-scale, commercially productive projects that have some equity participation of the Saudi government. PIF by-laws exclude firms or projects without Saudi government equity from applying to the PIF for financing. Because the application of the government equity participation requirement has limited benefits under this program to a small number of enterprises, we have previously determined that PIF loans are provided to a specific group of enterprises in Saudi Arabia, and that the PIF loan to HADEED is counteravailable to the extent that it is given on terms inconsistent with commercial considerations (see, Carbon Steel Wire Rod from Saudi Arabia; Final Results of Countervailing Duty Administrative Reviews, 56 FR 46158 (September 24, 1991)). The evidence reviewed by the Department does not indicate a need to revise this conclusion.

The loan contract between the PIF and HADEED requires that HADEED pay a variable commission, or interest, on the outstanding balance based on its profitability in the preceding semester. During 1990, HADEED made repayments of loan principal and commission on its PIF loan.

Using the two sources for medium- to long-term industrial financing available in Saudi Arabia, private commercial banks and the SIDF, we have constructed a composite interest rate benchmark for 1990 to determine whether the PIF loan to HADEED was on terms inconsistent with commercial considerations. Since the PIF loan covered 60 percent of HADEED's total project costs, for our benchmark we assumed that HADEED could have financed 50 percent of its total project costs with a SIDF loan (the maximum eligibility for a company with at least 50 percent Saudi ownership) and the remaining 10 percent of project costs with a Saudi commercial bank loan. The SIDF loan portion of the benchmark was used because, of all the specialized credit institutions, it is the only fund besides the PIF which lends to industrial or manufacturing projects and, thus, is most representative of what HADEED would otherwise have to pay for long-term loans in Saudi Arabia. We used the 2 percent flat rate of interest applied to SIDF loans in 1990. The commercial

VOL
56
ISS
248
DE
26
1991
UMI

bank portion of the benchmark was based on the average Saudi Interbank Offering Rate (SIBOR) for 1990, plus a one-quarter of one percent spread. Because the composite benchmark for 1990 is less than the actual commission, or interest rate, that HADEED paid on its PIF loan in 1990, we preliminary determine that the PIF loan was not inconsistent with commercial considerations for the period January 1, 1990 through December 31, 1990.

(2) SABIC's Transfer of SULB Shares to HADEED

The Saudi Arabian Basic Industries Corp. (SABIC) was established in 1976 by the Government of Saudi Arabia as an industrial development corporation. SABIC has been the majority shareholder in HADEED since the steel company's inception in 1979. In 1982, SABIC acquired all of the remaining shares in the Steel Rolling Company (SULB), a Saudi producer of steel reinforcing bars of which SABIC had been the majority shareholder since 1979. In December 1982, SABIC decided to transfer its shares in SULB to HADEED in return for new HADEED stock. Through the stock transfer, SULB became a wholly-owned subsidiary of HADEED.

In Final Affirmative Countervailing Duty Determination and Countervailing Duty Order; Carbon Steel Wire Rod From Saudi Arabia, (51 FR 4206; February 3, 1986), we determined that HADEED was unequityworthy in December 1982 and that the transfer of SABIC's shares in SULB to HADEED in exchange for additional shares in HADEED was inconsistent with commercial considerations.

To determine the benefit to HADEED from the acquisition of SULB, we used our rate of return shortfall methodology. Because no information was available on the 1990 national average rate of return on equity in Saudi Arabia, we used the 1990 annual average rates of return on U.S. direct investment in Saudi Arabia. Based on the most recent data available from the U.S. Commerce Department's Bureau of Economic Analysis, the 1990 average rate of return on investment was 21.61 percent. We computed the rate of return shortfall by taking the difference between this figure and the 1990 rate of return on equity in HADEED. Because HADEED's rate of return on equity in 1990 was greater than average rate of return on U.S. direct investment in Saudi Arabia in 1990, the rate of return shortfall for the review period is zero. On this basis, we preliminary determine the benefit from this equity infusion to be zero for the period January 1, 1990 through December 31, 1990.

(3) Preferential Provision of Equipment to HADEED

Under a lease/purchase arrangement, the Royal Commission for Jubail and Yanbu built for HADEED two bulk ship unloaders at the Jubail industrial port for unloading iron ore, and constructed a conveyor belt system for transporting iron ore from the pier to HADEED's plant in the Jubail Industrial Estate. When construction of these facilities was completed in 1982, the Commission transferred custody to HADEED under a lease/purchase agreement.

As originally planned, the bulk ship unloader and conveyor system was built to serve both HADEED and an adjacent plant in the Jubail Industrial Estate. The second plant was not built, however, leaving HADEED as the sole user of this equipment. The terms of the lease/purchase agreement require that HADEED must repay the equipment and construction costs plus a two-percent fee for the cost of money in 20 annual installments. The annual payments are stepped, with the lowest payment levels occurring at the beginning and the highest payment levels occurring at the end of the 20-year period.

In the Saudi Wire Rod (op. cit.), we found that the two-percent cost-of-money fee is the Commission's standard charge for recovery of costs on other facilities in the Jubail Industrial Estate. Of the projects examined, a urea berthside handling system built for the exclusive use of another company located in the Estate was the most comparable to HADEED's ship unloader and conveyor system. Therefore, we compared the repayment schedule for HADEED's ship unloader and conveyor system to the repayment schedule for a berthside handling system. Although both agreements carried the standard cost-of-money fee, we found that HADEED's end-loaded, stepped repayment schedule was more advantageous than the annuity-style repayment schedule on the berthside handling system. Therefore, we determine that HADEED's ship unloader and conveyor system was provided on preferential terms. Moreover, because the equipment is used exclusively by HADEED, we find that it is provided to a specific enterprise and, thus, confers a bounty or grant.

To calculate the benefit, we compare the principal and fees being paid in each year by HADEED to the principal and fees that would be paid under the repayment schedule used for the berthside handling system. We allocated the sum of the present values of the differences in the two repayment schedules over 20 years, using a two-percent discount rate. The resulting benefit for 1990 was divided by HADEED's total sales in 1990. On this basis, we preliminarily determine the benefit from the preferential provision of the unloader and conveyor system to be 0.01 percent ad valorem for the period January 1, 1990 through December 31, 1990.

(4) Income Tax Holiday for Saudi Joint Venture Projects

Duly licensed foreign partners of joint-venture companies in Saudi Arabia are granted a 10-year income tax holiday under article 7 of the Foreign Capital Investment Law of January 1, 1979. The exemption is granted automatically to any licensed industrial or agricultural project provided that Saudi capital shall not be less than twenty-five percent of the total capital of the project and that such percentage shall be maintained throughout the period of exemption. This tax holiday applies only to income taxes that are owed by the foreign share of the enterprise. The Saudi partners of both foreign joint-ventures or wholly national firms are liable for zakat, an Islamic alms tax, for which there are no exemptions.

In this review, information on the universe of firms eligible for the exemption, never before presented in any foreign reviews, was provided in the questionnaire responses on a timely basis. During verification, we reviewed the information provided in the responses. This information shows that of 369 foreign joint-ventures licensed and operating in the Kingdom during 1990, a large number of them, 322 or 87 percent, were eligible for the income tax holiday. The actual percentage of firms which made use of the automatic exemption in 1990 may differ from this, depending on the profit (loss) experience of each firm. Those firms comprising the 87 percent represent virtually all sectors of Saudi industry including food and beverage, textiles, apparel, wood products, paper products, printing and publishing, chemicals, petroleum products, plastics, rubber products, nonmettalic mineral products, metal industries, and other manufacturing. Based on these facts, we preliminarily determine that the income tax holiday is not limited to a specific enterprise or industry, or group of enterprises or industries, and therefore, is not countervailable.

Preliminary Results of Review

As a result of the review, we preliminarily determine the total bounty or grant to be 0.01 percent *ad valorem* for the period January 1, 1990 through December 31, 1990. In accordance with 19 CFR 355.7, any rate less than 0.50 percent *ad valorem* is *de minimis*.

Therefore, the Department intends to instruct the Customs Service to liquidate, without regard to countervailing duties, all shipments of this merchandise exported on or after January 1, 1990 and exported on or before December 31, 1990.

The Department also intends to instruct the Customs Service to waive cash deposits of estimated countervailing duties, as provided by section 751(a)(1) of the Tariff Act, on all shipments of this merchandise entered, or withdrawn from warehouse, for consumption, on or after the date of publication of the final results of this review.

Parties to the proceeding may request disclosure of the calculation methodology and interested parties may request a hearing not later than 10 days after the date of publication of this notice. Interested parties may submit written arguments in case briefs on these preliminary results within 30 days of the date of publication. Rebuttal briefs, limited to arguments raised in case briefs, may be submitted seven days after the time limit for filing the case brief. Any hearing, if requested, will be held seven days after the scheduled date for submission of rebuttal briefs. Copies of case briefs and rebuttal briefs must be served on interested parties in accordance with 19 CFR 355.38(e).

Representatives of parties to the proceeding may request disclosure of proprietary information under administrative protective order no later than 10 days after the representative's client or employer becomes a party to the proceeding, but in no event later than the date the case briefs, under 19 CFR 355.38(c), are due.

The Department will publish the final results of this administrative review, including the results of its analysis of issues raised in any case or rebuttal brief or at a hearing.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 355.22.

Dated: December 17, 1991.

Francis J. Sailer,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Minority Business Development Agency

Business Development Center Applications: Tucson, AZ

AGENCY: Minority Business Development Agency, Commerce.

ACTION: Notice.

SUMMARY: In accordance with Executive Order 11625, the Minority Business Development Agency (MBDA) is soliciting competitive applications under its Minority Business Development Center (MBDC) Program to operate an MBDC for approximately a 3-year period, subject to Agency priorities, recipient performance, and the availability of funds. The cost of performance for the first budget period (12 months) is estimated at $165,000 in Federal funds and a minimum of $29,118 in non-Federal (cost sharing) contributions. Cost-sharing contributions may be in the form of cash contributions, client fees, in-kind contributions or combinations thereof. The period of performance will be from May 1, 1992 to April 30, 1993. The MBDC will operate in the Tucson, Arizona Geographic Service Area.

The award number for this MBDC will be 09-10-92006-01.

The funding instrument for the MBDC will be a cooperative agreement. Competition is open to individuals, non-profit and for-profit organizations, State and local governments, American Indian Tribes and educational institutions.

The MBDC program is designed to provide business development services to the minority business community for the establishment and operation of viable minority businesses. To this end, MBDA funds organizations that can identify and coordinate public and private sector resources on behalf of minority individuals and firms; offer a full range of management and technical assistance; and serve as a conduit of information and assistance regarding minority business.

Applications will be evaluated initially by regional staff on the following criteria: The experience and capabilities of the firm and its staff in addressing the needs of the business community in general and, specifically, the special needs of minority businesses, individuals and organizations (50 points); the resources available to the firm in providing business development services (10 points); the firm's approach (techniques and methodologies) to performing the work requirements included in the application (20 points); and the firm's estimated cost for providing such assistance (20 points). An application must receive at least 70% of the points assigned to any one evaluation criteria category to be considered programmatically acceptable and responsive. The selection of an application for further processing by MBDA will be made by the Director based on a determination of the application most likely to further the purpose of the MBDC program. The application will then be forwarded to the Department for final processing and approval, if appropriate. The Director will consider past performance of the applicant on previous Federal awards.

MBDCs shall be required to contribute at least 15% of the total project cost through non-Federal contributions. To assist them in this effort, MBDCs may charge client fees for management and technical assistance (M&TA) rendered. Based on a standard rate of $50.00 per hour, MBDCs will charge client fees at 20% of the total cost for firms with gross sales of $500,000 or less, and 35% of the total cost for firms with gross sales of over $500,000.

MBDCs performing satisfactorily may continue to operate after the initial competitive year for up to 2 additional budget periods. MBDCs with year-to-date "commendable" and "excellent" performance ratings may continue to be funded for up to 3 or 4 additional budget periods, respectively. Under no circumstances shall an MBDC be funded for more than 5 consecutive budget periods without competition. Periodic reviews culminating in year-to-date quantitative and qualitative evaluations will be conducted to determine if funding for the project should continue. Continued funding will be at the discretion of MBDA based on such factors as an MBDC's performance, the availability of funds and Agency priorities.

Awards under this program shall be subject to all Federal and Departmental regulations, policies, and procedures applicable to Federal assistance awards.

In accordance with OMB Circular A-129, "Managing Federal Credit Programs," applicants who have an outstanding account receivable with the Federal Government may not be considered for funding until these debts have been paid or arrangements satisfactory to the Department of Commerce are made to pay the debt.

Applicants are subject to Governmentwide Debarment and Suspension (Nonprocurement) requirements as stated in 15 CFR part 26.

The Departmental Grants Officer may terminate any grant/cooperative agreement in whole or in part at any

VOL
56
ISS
248
DE
26
1991
UMI

time before the date of completion whenever it is determined that the MBDC has failed to comply with the conditions of the grant/cooperative agreement. Examples of some of the conditions which can cause termination are failure to meet cost-sharing requirements; unsatisfactory performance of MBDC work requirements; and reporting inaccurate or inflated claims of client assistance or client certification. Such inaccurate or inflated claims may be deemed illegal and punishable by law.

On November 16, 1988, Congress enacted the Drug-Free Workplace Act of 1988 (Pub. L. 100–690, title V, subtitle D). The statute requires contractors and grantees of Federal agencies to certify that they will provide a drug-free workplace. Pursuant to these requirements, the applicable certification form must be completed by each applicant as a precondition for receiving Federal grant or cooperative agreement awards.

"Certification for Contracts, Grants, Loans, and Cooperative Agreements" and SF–LLL, the "Disclosure of Lobbying Activities" (if applicable) is required in accordance with section 319 of Public Law 101–121, which generally prohibits recipients of Federal contracts, grants, and loans from using Legislative Branches of the Federal Government in connection with a specific contract, grant or loan.

CLOSING DATE: The closing date for submitting an application is February 3, 1992. Applications must be postmarked on or before February 3, 1992.

Proposals will be reviewed by the Atlanta Regional Office. The mailing address for submission is: Atlanta Regional Office, Minority Business Development Agency, U.S. Department of Commerce, 401 West Peachtree Street NW., suite 1930; Atlanta, Georgia 30308–3516, 404/703–3300.

A pre-application conference to assist all interested applicants will be held at the following address and time: San Francisco Regional Office, Minority Business Development Agency, U.S. Department of Commerce, 221 Main Street, room 1280, San Francisco, California 94105, January 15, 1992 at 10 a.m.

FOR FURTHER INFORMATION CONTACT: Xavier Mena, Regional Director, San Francisco Regional Office at 415/744–3001.

SUPPLEMENTARY INFORMATION: Anticipated processing time of this award is 120 days. Executive Order 12372, "Intergovernmental Review of Federal Programs," is not applicable to this program. Questions concerning the preceding information, copies of application kits and applicable regulations can be obtained from the San Francisco Regional Office.

11.800 Minority Business Development (Catalog of Federal Domestic Assistance).

Dated: December 19, 1991.

Maggie L. Faulkner,

Chief, Business Development Specialist.

BILLING CODE 3510–21–M

National Oceanic and Atmospheric Administration

International Whaling Commission; Meetings

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of meetings.

SUMMARY: NOAA makes use of an Interagency Committee to assist in preparing for meetings of the International Whaling Commission (IWC). This notice sets forth guidelines for participating on the Committee and a tentative schedule of meetings and other important dates.

DATES: See **SUPPLEMENTARY INFORMATION** for dates of scheduled meetings.

ADDRESSES: Recommendations to the U.S. Commissioner to the IWC and nominations to the U.S. delegation to the IWC should be sent to: Dr. John A. Knauss, United States Commissioner to the International Whaling Commission, Department of Commerce, Herbert C. Hoover Building, 14th and Constitution Avenue, NW., Washington, DC 20230, with a copy sent to Becky Rootes, Office of International Affairs, rm. 7276, NMFS, 1335 East-West Highway, Silver Spring, Maryland 20910.

FOR FURTHER INFORMATION CONTACT: Becky Rootes, Office of International Affairs, National Marine Fisheries Service, Department of Commerce, Washington, DC 20910. Phone: (301) 713–2276.

SUPPLEMENTARY INFORMATION: The Secretary of Commerce is charged with the responsibility of discharging the obligations of the United States under the International Convention for the Regulation of Whaling, 1946. This authority has been delegated to the Under Secretary of NOAA. The U.S. Commissioner to the IWC has primary responsibility with the Secretary for the preparation and negotiation of U.S. positions on international issues concerning whaling and for all matters involving the IWC. He is staffed by the Department of Commerce, and assisted by the Department of the Interior, the Marine Mammal Commission, and other interested agencies.

Each year NOAA conducts a series of meetings and other actions to prepare for the annual meeting of the IWC which is held in the summer. The major purpose of the preparatory meetings is to provide for participation in the development of policy by members of the public and non-governmental organizations interested in whale conservation. NOAA believes that this participation is important for the effective development and implementation of U.S. policy concerning whaling, and such participation is and shall continue to be, a prerequisite to the establishment of U.S. negotiating positions for IWC meetings.

Because the meetings discuss U.S. negotiating positions, the substance of the meetings must be kept confidential. For example, proposed position papers that may be circulated at a meeting for discussion cannot be removed from the meeting site and must be collected at the close of each meeting.

Any person with an identifiable interest in United States whale conservation policy may participate, but NOAA reserves the authority to inquire about the interest of any person who appears at a meeting and to determine the appropriateness of that person's participation. Persons who represent foreign governments may not attend. These stringent measures are necessary to promote the candid exchange of information and protect the confidentiality of U.S. negotiating positions. Such measures are a necessary basis for the relatively open process of preparing for IWC meetings that characterizes current practice.

The tentative schedule of meetings and deadlines, including those of the IWC and deadlines for the preparation of position papers during 1992 is as follows:

January 21, 1992—Interagency Committee Meeting to continue preparations for the 1991 IWC meetings. Interested persons who are unable to attend are welcome to submit comments. Recommendations to the U.S. Commissioner should be sent to: The United States Commissioner to the International Whaling Commission, at the above address.

February 28, 1992—Nominations for the U.S. Delegation to the May IWC meetings are due to the U.S. Commissioner, with a copy to Becky Rootes at the address above. All persons wishing to be considered pursuant to the U.S. Commissioner's recommendation to the Department of State concerning the composition of the Delegation should ensure that nominations are received by this date. Prospective Congressional advisors to the Delegation should contact the Department of State directly.

March 30, 1992—Tentative Interagency Committee meeting to review United States agenda changes for forwarding to the IWC Secretariat.

May 1, 1991—Publish in the Federal Register the Agency views on (1) the current population levels and annual net recruitment rate of bowhead whales, (2) the nature and extent of the aboriginal/subsistence need for bowhead whales, (3) the level of take of bowhead whales that is consistent with provisions of the IWC aboriginal/subsistence whaling management scheme and (4) a list of documents reviewed by NOAA and used by the Administrator in formulating these views.

May 21, 1992—Tentative Interagency Committee Meeting date for finalizing preparations for 1991 IWC meetings.

Persons who would like to be included in IWC Interagency Committee meeting may contact Becky Rootes at the address or telephone number provided above to obtain meeting times and location.

(16 U.S.C. 1801 *et seq.*)

Henry R. Beasley,

Director, Officer of International Affairs.

BILLING CODE 3510–22–M

Patent and Trademark Office

Advisory Commission on Patent Law Reform; Open Meeting

AGENCY: Patent and Trademark Office, Department of Commerce.

ACTION: Notice of open meeting.

SUMMARY: The Commission was chartered on August 15, 1990, to advise the Secretary of Commerce on the state of and need for any reform in the United States patent system, as well as the need for any changes in the U.S. laws relating to the enforcement and the licensing of U.S. patents. This meeting will provide an opportunity for discussion of the findings and draft recommendations of the Advisory Commission.

DATES: The Advisory Commission on Patent Law Reform will meet on January 16 and 17, 1992, from 9:30 a.m. to 5 p.m.

PLACE: Crystal Park Two, suite 912, 2121 Crystal Drive, Arlington, Virginia 22202.

MATTERS TO BE CONSIDERED:

1. Presentations on draft recommendations from the four Working Groups of the Advisory Commission, followed by discussion.

2. Set administrative agenda for further Advisory Commission proceedings and report preparation.

BACKGROUND: On March 28, 1991, the Advisory Commission held its first meeting and created four working groups to address an agenda of thirteen issues. Public input was solicited on each issue through an invitation for public comment published on May 16, 1991 (56 FR 22702) and comments were received through September 3, 1991. During the last meeting of the Advisory Commission, the public input discussed, and a fourteenth issue, the Secrecy Order Program, was taken up and assigned to Working Group II. the current meeting will provide an opportunity for the four Working Groups of the Advisory Commission to present draft recommendations and findings on the fourteen issues, and to permit discussion of those findings and draft recommendations.

STATUS: The meeting will be open to public observation. Approximately 30 seats have been reserved for the public on a first-come, first-served basis. Efforts will be made to accommodate all requests for attendance; however, to ensure that adequate seating will be available, parties wishing to attend should request a reservation by Janaury 14, 1992. Reservations for attendance should be made through the contact person indicated below. If time permits, the Chairperson may allow oral comments or questions. Written comments and suggestions will be accepted before or after the meeting on any of the agenda matters.

CONTACT PERSON FOR FURTHER INFORMATION: E. R. Kazenske, Executive Assistant to the Commissioner, Box 15, Patent and Trademark Office, Washington, DC 20231. Telephone: (703) 305–8600.

Dated: December 19, 1991.

Harry F. Manbeck, Jr.,

Assistant Secretary of Commerce and Commissioner of Patents and Trademarks.

BILLING CODE 6820–44–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of Import Limits for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in the Dominican Republic

December 19, 1991.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs adjusting limits.

EFFECTIVE DATE: December 23, 1991.

FOR FURTHER INFORMATION CONTACT: Naomi Freeman, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377–4212. For information on the quota status of these limits, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 566–5810. For information on embargoes and quota re-openings, call (202) 377–3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limits for certain categories are being adjusted, variously, for swing, carryover and recrediting of unused carryforward.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 55 FR 50756, published on December 10, 1990; and 56 FR 60101, published on November 27, 1991). Also see 56 FR 22402, published on May 15, 1991.

The letter to the Commissioner of Customs and the actions taken pursuant

to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 19, 1991.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on May 9, 1991, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton and man-made fiber textile products, produced or manufactured in the Dominican Republic and exported during the twelve-month period which began on June 1, 1991 and extends through May 31, 1992.

Effective on December 23, 1991, you are directed to amend further the directive dated May 9, 1991 to adjust the limits for the following categories, as provided under the terms of the current bilateral agreement between the Governments of the United States and the Dominican Republic:

Category	Adjusted twelve-month limit [1]
338/638	575,469 dozen.
339/639	573,474 dozen.
340/640	551,382 dozen.
342/642	375,857 dozen.
347/348/647/648	1,133,972 dozen of which not more than 778,655 dozen shall be in Categories 347/348 and not more than 714,610 dozen shall be in Categories 647/648.
633	78,748 dozen.
644	405,327 numbers.

[1] The limits have not been adjusted to account for any imports exported after May 31, 1991.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

Amendment to the Export Licensing System for Certain Cotton, Wool, Man-Made Fiber, Silk Blend and Other Vegetable Fiber Textiles and Textile Products Produced or Manufactured in the People's Republic of China

December 20, 1991.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs providing for the use of export licenses/commercial invoices printed on red paper.

EFFECTIVE DATE: January 1, 1992 and April 1, 1992.

FOR FURTHER INFORMATION CONTACT: Janet Heinzen, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The Governments of the United States and the People's Republic of China have agreed to further amend the existing export licensing system to provide for the use of export licenses/commercial invoices, issued by the Government of the People's Republic of China, for shipments of goods produced or manufactured in China and exported from China on or after April 1, 1992, which are printed on a red guilloche patterned background paper. The red form replaces the blue licenses/invoices currently in use. The visa stamp is not being changed at this time. The Chinese Embassy in Washington will continue to issue the white pre-printed replacement visa now in use.

Textile products which are produced or manufactured in China and exported from China during the period January 1, 1992 through March 31, 1992 may be accompanied by visas printed on either blue or red background paper.

See 49 FR 7269, published on February 28, 1984; and 52 FR 28741, published on August 3, 1987.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 20, 1991.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on February 23, 1984, as amended, by the Chairman, Committee for the Implementation of Textile Agreements. That directive establishes an export licensing system for certain cotton, wool, man-made fiber, silk blend and other vegetable fiber textiles and textile products, produced or manufactured in the People's Republic of China.

Effective on April 1, 1992, you are directed to amend further the directive dated February 23, 1984 to provide for the use of export licenses/commercial invoices issued by the Government of the People's Republic of China which are printed on red guilloche patterned background paper. The red form will replace the blue form currently being used. The Chinese Embassy in Washington will continue to issue the white pre-printed replacement visa now in use.

To facilitate implementation of this amendment to the export licensing system, I request that, effective on January 1, 1992, you permit entry of textile products, produced or manufactured in China and exported from China during the period January 1, 1992 through March 31, 1992, for which the Government of the People's Republic of China has issued either a blue or red export license/commercial invoice.

Goods exported on and after April 1, 1992 must be accompanied by an export visa issued by the Government of the People's Republic of China on the red invoice form only.

Shipments entered according to this directive which are not accompanied by an appropriate export visa shall be denied entry and a new visa must be obtained.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-F

Denial of Participation in the Special Access and Special Regime Programs

December 20, 1991.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs denying the right to participate in the Special Access and Special Regime Programs.

EFFECTIVE DATE: April 1, 1992.

FOR FURTHER INFORMATION CONTACT: Lori E. Goldberg, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-3400.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The Committee for the Implementation of Textile Agreements (CITA) has determined that Encro Macclenny Products is in violation of the requirements set forth for participation in the Special Access and Special Regime Programs.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs, effective on April 1, 1992, to deny Encro Macclenny Products the right to participate in the Special Access and Special Regime Programs, for a period of one year, beginning April 1, 1992 and ending March 31, 1993. In addition, for the period April 1, 1992 through March 31, 1993, U.S. Customs will not sign ITA-370P forms for export of U.S.-formed and cut fabric for Encro Macclenny Products.

Requirements for participation in the Special Access Program are available in **Federal Register** notices 51 FR 21208, published on June 11, 1986; 52 FR 26057, published on July 10, 1987; and 54 FR 50425, published on December 6, 1989.

Requirements for participation in the Special Regime Program are available in **Federal Register** notices 53 FR 15724, published on May 3, 1988; 53 FR 32421, published on August 25, 1988; 53 FR 49346, published on December 7, 1988; and FR 50425, published on December 6, 1989.

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

December 20, 1991.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: The purpose of this directive is to notify you that the Committee for the Implementation of Textile Agreements has determined that Encro Macclenny Products is in violation of the requirements for participation in the Special Access and Special Regime Programs.

Effective for entry on or after April 1, 1992, you are directed to prohibit Encro Macclenny Products from further participation in the Special Access and Special Regime Programs for a period of one year, beginning April 1, 1992 and ending March 31, 1993. Goods accompanied by Form ITA-370P which are presented to U.S. Customs for entry under the Special Access and Special Regime Programs will no longer be accepted. In addition, for the period April 1, 1992 through March 31, 1993, you are directed not to sign ITA-370P forms for export of U.S.-formed and cut fabric for Encro Macclenny Products.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

DEPARTMENT OF DEFENSE

Public Information Collection Requirement Submitted to OMB for Review

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Title, Applicable Form, and Applicable OMB Control Number: Report of Medical History, SF 93 (with overprint).

Type of Request: New Collection.

Average Burden Hours/Minutes Per Response: 20 minutes.

Responses Per Respondent: One.

Number of Respondents: 500,000.

Annual Burden Hours: 166,667.

Annual Responses: 500,000.

Needs and Uses: Title 10 U.S.C. 505 and 510 established minimum standards for enlistment, appointment, and induction into the Armed Forces. Medical standards were developed which address the acceptability of persons and define deviations from these standards. Those medical fitness standards provide sufficient detail to insure uniformity in the physical qualifications of candidates for enlistment, appointment, and induction into the military service.

Affected Public: Individuals or households.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain a benefit.

OMB Desk Office: Mr. Edward C. Springer. Written comments and recommendations on the proposed information collection should be sent to Mr. Springer at Office of Management and Budget, Desk Officer, room 3235, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. William P. Pearce. Written request for copies of the information collection proposal should be sent to Mr. Pearce, WHS/DIOR, 1215 Jefferson Davis Highway, suite 1204, Arlington, Virginia 22202-4302.

Dated: December 20, 1991.

L.M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Office of the Secretary

Defense Science Board Task Force on Feasibility of Employing Pit Reuse in the Production of W88 Warheads for Trident II

ACTION: Notice of advisory committee meetings.

SUMMARY: The Defense Science Board Task Force on Feasibility of Employing Pit Reuse in the Production of W88 Warheads for Trident II will meet in closed session on January 7-8, 1992 at Science Applications International Corporation, McLean, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Acquisition on scientific and technical matters as they affect the perceived needs of the Department of Defense. At this meeting the Task Force will investigate the feasibility of reusing existing plutonium pits in the production of Mark 5 Reentry Body/W88 warheads for deployment in Trident II SLBMs.

In accordance with section 10(d) of the Federal Advisory Committee Act, Public Law No. 92-463, as amended (5 U.S.C. app. II, (1988)), it has been determined that this DSB Task Force meeting, concerns matters listed in 5 U.S.C. 552b(c)(1) (1988), and that accordingly this meeting will be closed to the public.

Dated: December 20, 1991.

Linda M. Bynum,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3910–01–M

Defense Logistics Agency

Cooperative Agreements Revised Procedures

AGENCY: Defense Logistics Agency, DoD.

ACTION: Cooperative agreements; proposed revised procedures.

SUMMARY: This proposed revised procedure implements chapter 142, title 10, United States Code, as amended, which authorizes the Secretary of Defense, acting through the Director, Defense Logistics Agency (DLA), to enter into cost sharing cooperative agreements to support procurement technical assistance programs established by state and local governments, private nonprofit organizations, Tribal organizations, and Indian-owned economic enterprises. Subpart III of this issuance establishes the administrative procedures proposed to be implemented by DLA to enter into such agreements for this purpose.

DATES: Comments will be accepted until January 13, 1992. Proposed effective date: January 20, 1992.

FOR FURTHER INFORMATION CONTACT: Sim Mitchell, Program Manager, Office of Small and Disadvantaged Business Utilization (DLA–UM), Defense Logistics Agency, Alexandria, VA 22304–6100, Telephone (703) 274–6471.

I. Background Information

The Department of Defense (DoD) has developed programs designed to expand its industrial base and increase competition for its requirements for goods and services, thereby reducing the cost of maintaining a strong national security. Its efforts to increase competition in the private sector have been supplemented by many state and local governments and other entities where the interest in improving the business climate and economic development in their communities is compatible with these DoD objectives. To assist in furthering this mutual interest, a Cooperative Agreement Program was established in which DoD shares the cost of establishing new and/or maintaining procurement technical assistance (PTA) programs being conducted by state and local governments, private nonprofit entities, Tribal organizations, and Indian-owned economic enterprises.

The Cooperative Agreement Program was established by the Fiscal Year (FY) 1985 DoD Authorization Act, Public Law 98–525. It amended title 10, United States Code, by adding chapter 142 and authorizing the Secretary of Defense, acting through the Director, Defense Logistics Agency (DLA), to enter into cost sharing cooperative agreements with state and local governments, other nonprofit entities, Tribal organizations and Indian economic enterprises (hereafter referred to as eligible entities as defined in section 3 of this procedure) to establish and conduct PTA programs during FY 85. The Cooperative Agreement Program continues under title 10, United States Code, as amended.

The U.S. Congress authorized a total of $9,000,000 to support the program during FY 92. Of this total, $600,000 is available for Indian programs only.

In cases where the area being or to be serviced by the eligible entity encompasses more than one Defense Contract Management District's (DCMD) area of geographic cognizance, eligible entities will submit their proposals to the DCMD having cognizance over the preponderant part of the area being or to be serviced. Only one proposal will be accepted from a single eligible entity. The names, addresses and state or geographic areas under the cognizance of the DCMD Associate Directors of Small Business are at Encl 1.

Additional limitations placed on these funds are:

(a) DoD cost sharing shall not exceed 50% of the net cost of a single program. In no event shall the DoD share of the net program cost (NPC) exceed $150,000 for programs providing less than statewide coverage and $300,000 for programs providing statewide coverage.

(b) For the Indian Program, DoD share of NPC shall not exceed 75% or $150,000, whichever is less, for programs providing services on reservation(s) within one BIA service area. For programs providing services to 100% of the reservations within one BIA service area and at least 50% of the reservations of at least one additional BIA service area, DoD share of NPC shall not exceed 75% or $300,000, whichever is less.

(c) Eligible entities cannot subcontract more than 10% of their total program costs for private profit and/or nonprofit consulting services to support the program.

(d) These limitations may be modified by the Headquarters (HQ) DLA Cooperative Agreement Policy Committee (hereafter referred to as Policy Committee) as necessary to comply with legislative or other requirements.

DoD presently provides PTA to business firms through its network of Small Business Specialists located in industrial centers around the country. To the extent resources are available, the DCMD Associate Directors of Small Business (hereafter referred to as Associate Director) located in these industrial centers, will be available to provide: (1) Eligible entities such assistance as necessary to facilitate full understanding of the solicitation requirements; (2) general guidance in preparing proposals; and (3) orientation and training assistance to PTA cooperative agreement recipients' staff during program implementation.

PTA given to clients for marketing their goods and services to Federal agencies other than DoD will not be considered when evaluating proposals. However, eligible entities are encouraged to consider supplementing their DoD program to include these Federal marketing opportunities for business firms located in the area being or to be serviced.

The purpose of the proposed revised procedure is to make available to all eligible entities the prerequisites, policies and procedures which will govern the award of cooperative agreements by DLA. Also, this procedure establishes the guidelines which will govern the administration of cooperative agreements.

Although this procedure will affect all eligible entities desiring to enter into a DLA awarded cooperative agreement, DLA has determined that this procedure does not involve a substantial issue of fact or law, and that it is unlikely to have a substantial or major impact on the Nation's economy or large numbers of individuals or businesses. This determination is based on the fact that the proposed cooperative agreement procedure implements policies already published by the Office of Management and Budget pursuant to chapter 63, title 31, United States Code, Using Procurement Contracts and Grant and Cooperative Agreements. In addition DLA cooperative agreements will be entered into pursuant to the authorities and restrictions contained in the annual DoD Authorization and Appropriation Acts. Therefore, public hearings were not conducted.

II. Other Information

The language contained in the current cooperative agreement procedure limited the period of coverage to the FY 91 Program in that it addressed the FY 91 Authorization Act requirements in specific terms, including the exact dollar amounts of funding applicable to the Program. The proposed revision to the procedure will provide general guidance for cooperative agreements entered into by the DLA and will become a permanent document for the duration of the FY 92 program.

Comments are invited on the procedure. Comments should be submitted to the Defense Logistics Agency, ATTN: DLA–UM, Cameron Station, Alexandria, VA 22304–6100. Comments received after 13 January 1992 may not be considered in formulating revisions to the Procedure.

Cooperative Agreement Procedure

III. Proposed Revision to DLA Procedure—Cooperative Agreements

3–1 Policy

A. Proposals for cooperative agreements are obtained through the issuance of a DLA Solicitation for Cooperative Agreement Proposals, hereafter referred to as a SCAP. The contents of this procedure shall be incorporated, in whole or in part, into the solicitation to establish administrative requirements to execute and administer DLA awarded cooperative agreements. The SCAP may include additional administrative requirements that are not included in this procedure.

B. Cooperative agreements will be awarded on a competitive basis as a result of the SCAP. It is DLA's policy to encourage fair and open competition when awarding cooperative agreements. However, DoD through DLA, reserves the right to make or deny an award to an applicant if competition for DoD goods and services would be enhanced.

C. Letters of support and recommendation from Members of Congress are not necessary and will not be considered in the evaluation and selection of proposals to receive cooperative agreement awards.

D. The solicitation inviting the submission of proposals shall be given the widest practical dissemination. A copy of the SCAP will be provided to all known eligible entities and those that request copies after the solicitation is issued. All eligible entities that have advised DCMD of their interest in submitting a proposal under the SCAP will be invited to participate in preproposal conferences. The preproposal conferences will be held at the locations designated in the solicitation approximately 30 calendar days prior to the SCAP's closing date.

E. Proposals will not be accepted from applicants who apply as co-equal partners or co-equal joint ventures. Only one organization can take the lead and primary responsibility for the program.

F. Proposals will not be accepted from applicants who propose to provide less than county or equivalent coverage (i.e. parish, borough). For example, if an applicant proposes to service any part of a county, the applicant must service the entire county.

G. The SCAP shall not be considered to be an offer made by DoD. It will not obligate DoD to make any awards under this Program.

H. DoD is not responsible for any monies expended or expenses incurred by applicants prior to the award of a cost sharing cooperative agreement However, actual expenses incurred by FY 92 award recipients to participate in a preproposal conference may be reimbursed under the FY 92 cooperative agreement award subject to the provisions of the applicable cost principles.

I. DoD's share of an eligible entity's proposal and award recipient's net program cost (NPC) shall not exceed 50%, unless the eligible entity/recipient proposes to cover a distressed area. If the eligible entity/recipient proposes to cover a distressed area (as defined in paragraph 3–3, subparagraph K below), the DoD share may be increased to an amount not to exceed 75%. In no event shall DoD's share of NPC exceed $150,000 for programs providing less than statewide coverage or servicing reservation(s) within one BIA service area, and $300,000 for programs providing statewide coverage (defined in paragraph 3–3, subparagraph AG below) or servicing 100% of the reservations within one BIA service area and at least 50% of the reservations within one other BIA service area (defined in paragraph 3–3, subparagraph AE below).

J. During each FY for which funding is authorized for the PTA program, at least one cooperative agreement for either an existing program or a new start shall be awarded within the geographical cognizance of each DCMD. If the area being or to be serviced by an eligible entity encompasses more than one DCMD's area of geographical cognizance, the eligible entity should submit its application to the DCMD having cognizance over the majority of the counties or equivalent coverage (i.e. parishes, boroughs) it is servicing or proposes to service. Only one application will be accepted from a single eligible entity.

K. The award of a cooperative agreement shall not in any way obligate DoD to enter into a contract or give preference for the award of a contract to a concern or firm which becomes a client of a DLA cooperative agreement recipient.

L. The period of performance for a cooperative agreement shall cover a twelve month period.

M. To assist DoD in achieving its socioeconomic goals, applicants and cooperative agreement recipients must give special emphasis to assisting small disadvantaged business (SDB) firms which are participating or will be participating in DoD contracting opportunities. A concerted effort must be made by recipients to identify SDB firms and provide them with marketing and technical assistance, particularly where such firms are referred for assistance by a DoD component.

N. Award recipients are not required to obtain or retain private profit and/or nonprofit consulting services. Any subcontract costs being proposed for such services shall not exceed 10% of the total program cost (TPC). Subcontract costs in excess of 10% included in the eligible entity's proposal will cause the proposal to be rejected.

O. Reasonable quantities of government publications, such as "Selling to the Military," may be furnished to award recipients at no cost, subject to availability. All requests for such publications must be submitted to the cognizant Associate Director.

P. For the purpose of executing cooperative agreements, the HQ DLA Cooperative Agreement Program Manager (hereafter referred to as Program Manager) and the Associate Director are delegated the authority to execute cooperative agreements.

Q. Each cooperative agreement recipient's area of performance will be limited to the county(ies) or equivalent coverage (i.e., parish(es), borough(s)) specified in its cooperative agreement award, including modifications thereto.

R. To the extent that the annual DoD Authorization and Appropriation Acts provide for restricting some part of the total funds authorized to accommodate special socioeconomic requirements, any specific requirements related to the restricted funds which differ from this procedure will be identified in the SCAP.

S. The applicant/recipient will support the Mentor-Protege Pilot Program as required by section 831 of Public Law 101–510, "The Defense Authorization Act."

3–2 Scope.

This procedure implements chapter 142 of title 10, United States Code, as amended, and establishes procedure and guidelines for the award and administration of Cost Sharing Cooperative Agreements entered into between DLA and eligible entities. Under these agreements, financial assistance provided by DoD to recipients will cover the DoD share of the cost of establishing new and/or maintaining existing PTA programs for furnishing PTA to business entities.

3–3 Definitions.

The following definitions apply for the purpose of this procedure.

A. *Act.* The enabling legislation that authorizes the establishment and continuation of the PTA Cooperative Agreement Program each FY.

B. *Agency.* A field office of one of the twelve service area offices, as published by the Bureau of Indian Affairs (BIA), US Department of the Interior.

C. *Civil jurisdiction.* All cities with a population of at least 25,000 and all counties. Townships of 25,000 or more population are also considered as civil jurisdictions in 4 States (Michigan, New Jersey, New York, and Pennsylvania). In Connecticut, Massachusetts, Puerto Rico and Rhode Island where counties have very limited or no government functions, the classifications are done for individual towns.

D. *Client.* A recognized business entity, including a corporation, partnership, or sole proprietorship, organized for profit or nonprofit, which is small or other than small, that has the potential or is seeking to market its goods and/or services to DoD and other Federal agencies.

E. *Consultant services.* Marketing and technical assistance offered directly to cooperative agreement recipients by private nonprofit and/or profit seeking individuals, organizations or otherwise qualified business entities.

F. *Cooperative agreement.* A binding legal instrument reflecting a relationship between DLA and a cooperative agreement recipient for the purpose of transferring money, property, services or anything of value to the recipient to accomplish the requirements described in the agreement. The requirement shall be authorized by Federal statute and substantial involvement is expected between DLA and the recipient during performance of the agreement.

G. *Cooperative agreement offer/application/proposal.* An eligible entity's response to the SCAP describing its existing or planned PTA program. The offer binds the eligible entity to perform the services described in its offer if selected for an award, and upon the proposal being incorporated into the cooperative agreement award document.

H. *Cooperative agreement award recipient.* An organization receiving financial assistance directly from DLA to carry out the PTA program. The organization is the entire legal entity even if only a particular component of the entity is designated in the cooperative agreement award document.

I. *Cost matching or sharing.* The value of third party in-kind contributions and the portion of costs of a federally assisted project or program not borne by the Federal government.

J. *Direct cost.* Any cost that can be identified specifically with a particular final cost objective. No final cost objective shall have allocated to it as a direct cost any cost, if other costs incurred for the same purpose, in like circumstances, have been included in any indirect cost pool to be allocated to that or any other final cost objective.

K. *Distressed area.* The geographical area being or to be serviced by an eligible entity in providing PTA to business firms physically located within an area that:

(1) Has a per capita income of 80% or less of the State average; or

(2) Has an unemployment rate that is one percent greater than the national average for the most recent 24-month period in which statistics are available.

(3) Is a "Reservation" which includes Indian reservations, public domain Indian allotments, former Indian reservations in Oklahoma, and land held by incorporated Native groups, regional corporations, and village corporations under the provisions of the Alaska Native Claims Settlement Act.

DoD Cooperative Agreement Program. Provides assistance to eligible entities (defined by subparagraph N below) in establishing or maintaining PTA activities to help business firms market their goods and services to the DoD and other Federal government activities.

M. *Duplicate coverage.* A situation caused by two or more applicants offering to provide marketing and technical assistance to clients located within the same county(ies) or equivalent coverage (i.e., parish(es), borough(s)).

N. *Eligible entities.* Are organizations qualifying to submit a proposal under the PTA program, including:

(1) *State government.* A State of the United States, the District of Columbia, a territory or possession of the United States, an agency or instrumentality of a State, and a multi-state, regional, or interstate entity having governmental duties and powers.

(2) *Local government.* A county, municipality, city, town, township, local public authority (including any public Indian Housing agency under the United States Housing Act of 1937), school district, special district, intrastate district, council of governments (whether or not incorporated as a nonprofit corporation under State law), any other regional or interstate government entity (such as regional planning agencies), or any agency or instrumentality of a local government. The term does not include institutions of higher education and hospitals.

(3) *Private, nonprofit organizations.* Any corporation, trust, foundation, or institution which is exempt or entitled to exemption under section 501(c)(3)–(6) of the Internal Revenue Code, or which is not organized for profit and no part of the net earnings of which inure to the benefit of any private shareholder or individual.

(4) *Indian Economic enterprise.* Any Indian-owned (as defined by the Secretary of the Interior) commercial, industrial or business activity established or organized, whether or not such economic enterprise is organized for profit or nonprofit purposes: *Provided,* that such Indian ownership shall constitute not less than 51 per centum of the enterprise.

(5) *Tribal organization.* The recognized governing body of any Indian tribe; and legally established organization of Indians which is controlled, sanctioned, or chartered by such governing body, or which is democratically elected by the adult members of the Indian community to be served by such organization and which includes the maximum participation of Indians in all phases of its activities: *Provided,* that in any case where a contract is let or grant made to an organization to perform services benefiting more than one Indian tribe, the approval of each such Indian tribe shall be a prerequisite to the letting or making of such contract or grant.

O. *Existing program.* Any PTA program that was the recipient of a cooperative agreement with DLA for any two years subsequent to FY 88.

P. *Federal funds authorized.* The total amount of Federal funds obligated by the Federal government for use by the recipient.

Q. *Indian.* A person who is a member of any Indian tribe, band, group, pueblo, or community which is recognized by the Federal Government as eligible for services from the BIA and any "Native" as defined in the Alaska Native Claims Settlement Act [43 U.S.C. 1601 et seq.].

R. *Indian organization.* The governing body of any Indian tribe (as defined in subparagraph S below) or entity established or recognized by such governing body.

S. *Indian tribe.* Any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act [43 U.S.C. 1601 et seq.] which is recognized by the Federal Government as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

T. *Indirect cost.* Any cost not directly identified with a single, final cost objective, but identified with two or more final cost objectives or an intermediate cost objective. An indirect cost is not subject to treatment as a direct cost.

U *In-kind contributions/donations.* The value of noncash contributions provided by the eligible entity and non-Federal parties. Only when authorized by Federal legislation may property or services purchased with Federal funds be considered as in-kind contributions/donations. In-kind contributions/donations may be in the form of charges for real property and nonexpendable personal property and the value of goods and services directly benefiting and specifically identifiable to the project or program.

V. *Modified total cost.* Costs consisting of salaries and wages, fringe benefits, materials and supplies, services, travel, and subagreements and subcontracts up to $25,000 each.

W. *Net program cost.* The total program cost (TPC) (including all authorized sources) less any program income and/or other federal funds not authorized to be shared.

X. *New start.* An eligible entity that is not an existing program (see subparagraph O above for definition of an existing program).

Y. *Other Federal funds.* Include Federal funds such as that provided by the Job Training Partnership Act, and Federal agencies other than DoD. When authorized by statute, Federal funds received from other sources, including grants, may be used as cost sharing and/or cost matching contributions.

Z. *Per capita income.* The estimated average amount per person of total money income received during a calendar year for all persons residing in a given political jurisdiction as published by the U.S. Department of Commerce, Bureau of the Census.

AA. *Prior approval.* Written approval by the authorized official evidencing consent, as required by the cooperative agreement award document.

AB. *Procurement technical assistance (PTA).* A program organized to generate employment and improve the general economy of a locality by assisting business firms in obtaining and performing under Federal contracts.

AC. *Program income.* The gross income received by the recipient or subrecipient from cooperative agreement supported activities. It includes training fees received from other PTA centers and organizations. Such earnings exclude interest earned on advances. It may also include, but is not limited to, income from service fees, reimbursement for expenses incurred in conducting the program, sale of commodities, usage or initial fees, and royalties on patents and copyrights. It may be reported by the recipient on a cash or accrual basis, whichever is used for reporting outlays.

AD. *Reservation.* Includes Indian reservations, public domain Indian allotments, former Indian reservations in Oklahoma, and land held by incorporated Native groups, regional corporations, and village corporations under the provisions of the Alaska Native Claims Settlement Act [43 U.S.C. 1601 et seq.].

AE. *Service area.* Any of the twelve geographical regions, as published by the U.S. Department of the Interior, BIA to include: Aberdeen, Albuquerque, Anardako, Billings, Eastern, Juneau, Minneapolis, Muskogee, Navajo, Phoenix, Portland and Sacramento.

AF. *Solicitation for cooperative agreement proposals (SCAP).* A document issued by DLA/DCMDs containing provisions and evaluation factors applicable to all applicants which apply for a PTA cooperative agreement.

AG. *Statewide coverage.* A PTA program which proposes to service at least 50% of a State's counties or equivalent coverage (i.e., parishes, boroughs) and 75% of a State's labor force.

AH. *Subrecipient.* The legal entity to which a subagreement is awarded and which is accountable to the recipient of the cooperative agreement for the use of the PTA program funds for providing procurement technical assistance to business firms/clients.

AI. *Third party in-kind contributions.* Property or services which benefit the PTA cooperative agreement program and which are contributed by non-Federal third parties without charge to the recipient.

AJ. *Total program cost (TPC).* All allowable costs set forth in applicable OMB Circulars from all sources, to include in-kind contributions/donations and all income received from all sources, as a result of operating the program. Any Federal funds proposed for use in establishing or conducting the program must have prior approval for such use.

AK. Total quality management (TQM). Is both a philosophy and a set of guiding principles and practices that represent the foundation for continuously improving an organization. It applies human resources and quantitative methods to improve the material and services supplied to an organization, all the processes within an organization, and the degree to which the needs of the customer are met now and in the future. It integrates fundamental management techniques, existing improvement efforts, and technical tools in a disciplined and focused continuous improvement process. While operating under the principles of TQM, business firms/clients of the Government would tender goods and services whose quality not only meets but may exceed the requirements of the Government. Additionally, the quality of those goods and services would be continually improved by the producer to meet the future expectations of the Government.

3–4 Program Description

A. The objective of the PTA Program is to assist eligible entities in providing marketing and technical assistance to business firms/clients in selling their goods and services to DoD. Thus, the PTA program assists DoD in its acquisition goals. At the same time, it enhances the business climate and economies of the communities being served.

B. Program requirements to accomplish this objective will vary depending on location, the types of industries and business firms within the community, the level of economic activity in the community, and other factors.

C. A comprehensive PTA program should include, but not be limited to, the following:

(1) *Personnel.* Personnel qualified to counsel and advise business firms/clients regarding Federal procurement policies and procedures as they apply to both prime and subcontract opportunities. The areas of consideration should relate to:

(a) Marketing techniques and strategies;

(b) Pricing policies and procedures;

(c) Preaward procedures;

(d) Postaward contract administration;

(e) Quality assurance;

VOL 56 ISS 248 DE 26 1991 UMI

(f) Production and manufacturing;
(g) Financing;
(h) Subcontracting;
(i) Bid and proposal preparation; and
(j) Specialized acquisition requirements for such areas as construction, research and development, and data processing.

(2) *Counseling tools* The sources used or will be used by the eligible entity for implementing its PTA program. The following publications should be included:
(a) Commerce Business Daily;
(b) Federal Acquisition Regulations (FAR);
(c) DoD FAR Supplement;
(d) Commodity listings from Federal contracting activities;
(e) Federal and military specifications and standards; and
(f) Other Federal government publications.

(3) *Methods for providing PTA.* The eligible entity's procedures and plans for activating and developing the outreach program, including networking throughout the area being serviced or which the applicant plants to service. Examples of networking include:
(a) Locating assistance offices in areas of industrial concentration;
(b) Establishing data links with other organizations; and
(c) Crating data exchanges.

(4) *Performance measurement.* The program shall include a description of the method being used or to be used to periodically measure and verify the program's effectiveness. Factors to consider in establishing time phased goals and techniques for measuring performance against proposed goals shall consist of:
(a) The total number of procurement outreach conferences sponsored/participated;
(b) The total number of initial and follow-up counseling sessions and types of clients to be assisted, including size (small businesses and other than small businesses) and socioeconomic status (small disadvantaged and women-owned businesses);
(c) The total number of client applications submitted by business firms/clients for addition to Federal agency(ies) bidders mailing list(s); and
(d) The total number and value of DoD prime contract and subcontract awards received by business firms/clients, including the business firms/client's size (small businesses and other than small businesses) and socioeconomic status (small disadvantaged and women-owned businesses) resulting from assistance received through the recipient's program.
(e) The total number and value of other Federal agencies' prime contract and subcontract awards received by business firms/clients, including the business firms/client's size (small businesses and other than small businesses) and socioeconomic status (small disadvantaged and women-owned businesses) resulting from assistance received through the recipient's program.
(f) Award recipients are required to obtain appropriate data from their clients on the assistance provided to substantiate the effectiveness of the recipient's program.

D. *Fees and service charges.* In the event the applicant charges or plans to charge clients a fee or service charge, details as to the amount and basis for the fee or service charge must be described. Also, recipients shall not charge a commission, percentage, brokerage or other fee that is contingent upon the success of the client securing a Government contract. Any fees earned under the program are to be included as part of TPC.

3–5 Procedures.

A. The Program Manager will develop and prepare the SCAP. He/she will be responsible for assuring that adequate funds are made available to the DCMDs.

B. The SCAP will be approved by the Policy Committee and will be issued by DLA through each DCMD. The Policy Committee will be comprised of representatives from the HQ DLA Offices of General Counsel, Contracting, Comptroller, Congressional Affairs and Small Business. The Policy Committee will be responsible for reviewing the evaluations and recommendations of the Program Manager and the Evaluation Panel.

C. The Staff Director, Small and Disadvantaged Business Utilization will serve as the Policy Committee's Chairman. The Policy Committee is the final administrative appeal authority for disagreements between the Program Manager, Associate Director and the eligible entity and/or cooperative agreement recipient.

D. The evaluation of proposals submitted in response to the SCAP and the selection of award recipients will be conducted as detailed below:

(1). The Associate Director will perform an initial evaluation of each proposal received to determine if the proposal:
(a) Contains sufficient technical, cost and other information;
(b) Has been signed by a responsible official authorized to bind the eligible entity; and
(c) Generally meets all requirements of the SCAP. If the proposal does not meet all of the above requirements, the Associate Director will remove the applicant's proposal from further consideration for an award and promptly notify the applicant of the reason(s) for removal. The applicant's proposal will be retained with other unsuccessful proposals by the Associate Director. The Associate Director will forward all accepted proposals, along with his/her recommendations, to the Program Manager at HQ DLA.

(2) Under existing programs only, the applicant's PTA Performance Report, DLA Form 1806, will be attached to the proposal by the cognizant Associate Director if it is not included in the application by the eligible entity.

(3) Revised proposals will not be accepted from applicants unless the revised proposal is postmarked two working days prior to the date specified for receipt of proposals or is hand delivered prior to the time and closing date of the SCAP. Any proposal which is unsigned or otherwise rejected will not be given additional evaluation consideration and will be retained with other unsuccessful applications by the Associate Director.

(4) As part of the initial evaluation of an otherwise acceptable proposal, the Associate Director will review and verify the accuracy of the applicant's program status stated on block 8, "Type of Application" of the SF 424. If the Associate Director considers the program status misclassified, the matter will be reviewed with the applicant. If there is disagreement, the Associate Director's decision regarding the program classification is final and is not subject to further review.

(5) If the Associate Director determines that supporting documentation does not substantiate the applicant's proposed distressed area or per capita income status in part or in whole (where greater than 50% funding as the Government share is requested), the application will be disqualified and not be given further review or consideration for an award. The proposal will be retained with other unsuccessful applicants by the Associate Director.

(6) Proposals which pass the initial evaluation phase will be subjected to a comprehensive evaluation. The comprehensive evaluation is performed by a specially constituted HQ DLA Evaluation Panel comprised of small business specialists, contract management specialists, and other personnel deemed appropriate by the Policy Committee. The purpose of the comprehensive evaluation is to assess the merits of the proposals to determine which offer the greatest likelihood of achieving the stated program objectives considering technical, quality, personnel qualifications, estimated cost, and other relevant factors. The Evaluation Panel will conduct its evaluations in accordance with stated criteria and rank proposals in order of excellence to determine which will best further DoD's program objectives. A member of the Office of General Counsel, HQ DLA, will provide legal assistance to the Evaluation Panel, as needed.

(7) Upon completion of its review, the Evaluation Panel will submit its results and it recommendations to the Program Manager.

(8) The Program Manager will determine whether sufficient funds have been allocated to the DCMD to cover DoD's share of NPC and whether any of the dollar limitations have been exceeded. The Program Manager will submit its comments and the Evaluation Panel's recommendations to the Policy Committee for review.

(9) Proposals that include duplicate coverage will be processed by the Program Manager or designated representative(s) as follows:
(a) When two or more applicants submit proposals that provide duplicate coverage of the county(ies) or equivalent coverage (i.e., parish(es), borough(s)), which the applicant plans to service, selection priority will be given to the proposal that is assigned the highest total points by the Evaluation Panel.
(b) To be considered for an award, an applicant's proposal shall not duplicate more than 25% on an individual or cumulative basis any of the county(ies) or equivalent coverage (i.e., parish(es), borough(s)) proposed by higher ranked applicant(s) as established by the Evaluation Panel.
(c) Proposals will not be accepted from applicants who propose to provide less than county or equivalent coverage (i.e., parish, borough). For example, if an applicant proposes to service any part of a county, the applicant must service the entire county.
(d) Only one statewide program will be awarded in a state.

(10) The Policy Committee will review the Evaluation Panel's award recommendations along with the Program Manager's comments. The results of the Policy Committee's review and its recommendations will be forwarded to the appropriate DCMD Commander for approval.

E. After approval of the award selections by the DCMD Commander, the cooperative agreements will be executed by the Associate Director.

3–6 Evaluation Factors.

A. The evaluation factors for new starts and existing programs, with their relative importance, will be specified in the SCAP.

B. The following evaluation factors (which may be subject to change) will be considered:
(1) Program development, performance and effectiveness. (Existing Programs only.)
(2) Types and qualifications of personnel. (Existing Programs and New Starts.)
(3) Quality of the PTA Program. (New Starts only.)
(4) Potential number of business firms/clients in the county(ies) or equivalent coverage (i.e. parish(es), borough(s)) being serviced and/or which the applicant plans to service. (Existing Program and New Starts.)
(5) The amount and percentage of net program costs to be shared by DoD. (Existing Programs and New Starts.)
(6) The level of unemployment in the area being serviced and/or which the applicant plans to service. (Existing Programs and New Starts.)
(7) The amount of subcontracting. (Existing Programs only.)

C. As this program applies both to existing PTA programs and new start programs, certain of these evaluation factors will be evaluated based upon stated implementing policy for programs being planned. For example, the types and qualifications of personnel assigned will require applicants to provide a list of personnel by name, including each of their salaries, education, previous experience (listed by technical discipline(s)), and Federal government courses which were successfully completed (including the number of hours for each course), and the percentage of time assigned or to be assigned to directly performing the program. If personnel have not been selected, the qualification standard to be used in making the selection, anticipated salary range, education, previous experience by technical discipline required by the qualification standard, and the percentage of time the individual is to be assigned to directly performing the program must be provided.

D. The amount of subcontracting to private consultants for consultant services is limited to no more than 10% of total program costs for both existing programs and new starts. However, in evaluating this factor for existing programs, the smaller the amount of subcontracting for consultant services the greater the weight that will be given. In the case of new starts, this is not an evaluation factor. New starts are subject only to the 10% limitation.

3–7 DoD Funding.

A. Any funds available for the PTA program will be allocated equitably among the DCMDs to cover the DoD share of the PTA's program costs for existing programs and for new starts.

B. If there is an insufficient number of satisfactory proposals in a DCMD to allow effective use of the funds allocated, the Program Manager will reallocate the funds among the DCMDs based upon the award recommendations made by the Evaluation Panel and Policy Committee.

C. The award recommendations must be approved by the DCMD Commander.

3–8 Cost Sharing Criteria and Limitations.

A. The DoD share of NPC shall not exceed 50%, except in a case where an eligible entity meets the criteria of a distressed area. When the prerequisite conditions to qualify as a distressed area are met, the DoD share may be increased to an amount not to exceed 75%.

B. In no event shall the DoD share of NPC exceed $150,000 for programs providing less than statewide coverage and $300,000 for programs providing statewide coverage. For the Indian Program, a request for DoD share shall not exceed 75% of NPC or $150,000 for a program providing services on reservations within one BIA service area, or $300,000 for a program providing multi-area coverage.

C. Cost contributions may be either direct or indirect costs, provided such costs are otherwise allowable in accordance with the cost principles applicable to the award. Allowable costs which are absorbed by the eligible entity as its share of costs may not be charged directly or indirectly or may not have been charged in the past to the Federal Government under other contracts, agreements, or grants.

D. The SCAP will require applicants to submit an annualized estimated budget, which may include cash contributions, third party in-kind contributions/donations, any fees and service charges to be earned under the program, and any other Federal Agency funding (including grants, loans, and cooperative agreements) authorized to be used for this program.

E. The type of value of third party in-kind contributions/donations will be limited to no more than 25% of TPC.

F. Any fees, service charges or Federal funds provided under another Federal financial assistance award,

VOL
56
ISS
248
DE
26
1991
UMI

including loans (but not including loan guarantee agreements since these do not provide for disbursement of Federal funds) are not acceptable for calculating cost contributions of the eligible entity. Although the fees, service charges and other authorized Federal funds must be included in the annualized estimated budget, they cannot be included for cost sharing purposes. Inclusion of other Federal funds in the program is subject to the terms of the award instrument containing such funds or written advice being obtained from the awarding Agency(ies) authorizing such use. Any method used by the eligible entity in providing the required funds which relies upon Federal funds must be disclosed and identified in the eligible entity's proposal.

G. Where distressed area funding (greater than 50%) is requested and the civil jurisdiction(s) which the applicant services or plans to service includes both distressed areas and non-distressed areas, the budget must: (1) Be divided based on a reasonable and logical distribution of TPC between these two distinct areas; and (b) submitted as a single proposal. In addition, the recipient's accounting system must be capable of segregating and accumulating costs in each of the two budget areas.

H. Recipients of PTA cooperative agreements are required to maintain records adequate to reflect the nature and extent of their costs and expenditures, and ensure that the required cost participation is achieved. In addition, each state and local entity that receives Federal funding is required to have audits performed in accordance with the requirements of OMB Circular A-128. Nonprofit organizations and institutions of higher education are required to have audits performed in accordance with the the requirements of OMB Circular A-133. Indian economic enterprises (for profit only) will also have an audit performed in accordance with the requirements of OMB Circular A-133. Recipients shall have the audit organization send a copy of all audit reports which pertain to the PTA cooperative agreement directly to the cognizant Associate Director.

I. The SCAP will also provide that indirect costs are not to exceed 100% of direct costs. OMB Circular A-21, limits reimbursement of administrative costs to 26% of modified total direct costs for educational institutions.

J. In the event the applicant charges or plans to charge a fee or service charge for PTA given to clients, or to receive any other income as a result of operating the PTA Program, the estimated amount of such reimbursement is to be clearly identified in the proposed budget and shall be included as part of TPC.

K. The following OMB Circulars will be used to determine allowable costs in performance of the program:

(1) OMB Circular No. A-21, Cost Principles for Educational Institutions;

(2) OMB Circular No. A-87, Cost Principles for State and Local Governments; and

(3) OMB Circular No. A-122, Cost Principles for Nonprofit Organizations. This circular will also be used by for profit organizations.

3-9 Administration.

A. Cooperative Agreements will be assigned to the cognizant DCMD for postaward administration.

B. The Associate Director or designee at the cognizant DCMD will be responsible for performing in-depth reviews. These in-depth reviews will be performed annually for existing programs and semiannually for new starts during the effective period of each cooperative agreement. The review will include management control system, budgeted versus actual expenditures, performance factors, and quarterly performance report data. The result of the review will be furnished to the recipient and a copy will be provided to the Program Manager.

C. For eligible entities covered by OMB Circular No. A-102, Grants and Cooperative Agreements with State and Local Governments, Common Rule, Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments; or OMB Circular No. A-110, Grants and Agreements with Institutions of Higher Education, Hospitals and other Non-profit Organizations, the administrative requirements specified in those circulars will apply.

BILLING CODE 3620-01-M

DEPARTMENT OF EDUCATION

Indian Education National Advisory Council; Meeting

AGENCY: National Advisory Council on Indian Education, Education.

ACTION: Notice of open meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Advisory Council on Indian Education. This notice also describes the functions of the Council. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act.

DATES AND TIMES: Tuesday, January 21, 1992, 9 a.m. to approximately 5 p.m.

ADDRESSES: Ramada Renaissance at Techworld, 999 Ninth Street NW., Washington, DC 20001-9000. Telephone: 202/898-9000.

FOR FURTHER INFORMATION CONTACT: Robert K. Chiago, Executive Director, National Advisory Council on Indian Education, 330 C Street SW., room 4072, Switzer Building, Washington, DC 20202-7556. Telephone: 202/732-1353.

SUPPLEMENTARY INFORMATION: The National Advisory Council on Indian Education is established under section 5342 of the Indian Education Act of 1988 (25 U.S.C. 2642). The Council is established to, among other things, assist the Secretary of Education in carrying out responsibilities under the Indian Education Act of 1988 (part C, title V, Pub. L. 100-297) and to advise Congress and the Secretary of Education with regard to Federal education programs in which Indian children or adults participate or from which they can benefit.

The meeting is open to the public. The agenda includes reports by the Chairman and the Executive Director; a review of items to be included in the Fiscal Year 1991 Annual Report to Congress; the development of Council initiatives and workplan for the remainder of the 1992 fiscal year; and finalizing a work agenda for the White House Conference on Indian Education, January 22-24, 1992. Guest presenters will include Mr. Buck Martin, Director, White House Conference on Indian Education, Dr. John Tippeconnic, Director, Office of Indian Education and a representative from the Department of the Interior.

Records shall be kept of all Council proceedings open to the public and shall be available for public inspection at the office of the National Advisory Council on Indian Education located at 330 C Street SW., room 4072, Washington, DC 20202-7556.

Dated: December 19, 1991.

Robert K. Chiago,
Executive Director National Advisory Council on Indian Education.

DEPARTMENT OF ENERGY

Office of Fossil Energy

[FE Docket No. 91-61-NG]

Northridge Petroleum Marketing U.S., Inc.; Order Granting Blanket Authorization to Import and Export Natural Gas From and to Canada

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of an Order Granting Blanket Authorization To Import and Export Natural Gas From and to Canada.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order authorizing Northridge Petroleum Marketing U.S., Inc., to import up to 200 Bcf of natural gas from Canada and to export up to 300 Bcf of natural gas to Canada over a two-year period beginning on the date of first import or export.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, December 11, 1991.

BILLING CODE 6450-01-M

[FE Docket No. 91-69-NG]

Northern States Power Co.; Application for Long-Term Authorization To Import Natural Gas From Canada

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of application for long-term authorization to import natural gas from Canada.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt of an application filed on September 5, 1991, and amended on October 21, 1991, by Northern States Power Company (Wisconsin) (NSPW), for authorization to import up to 7,500 Mcf per day of natural gas from Canada over a 10-year term commencing on the later of November 1, 1992, or the date of first delivery. NSPW would import the gas from Canadian Occidental Petroleum Company Ltd. (Canadian Occidental) under a gas purchase agreement dated November 1, 1990. The gas would be imported at the international border near Emerson, Manitoba, where Great Lakes Gas Transmission's (Great Lakes) pipeline system interconnects with TransCanada PipeLines Limited (TransCanada). Great Lakes would deliver the import volumes to Viking Gas Transmission (Viking) which in turn would transport the gas to NSPW's distribution facilities at Eau Claire, Wisconsin. NSPW states that no new pipeline construction is required for the proposed import.

The application is filed under section 3 of the Natural Gas Act and DOE Delegation Order Nos. 0204-111 and 0204-127. Protests, motions to intervene, notices of intervention and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed in Washington, DC, at the address listed below no later than 4:30 p.m., Eastern time, January 27, 1992.

ADDRESSES: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F-056, FE-50, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478.

FOR FURTHER INFORMATION CONTACT:

Thomas Dukes, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F-070, FE-53, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9590.

Diane Stubbs, Office of Assistant General Counsel for Fossil Energy, U.S. Department of Energy, Forrestal Building, room 6E-042, GC-14, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-6667.

SUPPLEMENTARY INFORMATION: NSPW is a public utility incorporated in the State of Wisconsin and a wholly-owned subsidiary of Northern States Power

VOL 56 ISS 248 DE 26 1991 UMI

Company (Minnesota) (NSPM). According to its application, NSPW provides electricity and natural gas service to customers in upper and central Wisconsin as well as Michigan's Upper Peninsula.

Under its gas sales contract with Canadian Occidental, NSPW has agreed to purchase a minimum annual quantity. Minimum purchases for the peak period months of December through February would be 75 percent of the sum of the daily contract quantities (DCQ) for those months, and 40 percent for the remainder of the year. If NSPW does not meet minimum annual purchase requirements of 65 percent, the contract requires it to pay a gas inventory charge of $.25 per MMBtu times the shortfall. The contract DCQ (7,500 Mcf) is also subject to adjustment if NSPW does not make minimum purchases that average at least 65 percent of DCQ in any contract year.

The contract price for the DCQ service consists of a two-part demand/commodity price. The monthly demand rate would equal the product of the DCQ average for the month times the sum of the monthly demand tolls for transportation service on the TransCanada and Nova pipeline systems. The commodity price to be paid in any month would equal the product of the base commodity price of $1.70 (U.S.) per MMBtu, as adjusted annually to reflect changes in the weighted average cost of gas (WACOG) for spot purchases at Kansas, Texas and Oklahoma, and by changes in prices for eight mid-western gas utilities under long-term import contracts, times a predetermined monthly adjustment factor. The contract provides for renegotiation and, absent agreement, arbitration of the commodity price and the commodity price adjustment mechanism if it fails to track changes in the WACOG of NSPW's gas purchases or the weighted average price of long-term Canadian gas exported to the U.S. midwestern market.

In support of its application, NSPW asserts the pricing, renegotiation, and arbitration provisions in its gas sales contract provide sufficient flexibility to assure a competitive price that will reflect market conditions throughout the term of the contract. NSPW also submits that the long-term imports are needed and secure. According to its application, NSPW's natural gas demand between 1987 and 1990 increased from 11.4 to 14.1 Bcf, and NSPW anticipates at least a 5 percent annual growth rate for near-term deliveries. Finally, NSPW states that Canadian Occidental estimates it has over 35 Bcf of available reserves to supply its needs over the ten-year contract. According to NSPW, security of supply is further ensured by contract provisions that permit Canadian Occidental to substitute alternate gas supplies from other producers as long as there is no interruption in supply. In the event non-delivery of gas volumes exceeds ninety days, NSPW is entitled to terminate the contract by providing 30-days notice.

The decision on NSPW's application for import authority will be made consistent with DOE's natural gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). In the case of a long-term arrangement such as this, other matters that will be considered in making a public interest determination include need for the natural gas and security of the long-term supply. Parties that may oppose this application should comment in their responses on the issues of competitiveness, need for the gas, and security of supply as set forth in the policy guidelines. NSPW asserts that this import arrangement is in the public interest because it is needed, competitive, and its natural gas source will be secure. Parties opposing the import arrangement bear the burden of overcoming these assertions.

NEPA Compliance

The National Environmental Policy Act (NEPA), 42 U.S.C. 4321, *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have the written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the above address.

It is intended that a decisional record will be developed on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of NSPW's application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056 at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, December 19, 1991.

Clifford P. Tomaszewski,

Acting Assistant Deputy Secretary for Fuels Programs, Office of Fossil Energy

[FR Doc. 91-30965 Filed 12-24-91, 8:45 am]

BILLING CODE 6450-01-M

[FE Docket No. 91-59-NG]

Tenaska Gas Co.; Application for Long-Term Authorization To Import Natural Gas From Canada

AGENCY: Department of Energy; Office of Fossil Energy.

ACTION: Notice of application for long-term authorization to import natural gas from Canada.

SUMMARY: The Office of Fossil Energy (FE) of the Department of Energy (DOE) gives notice of receipt of an application filed on August 6, 1991, by Tenaska Gas Co. (Tenaska), for authorization to import up to 15,000 MMBtu (approximately 15,000 Mcf) per day of natural gas form Pertro-Canada beginning on the effective date of the requested authorization through December 31, 2011. The imported gas would enter the U.S. at the international border near Sumas, Washington, and be transported through the pipeline facilities of Cascade Natural Gas Corporation (Cascade) to a combined cycle, gasfired cogeneration facility being developed by Tenaska Washington, Inc. (TWI). The TWI facility would use the imported gas as part of its system supply to produce electricity for sale to the Puget Sound Power and Light Company and steam for sale to an as yet unidentified company. Cascade would construct and operate facilities on the international border to implement transportation of the gas.

The application is filed under section 3 of the Natural gas Act and DOE Delegation Order Nos. 0204-111 and 0204-127. Protests, motions to intervene, notices of intervention and written comments are invited.

DATES: Protests, motions to intervene or notices of intervention, as applicable, requests for additional procedures and written comments are to be filed at the address listed below no later than 4:30 p.m., Eastern time January 27, 1992.

ADDRESS: Office of Fuels Programs, Fossil Energy, U.S. Department of Energy; Forrestal Building, room 3F-056, FE-50, 1000 Independence Avenue, SW., Washington, DC 20585 (202) 586-9478.

FOR FURTHER INFORMATION CONTACT:

Stanley C. Vass, Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, Forrestal Building, room 3F-094, FE-53, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9482.

Diane Stubbs, Office of Assistant General Counsel for Fossil Energy, U.S. Department of Energy, Forrestal Building, room 6E-042, GC-14, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-6667.

SUPPLEMENTARY INFORMATION: Tenaska is a Nebraska Corporation with offices in Omaha, Nebraska. Tenaska has entered into a gas purchase agreement with Petro-Canada, a Canadian corporation, dated July 29, 1991, under which Petro-Canada would supply up to 15,000 MMBtu per day of natural gas to Tenaska for resale to TWI's proposed cogeneration facility. The term of the contract continues for seventeen years following commencement of commercial operation of TWI's cogeneration facility, or December 31, 2011, whichever occurs earlier. Commercial operation of the cogeneration facility is expected to begin by October 1, 1993. The TWI cogeneration facility would be a "qualifying facility" under section 201 of the Public Utility Regulatory Policies Act and would be located in Whatcon County, Washington.

Under the terms of the Tenaska/Petro-Canada gas purchase agreement, Tenaska must take or pay for eighty percent of the daily contract quantity of 15,000 MMBtu of natural gas. If Tenaska fails to take the prescribed minimum volume, then Tenaska must pay Petro-Canada a deficiency payment equal to the difference between the commodity price under the terms of the Tenaska/Petro-Canada contract and Canadian spot market prices for the volumes not taken as required by the contract.

The price of the imported gas would be computed under a pricing formula which, according to the applicant, would take into account market indexes for both domestic and Canadian natural gas prices. The formula does this by tying the price of the imported gas to the actual annual average market index price published in the Natural Gas Week and inside F.E.R.C.'s Gas Market Report. This index price represents the price for one month's gas sales transactions at the interconnection of the gas transmission system of Westcoast Energy, Inc. and Northwest Pipeline corporation near Sumas, Washington, and at the mainline gas receipt points of Northwest Pipeline Corporation located in the Rocky Mountains times a fraction the numerator of which is $1.70 (U.S.) per MMBtu of natural gas and the denominator of which $1.25 (U.S.) per MMBtu. The contract price is computed by averaging a monthly escalation price and the actual annual average market index price subject to a ceiling and a floor price. The contract provides that the monthly escalation price for the period January 1, 1993, through October 31, 1993, shall be $2.00 (U.S.) per MMBtu of natural gas, and shall be escalated monthly at the rate of one-half of one percent beginning on November 1, 1993. The contract also provides that the ceiling price for calendar year 1993 shall be $2.05 (U.S.) per MMBtu of natural gas and shall be escalated at the rate of eight and one-fourth percent each year thereafter. The floor price for the calendar year 1993 is also set at $2.05 (U.S.) per MMBtu and shall be escalated at the rate of four percent each year thereafter.

The Tenaska/Petro-Canada contract further provides that Tenaska is not responsible for any specific Canadian transportation costs for the gas but rather is obligated to pay a demand charge equal to thirty-five percent of what the cost of the Canadian gas would be if the daily contract quantity were delivered each day of the month and a commodity charge equal to sixty-five percent to the cost of the gas actually delivered each month.

In support of its application, Tenaska asserts that the price of the imported gas would be competitive because the pricing formula requires that the price of the gas track the marketplace price of gas and has escalator provisions that restrict wide swings in the price of the gas. Security of supply is assured, according to the applicant, by Petro-Canada's three trillion feet of proven reserves of natural gas and by a contract warranty provision under which Petro-Canada must deliver the daily contract quantity or reimburse Tenaska for the cost of obtaining alternate supplies of fuel to replace the delivery shortfall. Further, Tenaska states that the gas is needed to provide part of the gas requirements for TWI's proposed cogeneration facility.

The decision on Tenaska's application for import authority will be made consistent with DOE's natural gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). In the case of a long-term arrangement such as this, other matters that will be considered in making a public interest determination include need for the natural gas and security of the long-term supply. Parties that may oppose this application should comment in their responses on the issues of competitiveness, need for the gas, and security of supply as set forth in the policy guidelines. Tenaska asserts that this import arrangement is in the public interest because it is needed, competitive, and its natural gas source will be secure. Parties opposing the

VOL 56 ISS 248 DEC 26 1991 UMI

proposed import arrangement bear the burden of overcoming these assertions.

NEPA Compliance

The National Environmental Policy Act (NEPA), 42 U.S.C., 4321 *et seq.*, requires DOE to give appropriate consideration to the environmental effects of its proposed actions. No final decision will be issued in this proceeding until DOE has met its NEPA responsibilities.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have their written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR part 590. Protests, motions to intervene, notices of intervention, requests for additional procedures, and written comments should be filed with the Office of Fuels Programs at the above address.

It is intended that a decisional record will be developed on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law, or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If an additional procedure is scheduled, notice will be provided to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR ¶590.316.

A copy of Tenaska's application is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F–056, at the above address. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, December 19, 1991.

Clifford P. Tomaszewski,

Acting Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–4087–3]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden.

DATES: Comments must be submitted on or before January 27, 1992.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 260–2740.

SUPPLEMENTARY INFORMATION:

Office of Air and Radiation

Title: New Source Performance Standards (NSPS) (subpart E) for Municipal Incinerators—Reporting and Recordkeeping Requirements (EPA No. 1058.04, OMB No. 2060–0040).

Abstract: This ICR is for an extension of an existing information collection in support of the NSPS for Particulate Matter (PM) as established by the Clean Air Act. In accordance with the general requirements under 40 CFR part 60.7–60.8, and the specific requirements for PM emissions by municipal incinerators under 40 CFR part 60.50–60.54, subject facilities must comply with certain monitoring, recordkeeping, and reporting requirements. The information collected will be used by the EPA for monitoring, inspection, and enforcement efforts directed at ensuring facility compliance with this NSPS.

Owners or operators of new sources subject to this NSPS must submit to EPA: (1) Notification of the date of construction or reconstruction, (2) notification of the anticipated and actual dates of the start-up, and (3) initial performance tests results. Owners and operators of existing facilities must notify EPA of any physical or operational change to their facility which may result in an increase in the regulated pollutant emission rate. Existing facilities must also maintain records on the incinerator operation that include: (1) The occurrence and duration of any start-up, shutdowns, and malfunctions, (2) initial performance test results, and (3) daily charging rates and operating hours.

Presently, there are an estimated 79 facilities subject to the regulation, with the regulated universe expanding at an annual rate of 7 new facilities. All subject facilities must maintain records related to compliance for two years.

Burden Statement: Public reporting burden for this collection of information is estimated to average 81 hours per response including time for reviewing instructions, searching existing data sources, gathering and maintaining data, and completing and reviewing the collection of information. Public recordkeeping burden is estimated to average 87.5 hours, annually.

Respondents: State or local governments, Businesses or other for-profit organizations.

Estimated Number of Respondents: 7 reporters, 86 recordkeepers.

Estimated Number of Responses per Respondent: One.

Estimated Total Annual Burden on Respondents: 8,092 hours.

Frequency of Collection: On occasion for reporting, daily for recordkeeping.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to:

Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM–223Y), 401 M Street, SW., Washington, DC 20460,

and

Troy Hillier, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th St., NW., Washington, DC 20503.

Dated: December 18, 1991.

Class II Underground Injection Control Program Advisory Committee Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Advisory Committee Meetings.

SUMMARY: The Class II Underground Injection Advisory Committee will meet on Tuesday and Wednesday, January 21 and 22, in Alexandria, Va. to continue work on construction and areas of review for Class II Injection Wells.

DATES: On January 21, the meeting will begin at 9 a.m. and end at 5 p.m. On January 22, the meeting will begin at 8:30 a.m. and end at 3:30 p.m.

ADDRESSES: The meetings will take place at the Embassy Suites Hotel, 1900 Diagonal Road, Alexandria, Va. 22314, 703–684–5900, 1–800–362–2779.

FOR FURTHER INFORMATION CONTACT: For information on substantive issues, contact Jeffrey Smith, EPA, Water Office, (202) 260–5586. On administrative matters, contact Angela Suber, EPA, Regulatory Development Branch, at (202 260–7205, or John Lingelbach, Committee Co-Chair, at (202) 887–1037.

Dated: December 19, 1991.

Certain Chemicals; Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in the final rule published in the **Federal Register** of May 13, 1983 (48 FR 21722). In the **Federal Register** of November 11, 1984 (49 FR 46066) (40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. Notices for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of 4 such PMN(s) and provides a summary of each.

DATES: Close of review periods:

Y 92–70, 92–71, 92–72, December 29, 1991.

Y 92–73, December 15, 1991.

FOR FURTHER INFORMATION CONTACT: David Kling, Acting Director, Environmental Assistance Division (TS–799), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E–545, 401 M St., SW., Washington, DC, 20460, (202) 554–1404, TDD (202) 554–0551.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the nonconfidential version of the submission provided by the manufacturer on the PMNs received by EPA. The complete nonconfidential document is available in the TSCA Public Docket Office, NE–G004 at the above address between 8 a.m. and noon and 1 p.m. and 4 p.m., Monday through Friday, excluding legal holidays.

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirements Submitted to Office of Management and Budget for Review

December 18, 1991.

The Federal Communications Commission has submitted the following information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of these submissions may be purchased from the Commission's copy contractor, Downtown Copy Center, 1114 21st Street, NW., Washington, DC 20036, (202) 452–1422. For further information on these submissions contact Judy Boley, Federal Communications Commission, (202) 632–7513. Persons wishing to comment on these information collections should contact Jonas Neihardt, Office of Management and Budget, room 3235 NEOB, Washington, DC 20503, (202) 395–4814.

OMB Number: 3060–0034.

Title: Application for Construction Permit for Noncommercial Educational Broadcast Station.

Form Number: FCC Form 340.

Action. Revision.

Respondents: Non-profit institutions.

Frequency of Response: On occasion reporting.

Estimated Annual Burden: 48 responses; 171.56 hours average burden per response; 8,235 hours total annual burden.

Needs and Uses: FCC Form 340 is used to apply for authority to construct a new noncommercial educational AM, FM and TV broadcast station, or to make changes in the existing facilities of such a station. On 9/26/91, the FCC adopted a Report and Order, MM Docket No. 87–267, Review of the Technical Criteria for the AM Broadcast Service. In this R&O a number of major steps have been taken to improve technical standards and thus to reduce the level interference in the existing band, to encourage certain existing licensees to move into the expanded portion of the AM band, and to consolidate existing broadcasting facilities in order to further reduce congestion and interference in the existing band. The form has been revised to include this service. The form has also been changed to include modified policies concerning adjudicated actions or pending adjudications of relevant misconduct by broadcast applicants. The data is used by FCC staff to determine whether the

VOL 56 ISS 248 DEC 26 1991 UMI

applicant meets basic statutory requirements to become a Commission licensee.

OMB Number: 3060–0027.

Title: Application for Construction Permit for Commercial Broadcast Station.

Form Number: FCC Form 301.

Action: Revision.

Respondents: Businesses or other for-profit (including small businesses).

Frequency of Response: On occasion reporting.

Estimated Annual Burden: 916 responses; 193.59 hours average burden per response; 177,328 hours total annual burden.

Needs and Uses: FCC Form 301 is used to apply for authority to construct a new commercial AM, FM, or TV broadcast station, or to make changes in the existing facilities of such a station. On 9/26/91, the Commission adopted a Report and Order, MM Docket No. 87–267, Review of the Technical Assignment Criteria for the AM Broadcast Service. In this R&O a number of major steps have been taken to improve technical standards and thus to reduce the level of interference in the existing band, to encourage certain existing licensees to move into the expanded portion of the AM band, and to consolidate existing broadcasting facilities in order to further reduce congestion and interference in the existing band. There will be a 30 minute increase in burden for applicants for AM facilities filing in compliance with an Allotment Plan to Migrate to the expanded band. The form has been changed to include this service. The form has also been revised to include character qualification questions and to incorporate fee processing data. The data is used by FCC staff to determine whether applicant meets basic statutory requirements to become a Commission licensee.

OMB Number 3060–0029.

Title: Application for New Broadcast Station License.

Form Number FCC Form 302.

Respondents: Non-profit institutions, businesses or other for-profit (including small businesses).

Frequency of Response: On occasion reporting.

Estimated Annual Burden. 1,080 responses; 136.49 hours average burden per response; 147,409 hours total annual burden.

Needs and Uses: Licensees and permittees of AM, FM and TV broadcast stations are required to file FCC Form 302 to obtain a new or modified station license, and/or to notify the Commission of certain changes in the licensed facilities of these stations. On 9/26/91, the Commission adopted a Report and Order, MM Docket No. 87–267, Review of the Technical Assignment Criteria for the AM Broadcast Service. In this R&O a number of major steps have been taken to improve technical standards and thus to reduce the level of interference in the existing band, to encourage certain existing licensees to move into the expanded portion of the AM band, and to consolidate existing broadcasting facilities in order to further reduce congestion and interference in the existing band. There will be a 30 minute increase in burden for applicants for AM facilities filing in compliance with an Allotment Plan to Migrate to the expanded band. The form has been changed to include this service. The form has also been revised to include character qualification questions and to incorporate fee processing data. The data is used by FCC staff to confirm that the station has been built to terms specified in the outstanding construction permit, and to update FCC station files. Data is then extracted from FCC Form 302 for inclusion in the subsequent license to operate the station.

Federal Communications Commission.

BILLING CODE 6712–01–M

FEDERAL ELECTION COMMISSION

[Notice 1991–23]

Rulemaking Petition: Congressman William Thomas; Availability

AGENCY: Federal Election Commission.

ACTION: Rulemaking Petition: Notice of availability.

SUMMARY: On December 5, 1991, the Commission received a Petition for Rulemaking from Congressman William Thomas. The petition requests the Commission to consider amending its regulations governing the transfer of funds from nonfederal committees to federal political committees. The petition is available for public inspection in the Commission's Public Records office. Further information is provided in the supplementary information which follows.

DATES: Statements in support of or in opposition to the petition must be filed on or before February 10, 1992.

ADDRESSES: Comments must be made in writing and addressed to: Ms. Susan E. Propper, Assistant General Counsel, 999 E Street, NW., Washington, DC 20463.

FOR FURTHER INFORMATION CONTACT: Ms. Susan E. Propper, Assistant General Counsel, 999 E Street, NW., Washington, DC 20463, (202) 219–3690 or (800) 424–9530.

Rulemaking Petition: Notice of Availability

Petitioner has requested that the Commission reconsider its regulations governing the transfer of funds from nonfederal committees to federal political committees. Current regulations allow nonfederal committees to transfer funds to federal committees so long as the funds are not composed of any contributions that would violate the Act, so-called "soft money." 11 CFR 110.3(c)(6). The petitioner alleges that the regulations are ineffective, because they "do not address the loophole through which this 'soft money' is often spent by nonfederal committees to raise 'hard' dollars that are then transferred to federal committees." The petitioner urges the Commission to "conduct a rule-making procedure to ensure that Federal Election law is fully enforced to the extent that 'soft money' is not indirectly used by nonfederal committees to raise funds that will be used in Federal races."

Copies of the Petition for Rulemaking are available for public inspection at the Commission's Public Records Office, 999 E Street, NW., Washington, DC 20463, Monday through Friday between the hours of 9 a.m. and 5 p.m. Statements in support of or in opposition to the Petition for Rulemaking must be submitted in writing by February 10, 1992.

Dated: December 20, 1991.

John Warren McGarry,

Chairman, Federal Election Commission.

FEDERAL MARITIME COMMISSION

Agreement(s) Filed; Los Angeles, et al.

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street, NW., room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in § 572.603 of title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–200441–001

Title: Los Angeles/Containerfreight Transportation Co. Lease Agreement.

Parties: City of Los Angeles, Containerfreight Transportation Company.

Synopsis. The Agreement, filed December 17, 1991, revises the lease description of the premises to be used by the tenant, Containerfreight Transportation Company. The premises is defined as Bay No. 1 of Municipal Warehouse No. 16 and not the entire Warehouse.

Agreement No.: 224–200600.

Title: Los Angeles/Stevedoring Services of America Crane Assignment Agreement.

Parties: City of Los Angeles, Stevedoring Services of America.

Synopsis: This Agreement, filed December 12, 1991, provides for the assignment of two cranes owned by the Los Angeles Harbor Commission to Stevedoring Services of America on a nonexclusive preferential basis. The assignment term for the two cranes, Container Cranes Number 209–18 and 209–19, shall be on a month-to-month basis.

Dated: December 19, 1991.

By Order of the Federal Maritime Commission.

Joseph C. Polking,

Secretary

[Program Announcement 913]

Grants for Injury Control Research Centers and Injury Control Research Program Project Grants; Amendment

A notice announcing the availability of Fiscal Year 1992 funds for grants to support Injury Control Research Centers (IRGRCs) and Injury Control Research Program Projects (RPPGs) was published in the **Federal Register** on June 17, 1991, (56 FR 22762). The notice is amended as follows:

1. On page 27762, third column, under the heading "Availability of Funds," following the first sentence insert the following: "An additional $900,000 is available for evaluation research in the area of youth violence in high risk communities."

2. On page 27762, third column, under the heading "Purpose," in the first paragraph, insert the following publication within the references already listed: "Forum on Youth Violence in Minority Communities: Setting the Agenda for Prevention."

3. On page 27763, third column, under the heading "Evaluation Criteria," insert the following before the first paragraph: "Applications may be subjected to a preliminary evaluation by a peer review group to determine if the application is of sufficient technical and scientific merit to warrant further review. CDC will withdraw from further consideration those applications judged to be nonresponsive and will so notify in writing the principal investigator/program director and the official signing for the applicant organization. Those applications judged to be responsive will be further evaluated as described below."

All other information and requirements of the June 17, 1991, **Federal Register** notice remain the same.

Dated: December 18, 1991.

Administration for Children and Families

Meeting of the U.S. Advisory Board on Child Abuse and Neglect

AGENCY HOLDING THE MEETING: Administration for Children and Families.

TIMES AND DATES: 9 a.m., January 7, 1992; 2:45 p.m., January 10, 1992.

PLACE: Aerospace Building, Auditorium—Sixth Floor, 370 L'Enfant Promenade, SW., Washington, DC.

STATUS: The meeting is open to public observation at all times.

MATTERS TO BE CONSIDERED: During portions of this meeting the Executive Committee of the Advisory Board will hold preliminary discussions on the form, content, nature and scope of the 1992 and 1993 annual reports of the Board. During other portions of this meeting, the full Board will: Meet with the National Research Council Panel on Research on Child Abuse and Neglect; hold a symposium on the relationship of child maltreatment to foster care; discuss a proposed plan of Board activities for FY 1992–FY 1993; discuss the form, content, nature, and scope of the 1992 and 1993 reports; interact with the Federal Task Force on child Abuse and Neglect; hear from a British social services manager on the British approach to child protection; discuss new rules governing the compensation of Board members; receive a briefing on important programs of the National Center on Child Abuse and Neglect as well as the Children's Bureau; receive an updating on the reorganization of the Administration for Children and Families, the Secretary's initiative on child abuse and neglect, and National Center and Children's Bureau developments since the September, 1991 meeting; hear presentations on neonatal home visiting; and discuss Board papers on research, child fatalities, and child protective services reform.

CONTACT PERSON FOR MORE INFORMATION: Eileen H. Lohr, Program Assistant, U.S. Advisory Board on Child Abuse and Neglect, room 2433, Switzer Building, Washington, DC. 20201, (202) 245–6670.

Dated: December 17, 1991.

Byron D. Metrikin-Gold,

Executive Director, U.S. Advisory Board on Child Abuse and Neglect.

Health Care Financing Administration

Reconsideration of Disapproval of Illinois State Plan Amendment (SPA); Hearing

AGENCY: Health Care Financing Administration, HHS.

ACTION: Notice of hearing.

SUMMARY: This notice announces an administrative hearing on February 6, 1992, at 10 a.m.; the 15th Floor, Conference Room; 105 W. Adams Street, Chicago, Illinois to reconsider our decision to disapprove Illinois SPA 91–07.

CLOSING DATE: Requests to participate in the hearing as a party must be received by the Docket Clerk by January 10, 1992.

FOR FURTHER INFORMATION CONTACT: Docket Clerk, HCFA Hearing Staff, suite 110, Security Office Park, 7000 Security Blvd., Baltimore, Maryland 21207, Telephone: (410) 597–3013.

SUPPLEMENTARY INFORMATION: This notice announces an administrative hearing to reconsider our decision to disapprove Illinois State plan amendment (SPA) number 91–07.

Section 1116 of the Social Security Act (the Act) and 42 CFR, part 430 establish Department procedures that provide an administrative hearing for reconsideration of a disapproval of a

VOL
56
ISS

1991
UMI

State plan or plan amendment. The Health Care Financing Administration (HCFA) is required to publish a copy of the notice to a State Medicaid agency that informs the agency of the time and space of the hearing and the issues to be considered. If we subsequently notify the agency of additional issues that will be considered at the hearing, we will also publish that notice.

Any individual or group that wants to participate in the hearing as a party must petition the Hearing Officer within 15 days after publication of this notice, in accordance with the requirements contained at 42 CFR 430.76(b)(2). Any interested person or organization that wants to participate as *amicus curiae* must petition the Hearing Officer before the hearing begins in accordance with the requirements contained at 42 CFR 430.76(c).

If the hearing is later rescheduled, the Hearing Officer will notify all participants.

Illinois SPA 91–07 contains the State's Medicaid fee schedule for obstetrical and pediatric services and data alleging at least 50 percent of obstetrical and pediatric practitioners are full Medicaid participants.

The issue here is whether the plan amendment meets the statutory provisions of section 1926(a) of the Act and thus, also complies with section 1902(a)(30)(A) of the Act.

Section 1926 of the Act, as added by section 6402 of the Omnibus Budget Reconciliation Act of 1989, Public Law 101–239, requires that no later than April 1 of each year (beginning in 1990) States are to submit plan amendments specifying their payment rates for obstetrical practitioner services and pediatric practitioner services. States must provide specific information to document that those payment rates are sufficient to enlist enough providers such that obstetrical and pediatric services are available to Medicaid recipients at least to the extent that such services are available to the general population in the geographic area (section 1902(a)(30(A) of the Act).

HCFA has determined that for obstetrical and pediatric rate SPAs to be approvable, they must include the following:

1. Payment rates for this year and next year (i.e. 1991 and 1992) for those obstetrical and pediatric services covered under the State s plan. Pediatric rates must be specified by procedure; we recommend the same format be followed for obstetrical services;

2. Data that document that payment rates for obstetrical and pediatric services are sufficient to enlist enough providers so that care and services are available under the plan at least to the extent that such care and services are available to the general population in the geographical area, and,

3. Data that document that payment rates to health maintenance organizations (HMOs) under section 1903(m) of the Act take into account the payment rates specified in number 1 above.

HCFA has also developed several guidances, that if met by the State, would evidence that the State meets the statutory requirements of section 1926 of the Act. These guidelines are set forth in a draft State Medicaid manual (SMM) revision dated March 26, 1990. In accordance with these guidelines, a State is instructed to provide data, on a county-by-county or other appropriate substate geographic basis, documenting its compliance with at least one of the three guidelines.

Based upon the data submitted, HCFA determined that Illinois' amendment did not comply with the statutory requirements of section 1926, and thus, also did not comply with section 1902(a)(30)(A) of the Act. The State intended to demonstrate adequacy of access utilizing guideline number 1 (Practitioner Participation) from the March 26 draft SMM revision. The State had argued that it met the statutory requirements under guideline 1 of the draft SMM revision, which instructs the State to document its compliance with the statute by submitting data showing that at least 50 percent of obstetrical and pediatric practitioners are full Medicaid participants or that Medicaid participation is at the same rate as Blue Shield participation. The State claimed that they exceed the 50 percent criteria. However, the State had not defined a "participating practitioner". In addition, HCFA has a number of concerns about the data itself.

First, the State provided data on total obstetrical providers, total pediatric providers, total Medicaid obstetrical providers and total Medicaid pediatric providers.

In SPA 90–21, Illinois stated that because their Medicaid claims processing system does not separate family practitioners from other physicians, they have only incorporated family practitioners into the group of practicing pediatricians. In order to accurately determine the rate of obstetrical and pediatric practitioners in Medicaid, the State was asked to break-out the data for family practitioners by those who provide obstetrical care, pediatric care or both obstetrical and pediatric care. In this SPA, the State did not address the family practitioner data issue, and HCFA is unable to determine whether the State has broken-out the data by those who provide obstetrical care, pediatric care or both obstetrical and pediatric care.

Second, in 6 of 16 regions, the percentage of Medicaid obstetrical providers exceeds 100 percent. For example, Illinois states that, in region thirteen, 136.36 percent of all obstetrical providers participate in the Medicaid program. HCFA believes the data are flawed because Medicaid participating practitioners exceed total practitioners. If a practitioner is providing services in more than one country, he/she must be included in the total universe and not just the Medicaid participating total. The total universe must include *all* practitioners providing obstetrical services in the region. Therefore, percentages should not exceed 100 percent. Thus, HCFA is unable to accurately determine the rate of obstetrical and pediatric practitioners in Medicaid.

Third, there are three regions that do not meet the 50 percent criteria for obstetrical services. The State has attempted to prove equal access for Medicaid individuals in DuPage and Lake Counties by showing that the ratio of Medicaid participating practitioners to the Medicaid population is no less than that of non-participating practitioners to the general population. However, the State's ratio has not shown that access by Medicaid participating practitioners to Medicaid recipients is equal to or greater than access by non-participating practitioners to the non-Medicaid population. The State's documentation would be acceptable if the State's data showed at least 50 percent of the obstetrical/pediatrician practitioners in the State provided services to Medicaid recipients (and no ratio would be needed). Absent this, the State's ratio attempts to show that access to a practitioner is equivalent for Medicaid and non-Medicaid individuals.

However, this ratio essentially is showing access to a practitioner's time. It assumes that participating practitioners only treat Medicaid patients and nonparticipating practitioners only treat non-Medicaid patients. While this assumption is valid for non-participating practitioners (as that is how they are defined), it is not necessarily true for participating providers. The ratio is only valid if the State specifies the percentage of time that the participating practitioner provided services to Medicaid and non-Medicaid recipients.

The State has not included data or accounted for those obstetrical and pediatric nonphysician practitioners cited in the statutory definition of obstetrical and pediatric services. If nonphysician practitioners, such as certified nurse practitioners or nurse midwives, render obstetrical or pediatric services in Illinois, they should be included in the State's data.

The notice to Illinois announcing an administrative hearing to reconsider the disapproval of its SPA reads as follows:

Mr Phil Bradley,
Director, Division of Medical Programs, Illinois Department of Public Aid, 201 South Grand Avenue, East Springfield, Illinois 62762–0001

Dear Mr Bradley: I am responding to your request for reconsideration of the decision to disapprove Illinois State Plan Amendment (SPA) 91–07. The amendment contains the State's Medicaid fee schedule for obstetrical and pediatric services and data alleging at least 50 percent of obstetrical and pediatric practitioners are full Medicaid participants.

Section 1926 of the Act, as added by section 6402 of the Omnibus Budget Reconciliation Act of 1989, Public Law 101–239, requires that by no later than April 1 of each year (beginning in 1990) States are to submit plan amendments specifying their payment rates for obstetrical practitioner services and pediatric practitioner services. States must provide specific information to document that those payment rates are sufficient to enlist enough providers such that obstetrical and pediatric services are available to Medicaid recipients at least to the extent that such services are available to the general population in the geographic area (section 1902(a)(30)(A) of the Act).

The issue in this matter is whether the plan amendment meets the statutory provisions of section 1926(a) of the Act and thus, also complies with section 1902(a)(30)(A) of the Act.

I am scheduling a hearing on your request for reconsideration to be held on February 6, 1992, at 10 a.m., the 15th Floor, Conference Room; 105 W. Adams Street, Chicago, Illinois. If this date is not acceptable, we would be glad to set another date that is mutually agreeable to the parties. The hearing will be governed by the procedures prescribed at 42 CFR, Part 430.

I am designating Mr Stanley Katz as the presiding officer If these arrangements present any problems, please contact the Docket Clerk. In order to facilitate any communication which may be necessary between the parties to the hearing, please notify the Docket Clerk of the names of the individuals who will represent the State at the hearing. The Docket Clerk can be reached at (410) 597–3013.

Sincerely,

Gail R. Wilensky,
Administrator.

(Section 1116 of the Social Security Act (42 U.S.C. section 1316); 42 CFR section 430.18).

(Catalog of Federal Domestic Assistance Program No. 13.714, Medicaid Assistance Program).

Dated: December 18, 1991.

Gail R. Wilensky,
Administrator, Health Care Financing Administration.

National Institutes of Health

National Institutes of Allergy and Infectious Diseases; Meeting of AIDS Liaison Subcommittee of the AIDS Research Advisory Committee, NIAID

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the AIDS Liaison Subcommittee of the AIDS Research Advisory Committee, National Institute of Allergy and Infectious Disease, on January 24, 1992, in Building 31C, Conference Room 6, at the National Institutes of Health, Bethesda, Maryland 20892.

The entire meeting will be open to the public from 8 a.m. until adjournment on January 24. The subcommittee will discuss the mission and directions of the Division of AIDS (DAIDS) providing input and broad programmatic advice on the DAIDS extramural program with respect to basic and clinical research. Attendance by the public will be limited to space available.

Ms. Patricia Randall, Office of Reporting and Public Response, National Institute of Allergy and Infectious Diseases, Building 31, room 7A32, National Institutes of Health, Bethesda, Maryland 20892, telephone (301–496–5717) will provide a summary of the meeting and a roster of the committee members upon request.

Ms. Jean Noe, Executive Secretary, AIDS Research Advisory Committee, DAIDS, NIAID, NIH, Solar Building, room 2A22, 6003 Executive Boulevard, Rockville, Maryland 20892, telephone (301–496–0545) will provide substantive program information.

Meeting of the Planning Subcommittee of the Board of Regents of the National Library of Medicine

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Planning Subcommittee of the Board of Regents of the National Library of Medicine on January 9–10, 1992, in the Board Room of the National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland.

The entire meeting will be open to the public from 9 a.m. to approximately 5 p.m. on January 9, and from 9 a.m. to adjournment on January 10. This is the second meeting in a series of three to discuss and determine the role of the National Library of Medicine in serving the information needs of those concerned with toxicology and the environment. Attendance by the public will be limited to space available.

Ms. Susan P. Buyer, Deputy Assistant Director for Planning and Evaluation of the National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland, telephone 301–496–8834, will provide a summary of the meeting, a roster of subcommittee members, and substantive program information upon request.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WO–250–4370–02]

Wild Horse and Burro Advisory Board; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice is hereby given, under authority of 43 CFR part 1784, that the Wild Horse and Burro Advisory Board.

SUMMARY: Notice is hereby given, under authority of 43 CFR part 1784, that the Wild Horse and Burro Advisory Board will meet in the Washington, DC, area on January 28–30, 1992, at the Rosslyn Westpark Hotel, 1900 North Fort Myer Drive, Arlington, Virginia 22209, from 9 a.m. to 4:30 p.m. on January 28 and 29 and from 9 a.m. to 12 noon on January 30.

DATES: January 28–30, 1992.

ADDRESSES: Director (250), Bureau of Land Management, LS—room 206, 1849 C Street, NW., Washington, DC 20240.

FOR FURTHER INFORMATION OR TO SCHEDULE OR SUBMIT TESTIMONY, CONTACT: John S. Boyles, Chief, Division of Wild Horses and Burros, at the above address; telephone (202) 653–9215.

VOL 56 ISS 248 DEC 26 1991 UMI

SUPPLEMENTARY INFORMATION: The purpose of the Board is to advise the Secretary of the Interior, the Director, Bureau of Land Management (BLM), the Secretary of Agriculture, and the Chief, Forest Service, on matters pertaining to management and protection of wild free-roaming horses and burros on the Nation's public lands. At this meeting, the Board will discuss topics shown in the agenda below.

The meeting will be open to the public. Members of the public may make oral statements to the Board on January 29, 1992, starting at 3:15 p.m. Persons wishing to make statements should notify the BLM at the address or telephone number given above by January 17, so that time can be scheduled for their presentations. Depending on the number of speakers, it may be necessary to limit the length of each presentation. Speakers should address specific wild horse and burro issues related to the topics on the agenda. Speakers must submit a written copy of their testimony to the address given above or bring a written copy to the meeting. Persons who wish to provide testimony but who are unable to attend the meeting may submit a written statement to the address above.

The proposed agenda for the meeting is:

Tuesday, January 28: Morning: Review of draft report to the Secretaries of the Interior and Agriculture; discussion of wild horse and burro research needs.

Afternoon: Discussion of options and innovations for management and control and ways to develop leadership in the wild horse and burro program.

Wednesday, January 29: Morning: Review of second draft of report; briefing on Fiscal Year (FY) 1992 budget and review of FY 1990 expenditures.

Afternoon: Outreach briefing by the BLM Washington Office Public Affairs Staff; public comment period.

Thursday, January 30: Morning: Briefing on wild horse and burro strategic plan by BLM Nevada State Director; Advisory Board report presented to the Secretaries of the Interior and Agriculture, or their representatives.

Dated: December 20, 1991.

Cy Jamison,

Director, Bureau of Land Management.

BILLING CODE 4310-84-M

[G-010-4352-12/GS-0102]

Seasonal Closures in Bisti Wilderness and De-na-zin Wilderness; Off-Road Vehicle Restrictions in Aztec Gilia Area of Critical Environmental Concern

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Use Restrictions.

SUMMARY: To protect candidate or listed species under the Endangered Species Act, use restrictions are announced by the Farmington Resource Area, Albuquerque District.

Areas within ¼ mile of any active raptor nest will be posted and closed during the nesting season in the Bisti Wilderness.

Areas within ¼ mile of any active raptor nest will be posted and closed during the nesting season in the De-na-zin Wilderness.

Off-Road Vehicle use in the Aztec Gilia Area of Critical Environmental Concern will be limited to designated roads and trails.

SUPPLEMENTARY INFORMATION: Seasonal closures in the Bisti Wilderness and De-na-zin Wilderness are affected to protect the Ferruginous Hawk, a Category 2 species under the Endangered Species Act, and the Golden Eagle and Prairie Falcon, two species of special concern. These species are particularly susceptible to disturbance by human approaches. Affected area is approximately 125 acres per nest. Season of closure will be generally from March 15 to July 15. Authority for these closures is found in 43 CFR part 8364 and 43 CFR 8560.1-1, and is in keeping with management prescriptions as detailed in the Bisti Wilderness Management Plan of 1986 and the De-na-zin Wilderness Management Plan of 1989. Any person who fails to comply with a closure issued under 43 CFR part 8364 may be subject to the penalties provided in 43 CFR 8360.0-7: violations are punishable by a fine not to exceed $1,000 and/or imprisonment not to exceed 12 months.

Off-Road Vehicle restrictions in the Aztec Gilia Area of Critical Environmental Concern (ACEC) are affected to protect Gilia formosa, a Category 2 species under the Endangered Species Act. Affected area is approximately 6,400 acres. Authority for this restriction is found in 43 CFR 8340, and violations are punishable by a fine not to exceed $1,000 and/or imprisonment not to exceed 12 months. These restrictions are in keeping with the designation for this area as described in the Farmington Resource Management Plan of 1988; Aztec Gilia ACEC was inadvertently omitted from the notice of Off-Road Vehicle designation published in the **Federal Register** on September 1, 1988 (53 FR 33881).

FOR MORE INFORMATION CONTACT: Christopher Barns or Bill Falvey, BLM Farmington Resource Area, 1235 La Plata Highway, Farmington, New Mexico 87401; phone number (505) 327-5344.

Dated: December 16, 1991.

Robert T. Dale,

District Manager.

BILLING CODE 4310-HC-M

Bureau of Indian Affairs

Crow Irrigation Project Operation; Maintenance Rates

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Public notice.

PURPOSE: Proposed increase to the Crow Irrigation Project Operation and maintenance rates.

SUMMARY: The Bureau of Indian Affairs is proposing to increase the operation and maintenance rate of the Crow Irrigation Project from $10.60 to $11.60 per assessable acre. The cost to operate and maintain the irrigation project have increased since the last operation and maintenance rate increase and these cost are anticipated to increase in Fiscal Year 1992.

The projects annual operation and maintenance charges are based on the estimated normal operating cost of the project for one Fiscal Year. Copies of the proposed 1992 budget may be acquired from the Superintendent of the Crow Agency, Bureau of Indian Affairs, Crow Agency, Montana 59022. A self addressed manila envelope with postage must be included when making your request.

The due date for all operation and maintenance charges will be May 1 of each calendar year.

Interest and/or penalty fees will be assessed on all (Trust, and Fee assessed lands) delinquent operation and maintenance charges as prescribed in the 42 Bureau of Indian Affairs Manual and the Code of Federal Regulations, chapter 4, part 102. Government agencies, such as Federal, State and Tribal Governments are exempted from interest and/or penalty fees.

This notice will be published and posted at the following locations:

U.S. Post Offices

Crow Agency, Mt. 59022
Hardin, Mt. 59034

Newspaper

Big Horn County News
Hardin, Mt. 59034

Bureau of Indian Affairs

Crow Agency
Crow Agency, Mt. 59022.

COMMENT PERIOD: All comments concerning the proposed 1992 operating and maintenance charges for the Crow irrigation project must be in writing and addressed to the Superintendent of the Crow Agency, Crow Agency, Montana 59022. All written comments will be accepted on or after December 23, 1991, but no later than the close of business of January 24, 1992.

SUPPLEMENTARY INFORMATION: This notice is issued pursuant to the Code of Federal Regulations, chapter 25, part 171 under the authority delegated to the Area Director, by the Assistant Secretary of Indian Affairs and the Deputy Assistant Secretary of the Interior (Departmental Manual, chapter 3, part 230, (3.1 & 3.2)).

Richard Whitesell,

Billings Area Director.

BILLING CODE 4310-02-M

Bureau of Reclamation

San Luis Unit Drainage Program, Central Valley Project, CA

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of availability and notice of public hearings, INT DES 92-36.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA), as amended, the Department of the Interior, Bureau of Reclamation (Reclamation), has prepared a draft environmental impact statement (DEIS) on the San Luis Unit Drainage Program investigation. The DEIS describes and presents the environmental effects of no action plus four alternatives that will address agricultural drainage needs of the San Luis Unit through at least the year 2007 and be compatible with potential long-term solutions.

DATES: A 90-day public review period commences with the publication of this notice. Within the review period, written comments on the DEIS may be submitted to the Regional Director, Mid-Pacific Region, Bureau of Reclamation at the address provided below.

Public hearings on the DEIS will be held on the following dates at the locations indicated:

Tuesday, February 4, 1992, 1 p.m. to 4 p.m., the Sacramento Hilton, 2200 Harvard Street, Sacramento, California

Wednesday, February 5, 1992, 7 p.m. to 10 p.m., the Mendota Community Center, Mendota, California

Thursday, February 6, 1992, 7 p.m. to 10 p.m., Sheraton Smugglers Inn, Fresno, California

Tuesday, February 11, 1992, 7 p.m. to 10 p.m., Concord Hilton, Concord, California

ADDRESSES: Copies of the DEIS may be requested from: Regional Director, Bureau of Reclamation, Mid-Pacific Regional Office, 2800 Cottage Way, Attention: MP-405, Sacramento CA 95825-1898; telephone: (916) 978-5039.

Copies of the DEIS are available for inspection at the address above and at the following locations:

Office of the Commissioner, Bureau of Reclamation, Technical Liaison Division, 18th and C Streets, NW., room 7456, Washington, DC 20240; telephone: (202) 208-4662.

Denver Office, Bureau of Reclamation, Library, room 167, Building 67, Denver Federal Center, Denver, CO 80225; telephone: (303) 236-6963.

Libraries:

California State University, 2000 Jed Smith Dr., Sacramento, California

Sacramento County Library, 536 Downtown Plaza, Sacramento, California

Fresno County Free Library, 667 Quince Street, Mendota, California

Merced County Public Library, 2100 O Street, Merced, California

Kings County Public Library, 401 North Douty, Hanford, California

University of California, Water Resources Center, Berkeley Archives, Collection, 410 O'Brien Hall, Berkeley, California

University of California, Shields Library, Davis, California

FOR FURTHER INFORMATION CONTACT: Michael Delamore (Chief, Drainage, Water Quality and Environment Branch, MP-405), Bureau of Reclamation, Mid-Pacific Region, (916) 978-5039; or Dr. Wayne Deason (Manager, Environmental Services Staff, Bureau of Reclamation, Denver Federal Center), (303) 236-9336.

SUPPLEMENTARY INFORMATION: The proposed action concentrates on source control, monitoring, and pilot scale-demonstration programs of new technologies to collect, treat, and ultimately dispose of concentrated brines and salts (alternative 4). Source control activities include improving irrigation efficiency, setting lands aside for alternative uses, and other onfarm activities. This alternative proposes site-specific actions to implement recommendations in the final report of the San Joaquin Valley Drainage Program as they apply to the Federal San Luis Unit.

The proposed plan addressed in this DEIS fulfills the requirement of a court settlement (Barcellos Judgment) by presenting an implementable drainage plan by December 31, 1991, for drainage service for the Westlands Water District to the year 2007, while considering the

VOL
56
ISS
248
DE
26
1991
UMI

need for consistency with long-term needs and opportunities.

The agricultural drainage problem affects the agricultural economy, fish and wildlife resources, and water quality and has the potential to affect public health. Any viable plan for agricultural drainage in the San Luis Unit must also consider and be protective of fish and wildlife, water quality, and public health.

The no action alternative identifies the impacts of future agricultural operations without implementing any of the other alternatives.

Hearing Process Information: Organizations and individuals wishing to present statements at the hearings should contact Reclamation's Mid-Pacific Regional Office at the above address to announce their intention to participate.

Requests for scheduled presentations will be accepted through 4 p.m. on February 3, 1992, and may also be made at each hearing. Requests should indicate at which hearing the speaker wishes to appear. Speakers will be called upon to present their comments in the order in which requests were received. Advance requests will be called before requests made at the hearings. Oral comments will be limited to 10 minutes per individual. Speakers not present when called will lose their position in the scheduled order and will be recalled at the end of the schedule. Written comments from those unable to attend or those wishing to supplement their oral presentations at the hearings will be accepted through March 15, 1992, by Reclamation's Mid-Pacific Regional Office at the above address. All comments received during the 90-day public comment period will be addressed in the final environmental impact statement.

Dated: December 20, 1991.

Joe D. Hall,

Deputy Commissioner.

[FR Doc. 91-30671 Filed 12-24-91; 8:45 am]

BILLING CODE 4310-09-M

Tucson Aqueduct Reliability Investigation Project, Pima Co., AZ

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of intent to prepare a draft environmental impact statement and notice of public scoping meetings.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, as amended, the Department of the Interior proposes to prepare a draft environmental impact statement (DEIS) for the Tucson Aqueduct System Reliability Investigation (TASRI) Project.

DATES AND LOCATIONS: There will be two public scoping meetings:

March 9, 1992, 6 p.m., Tucson Convention Center, 260 South Church Street, Tucson, Arizona

March 10, 1992, 6 p.m., Vesey School, 5005 South Butts, Tucson, Arizona

FOR FURTHER INFORMATION CONTACT: Mr. Kurt W. Flynn, Environmental Division, Arizona Projects Office, Bureau of Reclamation, P.O. box 9980, Phoenix, Arizona 85068, telephone: (602) 870-6768.

SUPPLEMENTARY INFORMATION: The United States agreed, in the April 1986 Plan 6 Funding Agreement, to evaluate alternatives that "if approved by the Secretary [of the Interior] will provide as reasonably reliable a supply of municipal and industrial (M&I) water for the water users in the Tucson area as is provided for other major Central Arizona Project M&I water subcontractors * * *."

Tucson's location at the end of the aqueduct system and the existence of nine pumping plants between Phoenix and Tucson, Arizona, increases Tucson's vulnerability to routine maintenance outages. This difference in reliability between Phoenix and Tucson is the motive for the TASRI project.

The DEIS will analyze the environmental issues involved with alternatives that provide the municipal and industrial water users of the Tucson, Arizona, area with a supply of water that is as reasonably reliable as that provided other major central Arizona municipal and industrial water subcontractos.

Analysis will include, but not be limited to, the no action alternative, above-ground storage, ground-water storage/retrieval, and physical modifications to the aqueduct system. Combinations of one or more of the above alternatives, as well as any other alternatives identified during the public scoping process, may be included in the analysis. The DEIS is expected to be completed and available for review and comment by early 1993.

Based on public comment to date, Reclamation has developed the following list of significant environmental issues:

- Loss of desert habitat.
- Esthetic impacts to parks and surrounding areas.
- Impacts on plants and wildlife including threatened or endangered species.
- Impacts on properties listed or eligible for listing on the National Register of Historic Places.
- Use of Tucson Water's existing well system rather than building new facilities.
- Aquifer contamination and depletion.
- Creation of wetland and riparian habitat.
- Quality of drinking water.
- Impacts to landowners and residences.
- Impacts to Indian reservation land.
- Assistance in flood control.
- Impacts to air quality during construction.
- Creation of recreational benefits.

Reclamation will consult with other Federal, State, and local agencies with specific expertise regarding environmental impacts resulting from the TASRI Project.

Written comments may be sent to Mr. Kurt W. Flynn at the Arizona Projects Office, address above. To ensure inclusion in the environmental analysis, the comments should be received by this office no later than April 10, 1992. Comments submitted to Reclamation as a result of previous TASRI public involvement will automatically be considered in the preparation of the DEIS.

Dated: December 19, 1991.

Joe D. Hall,

Deputy Commissioner.

BILLING CODE 4310-09-M

Fish and Wildlife Service

Receipt of Applications for Permit

The following applicants have applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

PRT 764286

Applicant: San Diego Zoological Society, San Diego, CA.

The applicant requests a permit to import one male and one female captive born Anoa (*Bubalus depressicornis*) from Diergaarde Blijdorp, Rotterdam, Netherlands, for captive breeding.

PRT 744878

Applicant: Institute for Wildlife Studies, Arcata, CA.

The applicant requests the following amendments to their current permit which allows live-trapping, bleeding, and placement of telemetry transmitters on bald eagles (*Haliaeetus leucocephalus*): 1. Request authorization to remove up to two bald eagle nestlings per year for purposes of fostering failing nest sites on Santa Catalina Island; 2. authorization to harass bald eagles to obtain prey samples for contaminant studies on prey species. No more than one prey item per individual eagle will be sampled per month; 3. transfer eggs from wild nests on Catalina Island to the San Fransisco Zoo for artificial rearing and transfer of nestlings from the zoo to Santa Catalina Island for fostering to wild nests.

PRT 764416

Applicant: San Diego Zoological Society, San Diego, CA.

The applicant requests a permit to import two male and two female captive born Gabot's tragopans (*Tragopan caboti*) from the Guangxi Normal University, People's Republic of China, for captive breeding purposes.

PRT 763825

Applicant: A.L. Cuming, Watkinsville, GA.

The applicant requests a permit to import eight male and four female captive-bred, white-eared pheasants (*Crossoptilon crossoptilon*) and eight male and four female captive-bred, brown-eared pheasants (*Crossoptilon mantchuricum*) for breeding purposes.

Written data or comments should be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203 and must be received by the Director within 30 days of the date of this publication.

Documents and other information submitted with these applications are available for review by any party who submits a written request for a copy of such documents to, or by appointment during normal business hours (7:45-4:15) in, the following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203. Phone: (703/358-2104); FAX: (703/358-2281).

Dated: December 20, 1991.

Susan Jacobsen,

Acting Chief, Branch of Permits, Office of Management Authority.

[FR Doc. 91-30807 Filed 12-24-91; 8:45 am]

BILLING CODE 4310-55-M

Receipt of Application for Permit

The public is invited to comment on the following application for a permit to conduct certain activities with marine mammals. The application was submitted to satisfy requirements of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*) and the regulations governing marine mammals (50 CFR part 18).

File no. PRT 762093.

Applicant: Oregon Coast Aquarium, 2820 SE Ferry Slip Road, Newport, OR 97365.

Type of Permit: Public display.

Name and Number of Animals: Alaskan sea otter (*Enhydra lutris*); one male and two females.

Summary of Activity to be Authorized: The applicant proposes to import these animals for public display. The otters were obtained as beached and stranded animals due to the 1989 Exxon Valdez oil spill, Anchorage, Alaska, and are currently being held at the Vancouver Public Aquarium, Vancouver, B.C., Canada.

Source of Marine Mammals for Public Display: 1989 Exxon Valdez oil spill, Anchorage, Alaska.

Period of Activity: Duration for life of the animals.

Concurrent with the publication of this notice, the Office of Management Authority is forwarding copies of the application to the Marine Mammal Commission and the Committee of Scientific Advisors for their review.

Written data or comments and/or requests for a public hearing on this application should be submitted to the Director, U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203 and must be received by the Director within 30 days of the date of this publication. Anyone requesting a hearing should give specific reasons why a hearing would be appropriate. The holding of such a hearing is at the discretion of the Director.

Documents and other information submitted with this application are available for review by any party who submits a written request for a copy of such documents to, or by appointment during normal business hours (7:45-4:15) in, the following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, Office of Management Authority, 4401 North Fairfax Drive, room 432, Arlington, Virginia 22203. Phone: (703/358-2104); FAX: (703/358-2281).

Dated: December 20, 1991.

Maggie Tieger,

Acting Chief, Branch of Permits, Office of Management Authority.

BILLING CODE 4310-55-M

National Park Service

Golden Gate National Recreation Area and Point Reyes National Seashore Advisory Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Golden Gate National Recreation Area Advisory Commission will be held at 10 a.m. (PST) on Saturday, January 11, 1992 at the Presidio Golden Gate NCO Enlisted Club, Lincoln Boulevard and Sheridan Avenue, Presidio of San Francisco, California.

The Advisory Commission was established by Public Law 92-589 to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on problems pertinent to the National Park Service systems in Marin, San Francisco and San Mateo Counties.

Members of the Commission are as follows:

Mr. Richard Bartke, Chairman
Ms. Amy Meyer, Vice Chair
Mr. Ernest Ayala
Dr. Howard Cogswell
Brig. Gen. John Crowley, USA (ret)
Mr. Margot Patterson Doss
Mr. Neil D. Eisenberg
Mr. Jerry Friedman
Mr. Steve Jeong
Ms. Daphne Greene
Ms. Gimmy Park Li
Mr. Gary Pinkston
Mr. Merritt Robinson
Mr. R.H. Sciaroni
Mr. John J. Spring
Dr. Edgar Wayburn
Mr. Joseph Williams

The main agenda item at this public meeting will be receiving public comment on the Presidio Concepts Workbook, a work-in-progress report on planning for uses of the Presidio of San Francisco, issued by the National Park Service in November 1991. The Presidio will be transferred to the National Park Service when the U.S. Army vacates the post, expected in late 1994.

The National Park Service is interested in learning which items identified in the Presidio Concepts Workbook the public feels have merit for further evaluation as alternatives for the future of the Presidio as part of the Golden Gate National Recreation Area. The public's comments on the concepts will be considered along with technical and feasibility analyses as the Presidio Planning Team develops more detailed alternatives.

VOL 56 ISS 248 DEC 26 1991 UMI

A Draft Plan Amendment (which includes a proposed plan and several alternatives) and an accompanying Environmental Impact Statement (EIS) are scheduled to be released by the National Park Service for public comment in the fall of 1992. The Final Plan Amendment and Final Environmental Impact Statement are expected in the summer of 1993.

Copies of the Presidio Concepts Workbook can be obtained by calling (415) 556–7385.

The meeting will also contain a Superintendent's Report.

This meeting is open to the public. It will be recorded for documentation and transcribed for dissemination. Minutes of the meeting will be available to the public after approval of the full Advisory Commission. A transcript will be available after January 31, 1992. For copies of the minutes contact the Office of the Staff Assistant, Golden Gate National Recreation Area, Building 201, Fort Mason, San Francisco, California 94123.

Dated: December 18, 1991.

Stanley T. Albright,

Regional Director, Western Region.

BILLING CODE 4310-70-M

INTERNATIONAL TRADE COMMISSION

[Investigation 337-TA-328]

Certain Bathtubs and Other Bathing Vessels and Materials Used Therein; Receipt of Initial Determination Terminating Respondent on the Basis of Consent Order Agreement

AGENCY: U.S. International Trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above captioned investigation terminating the following respondent on the basis of a consent order agreement: SWC Industries, Inc.

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon parties on December 20, 1991.

Copies of the initial determination, the consent order agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 205–2000. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

WRITTEN COMMENTS: Interested persons may file written comments with the Commission concerning termination of the aforementioned respondents. The original and 14 copies of all such documents must be filed with the Secretary to the Commission, 500 E Streets, SW., Washington, DC 20436, no later than 10 days after publication of this notice in the **Federal Register**. Any person desiring to submit a document (or portions thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Ruby J. Dionne, Office of the Secretary, U.S. International Trade Commission, Telephone (202) 205–1802.

Issued: December 20, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[332-288]

Ethyl Alcohol for Fuel Use: Determination of the Base Quantity of Imports

AGENCY: International Trade Commission.

ACTION: Notice of determination.

SUMMARY: Section 7 of the Steel Trade Liberalization Program Implementation Act (19 U.S.C. 2253 note), enacted in December 1989, concerns local feedstock requirements for fuel ethyl alcohol imported by the United States from CBI-beneficiary countries. The U.S. International Trade Commission's role as outlined in this Act was to determine annually for 2 years the U.S. domestic market for ethyl alcohol during the 12-month period ending on the preceding September 30. The domestic market estimate made by the Commission is to be used to establish the "base quantity" of imports that can be imported with a zero percent local feedstock requirement. Beyond the base quantity of imports, progressively higher local feedstock requirements are placed on imports of fuel ethyl alcohol and mixtures from the CBI-beneficiary countries.

For purposes of making determinations of the U.S. market for ethyl alcohol as required by section 7 of the Act, the Commission instituted Investigation No. 332–288, Ethyl Alcohol for Fuel Use: Determination of the Base Quantity of Imports, in March 1990. The Commission uses official statistics of the U.S. Departments of Commerce and Treasury to make these determinations.

Section 225 of the Customs and Trade Act of 1990 (Pub. L. 101–382, August 20, 1990) amended the original language set forth in the Steel Trade Liberalization Program Implementation Act of 1989. In the amendment, a determination of the U.S. domestic market for ethanol will be made for each year after 1989.

For the 12-month period ending September 30, 1991, the Commission has preliminarily determined the level of U.S. consumption of ethyl alcohol to be 840 million gallons. Seven percent of this amount is 58.8 million gallons. Because the law specifies that the base quantity to be used by Customs in the administration of the law is the greater of 60 million gallons or 7 percent of U.S. consumption as determined by the Commission, the base quantity for 1992 should be 60 million gallons. It should be noted that certain of the data required to make the determination is being estimated by the Commission pending finalization of Treasury and Commerce statistics through September 1991 for alcohol fuel producers. In the event that the finalized data materially change the base quantity estimate to be used in 1992, the Commission will notify the Customs Service and issue an amended **Federal Register** notice.

EFFECTIVE DATE: December 16, 1991.

FOR FURTHER INFORMATION CONTACT: Mr. David G. Michels (202–205–3352) or Mr. James A. Emanuel (202–205–3367) in the Commission's Office of Industries. For information on legal aspects of the investigation contact Mr. William Gearhart of the Commission's Office of the General Counsel at 202–205–3091. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting our TDD terminal on (202) 205–1810.

Issued: December 17, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

[FR Doc. 91–30862 Filed 12–24–91; 8:45 am]

BILLING CODE 7020-02-M

[Investigation No. 701–TA–309 (Final)]

Magnesium From Canada; Notice of Institution

AGENCY: United States International Trade Commission.

ACTION: Institution and scheduling of a final countervailing duty investigation.

SUMMARY: The Commission hereby gives notice of the institution of final countervailing duty investigation No. 701–TA–309 (Final) under section 705(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b)) (the act) to determine whether an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports from Canada of primary magnesium,[1] that all alleged to be subsidized by the Government of Canada.

For further information concerning the conduct of this investigation, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

EFFECTIVE DATE: December 4, 1991.

FOR FURTHER INFORMATION CONTACT: Fred Fischer (202–205–3179), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000.

SUPPLEMENTARY INFORMATION:

[1] The product covered by this investigation is primary magnesium, which consists of unwrought pure magnesium and magnesium alloys. Pure unwrought magnesium contains at least 99.8 percent magnesium by weight and is sold in various slab and ingot forms and sizes. Magnesium alloys contain less than 99.8 percent magnesium by weight, with magnesium being the largest metallic element in the alloy by weight. Pure and alloy magnesium are provided for in subheadings 8104.1100.00 and 8104.1900.00, respectively, of the Harmonized Tariff Schedule of the United States (HTS). Excluded from the scope of investigation are secondary magnesium and magnesium alloys which contain 70 percent or less of magnesium by weight.

Background

This investigation is being instituted as a result of an affirmative preliminary determination by the Department of Commerce that certain benefits which constitute subsidies within the meaning of section 703 of the act (19 U.S.C. 1671b) are being provided to manufacturers, producers, or exporters in Canada of pure and alloy magnesium. The investigation was requested in a petition filed on September 5, 1991, by Magnesium Corp. of America (MagCorp), Salt Lake City, UT.

Participation in the Investigations and Public Service List

Persons wishing to participate in the investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's rules, not later than twenty-one (21) days after publication of this notice in the **Federal Register**. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to this investigation upon the expiration of the period for filing entries of appearance.

Limited Disclosure of Business Proprietary Information (BPI) Under an Administrative Protective Order (APO) and BPI Service List

Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in this final investigation available to authorized applicants under the APO issued in the investigation, provided that the application is made not later than twenty-one (21) days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Staff Report

The prehearing staff report in this investigation will be placed in the nonpublic record on Friday, February 21, 1992, and a public version will be issued thereafter, pursuant to § 207.21 of the Commission's rules.

Hearing

The Commission will hold a hearing in connection with this investigation beginning at 9:30 a.m. on Thursday, March 5, 1992, at the U.S. International Trade Commission Building. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission on or before Friday, February 28, 1992. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should attend a prehearing conference to be held at 9:30 a.m. on Monday, March 2, 1992, at the U.S. International Trade Commission Building. Oral testimony and written materials to be submitted at the public hearing are governed by §§ 201.6(b)(2), 201.13(f), and 207.23(b) of the Commission's rules.

Written Submissions

Each party is encouraged to submit a prehearing brief to the Commission. Prehearing briefs must conform with the provisions of § 207.22 of the Commission's rules; the deadline for filing is Friday, February 28, 1992. Parties may also file written testimony in connection with their presentation at the hearing, as provided in § 207.23(b) of the Commission's rules, and posthearing briefs, which must conform with the provisions of § 207.24 of the Commission's rules. The deadline for filing posthearing briefs is Wednesday, March 11, 1992; witness testimony must be filed no later than three (3) days before the hearing. In addition, any person who has not entered an appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before Wednesday, March 11, 1992. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Authority

This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.12 of the Commission's rules.

Issued: December 18, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

VOL 56 ISS 248 DEC 26 1991 UMI

[Investigation No. 337-TA-332]

Certain Translucent Ceramic Orthodontic Brackets; Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Institution of investigation pursuant to 19 U.S.C. 1337.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on November 21, 1991, under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, on behalf of Minnesota Mining and Manufacturing Corporation, 3M Center, St. Paul, Minnesota 55133; 3M Unitek Corporation, 2724 South Peck Road, Monrovia, California 92626; and Ceradyne Corporation, 3169–A South Redhill Avenue, Costa Mesa, California 92626. A supplement was filed on December 5, 1991. The complaint, as supplemented, alleges violations of section 337 by reason of unfair methods of competition and unfair acts in the unauthorized importation and sale of certain translucent ceramic orthodontic brackets, which allegedly infringe claims 1–2, 4, 6–8, 19, 22–23, 25–26, 28–31, 35–36, 39–40, and 42–43 of U.S. Letters Patent 4,954,080, and the claim of U.S. Letters Patent Des. 304,077; and that there exists an industry in the United States as required by subsection (a)(2) of section 337.

The complainants request that the Commission institute an investigation and, after a full investigation, issue a permanent exclusion order and permanent cease and desist orders.

ADDRESSES: The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E. Street, SW., room 112, Washington, DC 20436, telephone 202–205–1802. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–205–1810.

FOR FURTHER INFORMATION CONTACT: Juan Cockburn, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, telephone 202–205–2572.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and in § 210.12 of the Commission's Interim Rules of Practice and Procedure, 19 CFR 210.12.

SCOPE OF INVESTIGATION: Having considered the complaint, the U.S. International Trade Commission, on December 18, 1991, ORDERED THAT—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B)(i) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain translucent ceramic orthodontic brackets by reason of alleged infringement of claims 1–2, 4, 6–8, 19, 22–23, 25–26, 28–31, 35–36, 39–40, or 42–43 of U.S. Letters Patent 4,954,080, or the claim of U.S. Letters Patents Des. 304,077; and whether there exists an industry in the United States as required by subsection (a)(2) of section 337.

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainants are—

Minnesota Mining and Manufacturing Corporation, 3M Center, St. Paul, Minnesota 55133
3M Unitek Corporation, 2724 South Peck Road, Monrovia, California 92626
Ceradyne Corporation, 3169–A South Redhill Avenue, Costa Mesa, California 92626

(b) The respondents are the following companies alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:

Tomy Incorporated, 4–11–2 Tamagawa, Chofu-Shi, Tokyo, Japan
Dentaurum J.P. Winklestroeter, KG., Turnstr. 31, D–7536 Ispringen, Germany
GAC International, Inc., 185 Oval Drive, Central Islip, New York 11722
Dentaurum, Inc., 2 Pleasant Run, Newtown, Pennsylvania 91840

(c) Juan Cockburn, Esq., Office of Unfair Import Investigations, U.S. International Trade Commission, 500 E Street, SW., room 401Q, Washington, DC 20436, who shall be the Commission investigative attorney, party to this investigation; and

(3) For the investigation so instituted, Janet D. Saxon, Chief Administration Law Judge, U.S. International Trade Commission, shall designate the presiding Administrative Law Judge.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with § 210.21 of the Commission's Interim Rules of Practice and Procedure, 19 CFR 210.21. Pursuant to §§ 201.16(d) and 210.21(a) of the Commission's Rules (19 CFR §§ 201.16(d) and 210.21(a)), such responses will be considered by the Commission if received not later than 20 days after the date of service of the complaint. Extensions of time for submitting responses to the complaint will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to such respondent, to find the facts to be as alleged in the complaint and this notice and to enter both an initial determination and a final determination containing such findings, and may result in the issuance of a limited exclusion order or a cease and desist order or both directed against such respondent.

Issued: December 18, 1991.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. 290 (Sub No. 5) (92–1)]

Quarterly Rail Cost Adjustment Factor; Notice

AGENCY: Interstate Commerce Commission.

ACTION: Approval of rail cost adjustment factor and decision.

SUMMARY: The Commission has approved the first quarter 1992 rail cost adjustment factor (RCAF) and cost index filed by the Association of American Railroads. The first quarter RCAF (Unadjusted) is 1.168. The fourth quarter RCAF (Adjusted) is 1.040, a decrease of 1.6 percent from the fourth quarter 1991 RCAF (Adjusted) of 1.057. Maximum first quarter 1992 RCAF rate levels may not exceed 98.4 percent of maximum fourth quarter 1992 RCAF rate levels.

EFFECTIVE DATE: January 1, 1992.

FOR FURTHER INFORMATION CONTACT: William T. Bono (202) 927–5720, Robert C. Hasek (202) 927–6289. (TDD for hearing impaired (202) 927–5721).

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision write to, call, or pick up in person from: Dynamic Concepts, Inc., room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or telephone (202) 289–4357/4359. (Assistance for the hearing impaired is available through TDD services (202) 927–5721.)

This action will not significantly affect either the quality of the human environment or energy conservation.

Decided: December 16, 1991.

By the Commission, Chairman Philbin, Vice Chairman Emmett, Commissioners Simmons, Phillips, and McDonald.

Sidney L. Strickland, Jr.,

Secretary.

SUPPLEMENTARY INFORMATION:

Message from the Attorney General

I am pleased to announce the publication of the Office of Justice Programs' (OJP) Fiscal Year 1992 Program Plan. It represents a landmark effort on the part of OJP to target the resources of its five agencies on the highest priorities of law enforcement in the fight against drug and violent crime. OJP comprises the Bureau of Justice Assistance, the Bureau of Justice Statistics, the National Institute of Justice, the Office of Juvenile Justice and Delinquency Prevention, and the Office for Victims of Crime. In this Program Plan, these five agencies have unified their programs in accordance with Department of Justice priorities such as Gangs and Violent Offenders, Intermediate Sanctions and Community Policing, among others.

OJP is the primary component of the Department's effort to form partnerships with and provide assistance to State and local governments. The Justice Assistance Act of 1984 established OJP in order to foster the cooperation and coordination required to assist the criminal justice system to function effectively at the State and local level. OJP has done an outstanding job of enhancing State and local criminal justice efforts; upgrading the quality of criminal history records and statistics; conducting vital research and development; promoting programs to safeguard juveniles; and advancing the rights of victims of crime.

Violent crime and drug use have cut across all segments of our society and represent a major threat to the well-being of our Nation. The innovative programs contained herein will place Federal resources where they can truly be effective on the front lines of our cities, towns, streets and communities and in the hands of those who wage, first-hand, the daily battle to keep our neighborhoods safe and drug-free.

I strongly endorse this Fiscal Year 1992 Program Plan and commend OJP for its strong leadership and commitment to assisting law enforcement in its ongoing battle against crime and drugs.

William P. Barr,

Attorney General.

Foreword

The Office of Justice Programs (OJP) is taking a leadership role in the Department of Justice in forging Federal, State, and local partnerships that will have maximum impact on the problems of violent crime and drug-related crime. OJP's Fiscal Year 1992 Program Plan is designed to foster these cooperative efforts and, at the same time, combine the resources and expertise of each of OJP's five bureaus: The Bureau of Justice Assistance (BJA); the Bureau of Justice Statistics (BJS); the National Institute of Justice (NIJ); the Office of Juvenile Justice and Delinquency Prevention (OJJDP); and the Office for Victims of Crime (OVC).

The Office of Justice Programs has established ten priority areas for discretionary grant funding and program development in Fiscal Year 1992. These ten priority areas are designed to attack violent crime and drug-related crime on all fronts—from law enforcement to the judiciary to the community, to assure accountability for law-breakers and drug users, to assist crime victims, and to determine "what works" in the fight against drug-related crime and violence The Fiscal Year 1992 priorities are:

- Gangs and Violent Offenders
- Victims
- Community Policing and Police Effectiveness
- Intermediate Sanctions and User Accountability
- Drug Prevention
- Drug Testing
- Intensive Prosecution and Adjudication
- Evaluation
- Money Laundering and Financial Investigations
- Information Systems, Statistics and Technology

Most programs and activities in Fiscal Year 1992 will be funded under the priorities listed above. However, there are other programs—not included in this document—which respond to specific Congressional mandates. These programs will be continued in Fiscal Year 1992 in conformance with the intent of Congress. For example, the Public Safety Officers' Benefits Program and the Regional Information Sharing System are not listed, although these programs will be fully operational in Fiscal Year 1992.

During 1991, I traveled to more than 20 cities across the United States to talk with community leaders about their experiences with drug-related crime and gang violence and what they had found to be effective in combatting these problems. It is important that OJP planning decisions, the identification of program priorities, the allocation of resources, and the development of anti-drug abuse strategies not be made in isolation. Toward that end, OJP conducted a series of National Field Studies on Gangs and Gang Violence

VOL
56
ISS
248
DE
26
1991
UMI

this year in Los Angeles, Dallas and Chicago, with a fourth session planned for early in 1992 in an East Coast city. OJP Bureau Directors also participated in the Field Studies.

The purpose of the Gang Field Studies is to learn first-hand from the people facing the terror of gang violence on a daily basis what works and what does not in combatting the problem of gang-related violent crime. The information gained from the Field Study has been invaluable in developing the Fiscal Year 1992 OJP Program Plan. Moreover, we will take what we have learned from the Gang Field Studies and develop a national strategy—a plan of action—to prevent and suppress gang activity, prosecute hard-core gang members, assist the victims of gang violence, and return gang-infested neighborhoods to their law-abiding residents.

Although OJP Bureau Directors and I learned about many promising programs through the Field Studies, all too often there was not the kind of comprehensive, coordinated effort that is important in implementing an effective drug control strategy. President Bush in his National Drug Control Strategy stated, "America's fight against epidemic illegal drug use cannot be won on any single front alone; it must be waged everywhere—at every level of Federal, State, and local government and by every citizen in every community across the country."

This comprehensive approach is the principal focus of a major Department-wide initiative called "Operation Weed and Seed," which is described in more detail in this Program Plan. It is designed to target crime in areas where it is the most severe, usually in inner-city minority communities. I am proud of the work the Office of Justice Programs is doing to implement this comprehensive strategy in communities throughout the country. I am further excited about the potential that "Operation Weed and Seed" has for revitalizing crime-infested neighborhoods and restoring hope among families who must live and work in areas where crime and related violence are rampant. You will be learning more about "Operation Weed and Seed" as the number of pilot demonstration sites is expanded in Fiscal Year 1992 across the country. I believe that "Operation Weed and Seed" is the wave of the future for combatting and preventing drug and gang-related violent crime.

I would like to thank the OJP Bureau Directors and their staffs, as well as other Federal and State officials, and representatives of national criminal justice organizations, who contributed valuable suggestions for the Fiscal Year 1992 Program Plan. Working together, through comprehensive and coordinated efforts reflected in this document, we can drive criminals and drug traffickers out of our communities and make our neighborhoods safe places in which to live, work and raise a family. The law-abiding citizens of this Nation deserve no less and we are committed to achieving that goal for this and future generations.

Jimmy Gurulé,

Assistant Attorney General.

Office of Justice Programs Weed and Seed Strategy

The Office of Justice Programs, through its discretionary grant program resources, will initiate in Fiscal Year 1992 a comprehensive strategy entitled "Operation Weed and Seed." Operation Weed and Seed is an innovative, comprehensive and integrated multi-agency approach to law enforcement and community revitalization for controlling and preventing violent crime, drug abuse and gang activity in the United States.

Operation Weed and Seed has two distinct components. The first is to utilize existing and new Federal resources to "weed out" violent criminals, illegal gang activity, drug trafficking and related violence from selected high-crime neighborhoods. Under the second component, neighborhoods will be "seeded" with social, economic and community revitalization programs. This overall strategy is based on coordination and concentration of Federal, State and local resources, both public and private.

"Weeding" (or enforcement) is accomplished by coordinating Federal, State and local criminal justice systems (law enforcement, prosecution, adjudication and correctional supervision activities). The most violent repeat offenders, drug traffickers and members of street gangs will be targeted, apprehended and incapacitated. This enforcement strategy will keep these offenders off the streets through such programs as Operation Triggerlock, a nationwide, coordinated effort to prosecute violent criminals and drug kingpins for firearms-related violations under Federal laws. This approach has a positive effect by demonstrating to community residents that criminal violators will not be released back into the community shortly after arrest. The offender is immediately removed from the streets, receives swift justice, serves a mandatory prison term and is thereby prevented from returning to terrorize the community.

An essential element of the Weed and Seed strategy is community policing. Community policing involves law enforcement working in partnership with neighborhood residents to develop solutions to the problems of violent crime and drug abuse. Through community policing, the groundwork is laid for the next phase of the Weed and Seed program.

"Seeding" (community revitalization) is accomplished by implementing and focusing a broad array of existing and new social, economic, and recreational programs in these targeted neighborhoods, once violent felons and drug traffickers have been weeded out. Historically, social programs have a better chance of succeeding if they are placed within a crime-free and drug-free environment. Seeding should involve substantial cooperation between Federal, State and local agencies, along with local business and community organizations. Examples of programs included in the seeding component are health, education, labor, housing, small business development and recreational activities. Private sector resources and community participation are essential to the success of the Weed and Seed program. All of these entities must work together in partnership with the residents of the community.

To demonstrate the Weed and Seed strategy, in Fiscal Year 1991 the Office of Justice Programs, through the Bureau of Justice Assistance (BJA), provided funding to establish the first three Weed and Seed pilot sites at Trenton, New Jersey; Kansas City, Missouri; and Omaha, Nebraska. In addition, as part of the Department's broader Weed and Seed initiative in Fiscal Year 1991, OJP through BJA entered into a public-private partnership with New York University and two private foundations to fund a 3-year, $8 million anti-drug program. The Ford Foundation is contributing $3 million and the Pew Charitable Trusts is contributing $1 million toward the program. BJA is contributing $4 million. The purpose of the program is to develop and test a comprehensive intervention strategy for controlling and preventing illegal drug use and other criminal activity among high-risk youth in drug- and crime-infested neighborhoods. The program includes recreational alternatives and tutoring for idle youth to help keep them in school, out of trouble, and out of gangs. The NYU program will be implemented in five cities across the country.

In Fiscal Year 1992, Operation Weed and Seed will be continued in order to expand the initial, or "pilot," phase of the program. Although the strategy holds great promise, much work remains to be done in developing and refining the design of the program. While resources are limited in Fiscal Year 1992, Operation Weed and Seed will be expanded to approximately eight additional sites. In Fiscal Year 1993, it is anticipated that this experimental program will be expanded further to be national in scope. The number of sites funded in Fiscal Year 1993 will be based on the level of appropriations and the availability of funds.

Additionally, OJP agencies (BJA; the Office for Victims of Crime; and the Office of Juvenile Justice and Delinquency Prevention) provide formula grant funds to the States and territories. Those funds are administered by the State criminal justice planning agencies. The OJP formula grant funds, consistent with the statutory purposes, may be used to supplement the OJP discretionary activities described above or initiate similar programs at the State and local level.

Office of Justice Programs' Components

OJP components operate together as a coordinated unit, supporting the mission of the agency in providing leadership through innovation in the administration of justice, in keeping with the direction of the Administration and the Attorney General and the priorities set forth in the National Drug Control Strategy. The following information provides a brief description of each Bureau's programs and its total Fiscal Year 1992 discretionary grant dollars. These funds may be used to implement collaborative efforts between the Bureaus in selected programs. In addition, where agreements exist between OJP Bureaus and other agencies, the known external funding has been factored into the program totals. When this occurs, it is noted in the program summary.

The Bureau of Justice Assistance (BJA) administers the Edward Byrne Memorial State and Local Law Enforcement Assistance Program to support national drug control efforts and to improve State and local criminal justice systems. BJA's Discretionary Grant Program complements the Formula Grant Program through which funds are provided directly to the States to carry out their statewide drug control strategies. BJA funds innovative demonstration programs, some of which are national or multijurisdictional in scope; evaluates them to determine "what works" in drug and crime control; and encourages the replication of successful models through linkages with Formula Grant Funds and other resources. Discretionary Grant Funds are also used to provide enhanced training and technical assistance to State and local criminal justice personnel. The total Fiscal Year 1992 funds available for these activities are $54,050,000.

The Bureau of Justice Statistics (BJS) collects, analyzes, publishes and disseminates statistical information on crime, criminal offenders, victims of crime and the operations of justice systems at all levels of government and internationally. These objectives, critical data and analyses are used by key policymakers at the Federal, State and local levels in their efforts toward combatting drugs and crime. Generally, more than 90 percent of BJS' funds are allocated each year to ongoing statistical surveys and support entities. BJS also provides technical and financial support to State statistical and operating agencies responsible for the collection and analysis of State criminal justice data and statistics. The total Fiscal Year 1992 funds available for these activities excluding the BJA funds are $22,095,000.

The National Institute of Justice (NIJ) develops knowledge, conducts research and operates programs that support State and local efforts to combat crime and drug abuse. NIJ conducts evaluations of drug control programs and projects throughout the country. In addition, NIJ funds research and analyzes criminal justice policies and practices. NIJ tests new law enforcement and criminal justice programs and conducts demonstration projects. It operates a national and international clearinghouse for justice-related information, conducts national and regional conferences and produces publications detailing new policy options and successful programs. NIJ also provides technical assistance in the construction of correctional facilities and operates a technology and equipment program for law enforcement and corrections agencies. NIJ's unique mandate as a research and development agency requires flexibility to respond to varied needs and emerging national issues. The total Fiscal Year 1992 funds available for these activities are $23,739,000. (This does not include Fiscal Year 1991 carryover funds).

The Office of Juvenile Justice and Delinquency Prevention (OJJDP) provides assistance to State and local governments to improve their juvenile justice systems and to reduce delinquency. It also coordinates activities and policy for all Federal juvenile delinquency prevention efforts and provides leadership for the Coordinating Council on Juvenile Justice and Delinquency Prevention. It awards discretionary and formula grants that address a broad array of juvenile justice and delinquency prevention issues both nationally and through State and local subgrant assistance awards. The Juvenile Justice and Delinquency Prevention Act and the Missing Children's Assistance Act authorize the Office to fund research, development, demonstration and dissemination activities that develop and communicate information about what works in all aspects of the juvenile justice system: prevention, intervention, adjudication and supervision. OJJDP provides information through training and technical assistance to policymakers, practitioners and researchers throughout the Nation. The total Fiscal Year 1992 funds available for these activities are $22,439,698.

The Office for Victims of Crime (OVC) serves as the Federal focal point for improving the treatment of crime victims and ensuring that the criminal justice system recognizes the legitimate rights and interests of innocent victims. In addition to its role as a national victims advocate, OVC's program activities include victims' assistance and compensation grants to States, training and technical assistance and the provision of emergency services to victims of Federal crimes, particularly on Indian reservations. Given the demonstrable link between drug abuse and crime, the activities of OVC are an increasingly vital component in the Nation's war against illegal substance abuse. The total funding available from the Fiscal Year 1991 Crime Victims Fund is $3,873,000.

Gangs and Violent Offenders

$6,697,139

"We will not allow our communities to be held hostage to gangs and drug dealers." President Bush, November 2, 1990 (Remarks in Cincinnati, Ohio.)

"The first duty of any civil government is to protect its citizens. Through increased Federal, State and local cooperation we must rid our Nation's communities of the violent predators who are attempting to destroy the fabric of our society." Attorney General William P. Barr.

OJP Policy Statement

Federal, State and local law enforcement must work together in partnership with the community to combat adult and juvenile gang violence

and drug trafficking. Gang-related homicides and violent crime are tragically high and gang members armed with fully-automatic weapons pose a problem of national concern. The Office of Justice Programs will initiate a comprehensive agency-wide program which will emphasize prevention, intervention and suppression of illegal gang activity. A broad range of resources will be dedicated across the full spectrum of OJP agency functions, including policy research, evaluation, program development, demonstration, training and technical assistance, and information dissemination.

OJP Program Response

Bureau of Justice Assistance (BJA)

$775,000

New Programs

Summit on Violent Crime—Southeastern Region

$125,000 [1]

One-time funding support is being provided for the Southeastern States Violent Crime Summit. These States have established a regional planning and analysis process coordinated by the State of North Carolina to address the issue of increasing rates of violent crime. The following products are anticipated: (1) The identification of the most salient indicators to predict increases in violent crime; (2) innovative, regional planning approaches to address the growing instances of violent crime; (3) Federal, State and local agreements on program approaches to be adopted and funded through the Formula Grant Program; and (4) a regional, comprehensive strategy for addressing violent crime, incorporating the elements outlined above. This joint program implementation plan for the Southern States will include specific program elements and performance indicators. The program will be implemented by an existing grantee currently providing technical assistance, including conference support services, to formula grant program participants. No additional applications will be solicited in Fiscal Year 1992.

[1] This program and the corresponding budget amount represent a Congressional "earmark" or directive as contained in the Fiscal Year 1992 Appropriations report language pertaining to the Office of Justice Programs.

Continuation Programs

Urban Street Gang Drug Trafficking Suppression

$650,000

This is a demonstration program to develop model city-wide or multijurisdictional enforcement projects to investigate and prosecute drug distribution and drug-related violent crimes by organized urban street gang networks. Up to two new sites will be competitively selected during Fiscal Year 1992. Documentation of site implementation activities and model development will be undertaken by a separately-funded technical assistance and training effort which will operate concurrently with the implementation activities. This program will be implemented by the current grantee.

National Institute of Justice (NIJ)

$2,680,000

New Program

Research and Development on Gangs and Crime

$500,000

NIJ will support new gang research projects in Fiscal Year 1992 which will emphasize prevention, intervention and suppression of illegal gang activity. Building on efforts initiated in Fiscal Year 1991, issues of interest for Fiscal Year 1992 may include factors that influence gang involvement. Also, NIJ's Fiscal Year 1992 gang programs will reflect issues identified by the OJP National Field Study on Gangs and Gang Violence and by the National Academy of Sciences. Projects will be coordinated with BJA and OJJDP. Multiple awards are anticipated. Applications will be solicited in Fiscal Year 1992.

Research on Violence

$500,000

NIJ will expand its research program to study new aspects of violent crime. Research topics of particular interest in Fiscal Year 1992 may include characteristics of offenders and victims as well as risk and protective factors; violence-prone situations; alcohol and illegal drug use in criminal violence; correctional programs for serious, violent juvenile offenders; and improvements in the identification of suspected offenders through risk assessment profiling. Multiple awards are anticipated. Applications will be solicited in Fiscal Year 1992.

Research and Development on Gangs in Public Housing

$500,000

In coordination with the OJP Task Force on Gangs in Public Housing, NIJ will support a new research program on gangs and crime in public housing developments. This program will emphasize the prevention, intervention and suppression of illegal gang activity in public housing. In Fiscal Year 1992, NIJ will assess anti-gang law enforcement activities in public housing and examine the prevalence of gang-related crime in public housing. Multiple awards may be made in Fiscal Year 1992. Methods of procurement will be determined and solicitations issued, as appropriate.

Continuation Programs

Applied Research on Gangs

$100,000

NIJ, under its Research Applications Program, will continue to support applied research on gangs and crime. Activities in Fiscal Year 1992 may include site-specific case studies on gang prevention and intervention and control programs in State and local jurisdictions. These case studies may be published as part of NIJ's Focus on Programs and Issues and Practices series. Research is being conducted under an existing contract; no additional applications will be solicited in Fiscal Year 1992.

Longitudinal Study of Criminal Behavior

$1,000,000

This is a program between NIJ and the MacArthur Foundation studies the development of delinquent and criminal behavior patterns from birth to age 30 in multiple cities, gathering data over a 7-year period. The study will employ research approaches from a variety of disciplines and theoretical perspectives in order to understand better the individual and community circumstances under which criminal careers do and do not develop. During the course of the study, experimental projects may be implemented suggesting intervention strategies to prevent or control emerging patterns of delinquency and crime. Research is being conducted by a current grantee. No additional applications will be solicited in Fiscal Year 1992.

SMART Program

$80,000

The SMART Program, an interagency collaborative effort between NIJ and the Department of Education, is a demonstration program which provides assistance to local school districts in establishing safe, disciplined and drug-free schools. The program has been field-tested in more than 100 schools in seven districts. The program provides training, technical assistance and support in data collection and analysis, school-based team building and anti-drug strategy development. SMART Resource Centers have been established in the Anaheim, California, Union High School District and the Norfolk, Virginia, Public Schools. The Fiscal Year 1992 SMART program will expand to as many as 20 new pilot school districts. Services are being provided by a current grantee. No additional applications will be solicited in Fiscal Year 1992.

Office of Juvenile Justice and Delinquency Prevention (OJJDP)

$3,242,139

New Programs

Juvenile Justice System Handling of Sex Offenses and Offenders

$200,000

Research with adult sex offenders has shown that many began their offending behavior as juveniles. Within the past decade, the juvenile justice system has begun to address the problem of juvenile sex offenders. To understand and improve the system's ability to address effectively such offenses, OJJDP will begin a study of the juvenile justice system's response to juvenile sex offenders. This grant will assess the type and nature of these responses. This assessment will examine the flow of sex offenders through the system from initial contact to adjudication and disposition. Little is known about the relationship between various types of sex offenses and the sanctions or treatment approaches employed by the justice system. The project will also assess the justice system's response to different types of offenses from voyeurism and exhibitionism to violent assault and rape. The results from this study will indicate the direction of future efforts to improve the juvenile justice system's response to the problem. Applications will be solicited competitively.

Gang Prevention and Intervention

$800,000

The objective of this program is to reduce gang violence in a selected number of cities through legal suppression, community mobilization, and early intervention with gangs. OJJDP anticipates that awards will be made for programs in selected cities. Each city would choose the particular model that best fits its needs from among the promising program models which OJJDP identifies. The specific models will represent an integration of the best approaches identified in the OJJDP sponsored programs: The Gang Suppression and Intervention Program; Boys and Girls Clubs of America's Targeted Outreach with a Gang Component and the Serious Habitual Offender Comprehensive Action Program. Applications will be solicited competitively.

Continuation Programs

Youth Gang Intervention Training

$400,000

This is a collaborative interagency program between OJJDP and the Federal Law Enforcement Training Center. The objectives of this training program are: (1) To provide a process for community leaders to recognize the benefits of cooperatively developing strategies to address the problems resulting from gang and drug activities; (2) to promote an awareness and recognition of (a) the problems of gangs and drugs, (b) justice system practices, (c) behavior patterns of gangs and gang members, and (d) current system practices and demonstration projects; (3) to provide strategies and techniques for public and private interagency partnerships dealing dynamically with community gang and drug-related problems; (4) to clarify and document the legal roles, responsibilities and issues relating to an interagency approach to the prevention, intervention and suppression of these illegal activities of youth gangs; (5) to encourage leadership and innovation in the management and resolution of gang and drug problems; and (6) to develop or improve the response capacity to issues involving gangs and drugs through an effective interagency model which matches resources to demands.

National Youth Gang Clearinghouse

$225,139

The contract to Digital Systems Research, Inc., provides funding for OJJDP's National Youth Gang Clearinghouse. The Gang Clearinghouse will: (1) Gather and disseminate current information on model programs for combating violent juvenile gangs; (2) gather and disseminate current statistical and descriptive information on violent juvenile gangs; and (3) assist in the coordination of Federal, State and local gang program development and training and technical assistance efforts by providing information to the field on relevant programs and activities. This program will be administered by the current contractor. No additional applications will be solicited in Fiscal Year 1992.

Private Sector Options for Juvenile Corrections

$300,000

The American Correctional Association is currently implementing this private sector options program which is designed to help improve the quality of juvenile correctional services by providing technical assistance to corrections administrators in analyzing existing services, redesigning service delivery and developing a competitive process for delivering services to private providers. Supplemental funds will be used to expand the number of sites receiving technical assistance from six to ten. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

School Safety

$250,000

This is a collaborative interagency program between OJJDP and the Department of Education. The purpose of this program is to provide training and technical assistance on school safety to elementary and secondary schools, as well as to identify methods to diminish crime, violence, and illegal drug use in schools and on school campuses, with special emphasis on outreach to ethnic minorities and gang-related crime. The National School Safety Center (NSSC) maintains a library and clearinghouse with specialized information, provides research on school safety issues, and develops publications and training programs. OJJDP will work with NSSC over the next year to facilitate transition of the Center toward self-sufficiency. The Department of Education is supporting this transition with a transfer of $400,000 of Fiscal Year 1991 funds for expenditure in Fiscal Year 1992. These funds will strengthen the focus on prevention of drug abuse and violence in schools. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Targeted Outreach with a Gang Prevention and Intervention Component

$400,000

This program is designed to enable local Boys and Girls Clubs to prevent youth from entering gangs and to intervene with gang members who are very early in their careers in an effort to divert them away from gangs toward

VOL
56
ISS
248
DE
26
1991
UMI

more constructive programs. The National Office of Boys and Girls Clubs will provide training and technical assistance to the 33 existing sites and will add six to eight new gang prevention and intervention sites throughout the country. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Schools and Jobs are Winners

$150,000

This gang prevention program in Philadelphia focuses on high school students in grades 10 and 11 who are in gangs; have family members who belong to gangs; are involved with drugs or alcohol use; were abused or neglected; or were arrested by police. The project will also include funding by the Private Industry Council of Philadelphia. The goals of the project are to prevent high school students from dropping out of school and joining gangs by providing educational, recreational and social services, and to provide supportive services to families of at-risk youth and extremely disadvantaged youth. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Serious Habitual Offender Comprehensive Action Program (SHOCAP)

$517,000

SHOCAP is an information and case management program on the part of police, probation, prosecution, social service, school, and corrections authorities that enables the juvenile justice system to focus additional attention on juveniles who repeatedly commit serious crimes, with particular attention given to providing relevant case information for more informed sentencing dispositions. The training and technical assistance provider is assisting 20 jurisdictions with the implementation of this model by providing intensive training and follow-up technical assistance. In addition four new sites will be developed.

The provider also serves as a clearinghouse for information on the model, which non-participating jurisdictions can access. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Victims

$17,860,000

"None of us should rest however, until all of our laws practices fully reflect the sympathy we should have for the victims of crime—and the intolerance we should have for hardened criminals." President Bush, (Proclamation 5953—Crime Victims Week, 1990).

OJP Policy Statement

The criminal justice and juvenile justice systems must strive to implement policies and programs to improve services to crime victims. OJP is committed to helping crime victims and improving the responsiveness of juvenile justice, criminal justice and victim service systems. This year's Program Plan focuses on minority victims of crime to assure that services are made accessible to them at the Federal, State and local levels. In addition, it focuses on ensuring that innocent crime victims are not revictimized by the criminal justice system.

Resources will be committed to training law enforcement officers, prosecutors and other criminal justice personnel who work with innocent victims of crime.

OJP Program Response

Bureau of Justice Statistics (BJS)

$10,495,000

Continuation Programs

The National Crime Victimization Survey (NCVS)

$10,495,000

This program is under a reimbursable agreement between BJS and the Bureau of the Census governing the work to be undertaken by Census for BJS. The National Crime Victimization Survey (NCVS) is the second largest ongoing household survey undertaken by the Federal Government and is the major national indicator of criminal victimization in American society. BJS supports the Computer-Assisted Telephone Interviewing Center (CATI) which is currently utilized in a portion of the NCVS sample. Publications expected to be released in Fiscal Year 1992 using data from a variety of sources including *Criminal Victimization, 1991, Crime and the Nation's Households, 1991; Criminal Victimization in the U.S. 1990; and Criminal Victimization in the U.S., 1973–1989 Trends.* NCVS publications on the following topics will also be released in Fiscal Year 1992: school crime, self-protective measures, rural crime, elderly victims and police response time. This program will be implemented by the current grantee, the U.S. Census Bureau. No additional applications will be solicited in Fiscal Year 1992.

National Institute of Justice (NIJ)

$1,117,000

New Programs

Research and Development on Victims

$250,000

In Fiscal Year 1992, NIJ research will focus on the reduction of criminal victimization by assessing the crime prevention education efforts that are offered by some victim service agencies and police departments. Projects also may examine how well the criminal justice system is responding to the needs of victims and witnesses and how this is affecting the willingness of citizens to get involved and cooperate with the criminal justice system. Also, studies will explore the causes and prevention of victimization and the responses to the needs of crime victims by victim service providers and others. Methods of procurement will be determined and solicitations issued, as appropriate.

NIJ Program on the Elderly Against Crime

$317,000

The purpose of this program is to support local teams of law enforcement personnel, elderly volunteers and victim service providers in coordinating their efforts to prevent crimes against the elderly and to provide assistance to those victimized. This program may provide funding that results in a training and implementation manual, a source-book of crime prevention and victim assistance resources for use by the elderly and a script for a video to promote the program. Methods of procurement will be determined, and solicitations issued, as appropriate.

Initiative on Child Abuse and Neglect

$250,000

This program may focus on one or all of the following three areas: (1) Increasing our understanding of the influence of child abuse and neglect on criminal behavior; (2) identifying and promoting various improvements in the justice system response to child abuse and neglect; and (3) contributing to improvements in justice-related data on child abuse and neglect. One specific area of focus within this program will be the relationship between parental drug abuse and family violence. The program is coordinated with the Office of Justice Programs' (OJP) Task Force on Child Abuse and Neglect and some projects may be supported by more than one agency within OJP. The program includes a mix of both basic and applied research. Multiple grant awards are anticipated and solicitations will be issued, as appropriate.

Research on Underutilization of Victim Services in Minority Communities

$250,000

The purpose of this research is to determine the utilization of victim services by minority and low-income crime victims, to investigate reasons for any underutilization which may be found, to identify the special needs of these victims and to find methods to better meet these needs. This research is based on collaboration with the Office for Victims of Crime (OVC) and an examination by OVC of reporting data under the Victims of Crime Act in Fiscal Year 1991. NIJ will support a project in Fiscal Year 1992 to conduct focus groups, to develop a research instrument, to survey victim service utilization and special needs of minority and low-income victims and to analyze the survey data. The information may be used to make recommendations on what changes, if any, could be implemented in victim service program design and delivery that would increase utilization of victim services by minority and low-income crime victims. Methods of procurement will be determined and solicitations issued, as appropriate.

Continuation Programs

Project on Victims of Criminal Fraud

$50,000

This project supports a national survey which is expected to provide the first valid national estimates on the extent of victimization by criminal fraud. The research will provide information on the magnitude of financial losses and the severity of other forms of victimization. Crimes perpetrated against the elderly are of particular importance. Deficiencies in current prevention and victim assistance programs will be described and opportunities for improvements in these areas will be identified. Continued research in Fiscal Year 1992 will focus on the design of programs and strategies to reduce the incidence of criminal fraud and to deal more effectively with the perpetrators of this type of crime. This is an intramural research effort; no applications will be solicited.

Office of Juvenile Justice and Delinquency Prevention (OJJDP)

$1,525,000

Continuation Programs

Permanent Families for Abused and Neglected Children

$225,000 [1]

This is a national project to prevent unnecessary foster care placement of abused and neglected children, to reunify the families of children already in care, and to ensure permanent adoptive homes when reunification is impossible. The purpose of this project is to ensure that foster care is utilized only as a last resort and temporary solution for children. Accordingly, the project is designed to ensure that the government's responsibility to children in foster care is duly acknowledged by all appropriate disciplines. The project will continue to call upon judges, social service personnel, citizen volunteers, attorneys, and others to recognize and resolve the problems of children in foster care. Project activities include national training programs for judges, social service personnel, citizen volunteers and others in the Reasonable Efforts Provision of 42 U.S.C. 671(a)(15); training in selected lead States; and development of model questions to guide risk assessment. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Advocacy for Abused and Neglected Children

$1,000,000 [1]

The National Court Appointed Special Advocates Association (NCASAA) provides training and technical assistance to local and statewide programs. It assists in program development; advocates for the best interest of abused and neglected children; publicizes the Court Appointed Special Advocate (CASA) concept which helps recruit volunteers; develops management systems and standards to improve local CASA operations; provides a resource library and resource services; gathers and publishes information about the needs of the CASA network and operation; develops cooperative relationships with other national and regional organizations; and performs a variety of related services in furtherance of its goal of assuring that every child who needs one has a CASA. There are now 412 CASA programs in 47 States, with 15,000 volunteers. There are 12 statewide programs mandated and State-funded, and 23 State associations and networks offering support services to their State's program. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

The Investigation and Prosecution of Child Abuse

$300,000

This is a collaborative intra-agency program between OJJDP and OVC in which OVC is providing all of the funding. This program is designed to provide training and technical assistance to prosecutors and related professionals on the issue of child abuse prosecution. The project also serves as a clearinghouse for child abuse prosecution information. The trial manual entitled "The Investigation and Prosecution of Child Abuse" will be updated and published. Case law on issues of child abuse prosecution will also be updated and made available through the clearinghouse. At least one national training event will be held, and the recipient will also participate in several State-level training sessions during the supplemental grant period. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Office for Victims of Crime (OVC)

$4,723,000

New Programs

Law Enforcement Curricula—Victims of Hate Crimes

$150,000 [1]

This is a collaborative intra-agency program between OVC and BJA with BJA providing all of the funds. The purpose of this program is to develop a training curriculum for criminal justice and victim assistance professionals for dealing with victims of hate crime. The first stage will consist of an assessment of existing policies, procedures and practices for responding to hate crimes. A prototype for responding to hate crimes will be developed based on the assessment, and a training curriculum will be developed to transfer the prototype to the field. Applications will be solicited competitively.

Family Violence Information Dissemination

$50,000 (HHS)

This is a collaborative interagency program between OVC and the Department of Health and Human Services (HHS) in which HHS is providing all of the funds. The information and documentation

VOL 56 ISS 248 DE 26 1991 UMI

provisions of the Family Violence Prevention and Services Act are intended to encourage the official reporting of incidents of family violence. This award will fund five projects of up to $10,000 each through an interagency transfer from HHS to OVC. Grantees will develop and implement a training program for law enforcement policymakers and officers on the most effective procedures and policies for responding to incidents of family violence. Additional applications will be solicited to implement new activities in this continuation program in Fiscal Year 1992. Applications will be solicited competitively.

Prosecutor-Based Training and Technical Assistance

$210,000

This is a collaborative intra-agency program between OVC and BJA in which BJA is providing a portion of the funds. Prosecutors play a key role in responding to victims, and the training and technical assistance to help them fulfill that role is an ongoing need. This program funds the development and implementation of a model training and technical assistance program to improve the response of prosecutors' offices to the rights and needs of crime victims. The project has two phases. The first phase will focus on developing training and training materials for Federal Victim-Witness Coordinators to implement new Federal legislation concerning assistance services for crime victims and child victim-witnesses. The second phase will expand training for prosecutors to improve victim-witness assistance on the State and local level. This training will focus on measures prosecutors may take to ensure that victims are protected from harassment, intimidation and future harm; to inform them of key proceedings, such as bail hearings and plea bargains; and to help them feel safe as witnesses in court. Applications will be solicited competitively.

The Spiritual Dimension in Victim Services

$60,000

A high percentage of traumatized victims seek assistance from clergy rather than from other service or law enforcement professionals, and it is acknowledged by most clergy that generally they are untrained in the proper response to victimization. This program will provide multiple training events for clergy of all denominations about the indicators of child abuse and neglect, the operation of the child protection system, domestic violence and the issues surrounding the trauma of rape and other forms of assault. This program was selected competitively in Fiscal Year 1991 for funding in Fiscal Year 1992.

Elder Domestic Violence Law Enforcement Curriculum Development

$75,000 (HHS)

This is a collaborative interagency program between OVC and HHS in which HHS is providing all or a major portion of the funds. The problem of elder abuse is likely to grow more acute in the future as the number of older Americans who are dependent upon family members and others for long-term care increases. This award will fund the development of a training curriculum for law enforcement policymakers and officers on the most effective procedures and policies for responding to incidents of family violence involving elderly people. The curriculum developed under this grant will be designed for easy integration with other curricular materials used by police academies. Additional applications will be solicited to implement new activities in this continuation program in Fiscal Year 1992. Applications will be solicited competitively.

Family Violence Law Enforcement Training and Technical Assistance

$375,000 (HHS)

This is a collaborative interagency program between OVC and HHS in which HHS is providing all of the funds. Law enforcement training provided under the auspices of the Family Violence Prevention and Services Act has, to date, reached approximately 50,000 law enforcement officers enrolled in State training programs. This award will build on those training activities by funding up to seven new training projects. Grant recipients will develop and implement training for law enforcement policymakers and officers on the most effective procedures and policies for responding to incidents of family violence. Additional applications will be solicited to implement new activities in this continuation program in Fiscal Year 1992. Applications will be solicited competitively.

Training and Technical Assistance for Victims of Federal Crime in Indian Country Discretionary Grant Subgrantees

$120,000

The purpose of this program is to provide focused, short-term, on-site training and technical assistance or peer consultation to Native American Indian Tribes or Native American organizations that have received funds under the Assistance to Victims of Federal Crime in Indian Country Discretionary Grant Program. Applications will be solicited competitively.

Children's Justice Act Discretionary Grant Program for Native Americans

$302,000

The goal of this program is to bring about systemic improvement in the response to child sexual abuse on Indian reservations and other locations where Federally-recognized Indian tribes exist. Grants will be made directly to Indian tribes to improve the reporting, referral, investigation, prosecution and overall handling of child abuse cases, particularly child sexual abuse cases, in a manner that limits additional trauma to child victims. Additional applications will be solicited to implement new activities in this continuation program in Fiscal Year 1992. Applications will be solicited competitively.

The Investigation and Prosecution of Child Abuse Through the Federal Criminal Justice System

$1,200,000 [1]

This is a collaborative intra-agency program between OVC and OJJDP in which OVC is providing all or a major portion of the funds. Technical assistance will be provided nationwide to prosecutors and other professionals involved in the prosecution of child abuse cases. This program will provide several in-depth training conferences for child abuse prosecutors and will provide training workshops in conjunction with multidisciplinary national child abuse conferences. The program will revise and update a current training manual, *Investigation and Prosecution of Child Abuse*, and add a section on prosecuting child abuse cases in Federal court. The program will serve as an information clearinghouse for prosecutors, social workers, therapists, law enforcement officers and clinicians involved with the prosecution of child abuse cases. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992. This award will be in addition to a $300,000 award listed under OJJDP's program plan as "The Investigation and Prosecution of Child Abuse." A total sum of $1,500,000 will be awarded under this project in 1992.

Continuation Programs

Emergency Assistance for Victims of Federal Crime

$100,000

Emergency Assistance for Victims of Federal Crime supports emergency needs of victims of Federal crime when services that are essential to a victim's recovery cannot be provided by any other source. Requests are made from Federal Victim-Witness Coordinators to OVC for such purposes. Direct services such as emergency shelter, crisis intervention and counseling are supported by this program.

Federal Training and Technical Assistance

$526,000

OVC will continue to improve the response of Federal law enforcement officials to the needs of Federal victims through training programs for Federal prosecutors, investigators and Victim-Witness Coordinators. Efforts will include specialized training on handling cases of child abuse in the Federal criminal justice system; an interagency agreement with the Federal Law Enforcement Training Center to train Federal law enforcement officers to respond effectively to crime victims; an interagency agreement with the FBI to enhance victim witness assistance services; joint DOD/DOJ training on victim witness assistance; and assistance for grantees in Indian country to initiate and expand victim assistance services.

Children's Justice Act Discretionary Grant Program for Native Americans

$486,000

The goal of this program is to bring about systemic improvement in the overall response to child sexual abuse on Indian reservations and other locations where Federally-recognized Indian tribes exist. Grants are made directly to Indian tribes to improve the investigation, prosecution and handling of child abuse cases, particularly those involving child sexual abuse and to limit the trauma to child victims. Ten programs funded in November 1990 are eligible to submit an application for continuation funding. These grants were awarded in November 1991. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Outreach to Victims of Federal Crime

$45,000

Native Americans have not been made aware of crime victim compensation benefits and application procedures. Service providers and crime victims in the military also have been uninformed about benefits. This program will devise strategies to make both populations aware of procedures and benefits. A video tape will be produced that describes various options and sources of help for victims of crime in Indian country. The major focus will be the availability of crime victim compensation. It will also provide information to military service providers that describes available benefits. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Assistance to Victims of Federal Crime in Indian Country

$583,000

OVC will continue to improve direct services to victims of Federal crime by making grants to States to expand victim assistance services on Indian reservations. State grantees will subgrant these funds to Indian tribes to provide services in remote areas of Indian country where U.S. Attorneys have the jurisdiction to prosecute crimes. This program will provide funds for continuation grants to 15 States and approximately 50 tribal subgrantee victim assistance programs. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Specialized Training for Federal Criminal Justice Personnel Responding to Child Sexual Abuse Cases

$40,000

This cooperative agreement supports a Federal Training Day for Federal criminal justice personnel at the National Symposium on Child Sexual Abuse. The Federal Training Day addresses issues of special concern to those handling child sexual abuse cases at the Federal level. This year a concentrated 3-day training track will be developed for teams of Federal prosecutors, law enforcement officers and victim-witness coordinators on handling child victim-witnesses in the Federal judicial system. Federal criminal justice officials attend in teams consisting of Assistant U.S. Attorneys, LECC Victim-Witness Coordinators and Federal investigators; the training will promote coordination among these professionals. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

National Victims Resource Center

$300,000

This is a collaborative intra-agency program between OVC and BJA, in which BJA is providing a portion of the funds. The National Victims Resource Center collects, maintains and disseminates information about national, State and local victims-related organizations, criminal justice officials and also State programs that receive funds authorized by the Victims of Crime Act. The National Victims Resource Center is a component of the National Criminal Justice Reference Service. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Training and Technical Assistance to Help Children Grieving Violent Death

$34,000

In the wake of rising rates of violent crimes, there is evidence that numerous children across the Nation are suffering in the aftermath of the violent deaths of loved ones. The provision of a training and technical assistance package and training events will enable victim service providers, school staff and other human service professionals to address the often overlooked needs of children who are in the process of grieving the violent deaths of family members and close friends. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Technical Assistance and Training: Empowering Survivors of Homicide

$17,000

Parents of Murdered Children (POMC) is a national self-help organization for parents and their children who experience a violent homicide in their family. Services they provide include self-help groups that meet regularly; information about the grieving process and the criminal justice system; and communication with professionals in related fields about the problems faced by those surviving a homicide victim. The present funding will support dissemination of efforts. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

VOL 56 ISS 248 DE 26 1991 UMI

National Judicial College

$50,000

The National Judicial College is the Nation's leading continuing education center for State trial judges. In order to improve the treatment of victims and witnesses in the courts, it is essential that a more aware and knowledgeable group of judges be trained who will promote actively the rights of victims. Victims issues will be incorporated into the existing curriculum as well as a new curriculum developed to train judges regarding victims legislation, rules and procedures. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Community Policing and Police Effectiveness

$14,205,000

"While we can place great confidence in the courage, professionalism, and skill of our law enforcement officials, we also know that government cannot do the job alone—law enforcement officers must have the respect and the support of the people they serve. Fortunately, many concerned Americans have already taken a stand to help prevent crime and to apprehend its perpetrators." President Bush (Proclamation 6359—Crime Prevention Month, October 17, 1991)

OJP Policy Statement

The criminal justice system should assume a primary role in mobilizing communities to develop comprehensive strategies for combating gang violence and preventing illegal drug trafficking. Alliances between community residents and the police are essential for making neighborhoods safe and drug-free. Through comprehensive and coordinated activities, including the police and community leaders, school officials, youth service providers, church, business, and civic leaders can work together in partnership to "take back the streets." OJP's Community Policing and Police Effectiveness activities emphasize the importance of the police and the communities working together in a relationship of trust, cooperation and partnership to promote safety and security and to rid neighborhoods of thugs and drug pushers.

OJP will focus on demonstration projects which involve promising innovations, such as mini-police stations, directed patrols and police-neighborhood ombudsmen. Community prevention and intervention efforts will be concentrated in public housing complexes, drug-free school zones, recreational parks, alternative education programs and community centers threatened by drug-related crime and illegal gang activity. This rapidly developing approach to better control crime addresses the need to prevent crime and to respond effectively to crime when it occurs.

OJP Program Response

Bureau of Justice Assistance (BJA)

$9,300,000

New Programs

Community Policing Model Development, Training and Technical Assistance

$600,000 [1]

The purpose of this program is to develop a comprehensive program model (key components, processes and activities) of Community Oriented Policing and to provide training and technical assistance to local demonstration sites participating in OJP's Community Policing Program Initiatives. The development of the model will take place through a consortium of law enforcement organizations which will identify key components, processes and activities associated with community oriented policing. The model will be demonstrated by local law enforcement agencies selected through a separate solicitation.

Community Policing Model Demonstration

$1,500,000 [1]

This is a new program which is designed for law enforcement agencies to demonstrate prototype processes and strategies for making complete organizational transitions to community policing. The first phase of this program includes the development of a plan for the full implementation of community policing throughout a local jurisdiction and the implementation of internal organizational changes.

Weed and Seed—Demonstration

$2,000,000

This program will be designed to demonstrate the Weed & Seed Program in selected jurisdictions. Weed & Seed is a comprehensive and coordinated multiagency approach to law enforcement and community revitalization. The first task, "weeding," is accomplished by utilizing the resources of the criminal justice system, including intensive law enforcement efforts to remove and incapacitate violent criminals and drug traffickers from targeted neighborhoods and housing developments. The second task, "seeding," restores the community by providing broad economic and social opportunities developed in cooperation with other Federal, State and local agencies along with public and private organizations and community groups. Up to 8 sites will be funded under the demonstration phase of this program through a limited competition.

Weed and Seed—Technical Assistance

$350,000

This program is designed to develop an Implementation Guidance Manual for the Weed and Seed Program. Technical assistance and training will be provided to facilitate the demonstration of a comprehensive and coordinated multiagency approach to law enforcement and community revitalization. The first task, "Weeding," focuses on utilizing the resources of the criminal justice system, including intensive law enforcement efforts, to remove and incapacitate violent criminals and drug traffickers from targeted neighborhoods. The second task, "Seeding," is designed to restore the community by providing broad economic and social opportunities developed in cooperation with other Federal, State and local agencies along with public and private organizations and community groups.

Continuation Programs

Organized Crime Narcotics Trafficking (OCN) Enforcement

$2,500,000 [1]

This program demonstrates a unique approach to the development and implementation of coordinated investigations and prosecutions of upper level conspiratorial narcotics trafficking. It demonstrates that shared management, using a group composed of all participating agencies, of multi-jurisdictional investigations and prosecutions can avoid the usual pitfalls of single lead agency task forces. Fiscal Year 1992 funds will continue the existing projects, continue and expand a national training program as well as continue technical assistance to project sites. Additional variations in existing sites may be implemented. This program will be implemented by the current grantees. No additional applications will be solicited in Fiscal Year 1992.

Drug Impacted Small Jurisdictions

$200,000 [1]

The purpose of this program is to demonstrate effective drug prevention and control strategies which address drug trafficking and drug-related crime problems in jurisdictions or combinations of jurisdictions with populations of 50,000 or less. A comprehensive drug control program will be designed and implemented which features a centrally coordinated, cooperative effort with law enforcement, prosecutors, the courts, corrections, drug treatment services and the community. Additional applications will be solicited to implement activities in up to two new sites in this continuation program in Fiscal Year 1992.

Metropolitan Area Drug Enforcement Task Force

$500,000

This is a collaborative interagency program between BJA and the Drug Enforcement Administration (DEA) in which BJA is providing a portion of the funds. With the cooperation of DEA, this project targets street level and mid-level drug traffickers in the Washington, DC, Metropolitan Area. Its purpose is to establish a visible law enforcement presence in local neighborhoods; to disrupt major links between the suppliers, distributors, and users; to seize and initiate forfeitures against properties used to facilitate the sale and/or consumption of drugs; to initiate enforcement action against property owners who knowingly allow their property to be used in the distribution of illicit drugs and who fail to take action against their tenants who do so; and to develop comprehensive intelligence systems to identify the illicit drug supply source and the distribution network that is responsible for illicit drug trafficking and its associated violence. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

State and Local Training and Technical Assistance

$1,000,000

This program is designed to assist States and local jurisdictions in developing and implementing comprehensive strategies to prevent and control illegal drug trafficking and to improve their criminal justice systems. The major purposes of the program are to: (1) Support the development and enhancement of comprehensive State strategies; (2) promote and facilitate the implementation of programs developed under BJA discretionary initiatives; and (3) provide technical assistance to States and local jurisdictions. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Training Local Law Enforcement Officers in Anti-Drug Activities Involving Illegal Aliens

$150,000

This is a collaborative interagency program between BJA and the Immigration and Naturalization Service (INS). This program recognizes the unique problems faced by State and local law enforcement officers involved in narcotics investigations or other activities dealing with legal and illegal aliens. Regional training workshops are presented to provide information on criminal alien groups from a regional as well as national perspective. This program provides training on fraudulent document recognition as well as relevant training regarding U.S. Immigration and Naturalization Service procedures. The training provides an understanding of new and additional investigative possibilities in cases as well as an understanding of possible noncriminal sanctions. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Executive Working Group of State Drug Policy Officials

$300,000

This project will support the first year of Phase II of the Executive Working Group of State Drug Policy Officials, consisting of 15 senior State officials designated by their governors as the lead officials in the development of statewide drug strategies. The Working Group is designed to assist the governors' offices and inform the governors' designated representatives in the development and implementation of integrated, effective State drug control strategies. Phase I provided for an analysis of existing organizational structures in the represented States, a meeting of the Working Group and the development of a publication targeting governors and their senior staff members relative to practical, contemporary approaches to developing a statewide drug control strategy, with particular emphasis on effective integration of BJA formula grant planning in the broader State planning process. Phase II activities will involve conducting two meetings of the Working Group to address key issues identified earlier, building on the insights gained from the Phase I meeting. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Weed and Seed—Omaha

$200,000

The central focus of this program is the Omaha Community Partnership, a 23 member Steering Committee (comprised of leaders from law enforcement, corporate, political, civic, religious and community groups) who meet regularly to coordinate, support and execute neighborhood and citywide anti-crime and drug initiatives. This program was initiated in 1991 as part of the Weed & Seed Demonstration Sites. A full Weed & Seed Demonstration will be developed including a strong "Weeding" component, Community Policing, and "Seeding" activities focused on a selected neighborhood. No additional applications will be solicited in Fiscal Year 1992.

Bureau of Justice Statistics (BJS)

$1,145,000

Continuation Programs

National Incident-Based Reporting Program

$945,000

Having funded the redesign of the Uniform Crime Reporting (UCR) program of the Federal Bureau of Investigation, BJS provides support to State UCR programs in their implementation of recent changes under the National Incident-Based Reporting System. In Fiscal Year 1992, BJS intends to fund several local law enforcement agencies to demonstrate and document the utility of incident-based reporting to the law enforcement and criminal justice community. Applications will be solicited from cities following BJS site visits to implement new activities in this continuation program in Fiscal Year 1992.

Law Enforcement Management and Administrative Statistics

$200,000

This program is under a reimbursable agreement between BJS and the Bureau of the Census. The Law Enforcement Management and Administrative Statistics (LEMAS) Program provides nationally representative data on law enforcement agencies in the United States. Information gathered includes the number and characteristics of personnel, salary levels, education and training requirements, expenditures, number and types of vehicles, types of special units and agency policies. In Fiscal Year 1992, BJS will continue analysis of the 1990 data and will publish several reports, including: *Profile of State and Local Law*

VOL 56 ISS 248 DE 26 1991 UMI

Enforcement Agencies, 1990 and Profile of Sheriffs' Agencies, 1990. Additionally, the 1993 LEMAS questionnaire will be designed and new questions will be tested, as appropriate. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

National Institute of Justice (NIJ)

$3,313,000

New Programs

Research and Development on Community Policing and Police Effectiveness

$750,000

This NIJ program will continue to identify and develop innovative methods of community policing and crime analysis. Possible projects for Fiscal Year 1992 may include measuring the performance of community police officer activity and issues related to the accountability of community police officers, particularly the roles of supervisors, managers, and the community itself. Multiple awards are anticipated. Applications will be solicited in Fiscal Year 1992.

Rural Law Enforcement Initiative

$250,000

NIJ will begin to assess the efforts of law enforcement in rural environments. Knowledge about crime, disorder and law enforcement in rural America is limited to impressions from the media and anecdotal accounts from the field. Systematic assessment about the extent, nature and characteristics of crime and disorder and the response of the criminal justice system has not been undertaken. Based on this assessment, NIJ may develop pilot programs and conduct field tests of particularly promising strategies and models. Information provided by these studies could serve as the basis for demonstration and education programs. Methods of procurement will be determined and solicitations issued, as appropriate.

Drug Market Analysis: Enforcement Model

$200,000

This is a collaborative intra-agency program between NIJ and BJA, in which BJA is providing all of the funds. This program will examine and document drug enforcement activities of current projects funded under the Drug Market Analysis Program. Researchers will provide information about computer hardware and software necessary for the development of Drug Market Analysis and will describe how computer technology is useful for drug enforcement. To assist law enforcement in "weeding" out drug traffickers, implementation guidelines and a full description of drug enforcement strategies will be products of this research effort. A cross-site analysis will be conducted to identify the most effective approaches to developing and utilizing DMA techniques. This information will be disseminated to State and local officials. Methods of procurement will be determined and a solicitation issued, as appropriate.

Research & Demonstration Projects on the Weed and Seed Initiative

$750,000

NIJ will continue to support research projects that can provide model programs and strategies for the Weed and Seed comprehensive approach to neighborhood security. Special attention will be given to research projects that support each of the major components of Weed and Seed dealing with the suppression of neighborhood drugs and crime, police/community partnerships and neighborhood reclamation. The focus will be on the development of a coordinated approach to community security through the integrated efforts of the police, citizen groups and other public and private agencies. Multiple awards may be made in Fiscal Year 1992. Methods of procurement will be determined and solicitations issued, as appropriate.

Continuation Programs

Implementation of Community Policing

$100,000

This program is developing information to support the implementation of community policing across the Nation. NIJ efforts may include technical assistance, training, clearinghouse functions and demonstrations. Studies currently underway will assess the current State of community policing in the country. NIJ grantees are identifying community-based programs and strategies throughout the country, documenting the components of these programs and developing case studies to provide detailed accounts of program strengths and weaknesses. The information will be used to provide program guidance to selected communities and police agencies. These are continuing projects; no additional applications will be accepted in Fiscal Year 1992.

Performance Measures for Community Policing

$200,000

In Fiscal Year 1992, continuing research will identify performance measures, define elements of both administrative and operational supervision critical to successful community policing, and examine the role of community involvement in the development and success of community policing strategies. This is a continuation of a current project; additional applications may be solicited in Fiscal Year 1992.

Training and Technical Assistance for Community Policing

$138,000

NIJ will support training seminars on community-oriented policing for city managers, police executives and community leaders. This is a continuation of a current project; additional applications may be solicited in Fiscal Year 1992.

Drug Market Analysis (DMA)

$500,000

The program uses location based computer mapping technology to identify drug market "hot spots." Maps are computer generated by programming all city addresses into the system and integrating them with calls for service data, drug arrests and observational information collected by narcotics and patrol officers. The information produced assists police in developing and evaluating the effectiveness of a variety of drug enforcement strategies. In Fiscal Year 1992, the final year of funding for DMA, the program will reach its final stage at existing sites. Thus, applications will not be solicited in Fiscal Year 1992.

Study of Excessive Force by Police

$100,000

This research program is examining the relationship between the incidence of the use of excessive force by police and the presence or absence of training programs and internal procedures to guide police behavior in police-citizen encounters. Currently, a national survey is underway to collect information on incidents, law enforcement agency policies and procedures and law enforcement training information. A series of case studies on police experience with this issue was also funded in 1991. This program will be continued in Fiscal Year 1992 and will include applied research in individual police agencies and the communities they serve. Services are being provided by current grantees. No additional applications will be solicited in Fiscal Year 1992.

Analysis of Police Killings

$125,000

NIJ is examining violence against police officers, especially police killings and assaults. Information about the characteristics of incidents, motivations of assailants and the implications for additional police training are part of this continuation program. Services are being provided by current grantees; no additional applications will be solicited in Fiscal Year 1992.

Crime Prevention Through Environmental Design (CPTED)

$200,000

In Fiscal Year 1992, NIJ will conduct a review and synthesis of the CPTED research literature. NIJ may also support research that will incorporate studies of how the geographic distribution of different types of crime is associated with the environmental characteristics of locations where those crimes occur often or seldom, with a focus on the policy implications of the findings. Other issues to be addressed may include modification of the physical characteristics of locations to reduce risk in the urban environment, the association of public disorder with crime and fear, and the effect of disorder on urban decay and investment by businesses in the community. Methods of procurement will be determined and a solicitation issued in Fiscal Year 1992.

Office of Juvenile Justice and Delinquency Prevention (OJJDP)

$447,000

Continuation Programs

Juvenile Justice Training for Law Enforcement Personnel (Glynco)

$447,000

This project provides technical assistance and training to promote a better understanding of the juvenile justice system by Federal, State and local law enforcement agencies. Five training programs are offered through this project, namely: Police Operations Leading to Improved Children and Youth Services (POLICY) which has two components: POLICY I introduces law enforcement executives to management strategies in order to integrate juvenile services into the mainstream of their operations, while POLICY II helps mid-level managers build on these strategies and demonstrates step-by-step methods to improve police productivity in the juvenile justice area. The Child Abuse and Exploitation Investigative Techniques Program provides law enforcement officers with state-of-the-art approaches for building a case against those individuals charged with child abuse, sexual exploitation, or the abduction of children. Managing Juvenile Operations is a curriculum which provides a series of training programs for police executives. It demonstrates simple, yet effective methods to increase departmental efficiency and effectiveness by integrating juvenile services into the mainstream of police activity. School Administrators for Effective Police, Probation, and Prosecutors Operations Leading to Improved Children and Youth Services (SAFE POLICY) brings together the chief executives of schools, law enforcement, prosecution, and probation to promote interagency cooperation and coordination in dealing with youth-related problems. This program will be implemented under the current interagency agreement.

Intermediate Sanctions and User Accountability

$13,825,000

"All those engaged in illegal drug use must be held accountable for their behavior, yet not all convicted drug offenders need to be incarcerated * * *. However, intermediate punishments—which expand the range of options between incarceration and unsupervised release—can provide innovative ways to assure swift and certain punishment, which in many cases will deter further criminal acts * * *. Such punishments are not a safety valve to relieve prison crowding, and cannot serve as a substitute for needed prison construction. Public safety demands that serious offenders be incarcerated." (National Drug Control Strategy, February 1991).

OJP Policy Statement

Intermediate Sanctions fall between traditional probation and incarceration and are usually less severe than jail or prison. However, they are more restrictive than probation, for nondangerous offenders. Intermediate sanctions are designed to hold the drug user accountable and focus on the range of post-adjudication sanctions that fill the gap between traditional probation and jail or prison sentences. These sanctions can be used to address the problems of both juvenile and adult crime. Demonstration programs, as well as evaluation efforts, are being initiated to promote and test a continuum of sanctions such as the expanded use of fines, restitution, community service, home detention, intensive supervision, electronic monitoring and boot camps. Intermediate sanctions recognize gradations in the seriousness of criminal behavior and are designed to respond accordingly with graduated levels of criminal punishment.

OJP Program Response

Bureau of Justice Assistance (BJA)

$12,150,000

New Programs

Corrections Options Grants

$11,700,000 [1]

The purpose of this program is to provide assistance to public and private nonprofit agencies in designing, developing and implementing innovative alternatives to traditional incarceration and offender release programs. In addition, financial support will be provided to public agencies to demonstrate boot camp prisons. Training and technical assistance will be provided to public and private agencies in the development of innovative alternative programs. Also, this project will provide support for the Private Sector and Prison Industry Enhancement Certification program. An additional $1.3 million will be available to NIJ for the evaluation of this program, bringing the total for this program to $13 million.

Continuation Programs

Fines Demonstration Program

$200,000

This program benefits all jurisdictions in which criminal fines are used as sanctions in the punishment of drug offenders. The program will enhance alternative sanctioning options by demonstrating the application and enforcement of fines as realistic and credible monetary penalties. Currently, three demonstration sites are implementing the Structured Fine Program. This program will provide training and technical assistance to the demonstration sites.

Denial of Federal Benefits

$250,000

This program established a clearinghouse of automated systems to receive and transmit to the General Services Administration, as well as other interested Federal agencies, information on persons convicted of drug trafficking or possession offenses who have been sentenced to a denial of

VOL 56 ISS 248 DE 26 1991 UMI

Federal benefits. Fiscal Year 1992 funds will support continued technical assistance and an evaluation component.

National Institute of Justice (NIJ)

$1,325,000

New Programs

Research and Development on Corrections

$500,000

NIJ research in Corrections in Fiscal Year 1992 will address the critical issues of prison crowding, improving community supervision through development of more effective offender classification practices, preliminary planning and data collection for future assessment of the risks to the public and cost effectiveness of incarceration compared to community supervision of offenders. Research into the effectiveness of prison- and jail-based inmate education and work programs in deterring recidivism may also be initiated. In addition, the effectiveness of differing sentence lengths in deterring recidivism; a synthesis of what is known about current prison classification practices; and an assessment of current information on the frequency of offending are among the topics that may be examined. Methods of procurement will be determined and solicitations issued, as appropriate.

Research and Development on Intermediate Sanctions

$500,000

Building on its Fiscal Year 1990 and 1991 efforts, NIJ will support a new initiative in the development of standards and guidelines for boot camps. In addition, NIJ will examine a variety of intermediate sanctions, including boot camps and their impact in controlling criminal behavior. Issues to be addressed may include intensive supervision probation, operational impact of intermediate sanctions including day reporting centers, intermediate sanctions for special offender populations and the use of intermediate sanctions in the charging and sentencing process. Methods of procurement will be determined and solicitations issued, as appropriate.

Continuation Programs

Inmate Work Initiative

$325,000

This is a collaborative interagency program between NIJ, BJA and National Institute of Corrections (NIC) for which NIJ is providing all of the funds. This program provides developmental assistance to jurisdictions seeking to reduce inmate idleness and lower the costs of incarceration, through inmate work programs. The program demonstrates how private businesses operate inside correctional facilities by employing inmates for the production and open market sale of goods and services. The program serves to strengthen and expand prison and jail industry programs certified by BJA through its Prison Industry Enhancement Certification Program. The program also provides training and technical assistance. This program is being conducted by current grantees. It is not anticipated that applications will be solicited in Fiscal Year 1992.

Office of Juvenile Justice and Delinquency Prevention (OJJDP)

$350,000

New Programs

Juvenile Restitution

$200,000

OJJDP plans to support a juvenile restitution training and technical assistance program. The project design will be based on practitioner recommendations regarding the current needs in the field. A survey is being initiated by the Office to determine how best to expand and institutionalize restitution as a viable juvenile justice disposition. In addition to the survey, it is anticipated that a "working group" will be convened to map out the future course of OJJDP's support for optimum development of the various components of restitution. These components will include community service, victim reparation (also victim-offender mediation), offender employment and supervision, employment development, and possible new program elements designed to establish restitution as a major aspect in our efforts to improve the juvenile justice system. Applications will be solicited competitively.

Continuation Programs

Demonstration of Post Adjudication: Non-Residential Intensive Supervision Program

$150,000

The National Council on Crime and Delinquency (NCCD) was funded to implement the Intensive Supervision Program which was designed to identify and assess effective intensive supervision programs, to provide the capability of select jurisdictions to implement an effective program model and to disseminate information about the initiative. The assessment report has been completed and the training and technical assistance materials have been completed in draft. Support for this program will supplement NCCD's current award and provide funds for technical assistance and training for six to eight jurisdictions that are interested in implementing the intensive supervision programs model developed by NCCD. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Drug Prevention

$20,035,000

"Prevention remains one of our most important weapons in the Nation's war on illicit drugs." President Bush, September 4, 1990. (Proclamation 6174–National DARE Day.)

"Law Enforcement alone cannot solve the problem of violent crime * * * community action is essential. We need to transform our attitudes as a society. We need to mobilize the community at all levels." Acting Attorney General William P. Barr, October 1, 1991, (Annual Conference of Crime Stoppers International)

"When communities implement a coordinated plan of attack against drugs, one which includes meaningful sanctions for any drug use, and involves schools, parents, religious organizations, law enforcement agencies and businesses, we can make progress in keeping drugs out of schools, neighborhoods and the workplace. Strengthening the ability of communities to mobilize against drugs and holding the occasional user accountable are among the cornerstones of the Administration's drug prevention Strategy. (National Drug Control Strategy, February 1991).

OJP Policy Statement:

The criminal justice system should assume a primary role in developing community-wide efforts to prevent the use and trafficking of illegal drugs. OJP's drug prevention activities focus on community-based efforts to reduce the problems of drug abuse, gang activities, illiteracy, juvenile delinquency and school dropouts, especially in our minority communities. This priority area will emphasize programs at the grass roots level which focus on mobilizing law abiding citizens to get involved with prevention in high crime neighborhoods where there is a prevalence of drug trafficking, serious crime, gang violence and child sexual exploitation.

Through comprehensive and coordinated activities law enforcement officials, community leaders, including

school administrators, church, business and civic leaders can work together in partnership to both take back the streets and keep those most at risk, safe from criminals. It will also focus on offenders who have had previous drug involvement and are returning from correctional programs. These program activities will be implemented through demonstration programs, training and technical assistance and evaluations.

OJP Program Response

Bureau of Justice Assistance (BJA)

$10,200,000

New Programs

Boys and Girls Clubs Demonstration

$2,300,000 [1]

The purpose of this program, is to promote the establishment of Boys and Girls Clubs in public housing projects, which will be closely coordinated with the BJA Weed and Seed initiative. This will include training and technical assistance for Boys and Girls Clubs as well as support for demonstration activities in selected sites.

IMPACT

$200,000 [1]

The IMPACT Program provides training and consultation to teachers, school counselors, administrators and community groups in substance abuse awareness and prevention. This program for elementary and secondary school students, will expand the IMPACT Program in Washington State and document the program model.

Continuation Programs

Drug Abuse Resistance Education (DARE)—Training Centers

$1,700,000 [1]

The purpose of this program is: (1) To train police officers to teach skills to children that help them resist pressure to use drugs; (2) to reduce the demand for drugs and eliminate drug-related crime; and (3) to provide technical assistance to State training centers and to accredit those centers that are qualified as DARE Training Centers. DARE officer candidates will receive 80 hours of initial training, to be followed by 40 hours of in-service training classes. This program will be implemented by the current grantees. No additional applications will be solicited in Fiscal Year 1992.

National Citizens' Crime Prevention Campaign

$3,000,000 [1]

The purpose of this program is to educate children and adults about crime, violence and drug abuse prevention; to mobilize existing resources for crime and drug abuse prevention; to generate an individual and community sense of responsibility for crime and drug abuse prevention; and to provide program and policy direction to citizens, community organizations, law enforcement, other public and private service providers as well as State and Federal agencies. An evaluation of the public service advertising campaign will be included in this effort. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

The National Town Watch Crime and Drug Prevention Campaign

$100,000 [1]

Sponsored by the National Association of Town Watch, National Night Out, as the campaign is commonly referred to, is a nationwide crime and drug prevention initiative that involves thousands of communities in a year-long effort of partnership building among public and private agencies, businesses, community organizations and citizens. Program activities for the year culminate in an August event in which citizens are asked to turn on their porch lights between the hours of 8 and 10 p.m., go outside and meet neighbors and participate in events such as block parties and candlelight vigils to demonstrate support for community crime and drug abuse prevention efforts. This program will be implemented by the current grantee.

Community Drug Abuse Prevention Initiatives

$1,000,000 [1]

The purpose of this program is to continue to provide cost-effective technical assistance and training in crime, violence and drug demand reduction as well as to support the assessment and implementation of efficient multifaceted community-based strategies. The program will continue to promote holistic, cost-effective strategies to reduce crime, violence and illicit drug use; provide information on effective methods of reducing crime, violence, gang activity and illicit drug use by strengthening relationships among ethnically diverse populations, law enforcement and other public and private service providers. The program will promote the adoption and implementation of comprehensive community-based crime and drug demand reduction efforts which involve youth, citizens, schools, civic and community organizations, churches, businesses, law enforcement and other public and private service providers. This program will be implemented by the current grantee. Applications will not be solicited competitively.

Communities in Action to Prevent Drug Abuse

$400,000 [1]

The purpose of this program is to provide technical assistance and training to selected communities for the development of cost-effective community based anti-crime and drug control strategies which are comprehensive in nature. Projects will involve the building of partnerships between law enforcement and other public and private service providers, businesses, churches, schools, community organizations, citizens and youth. This program will be administered by the National Training and Information Center. Up to ten demonstration sites will be selected with close attention to coordination with operation Weed & Seed. Applications will not be solicited competitively.

Strategic Intervention for High Risk Youth

$1,275,000

This is a joint venture with New York University, the Ford Foundation and the Pew Charitable Trusts. The program consists of a test of a specific intervention strategy for preventing and controlling illegal drugs and related crime and fostering healthy development among youth from drug and crime-ridden neighborhoods. Multiservice, multidisciplinary neighborhood-based programs will be established to provide a range of opportunities and diverse services for pre-adolescents and their families who are at high risk for involvement in illegal drugs and crime. Simultaneously, the criminal and juvenile justice systems will target resources to reduce illegal drug use and crime in the neighborhoods where these young people reside. This year's funds will support the continuation of the demonstration sites, training and technical assistance and evaluation of the demonstration sites. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

VOL 56 ISS 248 DE 26 1991 UMI

Wings of Hope Anti-Drug Program

$225,000

This program is an excellent example of coalition building and community partnership, involving law enforcement agencies, churches, businesses, schools, residents and other public and private agencies in a multifaceted effort to combat crime and illicit drugs. With primary focus on minority populations, its goals are to: develop comprehensive community-based strategies to combat crime and drug abuse in public housing and drug infested neighborhoods; educate and train minority church groups, community groups and youth in crime and drug prevention, mentoring, coalition building and strategy development; develop proactive neighborhood prevention teams comprised of residents, church officials, the business community, law enforcement and other public and private service providers; develop an adoption program to assist "at risk" families in high risk communities; and develop and implement innovative law enforcement approaches that will better facilitate cooperation and coordination. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Bureau of Justice Statistics (BJS)

$450,000

Continuation Programs

Drugs and Crime Data Center and Clearinghouse

$450,000

This is a collaborative intra-agency agreement program between BJS and BJA. Entering its fourth year of operation, the Drugs and Crime Data Center and Clearinghouse is highlighted in the President's National Drug Control Strategy, 1991, and continues to provide a centralized source of information on drugs and crime for Federal, State and local officials, Congressional staff, academic researchers, private sector inquirers, the media and the general public. The Data Center and Clearinghouse has two components: (1) Data analyses and evaluation activities; and (2) data user services. BJS is developing a comprehensive national report, Drugs, Crime and the Justice System: A National Report, in conjunction with the Data Center. This report combines many sources of drug data and covers topics including illegal drug production and trafficking, extent of drug use, costs associated with drug abuse, drug control policies, drug testing and history of drug abuse and control. The anticipated publication date for the report is 1992. In addition, the Data Center and Clearinghouse is planning to release Drugs and Crime Facts, 1991, during the fiscal year. This annual report will present the most current information available relating to drugs and crime published by BJS in 1991. Other special reports, analytic studies and drug data services are planned. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

National Institute of Justice (NIJ)

$1,500,000

New Programs

Research and Development on Prevention of Drug Abuse and Related Crime

$500,000

This program will support new research on prevention and control of illegal drug supply and deterrence of illegal drug demand. In 1991, NIJ initiated a comprehensive analysis of criminal justice system drug treatment and analytic models of the relationship of drugs and crime to criminal sanctions. Building on these efforts, NIJ's Fiscal Year 1992 projects will emphasize assessments of drug use and related crime, identification and treatment of drug offenders and new strategies for prevention and control of drug-related crime. Initiatives may examine female and juvenile offenders, alcohol abuse and related violence, State and local drug laws, tracing drug money, drug detection devices and control of precursor chemicals. Multiple awards will be made. Methods of procurement will be determined and solicitations issued, as appropriate.

Continuation Programs

AIDS–HIV Education in Lockups and Booking Facilities

$1,000,000 (NIDA)

The purpose of this program is to design, test and evaluate the effectiveness of AIDS–HIV prevention approaches for arrestees held 48 hours or less in jail booking facilities and lockups. The program which is jointly administered by NIJ and NIDA involves a combination of various education and drug treatment referral strategies to prevent or intervene in high risk behavior among this population. Fiscal Year 1992 is the final year of the 3-year cooperative project operated under an interagency agreement. No additional applications will be solicited in Fiscal Year 1992.

Office of Juvenile Justice and Delinquency Prevention (OJJDP)

$7,885,000

New Programs

Professional Development for Youth Workers

$200,000

The primary purpose of this initiative is to establish and promote professional development of youth and juvenile justice system providers through a formal and continued training program. The program will be designed to include an inventory of existing training programs and their effectiveness, a needs assessment survey of training, the development of several curricula areas, the design of a dissemination strategy, and finally, an implementation plan for the second year of a two-year program. The end product is an expertly designed set of curricula which can be adapted for use in a broad range of juvenile justice and youth care training programs. The overall goal of the program will be to enhance professionalism for those persons to whom society has delegated responsibility in treating and caring for our Nation's troubled youth. Such individuals include foster parents for "acting-out" adolescents, staff in a range of community-based residential care facilities, juvenile correctional officers, probation officers, truant officers, and security personnel in youth facilities. Applications will be solicited competitively.

Native American Alternative Community-Based Program

$300,000

This is a collaborative interagency program between OJJDP and the Administration on Native Americans in the Department of Health and Human Services. The purpose of this program is to develop community-based alternative programs for Native American youth who have been adjudicated delinquent, and to develop a reentry program for Native American delinquents returning from institutional placement. The program will use the information being gathered by the American Indian Law Center in its study of the Native American juvenile justice system to develop this initiative. A multi-component design will be developed which will integrate the critical elements of the OJJDP Intensive Supervision and Aftercare programs with cultural elements that have traditionally been utilized by the Native Americans to control and rehabilitate offending youth.

As planned, the program would be tested in up to two sites. Applications will be solicited competitively.

Program for Chronic Status Offenders

$140,000

The grant will underwrite the replication in Philadelphia of the program for chronic status offenders conducted in West Milton, Pennsylvania. That program seeks to effect change in juvenile delinquent behavior (including addressing possible family dysfunction), stabilizing the offender's behavior at home and in the community, promoting positive substitutes for antisocial acts, and implementing individualized educational plans for those needing more than mainstream education can afford.

This program offers an efficient and effective alternative to the "too-little"/"too-much" syndrome as it applies to chronic status offenders and emergent delinquents. In lieu of probation alone or residential treatment, the day care program employs a broad spectrum of counseling techniques to enhance life skills and employment opportunities, while providing intensive treatment for pre-and post-adjudicatory delinquents and status offenders. Applications will not be solicited competitively.

Continuation Programs

Drug Abuse Prevention—Technical Assistance Voucher Project

$200,000

This project will provide technical assistance to 15–25 neighborhood-based organizations which have established anti-drug abuse projects, and will enhance their capacity to serve high-risk youth and serious juvenile offenders. Neighborhood groups will apply to the grantee for vouchers ranging from $1,000 to $10,000, depending on their needs. They will present their own plans and designs for the requested technical assistance, which will be evaluated and refined by the grantee. This method of delivery will allow these neighborhood groups to secure technical assistance inexpensively from sources that are compatible with both their programs and their specific community characteristics. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Intensive Community-Based Aftercare Program

$200,000

This program is designed to develop a juvenile aftercare model which can be tested in the juvenile justice system. Under this program, an assessment has been completed and a final draft assessment report has been submitted to OJJDP. A model juvenile aftercare program, which builds on the assessment material, has been developed and related policies and procedures have been completed in draft. This next stage of funding will provide training and technical assistance for up to four sites in the aftercare model. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Research on the Causes and Correlates of Delinquency and Non-Delinquency

$1,680,000

This longitudinal cohort study by three coordinated projects has been directed to improving the knowledge base regarding positive, delinquent, or drug using behaviors of juveniles in the context of the family, school and the individual. Factors are being identified that promote, as well as inhibit, involvement in delinquency, leading to effective design of intervention activities. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Reaching At-Risk Youth in Public Housing

$300,000

This is a collaborative interagency program between OJJDP and the Department of Housing and Urban Development (HUD). Boys and Girls Clubs of America have established seven Boys and Girls Clubs in public housing developments across the Nation under the existing cooperative agreement with OJJDP. HUD's funding level commitment for this program is not yet final. The dollar amount of this program represents only OJJDP's portion. These programs are designed to provide needed services to the high-risk youth who live in public housing, thereby preventing their involvement in delinquency, drug and alcohol abuse and gang involvement. During Fiscal Year 1992 additional sites will be established and training and technical assistance will be made available to other Boys and Girls Clubs and public housing authorities who wish to establish Clubs. Also, as part of this program, the Boys and Girls Clubs developed a curriculum on their targeted public housing outreach program for the Federal Bureau of Investigation's Drug Reduction Coordinators. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

The Congress of National Black Churches: National Anti-Drug Abuse Program

$150,000

The overall plan for this program calls for the development and implementation of a national public awareness and mobilization strategy to address the problem of drug abuse and drug abuse prevention in targeted communities across the United States. The goals of the national mobilization strategy are to summon, focus and coordinate the leadership of the Black religious community in cooperation with the Department of Justice, other Federal agencies and organizations to help mobilize groups of community residents to combat effectively drug abuse and drug-related criminal and antisocial activities. The program is currently operating in 10 cities. This award will provide funding to extend the program from 10 to 15 additional cities. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Effective Strategies in the Extension Service Network, Phase II

$75,000

This is a collaborative interagency program between the Office of Juvenile Justice and Delinquency Prevention (OJJDP), Department of Justice; the National Highway Traffic Safety Administration (NHTSA), Department of Transportation; and the Extension Service, Department of Agriculture, in which OJJDP and NHTSA provide the funding. NHTSA's funding level commitment for this program is not yet final. The dollar amount of this program represents only OJJDP's portion. The purpose of this program is to establish worthwhile community collaborations through a defined, established training program and technical assistance provided by the U.S. Department of Agriculture's Extension Service Network. These collaborations will focus on youth substance abuse, impaired driving and other delinquent behavior. Training and technical assistance will be based on the Community Systemwide Response (CSR) planning process, a training curriculum that presents a planning and organization strategy communities can use to assess and respond to their current juvenile drug and alcohol abuse and impaired driving problems. The CSR also provides information about the

VOL
56
ISS
248
DE
26
1991
UMI

most promising systemwide technologies in drug abuse prevention and treatment. Applications will not be solicited competitively.

Field-Initiated Programs

$550,000

OJJDP is proposing continuation of its program designed to increase the capacity of State and local governments, public and private youth-serving agencies, and neighborhood organizations or community groups to prevent delinquency, develop and use alternatives to the juvenile justice system, and improve the administration of juvenile justice. This program will provide competitive awards to practitioners, policymakers and researchers who have innovative ideas which address areas that do not fall within the scope of other proposed programs. The award of these grants will be closely coordinated with the priorities of the Office of Justice Programs. Any grant funded under this program will follow a regular cycle of application, peer review and competitive selection. Additional applications will be solicited to implement new activities in this continuation program in Fiscal Year 1992.

Law-Related Education (LRE)

$3,200,000 [1]

Since 1979, OJJDP has funded a national law-related education (LRE) effort. The Law-Related Education National Training and Dissemination Program involves five national LRE projects and programs which operate in 47 States. The purpose of this program is to provide training and materials to State and local school jurisdictions to encourage and guide them in establishing LRE delinquency prevention programs in the curricula of grades kindergarten through 12 and in juvenile justice settings. Grantees will be encouraged to place emphasis on drug abuse prevention programs in primary, middle and secondary schools in minority communities. The major components of the program are: Coordination and management, training and technical assistance, preliminary assistance to future sites, public information, program development, and assessment. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Satellite Prep School Program and Early Elementary Schools for Privatized Public Housing

$400,000

This is a collaborative interagency program between OJJDP and the Department of Housing and Urban Development, and is being coordinated with the Department of Education. The purpose of this program is to establish an early elementary school program to help prevent and deter children who reside in public housing developments from participation in delinquent acts and to reduce the potential for their involvement in lives of crime, especially drug-related crime, gang activities, alcohol and/or drug abuse. The Prep-School Program has as its mission the establishment of preparatory elementary schools for kindergarten to fourth grade children living in public housing developments. The Prep-School Program will begin with one demonstration site in the Ida B. Wells Housing Development, Chicago, Illinois. The Prep-School will be established and operated as an early intervention educational model based upon the Marva Collins Westside Preparatory School educational philosophy, curriculum and teaching techniques. The other partner in this effort is the Chicago Housing Authority. The Fiscal Year 1992 funds awarded to the Chicago Housing Authority will be used for the Prep-School operational expenses and continued training and technical assistance. The U.S. Department of Housing and Urban Development funds will be used for renovations to create the space for school. This program addresses Goal 6 of "Goals for America 2000: The President's Education Strategy." This program will be implemented by the current grantees. No additional applications will be solicited in Fiscal Year 1992.

Career Development

$90,000

This is a collaborative interagency program between OJJDP and the U.S. Department of the Interior. This program gives high-risk youths an opportunity to assess their interest in and potential for careers in the Criminal Justice System or the National Park Service. The purpose of Law Enforcement Exploring is to educate and involve youth in police or other justice system operations, to interest them in possible law enforcement careers, and to build understanding between youth and law enforcement personnel. An added program component in Fiscal Year 1990 was the introduction of youths to career opportunities in the National Park Service. The youths participating in the Exploring Program render hands-on assistance to their host agencies or organizations (State and local police departments, U.S. Park Service, U.S. Customs, etc.). The youths also receive hands-on training from their host agencies. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Partnership Plan, Phase V (Cities in Schools)

$400,000

This is a collaborative interagency program between OJJDP, the U.S. Department of Labor, and the U.S. Departments of Health and Human Services and Commerce. The dollar amount of this program represents only OJJDP's portion. The funding level commitment for the other agencies are not yet final. This program is a continuation of a national school dropout prevention model that is being implemented by Cities In Schools, Inc. (CIS). CIS provides training and technical assistance to States and local communities to enable them to adapt and implement the CIS dropout prevention model. The model focuses social, employment, mental health and other resources on high-risk youths and their families at the school level. Individualized plans are developed for each youth, and needed remedial education, social and other services are provided to the youths and their families. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Drug Testing

$3,350,000

"Testing within the criminal justice system can serve as an 'early warning system' that provides another method of keeping offenders in check while they are on pretrial or post-conviction release. Moreover, random, mandatory drug tests, coupled with certain penalties, create a powerful incentive for those under correctional supervision—a high risk group—to get off and stay off drugs." (National Drug Control Strategy, January 1990).

OJP Policy Statement:

Drug testing should be considered an essential component of intermediate sanctions as well as all other pre- and post-adjuditory sanctions of criminal justice and juvenile justice systems. It should be available at intake and throughout the system for initial and periodic screening and diagnostic assessment purposes. In addition, it should be used to guide decisions pertaining to immediate and longer term control and treatment needs, levels of security and types of confinement as well as the development of appropriate dispositions, treatment plans and referrals for services. Through research, demonstration, technical assistance, training and information dissemination program, OJP will provide policymakers at the State and local levels with information to enable and encourage them to incorporate drug testing in all aspects of the criminal and juvenile justice systems.

OJP Program Response

Bureau of Justice Assistance (BJA)

$500,000

Continuation Programs

Drug Testing Throughout the Criminal Justice System

$500,000

The purpose of this program is to demonstrate the use of drug testing throughout the criminal justice system from pretrial through parole. Training and technical assistance is being provided during the planning and operational phases of the demonstration site. Fiscal Year 1992 funds will support continuation of the Portland, Oregon, site. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

National Institute of Justice (NIJ)

$2,450,000

New Programs

Research and Development on Drug Testing/Drug Use Forecasting

$250,000

This program includes research on drug testing and its benefits for the criminal justice system, studies of NIJ's Drug Use Forecasting Program, and demonstrations and applications using DUF data. Issues to be addressed may include the predictive value of pretrial drug testing, the use of portable drug testing technology, models for efficient system-wide testing, the management and use of drug test results and programs for criminally-involved pregnant addicts or those with young children. NIJ will make the DUF juvenile data sets as well as those for male and female adult arrestees available. Responses to the open-ended interview questions may also be publicly available. This will permit broader lines of inquiry, ranging from progression of drug use from mid-teens to mid-twenties to analysis of the geographic movement over time of self-reported "new drugs on the street." Methods of procurement will be determined and solicitations issued, as appropriate.

Continuation Programs

Drug Use Forecasting (DUF) Program

$1,400,000

This is a collaborative intra-agency program between NIJ and BJA, in which BJA is providing matching funding. DUF has been identified by the Office of National Drug Control Policy (ONDCP) as one of eight leading drug indicator systems in the Nation. Using drug testing and interview data, the DUF system collects information on drug use by arrestees brought to booking facilities in 24 jurisdictions. Results are analyzed and published by NIJ in quarterly and annual reports. Studies are underway to expand the utility of DUF data in the sites, to examine and refine the DUF sampling plan and to pilot test a computerized interview which may improve the timeliness and accuracy of the data as well as the cost efficiency of the program. Fiscal Year 1992 activities will maintain the data collection and research program in the sites and support extended ongoing coordination with other Federal agencies including the National Institute of Drug Abuse (NIDA), Drug Enforcement Administration (DEA), ONDCP and the Office of Treatment Improvement (OTI). Methods of procurement will be determined and solicitations issued, as appropriate.

Hair Analysis Research and Standards

$800,000

This is a collaborative interagency program between NIJ and NIDA designed to expand the drug testing capability of the criminal justice system through the development of hair-based tests. Hair testing permits the detection of drug use patterns over longer periods of time than can be detected through urine-based testing. In Fiscal Year 1991, research focused on cocaine and heroin evidence in hair and the development of criminal justice system standards for hair analysis techniques. Building on these efforts, Fiscal Year 1992 initiatives may address variations in hair drug evidence by offender group characteristics, standardization of field testing and analysis procedures and cost-benefit comparisons of hair and other testing methods in criminal justice program settings. Multiple awards will be made. Methods of procurement will be determined and solicitations issued, as appropriate.

Office of Juvenile Justice and Delinquency Prevention (OJJDP)

$400,000

New Programs

Enhancing Enforcement Strategies for Juvenile Impaired Driving Due to Drug and Alcohol Abuse

$100,000

This is a collaborative interagency program between OJJDP and the National Highway Traffic Safety Administration. NHTSA's funding level commitment for this program is not yet final. The dollar amount of this program represents only OJJDP's portion. The purpose of this program is to enhance the juvenile justice system's coordination and responsiveness to delinquent youth involved in drinking and driving. Based on documentation of low arrest and citation problems as they pertain to youth impaired driving, as well as information about enforcement obstacles and effective enforcement strategies, an award is being made to develop training and technical assistance materials for the various juvenile justice system components (i.e., police officers, judges, prosecutors, probation officers, etc.). The materials will address the issues related to effective enforcement of impaired driving laws as they pertain to juveniles and the juvenile justice system. The materials will be tested in five jurisdictions across the country. Based on practical use, they will then be edited and prepared for replication and dissemination. Applications will not be solicited competitively.

Continuation Programs

Drug Testing Guidelines

$125,000

The primary purpose of this project is to develop a comprehensive curriculum in close coordination with the National Institute of Justice, consisting of drug identification, screening and testing which will assist juvenile justice systems in educating policymakers and training managers through training and technical assistance. This program, "Training and Technical Assistance Curriculum for Drug Identification, Screening and Testing in the Juvenile Justice System," offers a plan for providing training and technical assistance to selected juvenile justice systems throughout the country. This program will be implemented by the

VOL 56 ISS 248 DEC 26 1991 UMI

current grantee. No additional applications will be solicited in Fiscal Year 1992.

Testing Juvenile Detainees for Illegal Drug Use

$175,000

The intent of this program is to assess, develop, test, and disseminate information on new and innovative approaches to test for illegal drug use among juvenile detainees. The purpose of the program is to improve resource allocation and treatment services for youth in detention by developing more accurate and complete information on the use of illegal drugs. The world of drug testing is technical and complex, as are the issues revolving around the decision to test juveniles for illegal drug use. OJJDP has recognized the complexity of the situation and embarked on this initiative, among others, to provide guidance and leadership to the field in this area. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Intensive Prosecution and Adjudication

$6,728,263

"Through the criminal justice system we identify, arrest, and prosecute those who break our laws; incarcerate the most serious offenders so they cannot further threaten the welfare of society; deter others from involvement in the drug trade; and, by making clear the costs of drug use, cause many more to enter treatment and rehabilitation." (National Drug Control Strategy, February 1991.)

OJP Policy Statement

Prosecution and adjudication should be a primary focus of criminal and juvenile justice system activity in order to attack aggressively the problems of illegal drug trafficking, gang violence and community exploitation. OJP's activities will focus on promoting legislation as well as policies, procedures and practices that expedite the identification, processing, adjudication and case disposition of adult and juvenile serious, violent offenders. The activities will emphasize tactics, technologies and strategies that include system-wide coordinated responses, vertical prosecution, offender specialization, case management, expeditious court decisionmaking and appropriate dispositional alternatives. Demonstration, training, technical assistance and information dissemination are the primary program mechanisms that will be used in preparing more effective prosecutorial and judicial responses to serious and violent crime.

OJP Program Response

Bureau of Justice Assistance (BJA)

$2,700,000

Continuation Programs

Model State Drug Control Statutes

$350,000

This program will facilitate the adoption and implementation of model comprehensive drug control statutes which strengthen States' investigation, apprehension, prosecution and punishment capabilities in dealing with drug offenders and organizations trafficking in illegal drugs and narcotics. In addition, this program provides State and local policymakers model statutes with supporting commentary which effectively address both drug supply and demand problems. This program will promote and assist the implementation of the updated model State statutes across the Nation through key State and local policymakers and providing comprehensive technical assistance for their implementation of the model statutes. This funding will provide intensive technical assistance to between six to eight States. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Night Drug Courts

$500,000

This program benefits medium and large jurisdictions which experience backlogs and/or increased filings of drug cases. Purposes of this program are to refine program models, demonstrate those models and provide technical assistance and training to the demonstration sites. Additional applications will be solicited to implement new activities in this continuation program in Fiscal Year 1992.

National Drug Conference

$100,000

BJA and the State Justice Institute (SJI) sponsored a conference in November 1991 to assist State Judiciaries in developing responsive drug control strategies and in implementing corresponding programs. To support the needs of the judiciary in future program development, BJA and SJI have agreed to set aside funds to implement selected recommendations from the conference attendees. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Court Case Management Training and Technical Assistance

$150,000

The purpose of this program is to collect and assess the information generated by the programs of BJA and SJI focused on assisting courts to respond more effectively and efficiently to drug cases. This information will be used to develop a training and technical assistance curriculum for providing guidance to courts in implementing one or more model approaches to drug case management. The program will include a conference on alternative models of case management. It is anticipated that this will be a joint program with the SJI. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Interjurisdictional Prosecution Program—Demonstration

$500,000 [1]

The purpose of this program is to enable prosecutors from two to six adjoining jurisdictions to establish a formal interjurisdictional prosecutor-led task force focused on the investigation and prosecution of illegal drug manufacturing and distribution organizations operating within their contiguous jurisdictional boundaries. This program will support up to three new demonstration sites selected to replicate the prototype model. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

South Carolina Grand Jury—Criminal Drug Project

$500,000*

The purpose of this demonstration is to continue the ongoing South Carolina Grand Jury Project's operation and to assess and document the State Project to enable its possible replication by other States. The South Carolina Attorney General's Office was recognized during hearings held by Senators Hollings and Rudman in February 1990 as having a highly successful Statewide Grand Jury—Criminal Drug Organization Project which is a special prosecution unit in the State Attorney General's Office dedicated to intensive investigation and prosecution of multijurisdictional drug trafficking networks throughout the State. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Local Drug Prosecution—Innovative Projects and Assessments

$250,000

This program is designed to provide State and local prosecutors with new and innovative approaches to improve local investigation and prosecution of drug offenses as well as to organize community resources into a comprehensive strategy to eliminate illegal drugs. The program targets district attorneys who establish and implement drug control policies and front line prosecutors who try drug-related cases. Drawing upon the expertise of an established national network of narcotics prosecutors, the project will develop, document and disseminate information on innovative programs and policies related to effective investigation and prosecution of drug offenses and the development of comprehensive community-based drug control strategies. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Statewide Training for Local Prosecutors

$150,000

The purpose of this dissemination program is to provide training and technical assistance to local prosecutors assigned full-time to drug units and task forces. It is based on a sophisticated case study and trial advocacy training program for drug prosecutors that was tested statewide in two jurisdictions and is to be made available to all States. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Federal Alternatives to State Trial (FAST)

$200,000

The purpose of this program is to demonstrate the potential benefits of moving selected State drug trafficking cases to the Federal system utilizing City and County of Philadelphia Assistant District Attorneys to develop and prosecute these cases in Federal Court. This transfer from State to Federal jurisdiction will substantially increase the likelihood of pretrial detention for local drug dealers, expedite the prosecution of these cases before the Federal District Court and obtain a significant mandatory sentence, for the guilty defendants, in a Federal prison facility. Special emphasis will be given to the project's documentation and assessment-evaluation activities. This information will provide the first substantive review of a systematic removal of a relatively large number of State cases (200–400 annually) to Federal jurisdiction. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

National Institute of Justice (NIJ)

$500,000

New Programs

Research and Development on Prosecution and Adjudication

$500,000

This program addresses issues and problems concerning the prosecution and adjudication of criminal cases and related civil matters. The program builds on past research and upon recently identified problems and issues of concern to prosecution and the judicial process. Some of the areas of particular interest that may be pursued concern effective handling of drug cases, innovation in the pretrial process, evidentiary issues such as eyewitness testimony, jury decisionmaking, assessing juror representation and environmental crime. Methods of procurement will be determined and solicitations issued, as appropriate.

Office of Juvenile Justice and Delinquency Prevention (OJJDP)

$3,528,263

New Programs

Improvement in Correctional Education for Juvenile Offenders

$100,000

This is a collaborative interagency program between OJJDP and the U.S. Department of Education. The primary purpose of this program is to assist juvenile corrections administrators in planning and implementing educational services for detained and incarcerated juvenile offenders. This will be accomplished by the development of minimum educational standards and specific approaches to improving correctional education. OJJDP will seek joint funding for the program from the Department of Education. Applications will be solicited competitively.

A Study To Examine The Delay In Juvenile Sanctions

$75,000

The problems created by delays in juvenile treatment and sanctions are not well documented because of the lack of research. Since the Supreme Court decision in In Re Gault, 387 U.S. 1 (1969), procedural requirements in juvenile hearings have become more formal. Crowded civil and criminal calendars often delay juvenile hearings. The decision in *United States* v. *Furey*, 500 F.2d 338 (2d Cir. 1974), and a number of State cases have held that juveniles have a constitutional right to a speedy trial. In line with this right, the Institute of Judicial Administration and the American Bar Association published Standards for Juvenile Justice in 1977 that recommended ideal time limits for juvenile systems to function appropriately and effectively. Delays, directly and many times adversely, affect juveniles and are also wasteful of judicial resources. OJJDP will fund a study to determine the extent of unnecessary delays and whether they are excessive; the cause of the delays; and their effect on the juveniles and system administration. As a result, recommendations will be offered for improvement. Applications will be solicited competitively.

Juvenile Justice Personnel Improvement

$100,000

The purpose of this applied research program is to raise the quality of the key personnel in the juvenile justice system, such as probation officers and detention and corrections counselors, who have direct one-on-one contact with juveniles on an on-going basis. Juvenile justice succeeds or fails as a result of the highly interpersonal relations that are established by these professionals. Unfortunately, turnover rates among these professionals are excessively high. The obvious effects of such turnover are disruption on administration and increasing costs of recruitment and training. However, of possibly greater seriousness are the effects on the juveniles who are confused by a succession of youth workers. Many of these youth have begun to form meaningful relationships with a juvenile justice professional only to be abruptly placed with a different person. Despite the high turnover rates, there are capable and experienced staff professionals who stay, are satisfied, and do excellent work. The object of this program is to learn how to increase the number of professionals who achieve such stability and longevity in their careers.

The initial project will include an assessment of the descriptions of the functions, knowledge, and skill requirements of these personnel. A study of turnover rates in a representative sample of jurisdictions

VOL 56 ISS 248 DEC 26 1991 UMI

and agencies will be initiated. The goal of the overall program, which will be completed in a continuation, will be the development of guides for the implementation of personnel programs that will result in the recruitment and retention of competent and satisfied personnel. Applications will be solicited competitively.

Juvenile Court Technical Assistance and Training on Child Abuse and Neglect Cases

$500,000

The purpose of this program is to design and implement model national standards and to develop a national training curriculum to improve the handling of child abuse and neglect cases in juvenile court. Training and Technical Assistance will be the primary method of transferring the model material to State and local court systems. Section 223(a) of the Crime Control Act of 1990 (Public Law 101–647, 104 Stat 4797) provides $500,000 for a grant to the National Council of Juvenile and Family Court Judges for this purpose. Therefore, no additional applications will be solicited in Fiscal Year 1992.

Continuation Programs

Juvenile Court Training

$1,100,270 [1]

The primary purpose of this project is to allow the National Council of Juvenile and Family Court Judges to continue to refine the training presently offered and to provide technical assistance. The training objectives are to supplement law school curricula, provide judges with current information on developments in juvenile and family case law and make available options for sentencing and treatment. Specifically, emphasis will be placed on the areas of drug testing, gangs and violence, intermediate sanctions, as well as responding to the problems of unemployability, illiteracy and family dysfunction. This project will provide foundation training both to newly elected or appointed judges and to experienced judges who have been recently assigned to the juvenile or family court bench. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Court Management Training

$35,000

The purpose of this training is to develop and enhance skills of juvenile court personnel who manage the day-to-day operations of juvenile court intake, detention facilities, juvenile court processing, and juvenile court data systems. The focus will be upon improved development and functioning of these systems within the juvenile court through upgrading skills of management staff. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Technical Assistance to the Juvenile Courts

$392,993 [1]

The National Center for Juvenile Justice (NCJJ) is the research division of the National Council of Juvenile and Family Court Judges. The general areas in which assistance will be provided include: Court administration and management, program development, court decision-making, legal opinions, due process, and case law. Emphasis will be placed on intermediate sanctions such as boot camps, and on appropriate dispositional alternatives for handling juveniles involved in gang activity. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Improving Literacy Skills of Institutionalized Juvenile Delinquents

$100,000

This is a collaborative interagency program between OJJDP and the Department of Education. Many juvenile delinquents in correctional institutions have a serious need to develop basic reading and writing skills. This program will improve the literacy levels of juvenile residents in these facilities while creating a national network of trained reading teachers and volunteers available to juvenile correctional facilities. The program will include training, technical assistance, and development of curricula for use by staff of detention and corrections facilities. The program should improve correctional education and the delivery of appropriate services to incarcerated juveniles. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Improving Conditions of Confinement: Training for Juvenile Corrections Staff

$600,000

This is a collaborative interagency program between OJJDP and the National Institute of Corrections (NIC) to continue the development of a comprehensive training program for juvenile corrections and detention staff personnel. The program is being designed to develop a core curriculum to provide training for juvenile corrections and detention administrators and mid-level management personnel in such areas as drug testing, gang activity and overcrowding. It is anticipated that the juvenile corrections core training will be conducted at the NIC Academy and that the more issue-oriented training will be done regionally. This program will be implemented under the existing interagency agreement.

Juvenile Justice Training for Prosecutors

$125,000

This project's activities include designing and implementing policy development workshops for chief prosecutors, and for juvenile unit chiefs in prosecutors' offices, to support their roles in the juvenile court processing of delinquents. Materials will be collected for the preparation of a training manual on policy issues pertaining to the prosecution of juvenile offenders. The project will also continue to issue a newsletter. To date, the National District Attorneys Association has presented five highly rated workshops designed to expand prosecutor involvement in juvenile justice. The training provided by the project addresses organizational leadership, management, and change. A major goal of the project is to make juvenile matters a priority concern in prosecutors' offices. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Training and Technical Assistance for Juvenile Detention and Corrections Agencies

$250,000

This project will continue to provide technical assistance and training to juvenile correctional and detention agencies. It will also provide a national forum on juvenile corrections to include representatives from the juvenile court judges and juvenile probation offices; develop a juvenile facility construction handbook; develop a behavior management training package; and complete the development of standards for all juvenile justice facilities. Emphasis will be placed on intermediate sanctions for handling juveniles involved in drug-related offenses and gang activities. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Juvenile Corrections Industries Venture Program

$150,000

The purpose of this program is to assist juvenile corrections agencies in establishing joint ventures with private businesses and industries in order to provide new opportunities for the vocational training of juvenile offenders. The grantee has performed an assessment of corrections industries ventures programs, developed a policies procedures manual, and produced training and technical assistance materials and is now in the process of selecting four to eight juvenile corrections agencies to participate in the training and technical assistance on the corrections venture models. The Fiscal Year 1992 funding will increase the number of sites receiving training and technical assistance. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Evaluation

$5,790,000

"The detailed picture of drug use and trafficking patterns necessary to formulate intelligent national policy can be developed only by means of wide-ranging, interdisciplinary data collection and evaluation." (National Drug Control Strategy, February 1991).

OJP Policy Statement

Evaluations are a primary component of OJP discretionary grant programs. OJP promotes program evaluation so that programs that are effective can be identified, publicized and replicated in other jurisdictions, while programs that have not proven effective can be discontinued. OJP will dedicate significant financial resources to encourage, enhance and enforce quality design and program development and will disseminate the results to communicate what works and what does not. These evaluation activities consist of formal assessments of OJP programs through objective measurement and systematic analysis of the manner and extent to which the programs achieve their objectives and produce significant results. The results are used to assist in the formulation of relevant criminal justice and juvenile justice policies. Related program design and the subsequent development and dissemination of program policies, procedures and practices provide information and guidance at the Federal, State and local levels.

OJP Program Response

Bureau of Justice Assistance (BJA)

$750,000

Continuation Programs

BJA-State Reporting and Evaluation Program

$750,000

This project is designed to develop and implement standardized assessments of subgrant performance data to allow the assessment and evaluation of formula grant drug control efforts at the State and local levels. The project will provide technical assistance to the 56 States and Territories directly and through a series of reports and technical assistance documents. This technical assistance will enhance the data collection, analysis and reporting capabilities of the State agencies designated to administer the formula grant program. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

National Institute of Justice (NIJ)

$4,250,000

New Programs

Evaluation Projects

$4,000,000

This is a collaborative intra-agency agreement between NIJ and BJA to evaluate a range of new programs funded under the Anti-Drug Abuse Act of 1988. Evaluation areas may include Corrections Options, Inmate Work and Education, Weed and Seed, Boys and Girls Clubs, Community Policing and Disruption of Drug Markets. NIJ will continue to evaluate innovative State and local anti-drug programs supported by BJA funds. In 1992, NIJ will co-sponsor with BJA the Third Annual Evaluation Conference to provide a forum for State and local officials to exchange information, provide technical assistance and training and disseminate the findings from completed evaluation studies. NIJ will also continue to build its evaluation capacity and consider possible supplements to ongoing projects. Multiple awards may be made in Fiscal Year 1992. Methods of procurement will be determined and solicitations issued, as appropriate.

Evaluation of Weed and Seed Projects

$250,000

The National Institute of Justice will continue to support evaluation projects that can provide model programs and strategies for the Weed and Seed comprehensive approach to neighborhood security. The focus will be on the development of a coordinated approach to community security through the integrated efforts of the police, citizen groups and other public and private agencies. Special attention will be given to evaluation projects that support each of the major components of Weed and Seed dealing with the suppression of neighborhood drugs and crime, police-community partnerships and neighborhood reclamation. Multiple awards may be made in Fiscal Year 1992. Methods of procurement will be determined and solicitations issued, as appropriate.

Office of Juvenile Justice and Delinquency Prevention (OJJDP)

$790,000

New Programs

Effectiveness of Juvenile Offender Treatment: What Works Best and for Whom?

$50,000

OJJDP seeks to determine what forms of treatment are most effective for individual juvenile offenders. The initial project will determine the feasibility of a program of collection and review of data, previous studies, and current literature. Treatment, in this context, could range from release, restitution, community service, and probation to incarceration. The aim is to determine, insofar as possible, what forms of treatment and sanctions are most effective, and for which types of juvenile offenders. Subsequent findings would be made available to the juvenile courts in order to provide officials with the necessary data to assist them in selecting treatment options for juvenile offenders. Applications will be solicited competitively.

Continuation Programs

Independent Evaluations

$640,000

OJJDP awarded a contract to conduct independent evaluations of selected funded programs. This will establish a concerted, continuous effort to learn, in the following order of priority: Efficacy, cost-effectiveness, and impact of the discretionary programs. Reported findings, including strengths, weaknesses and other assessment data, will be made available to all concerned. The following criteria will determine the priority of programs selected for evaluation: (1) Continuations in order of number of years of funding and total expenditures; (2) new action programs being tested to serve as possible models;

VOL
56
ISS
248
DE
26
1991
UMI

and (3) new and continuing programs requiring decisions regarding continuation. This program will be implemented by the current contractor. No additional applications will be solicited in Fiscal Year 1992.

Fellowship Program

$100,000

Acting through the National Institute for Juvenile Justice and Delinquency Prevention, OJJDP will continue a Fellowship Program which will provide grants of varying amounts to individuals for independent scholarly study in the field of juvenile delinquency. The Fellowship Program includes the Graduate Research Fellowship and the Summer (short-term) Research Fellowship. Each fellowship program selection will be based on a competitive review and evaluation of proposals for independent study on policy-relevant issues in the juvenile justice field that are closely coordinated with the Office of Justice Programs priority areas. (See OJP priorities under Proposed Programs in earlier sections of this notice.) The OJJDP fellowships are open to juvenile justice practitioners, new Ph.D.s, graduate students, and senior researchers. Each fellowship application will be expected to meet the criteria specified in the procedures and requirements of the OJJDP Fellowship Program. Fellowships will vary in length and amount. Additional applications will be solicited competitively to implement new activities in this continuation program in Fiscal Year 1992.

Money Laundering and Financial Investigation

$3,850,000

"A top priority of the National Drug Control Strategy is to bar the doors of the world's financial institutions to drug money launderers. Our comprehensive money laundering strategy focuses on four aspects of the problem: Improving our intelligence and data analysis capabilities to understand the financial activities of the drug traffickers better; conducting criminal investigations of suspected money laundering activities, to arrest and prosecute those engaging in same, and to seize and forfeit laundered drug proceeds and accumulated wealth * * * and finally * * * promoting international cooperation in stopping money laundering." (National Drug Control Strategy, February 1991.)

OJP Policy Statement

The criminal justice system must disrupt and destroy the production and distribution of illegal drugs and as a result remove the principal income generating activity for organized crime in the Nation. This requires appropriate statutory authorizations, specialized financial investigative techniques and expertise. Prosecutors and other law enforcement officials have to be knowledgeable in financial crimes and the movement of adult and juvenile illegal drug trafficking revenues. Countering major interstate drug enterprises requires techniques that involve identifying the hidden assets and proceeds of drug crime, tracing narcotics-related financial structures and money laundering schemes and asset administration. Demonstration, development, training and technical assistance programs as well as evaluation efforts are being implemented to promote and test a complete range of skills, techniques and approaches to effect the necessary legislation, policy and practices to conduct successful financial investigations.

OJP Program Response

Bureau of Justice Assistance (BJA)

$3,250,000

New Programs

COMMAND

$200,000 [1]

This will be a pilot program involving the cities of Buena Park and Fontana, California. COMMAND Asset Seizure and Forfeiture Administration Service, and the University of Nevada, Reno. It is designed to determine the feasibility of using private sector financial investigators to assist in the detection and seizure of hidden assets of drug traffickers.

Continuation Programs

Financial Investigation Demonstration (FINVEST)

$2,200,000 [1]

This program is designed to develop and implement centrally coordinated multijurisdictional financial investigation activities involving tracing narcotics-related financial transactions, analyzing movement of currency and identifying criminal financial structures and forfeitures. Fiscal Year 1992 funds will provide continuation funding for 12 existing sites and provide for continuation and expansion of the training and technical assistance component. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Civil RICO—Training and Technical Assistance

$250,000

This project will continue to provide sophisticated technical assistance, training and information exchange capabilities to State Attorneys General Offices. It will increase the use of State civil RICO and other civil remedy statutes as drug enforcement tools by providing technical assistance and training to all interested State Attorneys General Offices. Available statistical information will be shared with BJS. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Asset Seizure and Forfeiture Enforcement Training

$300,000 [1]

This is a collaborative interagency program between BJA and the Executive Office of Asset Forfeiture (EOAF). The purpose of this program is to provide training and technical assistance to State and local law enforcement investigators and selected prosecution personnel in State and local asset seizure and forfeiture statutes and appropriate Federal laws and protocols.

BJA has an existing grant with the Police Executive Research Forum (PERF) to provide training to State and local agencies to develop and implement asset seizure and forfeiture units within their respective departments. The training delivered under this program is directed specifically toward State asset seizure and forfeiture statutes and coordinated with the EOAF, cognizant U.S. Attorneys and with related BJA efforts in prosecution training in this area. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Asset Forfeiture Training for Prosecutors—Training Financial Investigations

$300,000 [1]

This program is designed to train State and local prosecutors and selected local law enforcement officers in implementing effective State forfeiture statutes. The training will address the key provisions of these statutes: civil (*in rem*) and criminal forfeiture procedures, substitute asset provisions, money laundering provisions and property management procedures. It will focus on how to develop the prosecution capacity, as well as policies and management to ensure just, ethical and effective prosecution of the model State asset forfeiture provisions. Training will be provided to States that now have or are actively pursuing the adoption of the model asset forfeiture statute or an enhanced State asset forfeiture statute. Training will be increased for eight to ten more States. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

National Institute of Justice (NIJ)

$605,000

New Programs

Research and Development on White Collar and Organized Crime

$500,000

In Fiscal Year 1991, NIJ funded research aimed at increased understanding, prevention and control of money laundering, securities fraud and organized crime corruption of legitimate industries (construction). In addition, joint conferences were held with the FBI on money laundering and emerging economic crimes and with the DOJ Criminal Division on Asian organized crime. In Fiscal Year 1992, studies will target offenses that threaten to cause major physical, social and economic harm, such as insurance fraud and health care fraud as well as the drug trafficking and multiple illegal enterprises of violent organized criminal groups. These studies will seek to describe clearly the characteristics of these crimes and to identify effective strategies of prevention and control. Multiple awards may be made and solicitations will be issued, as appropriate.

Continuation Programs

Study of the Changing Structure of Organized Crime

$100,000

This project will examine international money laundering issues, including existing modes of money laundering by drug traffickers, organized crime and other criminals, current law enforcement strategies, cooperative efforts among nations and special problems faced by investigators and prosecutors in detecting and responding to these offenses. Recommendations will then be made for improved legislative and law enforcement strategies, highlighting multinational coordination. The study will be closely coordinated with NIJ's ongoing national assessment of money laundering. Applications will not be solicited in Fiscal Year 1992.

Information Systems, Statistics and Technology

$37,258,991

"Success on the interdiction, criminal justice, and other fronts will depend on acquiring, integrating, and disseminating information for planning, decision-making, and management of drug control resources." (National Drug Control Strategy, 1990.)

OJP Policy Statement

Criminal justice agencies need accurate, comprehensive and timely information in developing policies and allocating resources to prevent and control illegal drugs. OJP's Information Systems, Statistics and Technology activities focus on the collection and analysis of criminal and juvenile justice information related to serious crime, gang activity, illegal drug use, pre- and post- adjudicatory incarceration, criminal history and system-wide service response effectiveness. To enhance reporting and access to accurate and complete criminal history data, the improvement of criminal history information systems within the States is also a major focus of this activity. Statistical research, analysis, development and dissemination activities are used to implement this priority. Particular emphasis will be placed on technological programs that focus on less than lethal weapons and protective clothing.

OJP Program Response

Bureau of Justice Assistance (BJA)

$1,375,000

Continuation Programs

BJA Clearinghouse

$550,000

The BJA Clearinghouse maintains a criminal justice library of over 100,000 documents and an electronic data base of document surrogates which serve reference specialists in locating information quickly for the use of the criminal justice practitioners and research community. During Fiscal Year 1992, particular emphasis will be placed on OJP priorities; for example, publications regarding gangs and violence will be disseminated throughout the criminal justice community via reports, the NCJRS Electronic Bulletin Board and conference support system which ensures dissemination to all major criminal justice agencies and organizations in the Nation and worldwide. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Operational Systems Support Training and Technical Assistance (SEARCH)

$700,000 [1]

The purpose of this continuation program is to conduct outreach training to improve the general understanding of micro-computer automation and to provide criminal justice practitioners with information and demonstrations of specific criminal justice applications. It is designed to provide short-term technical assistance in order to address the specific needs of criminal justice agencies and long-term technical assistance to individual States or agencies within States which are not automated predominantly or seriously lag in their adoption of criminal justice automation. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Peer Review Services

$125,000

In approving programs for Federal funding, the process for reviewing competitive applications by independent experts in the field has been institutionalized in such a way as to avoid bias or the appearance of bias. Typically, there is a clearly delineated period of time in which to select a panel and complete the review. This contractor identifies potential panel reviewers, provides résumés of candidates and submits these to the program manager, who, in turn, presents them to the Director for final selection of the review panel participants. The contractor then collates a package of materials relevant to each program being reviewed, coordinates the review and prepares a synopsis of reviewers' comments on each of the applications. This project permits BJA to complete the application review and award process quickly and fairly. Additional applications will be solicited to implement new activities in this continuation program in Fiscal Year 1992. Applications will be solicited competitively.

Bureau of Justice Statistics (BJS)

$19,205,000

New Programs

Visiting Research Fellowship Program

$100,000

The Visiting Research Fellowship Program promotes criminal justice statistical research among the academic

1991
UMI

and professional criminal justice community to meet the specific needs of the Department of Justice and BJS. Visiting Fellows participate in a specifically designed research project of particular operational relevance to the national justice system or the international justice system. The Fellowship Program offers criminal justice researchers an opportunity to have a significant impact on specific BJS projects as well as a chance to investigate innovative approaches to the analysis and dissemination of BJS data. Fellows learn from and work with BJS statisticians and present seminars on the work they conduct. Applications will be solicited competitively.

Continuation Programs

Criminal History Record Improvements (CHRI) Program

$9,000,000

This is a collaborative intra-agency program between BJS and BJA with BJA providing all of the funds. The Attorney General's 3-year $27 million Criminal History Record Improvement (CHRI) program, funded by BJA and administered by BJS, will continue in Fiscal Year 1992. The major purposes of the program remain the same for the third year: (1) To make systematic improvements in the quality and timeliness of State criminal history records; (2) to identify convicted felons accurately; and (3) to meet new BJS/FBI voluntary reporting standards. Future changes may be made to this program to ensure consistency with related legislation now pending before the Congress. Under the BJS Information Policy Program, BJS will provide funding for the development of a national training curriculum and training for auditing State record improvements. Under a separate program, BJA is funding an evaluation of the CHRI program. Additional applications will be solicited to implement new activities in this continuation program in Fiscal Year 1992.

National Judicial Reporting Program

$450,000

This program is governed by a reimbursable agreement between BJS and the Bureau of the Census. The National Judicial Reporting Program is the Nation's sole source of data on characteristics of persons convicted of felonies in State courts nationwide. Data are obtained from a nationally representative sample of 300 counties. Characteristics of these data include age, race, sex, conviction offense, type and length of sentence received, type of conviction and judicial processing time. In Fiscal Year 1992, the 1990 data collection process will be completed and BJS will conduct data analysis and prepare the report, Felony Cases in State Courts, 1990. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

National Prosecutor Survey Program

$120,000

This program is governed by a reimbursable agreement between BJS and the Bureau of the Census. The National Prosecutor Survey Program recently collected data on prosecutorial policies and practices from a nationally-representative sample of 290 chief prosecutors in State court systems. Data was collected and analyzed on such factors as staff size, use of plea bargaining, sentencing guidelines, court organization, capacity and workload. In Fiscal Year 1992, BJS will report the findings of the survey in the Special Report, National Prosecutor Survey, 1990. Additionally, BJS will initiate a 1992 survey of the same panel of 290 State court prosecutors, adding questions covering topics of special interest to the Department and the prosecutor community. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

National Pretrial Reporting Program (NPRP)

$450,000

NPRP collects data relating to the pretrial status of persons charged with felonies. Information gathered includes arrest offense, prior criminal record, type of pretrial release, failure to appear in court, rearrests while on pretrial release, disposition and sentencing. Data is being collected currently from 40 jurisdictions representing the 75 largest counties in the United States. These 75 counties account for about half the Nation's crime. The sample of defendants was tracked for 12 months beginning in May 1990 or until case disposition. Consideration will be given to expanding the sample and preparing for future data collection. The NPRP plans to release Pretrial Release of Felony Defendants, 1990 during Fiscal Year 1992. No additional applications will be solicited in Fiscal Year 1992.

Civil Justice Statistics

$175,000

BJS will initiate efforts in the collection and analysis of data related to selected civil justice topics, including the National Survey of State Court Organization. A 1992 national survey of State court organizations will be conducted to collect current information on the organizational, financial and personnel statistics relating to State and Federal judicial systems. A detailed report presenting the findings of the survey will be released in Fiscal Year 1992. Additional applications will be solicited to implement new activities in this continuation program in Fiscal Year 1992.

National Corrections Statistics

$1,565,000

This program is governed by a reimbursable agreement between BJS and the Bureau of the Census. The corrections statistics program consists of a number of separate data collection and analysis efforts designed to obtain detailed information on offenders under correctional care, custody or control and the agencies and facilities responsible for administering the supervision of offenders. Statistical series obtain information on Federal, State and local correctional populations including those in confinement, as well as those subject to intermediate sanctions or conditional supervision in the community. The data collected and analyzed under the corrections statistics program will result in several publications and press releases during the Fiscal Year. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

State Statistical Analysis Network

$2,500,000

BJS provides financial and technical assistance to support a national network of State Statistical Analysis Centers (SACs) which are State-level organizations devoted to the collection, analysis and dissemination of criminal justice statistical information. Through the SAC programs, a new effort will be initiated which will assist States in: (a) Establishing an infrastructure which promotes the collection of common criminal justice statistical data among the States which emphasizes selected topics such as the control of gang activity and (b) developing a mechanism to share data and information among the States and to access Federal and State data and information electronically. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Statistical Initiatives for Improved Analysis

$550,000

BJS provides support to national organizations for special activities of national significance (for example, the Justice Research and Statistics Association, comprised of State Statistical Analysis Centers and their directors.) Activities anticipated this year include the development of: new research and evaluation measures, operationally relevant trend measures of special topics (e.g., State habeas corpus practices) and standards for justice statistics. Additional applications will be solicited to implement new activities in this continuation program in Fiscal Year 1992.

Offender-Based Transaction Statistics (OBTS) Program

$150,000

The OBTS Program collects and analyzes data tracing the key decisions during the arrest, prosecution, judicial decision and incarceration of the felony offender within the State's criminal justice system. The Statistical Analysis Centers play a key role in the collection of these data. This is an expanding program with additional States participating in the data collection process as the quality and completeness of their criminal history records permit. BJS is currently receiving data on dispositions occurring in 1989. In Fiscal Year 1992, the 1989 data will be processed, analyzed and published in the report, Tracking Offenders, 1989. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Criminal Justice Expenditure and Employment Extracts

$145,000

This program is under a reimbursable agreement between BJS and the Bureau of the Census governing the work to be undertaken by Census for BJS. BJS will collect, analyze and publish extract data for the Criminal Justice Expenditure and Employment program which includes statistical data on the cost of operating the Nation's criminal justice systems. The last year for which complete and more detailed expenditure and employment data was collected and analyzed was 1990. This served as the basis for calculating variable pass-through data in distributing the formula funds of the Edward Byrne Memorial State and Local Law Enforcement Assistance Program administered by BJA. Using extract data from the Census Bureau's ongoing finance and employment survey series, BJS will produce less detailed national estimates of expenditures and employment relating to major criminal justice activities, including police protection, prosecution, legal services, public defense and corrections. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

National Criminal Justice Statistical Compilations

$355,000

The Sourcebook of Criminal Justice Statistics, a BJS annual publication, provides in a single volume statistical data on a full range of criminal justice topics, from victimization to corrections. Data is compiled from over 100 different sources from various Federal agencies and private organizations. The Sourcebook is designed to make existing data more readily available to criminal justice practitioners, policymakers, researchers, the media and others in need of criminal justice statistics. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Technical Assistance in Law and Justice Statistics

$175,000

The purpose of this program is to ensure that all BJS programs benefit from a wide range of technical statistical expertise residing in other government agencies, the academic world, the research community and private industry. The Law and Justice Statistics Committee of the American Statistical Association provides technical advice to BJS, upon request, for the overall improvement of statistical methodology and data analysis and presentation. It also assists BJS personnel in a variety of ways including the review of written reports and documents, technical consultations with BJS personnel and in-depth studies of issues by the committee. Technical advice is given relating to the following matters: sample design, survey design, estimation techniques, data analysis and interpretation, and statistical and economic model design. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Federal Justice Statistics and Information Policy

$1,475,000

BJS has developed and maintained a Federal integrated data base which links information from investigative agencies, the Executive Office for U.S. Attorneys, the Administrative Office of the Courts and the Bureau of Prisons to understand the movement of cases and accused persons or offenders through the Federal criminal process. The Federal Justice Statistics program is currently developing, in conjunction with other Federal research and statistical agencies, a state-of-the-art automated model to simulate functioning of the Federal criminal justice system. The program produces annual compendiums, special reports and trend data relating to Federal justice statistics, sentencing and criminal case processing and Federal offenses and offenders. In Fiscal Year 1992, several efforts will be undertaken under the Information Policy Program, giving attention to privacy and security issues in data series, particularly criminal histories and other data bases where access is a critical issue. A curriculum will be developed and training provided in Criminal History Record Improvement (CHRI) auditing and a second comprehensive survey of the CHRI systems will be undertaken. A study will be conducted on issues associated with the merging of juvenile and adult criminal history records. Additional applications will be solicited to implement new activities in this continuation program in Fiscal Year 1992.

International Statistics

$100,000

In its effort to make international criminal justice statistics more accessible within the United States, the International Statistics Program will continue to support a number of activities in Fiscal Year 1992. Foreign universities and research centers are encouraged to supply data tapes of crime statistics and criminal justice studies that have been conducted in other countries to the Criminal Justice Archive at the University of Michigan. A program which collects annual statistical reports on crime and justice from statistical agencies in other countries will be maintained through the National Criminal Justice Reference Service. Translation of selected reports from nonEnglish-speaking countries and dissemination of these data to American scholars and researchers is also accomplished through the National Criminal Justice Reference Service. BJS also provides financial assistance to the United Nations Criminal Justice Information Network which fosters easy communication among criminal justice professionals and dissemination of

VOL
56
ISS
248
DE
26
1991
UMI

criminal justice information and research findings around the world. BJS will assist the Department in providing relevant international statistics associated with topics of priority to the Department. Additional applications will be solicited to implement new activities in this continuation program in Fiscal Year 1992.

Publication and Dissemination

$1,895,000

BJS reports its statistical findings in a variety of publications, including bulletins, special reports, national updates, tomes, user guides and press releases. BJS sends reports to persons on one of 11 subject-oriented mailing lists to get new reports on specific data series. A variety of mechanisms and institutions are used by BJS to disseminate and promote utilization of data. Reports are distributed by two clearinghouses: the Justice Statistics Clearinghouse and the Drugs and Crime Data Center and Clearinghouse, through the National Criminal Justice Reference Service (NCJRS). In addition, the University of Michigan's Inter-University Consortium for Political and Social Research is the repository for and provides access to the public-use data tapes created as a result of all of the BJS data collection activities, including those of the Bureau of the Census, the Federal Bureau of Investigation and all BJS and NIJ grantees. Finally, BJS also supports the National Clearinghouse for Criminal Justice Information Systems (CJIS) which operates an automated index of more than 1,000 criminal justice information systems maintained by State and local governments throughout the Nation. As part of this program, the CJIS Clearinghouse operates an electronic bulletin board which promotes and facilitates the exchange of information among justice agencies and practitioners. The bulletin board features an electronic mail system, a variety of publications to read on-line or by downloading and the ability to exchange software between users. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

National Institute of Justice (NIJ)

$12,303,092

New Programs

Research and Development in Forensic Sciences and Criminal Justice Technology

$200,000

This science and technology program supports development of new methods, techniques and systems for improving criminal investigation. NIJ is considering a consolidation of the various DNA testing efforts underway nationally to produce reliable statistical and effective laboratory procedures as well as a national assessment of fingerprint technologies. Multiple awards may be made and solicitations will be issued, as appropriate.

State and Local Technical Assistance

$500,000

This program will provide assistance to State and local governments for implementing new and innovative approaches to crime control and criminal justice. The technical support will transfer and apply NIJ research findings and programs to the field. The methods of procurement in Fiscal Year 1992 will be determined.

"Research Focus" Series

$150,000

NIJ is developing a new research publication series which is designed to place current NIJ-sponsored research on critical policy issues in the hands of criminal justice officials. This national publication will highlight current and prior NIJ research on issues of importance to State and local governments. The primary audience for this series is criminal justice officials, agency administrators and policymakers at the State and local level. Each issue will be devoted to a single substantive topic, such as boot camps, intermediate sanctions, child abuse or gang violence and will be composed of six to eight individual articles describing NIJ research, relevant policy issues and current practice. Issues may be structured differently depending on the topic. The product will be highly readable with a focus on the substantive topic as it relates to criminal justice decisionmaking and current policy issues. Services are provided by a current contractor; no applications will be solicited in Fiscal Year 1992.

Continuation Programs

Research and Development in Forensic Sciences and Criminal Justice Technology

$350,000

NIJ plans to support continuation studies in Forensic Science. In Fiscal Year 1991, NIJ funded projects related to DNA profiling, fingerprints and other forensic science technology research. In Fiscal Year 1992, NIJ will continue its efforts to provide the criminal justice field with the latest forensic science and technological information and products. This includes projects that result in a sourcebook for serology (including DNA), fingerprinting and trace evidence and DNA testing. Methods of procurement will be determined and solicitations issued, as appropriate.

NIJ Technology Assessment Program

$938,000

The Technology Assessment Program Information Center operated by NIJ disseminates information to Federal, State and local law enforcement officials on the reliability and effectiveness of criminal justice equipment and products. Services are being provided by a current grantee; no new applications will be solicited in Fiscal Year 1992.

National Criminal Justice Reference Service (NCJRS)

$3,600,000

NCJRS serves as a clearinghouse by maintaining a criminal justice library of over 100,000 documents and an electronic data base which allows reference specialists to locate information quickly for use by law enforcement agencies, policymakers, criminal justice professionals and the research community. During Fiscal Year 1992, particular emphasis will be placed on OJP priorities. For example, publications regarding gangs and violence will be disseminated throughout the criminal justice community via announcements in NIJ Reports, through the NCJRS Electronic Bulletin Board and through conference support activities. This strategy ensures dissemination to all major criminal justice agencies and organizations. Fiscal Year 1992 is the second year of a 4-year contract period. No applications will be solicited in Fiscal Year 1992.

NIJ Research Support Services

$1,000,000

The services provided under this contract fall into three areas: peer review, logistical and technical support, and consultant support. This contract provides for many of the essential research support and administration functions that are integral to NIJ's programs. This contract also may support a possible follow-up meeting of the Chemical Action Task Force in Fiscal Year 1992 which NIJ would coordinate with the Criminal Division of the Department of Justice. Methods of procurement will be determined, as appropriate.

NIJ Data Resources Program

$300,000

The purpose of the Data Resources Program is to facilitate production of fully documented, machine-readable criminal justice research data sets produced under NIJ grant awards. These data sets are made available for subsequent analysis through a public data archive. This program obtains machine-readable data, code-books, and other documentation as they are delivered to NIJ. These items are reviewed for accuracy, completeness and clarity. Of particular interest are those data related to NIJ's evaluation efforts. In addition, the Data Resources Program promotes access to and use of these data. Fiscal Year 1992 is the third year of a 3-year contract. A new contract may be competed in Fiscal Year 1992.

National Assessment Program

$170,000

The National Assessment Program (NAP) supports a triennial national survey of criminal justice policymakers and practitioners to ensure that their needs and priorities are included in the NIJ's research and development agenda. The NAP survey also serves as a means to identify emerging areas of concern in the field and helps inform those in criminal justice about issues of concern to their colleagues nationwide. A new contract may be offered for competition in Fiscal Year 1992.

Less-than-Lethal Weapons Program

$3,585,692

A major research priority will be to continue the development and testing of less-than-lethal weaponry for use in the criminal justice system. NIJ is developing and evaluating less-than-lethal weaponry systems for use by patrol officers. Continued evolution of this research program will be based on an ongoing assessment of the needs of law enforcement in light of emerging technological advances. Multiple awards may be made in Fiscal Year 1992.

Administration of Justice Seminars

$10,000

NIJ will continue to sponsor seminars on the Administration of Justice in Fiscal Year 1992. Seminars provide for the exchange of information, ideas and differing perspectives among the three branches of government on key issues and concerns in the effective operation of the judicial system. In addition, they provide a vehicle for the dissemination of research results to key policymakers and identify critical areas for further research. Services are provided by a current grantee; no applications will be solicited in Fiscal Year 1992.

NIJ Research Applications Program

$600,000

The Research Applications Contract supports applied research projects, summaries of major studies, and syntheses of studies in identified topic areas. The program also develops reports, publications and program development products to convey useful research-based information to criminal justice policymakers and professional audiences. A number of projects underway and proposed for Fiscal Year 1992 specifically address the Office of Justice Programs' initiatives on Gangs and Violence, Prosecution, Drug Prevention and Victims. Services are provided by a current contractor. However, applications for the Fiscal Year 1993 procurement may be accepted in Fiscal Year 1992.

NIJ Professional Conference Series

$500,000

The Professional Conference Series sponsors meetings, workshops and national conferences to provide information and research findings on criminal justice issues to State and local officials, to serve as a forum for discussions with criminal justice professionals on their needs and priorities and to develop and refine research agendas. Plans for Fiscal Year 1992 include the delivery of regional training workshops on evaluating criminal justice programs. Focus groups will be convened to identify the concerns of law enforcement and corrections professionals and to provide feedback on and support for programs in community policing, law enforcement technology and drug testing. As proposed in Fiscal Year 1991, NIJ will continue to sponsor regional conferences on intermediate sanctions. Fiscal Year 1992 is the second year of a 3-year contract period. Applications will not be solicited in Fiscal Year 1992.

Fellowship Programs

$400,000

NIJ's Fellowship Program will support work on topics of high priority to the Attorney General, OJP and NIJ. The program includes graduate fellowships and grants to researchers and practitioners for research in criminal justice. This program also includes grants to Historically Black Colleges and Universities. Multiple awards will be made under this program. Methods of application will be determined and solicitations issued, as appropriate.

Office of Juvenile Justice and Delinquency Prevention (OJJDP)

$4,375,298

New Programs

Telecommunications Technology for Training and Information Dissemination

$100,000

The purpose of this program is to take advantage of the newly developed technology of satellite communications by examining the feasibility of using this medium for the training and dissemination activities of OJJDP. Funds under this program would support a feasibility study to determine (1) what programs currently being implemented by OJJDP would best lend themselves to satellite technology, (2) what modes of the technology (i.e., teleconferencing, closed circuit satellite television, etc.) would best suit the needs of our target audiences and the Federal, State and local governments, and (3) what cost benefits the agency could realize through application of satellite communications. Additionally, the program would fund one pilot project as a demonstration effort to gather additional information on implementation issues, reaction of the field, and assessment of the medium for training and dissemination activities of OJJDP. Application will be solicited competitively.

Continuation Programs

National Juvenile Court Data Archive

$611,998

This program collects, processes, analyzes, and disseminates available data concerning the Nation's juvenile courts. The Archive collects automated data and published reports from juvenile courts throughout the Nation. Using the automated data, the Archive produces comprehensive reports on the activities of the juvenile courts. These reports examine resources expended, referral, offenses, intake, and disposition. These

VOL 56 ISS 248 DE 26 1991 UMI

reports also examine specialized topics such as minorities in juvenile courts, gang-related offenses, or specific offense categories. The Archive also provides direct assistance to jurisdictions in analyzing their juvenile court data, yielding better case flow management and more effective allocation of resources. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Juvenile Justice Data Resources

$55,000

This is an interagency agreement between OJJDP and the University of Michigan. This program addresses the need to enhance the availability of juvenile justice data sets and to improve OJJDP's analytic capability. In order to make the data more widely available, this project assures that data are understandable and accurate, or "clean." This project also ensures that the data are fully documented to be of use to researchers and others. OJJDP will conduct cross analyses of data sets to add to the knowledge and understanding necessary for improved policy decisions. Improved computer capabilities will give OJJDP access to past data sets thus permitting the study of trends.

Research Program on Juveniles Taken Into Custody

$450,000

This continuing statistical program produces an annual report to OJJDP and the Congress containing a detailed summary and analysis of the most recent data available regarding the numbers and characteristics of juveniles taken into custody. A major objective of this program is to develop individual-based data collection systems that are more responsive to the statutory requirements and the needs of the field. There are two projects under this program: one with the U.S. Census Bureau and the other with the National Council on Crime and Delinquency (NCCD). NCCD's role in this program is to refine the data collection design and procedures; develop, in concert with the Census Bureau, technical assistance and training materials; continue the feasibility testing; and analyze juvenile corrections data and prepare reports. No additional application will be solicited in Fiscal Year 1992.

Juveniles Taken Into Custody

$150,000

This is an interagency agreement with the U.S. Bureau of the Census in which OJJDP is providing all of the funds. The Juveniles Taken into Custody (JTIC) program is conducted in collaboration with the National Council on Crime and Delinquency (NCCD). The Census Bureau contributes to the refinement of the program design, provides training and technical assistance and is responsible for all aspects of data collection and processing. Automated data tapes containing detailed, case-level data on juveniles admitted to and released from State juvenile correctional custody during a given year are submitted to the Census Bureau for processing. The data are analyzed by NCCD.

Children in Custody Census

$300,000

This is a collaborative interagency program between the Bureau of the Census and OJJDP in which OJJDP is providing all or a major portion of the funds. This biennial census of public and private juvenile detention and correctional facilities is conducted by the Census Bureau to describe the subject facilities in terms of their resident populations as well as their programs and physical characteristics. This program will be implemented under the existing interagency agreement. No additional applications will be solicited in Fiscal Year 1992.

Juvenile Justice Statistics and Systems Development

$550,000

The purpose of this program is to improve national and sub-national (State and local) statistics on juvenile justice as well as decision-making and management information systems (MIS) within the juvenile justice system. The project is divided into two tracks, the National Statistics Track (NST) and Systems Development Track (SDT). The NST is helping to formulate a comprehensive National Juvenile Justice Statistics program which will include a series of regular reports on the extent and nature of juvenile offenses and victimization and the justice system's response. A major product will be a Report to the Nation on Juvenile Crime and Victimization. The SDT will assess juvenile justice agencies' decision-making, needs and capabilities to generate and use information; develop models for decision-making and related MIS; and develop and provide training and technical assistance to promote the adoption of model systems in test sites. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Study to Evaluate Conditions in Juvenile Detention and Correctional Facilities

$250,000

This national study of conditions of confinement in juvenile facilities will give facility administrators, agency directors, state policymakers and the Congress a systematic overview of the field. The study has involved a review and assessment of secure juvenile detention centers, reception and diagnostic centers, training schools, farms, ranches, and camps operated by public and private agencies in all 50 states. State and local officials will be able to use the information from the study to refine their programs, services, facilities and policies and to provide better information on conditions of confinement and quality of life linked to overcrowding. A major product of this study will be a summary of the results and a report to the Congress on the conditions existing within juvenile detention and correctional facilities, including recommendations for the improvement of those conditions as needed. This program will be implemented by the current grantee. No additional applications will be solicited in Fiscal Year 1992.

Juvenile Justice Clearinghouse

$780,301

The Clearinghouse provides support services to OJJDP in preparing the Office's publications; collecting, synthesizing, and disseminating information on all aspects of juvenile delinquency; and preparing specialized responses to information requests from the juvenile justice field. A toll-free number is maintained for information requests. This program will be implemented by the current contractor. No additional applications will be solicited in Fiscal Year 1992.

National Coalition of State Juvenile Justice Advisory Groups

$500,000 [1]

The National Coalition of State Juvenile Justice Advisory Groups was established in 1983 as an organization that would support and facilitate the purposes and functions of state juvenile justice and delinquency prevention groups. In 1984 Congress also required the National Coalition to prepare and submit an Annual Report to the President, the Congress, and the OJJDP Administrator which reviews Federal policies regarding juvenile justice and delinquency prevention. The Coalition is also authorized to disseminate information, data, standards, and advanced techniques. Applications will not be solicited competitively.

OJJDP Technical Assistance Support Contract

$628,000

The purpose of this project is to provide technical assistance and support to OJJDP, the National Institute for Juvenile Justice and Delinquency Prevention, OJJDP grantees, and the Coordinating Council on Juvenile Justice and Delinquency Prevention on all research, program development, evaluation, training, and research activities. This program will be implemented by the current contractor. No additional applications will be solicited in Fiscal Year 1992.

Walter W. Barbee,

Acting General Counsel, Office of Justice Programs.

[FR Doc. 91-30580 Filed 12-24-91; 8:45 am]

BILLING CODE 4410-18-M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: Office of Records Administration National Archives and Records Administration.

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Records schedules identify records of sufficient value to warrant preservation in the National Archives of the United States. Schedules also authorize agencies after a specified period to dispose of records lacking administrative, legal, research, or other value. Notice is published for records schedules that (1) propose the destruction of records not previously authorized for disposal, or (2) reduce the retention period for records already authorized for disposal. NARA invites public comments on such schedules, as required by 44 USC 3303a(a).

DATES: Request for copies must be received in writing on or before February 10, 1992. Once the appraisal of the records is completed , NARA will send a copy of the schedule. The requester will be given 30 days to submit comments.

ADDRESSES: Address requests for single copies of schedules identified in this notice to the Records Appraisal and Disposition Division (NIR), National Archives and Records Administration, Washington, DC 20408. Requesters must cite the control number assigned to each schedule when requesting a copy. The control number appears in the parentheses immediately after the name of the requesting agency.

SUPPLEMENTARY INFORMATION: Each year U.S. Government agencies create billions of records on paper, film, magnetic tape, and other media. In order to control this accumulation, agency records managers prepare records schedules specifying when the agency no longer needs the records and what happens to the records after this period. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. These comprehensive schedules provide for the eventual transfer to the National Archives of historically valuable records and authorize the disposal of all other records. Most schedules, however, cover records of only one office or program or a few series of records, and many are updates or previously approved schedules. Such schedules also may include records that are designated for permanent retention.

Destruction of records requires the approval of the Archivist of the United States. This approval is granted after a thorough study of the records that takes into account their administrative use by the agency of origin, the rights and interests of the Government and of private persons directly affected by the Government's activities, and historical or other value.

This public notice identifies the Federal agencies and their subdivisions requesting disposition authority, includes the control number assigned to each schedule, and briefly describes the records proposed for disposal. The records schedule contains additional information about the record and their disposition. Further information about the disposition process will be furnished to each requester.

Schedules Pending

1. Department of Health and Human Services, Centers for Disease Control (N1-442-90-5). Records relating to the Agent Orange Project.

2. Department of Health and Human Services, Centers for Disease Control (N1-442-91-6). Records relating to the distribution of swine flu vaccine and compensation for side-effects.

3. Department of Health and Human Services, Public Health Service (N1-90-91-2). Audiovisual records of the Office of Assistant Secretary for Health.

4. Department of State, Bureau of Intelligence and Research (N1-59-91-34). Routine and facilitative records.

5. Department of the Treasury, United States Secret Service (N1-87-89-2). Revisions to comprehensive schedule for field office investigative records.

6. Department of the Treasury, United States Secret Service (N1-87-91-2). Litigation case files.

7. Federal Emergency Management Agency (N1-311-92-2). Records relating to the proposed National Emergency Training Center in Carson City, NV.

8. General Accounting Office (N1-411-92-1). Financial disclosure statements.

9. General Services Administration (N1-234-92-1). Administrative records of the Price Adjustment Board, Reconstruction Finance Corporation.

10. National Archives and Records Administration (N1-GRS-92-3). Records relating to Equal Employment Opportunity complaints that do not develop into official cases.

11. National Archives and Records Administration (N2-34-91-1). Administrative and fiscal records, 1933-75, accessioned from the Federal Deposit Insurance Corporation.

12. National Endowment for the Arts (N1-288-92-1). Grant case files.

Dated: December 19, 1991.

Don W. Wilson,

Archivist of the United States.

BILLING CODE 7515-01-M

NATIONAL COMMISSION ON ACQUIRED IMMUNE DEFICIENCY SYNDROME

Meeting

AGENCY: National Commission on Acquired Immune Deficiency Syndrome.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92-463 as amended, the National Commission on Acquired Immune Deficiency Syndrome announces a forthcoming meeting of the Commission.

DATE AND TIME: Tuesday, January 14, 1992; 8:30 a.m. to 5:30 p.m.

PLACE: Pan American Health Organization, 525 23rd Street, NW., Washington, DC 20037.

TYPE OF MEETING: Open.

FOR FURTHER INFORMATION CONTACT: Roy Widdus, Ph.D., Executive Director, The National Commission on Acquired Immune Deficiency Syndrome, 1730 K Street NW., suite 815, Washington, DC 20006, (202) 254-5125. Records shall be

VOL 56 ISS 248 DE 26 1991 UMI

kept of all Commission proceedings and shall be available for public inspection at this address.

AGENDA: The agenda for the Commission meeting includes a discussion of the future of the Human Immunodeficiency Virus (HIV) epidemic as well as Commission business. Inquiries regarding the agenda should be addressed to the Commission. Written comments on this issue are welcome from interested individuals or organizations.

Interpreting services are available for deaf people. Please call our TDD number (202) 254–3816 to request services no later than January 8, 1992.

Dated: December 19, 1991.

Roy Widdus,

Executive Director.

BILLING CODE 6820–CN–M

NATIONAL COMMISSION ON AMERICAN INDIAN, ALASKA NATIVE, AND NATIVE HAWAIIAN HOUSING

Meeting

AGENCY: The National Commission on American Indian, Alaska Native, and Native Hawaiian Housing.

ACTION: Notice of public hearings and meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Commission on American Indian, Alaska Native, and Native Hawaiian Housing announces the forthcoming public hearings and meeting of the Commission.

DATES: January 7 & 8, 1992, 9 a.m. to 5 p.m.

ADDRESSES: Hotel Denver Downtown, 1450 Glenarm Place, Denver, Colorado 80202, (303) 573–1450.

FOR FURTHER INFORMATION CONTACT: Lois V. Toliver, Administrative Officer, (202) 275–0045.

Type of Meeting: Open.

Agenda: Call to Order, Roll Call, Chairman's Message, Introduction of Commissioners and Guests, Presentations from Invited Guests.

Lois V. Toliver,

Administrative Officer.

[FR Doc. 91–30774 Filed 12–24–91; 8:45 am]

BILLING CODE 6820–97–M

NATIONAL COMMUNICATIONS SYSTEM

Federal Telecommunication Standards

AGENCY: Office of Technology and Standards, National Communications System.

ACTION: Notice for comment on proposed standard.

SUMMARY: The purpose of this notice is to solicit the views of Federal agencies, industry, the public, and State and local governments on proposed Federal Telecommunications Standard 1046; "Telecommunications: High Frequency Radio Automatic Networking."

DATES: Comments are due on or before March 26, 1992.

ADDRESSES: Send comments to the National Communications System, Office of Technology and Standards, Attn: NT, 701 South Court House Road, Arlington, VA 22204–2199.

FOR FURTHER INFORMATION CONTACT: Institute for Telecommunications Sciences, National Telecommunications and Information Administration, Mr. Robert T. Adair, telephone (303) 497–3723, or Mr. David F. Peach, telephone (303) 497–5309.

SUPPLEMENTARY INFORMATION:

1. The General Services Administration (GSA) is responsible under the provisions of the Federal Property and Administrative Services Act of 1949, as amended, for the Federal Standardization Program. On August 14, 1972, the Administrator of General Services designated the National Communications System (NCS) as the responsible agent for the development of Federal telecommunication standards for NCS interoperability and the computer communication interface.

2. Prior to the adoption of proposed Federal standards, it is important that proper consideration be given to the needs and views of Federal agencies, industry, the public, and State and local governments.

3. Requests for copies of the November 14, 1991 draft proposed FED–STD–1046, should be directed to the National Communications System, Office of Technology and Standards, Attn: NT, 701 South Court House Road, Arlington, VA 22204–2199.

Dennis Bodson,

Assistant Manager, NCS Office of Technology and Standards.

Beverly Sampson,

Federal Register Liaison Officer.

BILLING CODE 3610–05–M

Federal Telecommunication Standards

AGENCY: National Communications System, Office of Technology and Standards.

ACTION: Notice for comment on proposed standard.

SUMMARY: The purpose of this notice is to solicit the views of Federal agencies, industry, the public, and State and local governments on proposed Federal Telecommunications Standard 1045A; "Telecommunications: High Frequency Radio Automatic Link Establishment."

DATES: Comments are due on or before March 26, 1992.

ADDRESSES: Send comments to the National Communications System, Office of Technology and Standards, Attn: NT, 701 South Court House Road, Arlington, VA 22204–2199.

FOR FURTHER INFORMATION CONTACT: Institute for Telecommunication Sciences, National Telecommunications and Information Administration, Mr. Robert T. Adair, telephone (303) 497–3723, or Mr. David F. Peach, telephone (303) 497–5309.

SUPPLEMENTARY INFORMATION:

1. The General Services Administration (GSA) is responsible under the provisions of the Federal Property and Administrative Services Act of 1949, as amended, for the Federal Standardization Program. On August 14, 1972, the Administrator of General Services designated the National Communications System (NCS) as the responsible agent for the development of Federal telecommunication standards for NCS interoperability and the computer communication interface.

2. Prior to the adoption of proposed Federal standards, it is important that proper consideration be given to the needs and views of Federal agencies, industry, the public, and State and local governments.

3. Requests for copies of the November 14, 1991 draft proposed FED–STD–1045A, should be directed to the National Communications System, Office of Technology and Standards, Attn: NT, 701 South Court House Road, Arlington, VA 22204–2199.

Dennis Bodson,

Assistant Manager, NCS Office of Technology and Standards.

Beverly Sampson,

Federal Register Liaison Officer.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Challenge/Advancement Advisory Panel (Advancement Literature Section); Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Challenge/Advancement Advisory Panel (Advancement Literature Section) to the National Council on the Arts will be held on January 16, 1992 from 9 a.m.–5 p.m. in room M–07 at the Nancy Hanks Center, 110 Pennsylvania Avenue, NW., Washington, DC 20506.

A portion of this meeting will be open to the public from 9 a.m.–9:30 a.m. The topic will be introductory remarks.

The remaining portion of this meeting from 9:30 a.m.–5 p.m. is for the purpose of application review on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman of November 20, 1991, this session will be closed to the public pursuant to subsection (c)(4), (6) and (9)(B) of section 552b of Title 5, United States Code.

Any person may observe meetings, or portions thereof, of advisory panels which are open to the public, and may be permitted to participate in the panel's discussions at the discretion of the panel chairman and with the approval of the full-time Federal employee in attendance.

If you need special accommodations due to a disability, please contact the Office of Special Constituencies, National Endowment for the Arts, 1100 Pennsylvania Avenue, NW., Washington, DC 20506, 202/682–5532, TTY 202/682–5496, at least seven (7) days prior to the meeting.

Further information with reference to this meeting can be obtained from Ms. Yvonne M. Sabine, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

Dated: December 19, 1991.

Yvonne M. Sabine,

Director, Council and Panel Operations, National Endowment for the Arts.

NATIONAL SCIENCE FOUNDATION

Collection of Information Submitted for OMB Review

In accordance with the Paperwork Reduction Act and OMB Guidelines, the National Science Foundation is posting two notices of information collections that will affect the public. Interested persons are invited to submit comments by January 17, 1991. Comments may be submitted to:

(A) *Agency Clearance Officer.* Herman G. Fleming, Division of Personnel and Management, National Science Foundation, Washington, DC 20550, or by telephone (202) 357-7335, and to:

(B) *OMB Desk Officer.* Office of Information and Regulatory Affairs, ATTN: Dan Chenok, Desk Officer, OMB, 722 Jackson Place, room 3208, NEOB, Washington, DC 20503.

Title: Visiting Professorships for Women Program Evaluation.

Affected Public: Individuals.

Respondents/Burden Hours: 600 respondents/40 minutes each response.

Abstract: The survey is needed to assess the impact of the Visiting Professorships for Women program, a program that provides funding on a competitive basis for women scientists and engineers to undertake advanced research at host institutions. Information obtained from this study will be used for program planning within the Directorate for Education and Human Resources.

Dated: December 19, 1991.

Continental Dynamics Proposal Review Panel; Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting:

Name: Continental Dynamics Proposal Review Panel.

Date and Time: January 30-31, 1992; 9 a.m.–5 p.m.

Place: National Science Foundation, 1800 G Street, NW., room 1243, Washington, DC 20550.

Type of Meeting: Closed.

Contact Person: Dr. Leonard E. Johnson, Program Director, Continental Dynamics Program, National Science Foundation, room 602, Washington, DC 20550. Telephone: (202) 357-7721.

Purpose of Meeting: To provide advice and recommendations concerning applications submitted to NSF for financial support.

Agenda: Review and evaluate proposals for the Continental Dynamics Program.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions 4 and 6 of 5 U.S.C. 552b. (c) (4) and (6) the Government in the Sunshine Act.

Dated: December 17, 1991.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–219]

GPU Nuclear Corp.; and Jersey Central Power & Light Co., Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR–16 issued to GPU Nuclear Corporation, et al. (the licensee), for operation of the Oyster Creek Nuclear Generating Station, located in Ocean County, New Jersey.

Environmental Assessment

Identification of the Proposed Action

The proposed amendment would revise Technical Specification Sections 4.2.A and 4.2.C.1 to delete restriction that the refueling outage interval is not to exceed 20 months. This revision accommodates implementation of a 21-month operating cycle with a 3-month refueling outage. Specifically, it relates to the surveillance requirements for shutdown margin and measured scram time for the control rods.

The proposed amendment is in accordance with GPU Nuclear Corporation's application dated August 19, 1991 as revised August 29, 1991.

Need for the Proposed Action

The proposed change to the Facility Operating License is needed so that surveillance requirements for shutdown margin and measured scram time of control rods is extended to accommodate a 21-month operating cycle with a 3-month outage or a 24-month plant refueling cycle.

Environmental Impacts of the Proposed Action

The Commission has completed its evaluation of the proposed revision to Technical Specification Section 4-2 "Reactivity Control." The proposed revision would accommodate implementation of a 21-month operating cycle with a 3-month outage or a 24-month plant refueling cycle for the Oyster Creek surveillance requirements for shutdown margin and measured scram time of control rods. The surveillance interval is presently 20 months.

Based on its review, the Commission concludes that the proposed change is acceptable. The staff has determined that the proposed change does not alter any initial conditions assumed for the design basis accidents previously evaluated nor change operation of safety systems utilized to mitigate the design basis accidents.

The proposed change does not increase the probability or consequences of accidents. No changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable individual or cumulative occupational radiation exposure. Accordingly, the Commission concludes that proposed action would result in no significant radiological environmental impact.

With regard to potential nonradiological impacts, the proposed change to the License involves one component in the plant which is located within the restricted area as defined in 10 CFR part 20. It does not affect nonradiological plant effluents and has no other environmental impacts. Therefore, the Commission concludes that there are no significant nonradiological environmental impacts associated with the proposed amendment.

Alternatives to the Proposed Action

Since the Commission concluded that there are no significant environmental effects that would result from the proposed actions, any alternatives with equal or greater environmental impacts need not be evaluated.

Alternative Use of Resources

The action would involve no use of resources not previously considered in the Final Environmental Statement (FES) for the Oyster Creek Nuclear Generating Station dated December 1974.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or persons.

Finding of No Significant Impact

Based upon the foregoing environmental assessment, the staff concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the staff has determined not to prepare an environmental impact statement for the proposed amendment.

For further details with respect to this action, see the application for amendment dated August 19, 1991, as revised August 29, 1991, which is available for public inspection in the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, 20555 and the local public document room located at the Ocean County Library, Reference Department, 101 Washington Street, Toms River, New Jersey 08753.

Dated at Rockville, Maryland this 17th day of December 1991.

For the Nuclear Regulatory Commission.

John F. Stolz,

Director, Project Directorate I–4, Division of Reactor Project—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 91–30830 Filed 12–24–91; 8:45 am]

BILLING CODE 7590-01-M

Biweekly Notice Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (P.L.) 97-415, the Nuclear Regulatory Commission (the Commission) is publishing this regular biweekly notice. P.L. 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This biweekly notice includes all notices of amendments issued, or proposed to be issued from December 2, 1991 through December 13, 1991. The last biweekly notice was published on December 11, 1991 (56 FR 64649).

Notice of Consideration of Issuance of Amendment To Facility Operating License And Proposed No Significant Hazards Consideration Determination And Opportunity For Hearing

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this Federal Register notice. Written comments may also be delivered to Room P-223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By January 27, 1992, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room for the particular facility involved. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish in the Federal Register a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission,

VOL

1991
UMI

Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to **(Project Director)**: petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room for the particular facility involved.

Alabama Power Company, Docket Nos. 50-348 and 50-364, Joseph M. Farley Nuclear Plant, Units 1 and 2, Houston County, Alabama

Date of amendments request: July 15, 1991, as supplemented September 10, 1991

Description of amendments request: The proposed amendments would revise numerous sections of the Technical Specifications (TS) to provide for (1) the planned changeover of fuel type from the current Westinghouse 17x17 low-parasitic (LOPAR) fuel assemblies to Westinghouse 17x17 VANTAGE-5 fuel assemblies, and (2) the removal and replacement of the existing Unit 2 resistance temperature detector (RTD) bypass manifold system with fast response RTDs located in the reactor coolant hot and cold leg piping. The proposed TS changes were justified on the basis of the specific design features of VANTAGE-5 fuel and RTD replacement, making use of improved computer code methodologies in the determination of gain in departure from nucleate boiling (DNB) margin and in safety and accident analyses. The RTD replacement for Unit 1 was previously approved on March 8, 1991 (56 FR 11788).

The proposed TS changes related to core safety limits, reactor trip system instrumentation setpoints and DNB parameters are contained in TS Section 2.1 (Safety Limits), TS Section 2.2 (Limiting Safety System Settings), TS 3/4.2 (Power Distribution Limits), TS 3/4.2.2 (Heat Flux Hot Channel Factor, F (sub script Q)(Z)), TS 3/4.2.3 (Nuclear Enthalpy Hot Channel Factor - F (super script N sub script delta H), TS 3/4.2.5 (DNB Parameters) and their associated Bases.

The changes to TS Bases 2.1.1 (Reactor Core, Safety Limits), 2.2.1 (Reactor Trip System Instrumentation Setpoints), 3/4.2 (Power Distribution Limits) and 3/4.4.1 (Reactor Coolant Loops and Coolant Circulation) pertain to the determination of DNB parameters, F (sub script Q)(Z) and F (super script N sub delta H), using the Westinghouse DNB correlations WRB-1 and WRB-2 (Westinghouse proprietary correlations).

The moderator temperature coefficient is increased by the revision to TS 3.1.1.3 (Moderator Temperature Coefficient). The allowable rod drop time is increased in the revised TS 3.1.3.4 (Rod Drop Time). The response time for Power Range, Neutron Flux, High Negative Rate in Table 3.3-2 (Reactor Trip System Instrumentation Response Times) is changed to "Not Applicable", since this function is not used as a primary protection function and is not taken credit for in any accident analysis. In the same Table 3.3-2, the allowable response time for overtemperature delta temperature (OT delta T) is increased to allow for the thermal resistance of the thermowells after the RTD replacement.

The allowable containment pressure high-high-high and high-high limits are decreased in Table 3.3-4 (Engineered Safety Factor (ESF) Actuation System Instrumentation Trip Setpoints) to account for the effects of uncertainties associated with plant instrumentation, procedures and measurement techniques. Also because of these uncertainties, the allowable limits for steam line isolation on high steam flow coincident with T (sub script avg) low-low were increased. The response time for the steam line isolation is changed to "Not Applicable" in Table 3.3-5 (ESF Response Times) because it is not used as a primary protection function and is not taken credit for in any accident analysis.

The revisions to TS 3.4.1.2 (Reactor Coolant System, Hot Standby) and Bases 3/4.4.1 (Reactor Coolant Lopps and Coolant Circulations) permit Mode 3 operation with two reactor coolant pumps running and their associated loops operable.

The proposed change to TS 6.9.1.11 (Administrative Controls, Radial Peaking Factor Limit Report) revises the reporting requirement to 30 days after cycle initial criticality.

For all of the proposed TS changes listed above, the licensee has considered the effects of the changes on the safety analyses.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration for each aspect of the changes associated with the use of VANTAGE-5 fuel and replacement of the RTD bypass manifold. The licensee's analysis is presented below:

A. Reactor Core Safety Limits, Reactor Trip System Instrumentation Setpoints, and DNB Parameters

1. The proposed safety limits, reactor trip setpoints, and DNB related parameters Technical Specifications changes do not increase the probability or consequences of an accident previously evaluated in the FSAR [Final Safety Analysis Report]. The core safety limits, trip setpoints, and DNB parameters were determined using [Nuclear Regulatory Commission] NRC-reviewed and approved DNB methodologies, namely RTDP [revised thermal design procedure] improved THINC-IV model [thermal-hydraulics computer code], and the WRB-1 and WRB-2 DNB correlations. No new performance requirements are being imposed on any system or component in order to support the revised DNBR [departure from nucleate boiling ratio] analysis assumptions. Overall plant integrity is not reduced. The DNB sensitive transients were reanalyzed. The DNB design criterion continues to be met. None of these changes directly initiate an accident; therefore, the probability of an accident has not increased. The acceptance criteria for the reanalyzed analyses with these revised DNB parameters continue to be met; therefore, the consequences of accidents previously evaluated in the FSAR are not significantly changed. All dose consequences have been evaluated for these changes and all acceptance limits continue to be met.

2. The proposed safety limits, reactor trip setpoints, and DNB-related parameters Technical Specifications changes do not create the possibility of a new or different kind of accident than any accident already evaluated in the FSAR. No new accident scenarios, failure mechanisms, or limiting single failures are introduced as a result of the proposed changes. The proposed Technical Specifications changes have no adverse effects on any safety-related system and do not challenge the performance or integrity of any safety-related system. The DNB design criterion continues to be met. Therefore, the possibility of a new or different kind of accident is not created.

3. The proposed Technical Specifications changes do not involve a significant reduction in a margin of safety. The change in the DNBR design limits are [sic] associated with the use of NRC-approved methodologies (RTDP and WRB-1 and WRB-2 DNB correlations) and the improved THINC-IV model. In addition, the VANTAGE-5 fuel design, including IFM (intermediate flow mixer) grids, uses the WRB-2 correlation and has been generically approved by the NRC. The DNB design criterion remains unchanged, even with the changes in DNBR design limit values. Therefore, the new DNBR design limit values associated with the DNB methodology and correlation changes, upon which the Technical Specifications changes are based, do not result in a significant reduction in the margin of safety because the DNB design criterion continues to be met.

B. Reactor Trip System Instrumentation Response Times

1. The deletion of response time for reactor trip on high negative flux rate does not significantly increase the probability or consequences of an accident previously evaluated in the FSAR. This function provides no primary protection for any transient in the FSAR. The power range high negative flux rate reactor trip is considered to be a diverse RPS [reactor protection system] feature. No new performance requirements are being imposed on any system or component. Consequently, overall plant integrity is not reduced. This change has no effect on any dose calculations. Therefore, the probability or consequences of an accident will not increase.

2. The reactor trip response time change to "Not Applicable" for high negative flux rate does not create the possibility of a new or different kind of accident from any previously evaluated in the FSAR. This response time is not an initiator for any transient. No new accident scenarios, failure mechanisms, or limiting single failures are introduced as a result of this modification. The response time change does not challenge or prevent the performance of any safety-related system during plant transients. Therefore, the possibility of a new or different kind of accident is not created.

3. This change does not involve a significant reduction in the margin of safety. All primary trip functions and ESF actuations are unaffected by the change in this response time. In addition, the other Technical Specification surveillance testing requirements (e.g., channel calibration) associated with the power range high negative flux rate reactor trip are not affected by this change. Therefore, the deletion of the response time does not affect the results of any accident analysis, and the margin of safety is maintained and not significantly reduced.

C. Increase in Shutdown and Control Rod Drop Time

1. The increase in rod drop time will not result in a significant increase in the probability or consequences of any accident previously evaluated in the FSAR, since the increased rod drop time has been accounted for in all accident analyses and the same surveillance requirements will be used to detect inoperable rods and increased rod drop times. The effects of increased rod drop time on all applicable analyses and dose calculations have been evaluated or analyzed, and all the acceptance limits continue to be met.

2. The possibility of a new or different type of accident is not involved because the increase in rod drop time used in the analyses and in the proposed Technical Specifications is consistent with the design of the VANTAGE-5 fuel and does not indicate any new or different failure mechanism.

3. The effects of the increased rod drop time have been included in all applicable analyses and evaluations of accidents and transients. These analyses demonstrated that the plant will remain within previously accepted limits; therefore, the increase in the allowable rod drop time does not result in a significant reduction in a margin of safety.

D. Increased Positive Moderator Temperature Coefficient (PMTC)

1. The proposed Technical Specifications changes with respect to increased moderator temperature coefficient do not involve a significant increase in the probability or consequences of an accident previously evaluated in the Farley FSAR. The mechanical design changes associated with VANTAGE-5 fuel result in the capability for relaxation of analytical input parameters, such that increased margin can be generated without violation of any acceptance criteria. This margin can then be applied towards relaxation of operational limits such as moderator temperature coefficient. In all cases, the appropriate design and acceptance criteria are met. No new performance requirements are being imposed on any system or component in order to support the revised analysis assumptions. Subsequently, overall plant integrity is not reduced. Therefore, the probability of an accident has not significantly increased.

The radiological consequences of an accident previously evaluated in the FSAR are not increased due to the proposed increase in PMTC. Evaluations have confirmed that the doses remain within previously approved acceptable limits, as well as those defined by 10 CFR [Part] 100. Therefore, the radiological consequences to the public resulting from any accident previously evaluated in the FSAR has not significantly increased.

2. The Technical Specifications changes with respect to increased moderator temperature coefficient do not create the possibility of a new or different kind of accident from any previously evaluated in the FSAR. No new accident scenarios, failure mechanism, or limiting single failures are introduced as a result of the fuel transition. Neither the presence of VANTAGE-5 fuel assemblies in the core nor the revised analytical assumptions, including increased PMTC, create new challenges to the performance of any safety-related system. Therefore, the possibility of a new or different kind of accident is not created.

3. The Technical Specifications related to PMTC changes do not involve a significant reduction in the margin of safety. The margin of safety for fuel-related parameters, including increased PMTC, associated with the VANTAGE-5 transition are defined in the Bases of the Technical Specifications. These Bases and the supporting Technical Specifications values are defined by the accident analyses which are performed to conservatively bound the operating conditions defined by the Technical Specifications and to demonstrate meeting the regulatory acceptance limits. Performance of analyses and evaluations for the VANTAGE-5 fuel transition with increased PMTC has confirmed that the operating envelope defined by the Technical Specifications will be bounded by the revised analytical basis, which in no case exceeds the acceptance limits. Therefore, the margin of safety provided by the analyses in accordance with these acceptance limits is maintained and is not significantly reduced.

E. Increased F (subscript Q), F (subscript delta H), and Modification of K(Z) Curve

1. The F (subscript delta H) and K(Z) (axially dependent multiplier) curve Technical Specifications changes do not involve a significant increase in the probability or consequences of an accident previously evaluated in the Farley FSAR. The mechanical design changes associated with VANTAGE-5 fuel and the improved methodologies result in the capability for relaxation of analytical input parameters, such that increased margin can be generated without violation of any acceptance criteria. This margin can then be applied towards relaxation of operational limits such as higher F (subscript Q) (Z) and F (subscript delta H) for the VANTAGE-5 assemblies. In each case, however, the appropriate design and acceptance criteria are met. No new performance requirements are being imposed on any system or component in order to support the revised analysis assumptions. Subsequently, overall plant integrity is not reduced. Furthermore, the parameter changes are associated with features used as limits or mitigators to assumed accident scenarios and are not accident initiators. Therefore, the probability of an accident has not significantly increased.

The radiological consequences of an accident previously evaluated in the FSAR are not increased due to these Technical Specifications changes. Evaluations have confirmed that the doses remain within previously approved acceptable limits as well as those defined by 10 CFR [Part] 100. Therefore, the radiological consequences to the public resulting from any accident previously evaluated in the FSAR have not significantly increased.

2. The F [subscript Q], F [subscript delta H], and K(Z) curve Technical Specifications changes do not create the possibility of a new or different kind of accident from any previously evaluated in the FSAR. No new accident scenarios, failure mechanisms, or limiting single failures are introduced as a result of the fuel transition. The presence of VANTAGE-5 fuel assemblies in the core or the revised analytical assumptions have no

VOL 56 ISS 248 DEC 26 1991 UMI

adverse effect and do not challenge the performance of any other safety-related system. Therefore, the possibility of a new or different kind of accident is not created.

3. The F [subscript Q], F [subscript delta H], and K(Z) curve Technical Specifications changes do not involve a significant reduction in the margin of safety. The margin of safety for fuel-related parameters associated with the VANTAGE-5 transition are defined in the bases to the Technical Specifications. These bases and the supporting Technical Specifications values are defined by the accident analyses which are performed to conservatively bound the operating conditions defined by the Technical Specifications and to demonstrate that the regulatory acceptance limits are met. Performance of analyses and evaluations for the proposed inclusion of separate F [subscript Q's] and F [subscript delta H's] for VANTAGE-5 and LOPAR [low parasitic] fuel types and modification of the K(Z) curve have confirmed that the operating envelope defined by the Technical Specifications continues to be bounded by the revised analytical basis, which in no case exceeds the acceptance limits. Therefore, the margin of safety provided by the analyses in accordance with these acceptance limits is maintained and is not significantly reduced.

F. Engineered Safety Features (ESF) Allowable Values

1. The ESF allowable value changes do not significantly increase the probability or consequences of an accident previously evaluated in the FSAR. These allowable values are not input parameters to any transient in the FSAR. No new performance requirements are being imposed on any system or component. Consequently, overall plant integrity is not reduced. These changes have no effect on any dose calculations. Therefore, the probability or consequences of an accident will not increase.

2. The ESF allowable value changes do not create the possibility of a new or different kind of accident from any previously evaluated in the FSAR. These values are not an initiator for any transient. No new accident scenarios, failure mechanisms, or limiting single failures are introduced as a result of these changes. The allowable value changes do not challenge or prevent the performance of any safety-related system during plant transients. Therefore, the possibility of a new or different kind of accident is not created.

3. These changes do not involve a significant reduction in the margin of safety. All trip setpoints associated with these changes have been preserved. Therefore, the small changes to the allowable values do not effect the results of any accident analysis. Therefore, the margin of safety is maintained and not significantly reduced.

G. Engineered Safety Features (ESF) Response Times

1. The ESF response time change for this steam line isolation function does not significantly increase the probability or consequences of an accident previously evaluated in the FSAR.

This function provides no primary protection for any transient in the FSAR. No new performance requirements are being imposed on any system or component. Consequently, overall plant integrity is not reduced and dose calculations are not affected. Therefore, the probability or consequences of an accident will not increase.

2. The ESF response time change to "Not Applicable" for the high steam flow in coincidence with low-low Tavg [average reactor coolant temperature] function does not create the possibility of a new or different kind of accident from any previously evaluated in the FSAR. This response time is not an initiator for any transient. No new accident scenarios, failure mechanisms, or limiting single failures are introduced as a result of this modification. The response time change does not challenge or prevent the performance of any safety-related system during plant transients. Therefore, the possibility of a new or different kind of accident is not created.

3. This change does not involve a significant reduction in the margin of safety. All primary reactor trip functions and ESF actuations are unaffected by the change in this ESF response time. In addition, the other Technical Specification surveillance testing requirements (e.g., periodic channel checks and calibrations) associated with high steam flow coincident with low-low Tavg are not affected by this change; therefore, performance of these surveillance tests will continue to demonstrate operability. Therefore, the change to the response time does not affect the results of any accident analysis, and the margin of safety is maintained and not significantly reduced.

H. Reactor Coolant Loops and Coolant Circulation (Mode 3)

1. The Technical Specifications change with respect to Mode 3 operation requiring only two RCPs [reactor coolant pumps] operable does not involve a significant increase in the probability or consequences of an accident previously evaluated in the Farley FSAR. Capability for relaxation of analytical input parameters has been demonstrated by acceptable analytical results without violation of any acceptance criteria. This can allow a reduction in the number of RCPs required for Mode 3. In all cases, the appropriate design and acceptance criteria are met. No new performance requirements are being imposed on any system or component in order to support the revised analysis assumptions. Subsequently, overall plant integrity is not reduced. Therefore, the probability of an accident has not significantly increased.

The radiological consequences of an accident previously evaluated in the FSAR are not increased due to this proposed Technical Specifications change. Evaluations have confirmed that the doses remain within previously approved, acceptable limits as well as those defined by 10 CFR [Part] 100. Therefore, the radiological consequences to the public resulting from any accident previously evaluated in the FSAR has not significantly increased.

2. The Technical Specifications changes [sic] with respect to requiring only two RCPs in Mode 3 does not create the possibility of a new or different kind of accident from any previously evaluated in the FSAR. No new accident scenarios, failure mechanism, or limiting single failures are introduced as a result of this change. No new challenges to safety systems have been identified because of this proposed change. Therefore, the possibility of a new or different kind of accident is not created.

3. The proposed Technical Specifications change related to requiring only two RCPs in Mode 3 does not involve a significant reduction in the margin of safety. The margin of safety associated with this change is defined in the bases to the Technical Specifications. These bases and the supporting Technical Specifications are defined by the accident analyses which are performed to conservatively bound the operating conditions defined by the Technical Specifications and to demonstrate meeting the regulatory acceptance limits. Performance of analyses and evaluations have confirmed that the operating envelope defined by the Technical Specifications continues to be bounded by the revised analytical basis, which in no case exceeds the acceptance limits. Therefore, the margin of safety provided by the analyses in accordance with these acceptance limits is maintained and is not significantly reduced.

I. Administrative Change for Radial Peaking Factor Limit Reporting

1. Since the reporting requirements are an administrative change, this change does not involve a significant increase in the probability or consequences of an accident previously evaluated in the Farley FSAR. With the exception of the reporting schedule, no other changes to the reporting requirements are made.

2. This administrative change in reporting requirements does not create the possibility of a new or different kind of accident from any previously evaluated in the Farley FSAR, since only the time for reporting requirements has changed. Therefore, the possibility of a new or different kind of accident is not created.

3. This administrative change is not safety-related and, therefore, does not involve any reduction in the margin of safety.

J. Farley, Unit 2, Resistance Temperature Detector (RTD) Bypass Removal

1. The use of fast response RTDs does not involve a significant increase in the probability or consequences of any accident previously evaluated. The non-LOCA and LOCA accidents were reviewed in WCAP-12814, Rev. 2, verifying that the variations in uncertainty associated with certain reactor trip functions were unacceptable. It is concluded that an increase in RCS [reactor coolant system] temperature uncertainty can be accommodated by margins in the safety analyses to acceptance criteria limits and allocation of generic DNB margin. Evaluation of the modification to the Reactor Coolant System boundary has also been performed, and no degradation in integrity is involved. In addition, the recent analyses and evaluations conducted to support the transition to VANTAGE-5 fuel at Farley were performed with a bounding set of plant operating parameter uncertainties that bound plant operation with or without the RTD bypass manifold temperature system. Therefore, the potential effects of RTD Bypass Elimination (RTDBE) on plant operation with VANTAGE-5 fuel have been considered and found not to involve a significant increase in the probability or consequences of any accident previously evaluated.

2. The use of fast response RTDs does not create the possibility of a new or different kind of accident from any accident previously evaluated. The three dual-element hot leg RTDs and one dual-element cold leg RTD will utilize the existing penetrations, whenever possible, into the RCS piping from the bypass system with only slight modifications. Caps and welds sealing the crossover leg bypass return nozzle and piping, as well as the modification and welding for the existing penetrations, will be qualified in accordance with the ASME code, thus precluding the possibility for a new or different kind of accident.

The function of the [delta] T/T [subscript avg] protection channels is not changed because of the bypass elimination. The newly installed fast response RTDs perform the same function in both T[subscript hot] [RCS hot leg temperature] and T [subscript cold] [RCS cold leg temperature] applications. The three T [subscript hot] signals are electronically averaged. Dual-element RTDs are installed in the hot and cold legs. Should one RTD element fail, the spare element can be connected. In addition, the average T [subscript hot] signal can be electronically biased to a two RTD average should one dual RTD fail. The measured temperature values will still serve as input to two-out-of-three voting logic for protection functions. The Median Signal Selector (MSS) will eliminate the potential for control and protection interactions with all [delta] T/T [subscript avg] applications. The basis for the instrumentation and control design meets the criteria of applicable IEEE [Institute of Electrical and Electronic Engineers] standards, regulatory guides, and general design criteria, in that such principals [sic] as electrical separation, seismic and environmental qualification, and single failure criteria are satisfied. Therefore, there is no possibility of a new or different kind of accident as a result of the instrumentation aspects of RTD Bypass Elimination.

3. The effect of RTD Bypass Elimination, response time, setpoint uncertainty, temperature, and flow measurement uncertainty does not involve a significant reduction in a margin of safety. These changes have been evaluated and compared to the acceptance limits with respect to the fuel, RCS pressure boundary, and containment. All acceptance limits continue to be met. The evaluation of the effect of these variables on non-LOCA and LOCA transients has verified that plant operation will be maintained within the bounds of safe, analyzed conditions as defined in the FSAR with the revised Technical Specifications, and the conclusions presented in the FSAR remain valid. As such, there is no significant reduction in the margin of safety for operation of J. M. Farley Nuclear Plant Unit 2 with RTD Bypass Elimination.

The NRC staff has reviewed the licensee's analysis; and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Houston-Love Memorial Library, 212 W. Burdeshaw Street, P. O. Box 1369, Dothan, Alabama 36302

Attorney for licensee: James H. Miller, III, Esq., Balch and Bingham, P. O. Box 306, 1710 Sixth Avenue North, Birmingham, Alabama 35201

NRC Project Director: Elinor G. Adensam

Baltimore Gas and Electric Company, Docket Nos. 50-317 and 50-318, Calvert Cliffs Nuclear Power Plant, Units Nos. 1 and 2, Calvert County, Maryland

Date of amendments request: November 27, 1991

Description of amendments request: The proposed amendments would revise Calvert Cliffs Units 1 and 2 Technical Specifications (TS) Section 3/4.6.1.2 and associated Bases to increase the surveillance intervals for Type B and C leak tests to up to 30 months to accommodate the 24-month fuel cycle currently in use. The proposed amendment would also reduce the maximum allowable combined leakage rate of Type B and C leak tests. In accordance with the guidance provided in Generic Letter 91-04, "Changes in Technical Specification Surveillance Intervals to accommodate a 24-month fuel cycle," the licensee has provided an analysis in support of the proposed changes. In addition, the proposed amendments would make an administrative revision to Section 3/4.6.1.2 and remove a note regarding a one-time extension which no longer applies.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) Would not involve a significant increase in the probability or consequences of an accident previously evaluated.

Neither containment penetrations, nor their leak rate testing processes, are considered as initiators for any accidents previously evaluated. Therefore, the probability of previously evaluated accidents would not be increased by this change to the operating license.

Since the containment leakage rate is a direct assumption of dose calculations for all design basis accidents, the requested change could potentially affect the consequences of previously evaluated accidents. However, the assumed maximum allowable leakage rate is not changed and must continue to be met. While the surveillance interval between leak rate testing of containment penetrations is increased, the margin between the specified allowable leakage and maximum allowable leakage is proportionately increased to provide an equivalent margin for increase of leakage during the surveillance interval Therefore, the consequences of previously evaluated accidents are not significantly affected by this change.

(2) Would not create the possibility of a new or different type of accident from any accident previously evaluated.

This change in surveillance intervals does not affect the design or function of any equipment, nor the operation of such equipment. Therefore, the proposed change does not create the possibility of a new or different type of accident from any accident previously evaluated.

(3) Would not involve a significant reduction in a margin of safety.

A significant margin, 0.40 L_a, is provided between the specified allowable containment penetration leakage rate limits and the maximum allowable leakage rate limit which is used as the assumed containment leakage rate in accident dose calculations. This change would increase this margin by 25 percent to match the 25 percent increase in the surveillance interval. Therefore, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendments request involves no significant hazards consideration.

NRC Project Director: Robert A. Capra

Carolina Power & Light Company, Docket No. 50-261, H. B. Robinson Steam Electric Plant, Unit No. 2, Darlington County, South Carolina

Date of amendment request: October 31, 1991

Description of amendment request: The proposed amendment request changes the required refueling shutdown margin accomplished with a required minimum boron concentration of 1950 ppm from 10 percent delta K/K to 8 percent delta K/K.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

VOL
56
ISS
248
DE
26
1991
UMI

1. Operation of the facility, in accordance with the proposed amendment, would not involve a significant increase in the probability or consequences of an accident previously analyzed.

Since the purpose for Shutdown Margin (SDM) during refueling is protection against accidental criticality, Inadvertent Boron Dilution during Refueling is the only Updated FSAR Chapter 15 event pertinent to the parameter being changed. Because changing the shutdown reactivity associated with the same boron concentration of 1950 ppm does not affect the boration/dilution equipment or procedures, the probability that an accidental dilution will occur cannot be affected.

The purpose of analysis of Inadvertent Boron Dilution in UFSAR Section 15.4.6 is to show that there is sufficient operator response time to avoid accidental criticality. In other words, the calculation is focused on preventing instead of withstanding an accidental criticality. The consequences of this event are not increasing because the accident analysis will continue to make an off-site dose calculation unnecessary.

2. Operation of the facility in accordance with the proposed amendment would not create the possibility of a new or different kind of accident from any accident previously evaluated because inadvertent criticality is the only relevant concern and:

- Changing the shutdown reactivity requirement associated with the boron concentration of 1950 ppm does not affect the boration/dilution equipment or procedures.
- Control rods are intentionally withdrawn from fuel assemblies during refueling only one at a time, and the reactivity "worth" of an individual RCCA will always be much less than 6 percent delta K/K.
- The requirement that the 1950 ppm be enough to keep the core subcritical with no control rods present is being retained.
- Six percent SDM is more than enough to cover any uncertainty in fuel assembly placement allowed by fuel shuffle procedures.

3. Operation of the facility, in accordance with the proposed amendment, would not involve a significant reduction in a margin of safety.

Since the only purpose for Shutdown Margin during refueling is protection against accidental criticality, Inadvertent Boron Dilution during refueling is the only pertinent FSAR Chapter 15 event. Although analysis in UFSAR does not explicitly mention initial refueling shutdown margin in terms of reactivity, this change can indirectly affect the analysis by allowing a higher refueling critical boron concentration. Since this represents a less restrictive constraint for the analysis at this mode, the estimated time to complete loss of all available shutdown margin (which in this case corresponds to criticality) for Refueling for future core loadings may be less, more closely approaching those of other modes (e.g., Cold Shutdown). In other words, because the acceptance criteria for Inadvertent Boron Dilution is defined in terms of the time available for the operator to terminate the dilution flow before the core goes critical, and because this change will allow the calculation of a shorter "time" for Refueling, the calculated margin to the NRC acceptance limit for this accident may be considered to decrease.

In considering "Time to Loss of Shutdown Margin" as a measure of the "margin of safety," the impact of reducing the required shutdown margin from 10 percent to 6 percent is not significant for several reasons:

(1) As noted, the minimum refueling boron concentration of 1950 ppm is not changing.

(2) Even in the unlikely case that the critical boron concentration increases to the new limit (i.e., 1950 ppm comes to correspond to 6 percent delta K/K), more than half of the original shutdown margin is retained. In rough terms, reducing the shutdown margin by 40 percent can be expected to result in a similar reduction in the calculated "Time to Loss of Shutdown Margin." The 68.4 minutes previously calculated for Cycle 14 for the refueling condition can be reduced considerably and still meet the 30-minute minimum allowable operator response time presented in our Cycle 10 SER as an acceptance criterion. Therefore, a 6 percent delta K/K is consistent with the acceptance limit for our present analysis of Inadvertent Boron Dilution for the refueling condition.

(3) In a practical sense, it is the "Time" estimation in UFSAR (rather than the extent of initial negative reactivity) that provides the assurance that the core will not achieve criticality in the unlikely event of accidental dilution. This more meaningful commitment in UFSAR Section 15.4.6 to maintain adequate operator response time is unchanged.

In summary, since this change will slightly reduce the extent to which the core is required to be subcritical during refueling, it does result in a small increase in the susceptibility to inadvertent criticality. However, maintaining the same acceptance criteria for analysis of Inadvertent Boron Dilution ensures that there is no significant reduction in the margin of safety with respect to this accident. Likewise, the proposed Refueling Shutdown Margin of 6 percent is more than adequate to accommodate the other credible reactivity challenges represented by movement of core components.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina 29535

Attorney for licensee: R. E. Jones, General Counsel, Carolina Power & Light Company, P. O. Box 1551, Raleigh, North Carolina 27602

NRC Project Director: Elinor G. Adensam

Detroit Edison Company, Docket No. 50-341, Fermi-2, Monroe County, Michigan

Date of amendment request: November 26, 1991

Description of amendment request: The proposed amendment relocates the existing procedural details of the current Radiological Effluent Technical Specifications (RETS) to the Offsite Dose Calculation Manual (ODCM), and procedural details for the solid radioactive wastes to the Process Control Program (PCP). The amendment also incorporates the respective programmatic controls in the Administrative Controls section of the TS.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated because relocating the Radiological Effluent Technical Specifications (RETS) to the Offsite Dose Calculation Manual (ODCM) or the Process Control Program (PCP) is strictly an administrative change that does not reduce or modify any existing safety requirement or procedures;

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated because no new accident scenario is created and no previously evaluated accident scenario is changed by re- locating procedural requirements from one controlled document to another; or

(3) Involve a significant reduction in a margin of safety because no modification of any plant structure, system, component or operating procedure is associated with this administrative change so all safety margins remain unchanged.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Monroe County Library System, 3700 South Custer Road, Monroe, Michigan 48161.

Attorney for licensee: John Flynn, Esq., Detroit Edison Company, 2000 Second Avenue, Detroit, Michigan 48226.

NRC Project Director: L. B. Marsh

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of amendment request: August 6, 1991

Description of amendment request: The proposed revisions would change the maximum allowable combined flowrates from both reactor makeup water pumps for Modes 3-5 with one or both trains of the Boron Dilution Mitigation System (BDMS) inoperable. The restriction to either isolate or limit the flowrate from both reactor makeup water pumps with one or both trains of the BDMS inoperable is being added to the Mode 6 BDMS Technical Specification. This request also includes administrative changes to the BDMS Technical Specifications (TS) for Modes 3-5 and Mode 6.

Catawba Units 1 and 2 are equipped with a BDMS which serves to detect uncontrolled dilution events in Modes 3-6 of plant operation. The BDMS uses two source range detectors to monitor the subcritical multiplication of the reactor core. An alarm setpoint is continually calculated. Once the alarm setpoint is exceeded, each train of the BDMS will automatically shut off both reactor makeup water pumps, align the suction of the charging pumps to highly borated water from the Refueling Water Storage Tank, and isolate flow to the charging pumps from the Volume Control Tank. Since these functions are automatically actuated by the BDMS, no operator action is necessary to terminate the dilution event and recover the shutdown margin.

The evaluation of dilution events in Modes 3-6 must demonstrate that the dilution will be terminated, either by the BDMS or by the operator, before criticality occurs. In the event that one or both trains of the BDMS is inoperable in these modes, the flowrate of the Reactor Makeup Water System is limited to values which have been shown to allow adequate operator action time to terminate the dilution before criticality occurs. This accident was reanalyzed based on a Westinghouse bulletin concerning potential nonconservatism in the existing boron dilution analysis. Reanalysis of the boron dilution event in Modes 3-6 shows a need to change the TS flowrates. The new flowrates result from changes in two of the flowrate calculation parameters. For all modes, the increase in temperature of the diluting water as it reaches the Reactor Coolant System (RCS) was factored into the calculation of the dilution rate. Since the diluting water is typically colder than the RCS inventory, the diluting water expands within the RCS. This expansion causes a given volumetric flowrate measured at the colder temperature to correspond to a larger volumetric flowrate dilution flowrate within the RCS. This temperature increase was not accounted for in the original analysis. The diluting water source is conservatively assumed to be 30° F and 0 ppm boron. This reduced the maximum allowable combined reactor makeup water pump output from 200 gpm to 150 gpm for Mode 3 and from 80 gpm to 75 gpm for Mode 5.

The second flowrate calculation parameter change increased the minimum water volume in the RCS for Mode 4 from 3588 ft ^{3} to 9029 ft ^{3}. The original Mode 4 analysis had incorrectly used the Modes 5 and 6 minimum RCS water volume of 3588 ft ^{3} instead of the correct Mode 4 value of 9029 ft ^{3}. This change over-shadowed the temperature difference correction and resulted in an increase in the maximum allowable combined reactor makeup water pump output from 80 gpm to 150 gpm. The additional formalized requirement for Mode 6 is considered appropriate to ensure that the 30 minute operator action time for mitigation of a dilution event is available.

The following changes to the TS are proposed: (1) TS 3.3.3.12 (a)(2) and (b)(2), and TS 4.3.3.12.2 (b) would be changed to reflect the new required flowrates; (2) TS 3.9.2.1 (a)(1) and (a)(2) would be modified and TS 4.9.2.1.2 (d) would be added to include isolating or limiting the flowrate from the Reactor Makeup Water Pumps; (3) ACTION (d) is being removed from TS 3.9.2.1 because it is no longer required based on the issuance of Amendment 48/41 which was made using the guidance of Generic Letter 87-09; (4) The footnote in TS 3.3.3.12 and 3.9.1.2 that refers to applicability for Unit 2 has been removed since this time has passed; (5) The addition of "(square root of 10)" to TS 3.3.3.12 (a)(2) and (b)(2) is to provide additional clarity and consistency with TSs 4.3.3.12.2 (a), 3.9.2.1, (2) and 4.9.2.1.2 (c); (6) The removal of "3/4.3.3.12" from the title of the TS provides consistency with other TS in this section; and (7) The spelling of the word "least" has been corrected in TS 4.9.2.1.2 (c).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Changes 1 and 2

The proposed amendment does not involve an increase in the probability or consequences of any previously evaluated accident. No accident initiators are affected by this change so the probability of a previously evaluated accident is not increased. The consequence of a boron dilution accident is recriticality of the reactor core. The flowrate reduction in

Modes 3 and 5 due to temperature differences between the diluting water source and the RCS adds more conservatism to the analysis which decreases the chance that the reactor core will become critical due to a boron dilution accident. The overall increase in the Mode 4 flowrate results from using the correct minimum RCS water volume, thus removing unnecessary conservatism. The added restriction that requires either isolating or limiting the combined flowrate from both reactor makeup water pumps for Mode 6 ensures that the 30 minute operator action time is available for mitigation of a dilution event. The calculated consequences of the boron dilution accident are unchanged.

The proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated. This proposed Technical Specification change will not cause any physical changes to the plant. The plant will continue to operate the same way it does now with the exception of the new reactor makeup water flowrates. These new flowrates are necessary to ensure that the Standard Review Plan operator action times are available for the mitigation of a dilution event.

The proposed amendment does not involve a significant reduction in a margin of safety. The flowrate reduction in Modes 3 and 5 due to temperature differences between the diluting water source and the RCS adds more conservatism to the analysis which increases the margin of safety. The overall increase in the Mode 4 flowrate results from using the correct Mode 4 minimum RCS water volume, thus removing unnecessary conservatism. The added restriction that requires either isolating or limiting the combined flowrate from both reactor makeup water pumps for Mode 6 ensures that the 30 minute operator action time is available for mitigation of a dilution event. The calculated margin of safety remains unchanged.

Change 3

The exemption from the requirements of TS 3.0.4 are no longer necessary because of the issuance of Amendment 48/41 to the Catawba Technical Specifications. This amendment was made using the guidance contained in NRC Generic Letter 87-09. The NRC has already concluded that the changes made using the guidance of Generic Letter 87-09 contain no significant hazards.

Change 4

The footnote regarding applicability for Unit 2 after entering Mode 2 following the first refueling outage has been removed since this time has passed. This change is administrative in nature and does not involve significant hazards consideration.

Change 5

The addition of the phrase "square root of 10" clarifies the meaning of "one-half

VOL 56 ISS 248 DE 26 1991 UMI

decade." This was inadvertently left out in some of the actions that require verifying the Alarm Setpoints on the Source Range Neutron Flux Monitors. The addition of the phrase "square root of 10" is administrative in nature and does not involve significant hazards consideration.

Change 6

The removal of the number 3/4.3.3.12 from the title of the Technical Specification provides formatting consistency with other titles in this section. This change is administrative in nature and does not involve significant hazards consideration.

Change 7

The word "least" had been misspelled "lest." This spelling correction is administrative in nature and does not involve significant hazards consideration.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

Attorney for licensee: Mr. Albert Carr, Duke Power Company, 422 South Church Street, Charlotte, North Carolina 28242

NRC Project Director: David B. Matthews

Houston Lighting & Power Company, City Public Service Board of San Antonio, Central Power and Light Company, City of Austin, Texas, Docket Nos. 50-498 and 50-499, South Texas Project, Units 1 and 2, Matagorda County, Texas

Date of amendment request: April 15, 1991

Description of amendment request: The proposed amendment would change Technical Specifications 3.3.1 and 3.3.2 for South Texas Project, Units 1 and 2 (STP). Specifically, the licensee is requesting to remove two tables regarding response times of reactor trip system instrumentation and engineered safety features from the STP Technical Specifications. These tables would be placed in Chapter 16 of the STP Updated Final Safety Analysis Report (USFAR).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequence of an accident previously evaluated.

No change is being proposed to physical systems in the plant; information on response times for reactor trip system instrumentation and engineered safety features would be relocated to the UFSAR. Changes to UFSAR tables regarding response times would be made pursuant to 10 CFR 50.59, thereby ensuring proper safety considerations. Therefore, the proposed change does not involve a significant increase in the probability or consequence of an accident previously evaluated.

2. The proposed change does not create the possibility of a new or different kind of accident from any previously evaluated.

The proposed change would not affect the design, configuration, or method of operation of the plant. Transferring tables from the Technical Specifications to the UFSAR is an administrative change with no effect on plant operations. Any changes to response times would be evaluated pursuant to 10 CFR 50.59 and safety questions, if any, would be adequately handled through that process. Therefore, since no actual changes to safety systems would be made, the proposed change does not create the possibility of a new or different kind of accident from any previously evaluated.

3. The proposed change does not involve a significant reduction in the margin of safety.

Existing Technical Specification operability and surveillance requirements would not be reduced by the proposed change, and the change would not affect a safety limit or a Limiting Condition for Operation. Changes to tables regarding response times would be handled pursuant to 10 CFR 50.59, reviewed by PORC [Plant Operations Review Committee], and then approved by the Plant Manager. Changes which involve an unreviewed safety question will be reviewed and approved by the NRC prior to implementation. Therefore, no margins of safety are significantly reduced by the proposed change.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the request for amendments involves no significant hazards consideration.

Local Public Document Room Location: Wharton County Junior College, J. M. Hodges Learning Center, 911 Boling Highway, Wharton Texas 77488

Attorney for licensee: Jack R. Newman, Esq., Newman & Holtzinger, P.C., 1615 L Street, NW, Washington, DC 20036

NRC Project Director: Suzanne C. Black

Houston Lighting & Power Company, City Public Service Board of San Antonio, Central Power and Light Company, City of Austin, Texas, Docket Nos. 50-498 and 50-499, South Texas Project, Units 1 and 2, Matagorda County, Texas

Date of amendment request: October 12, 1990, as superseded by letter dated October 25, 1991.

Description of amendment request: This was previously published in the **Federal Register** on December 26, 1990 (55 FR 53072). The proposed amendment would delete Table 5.7-1 (Component Cycle or Transient Limits) from the Technical Specifications. Cyclic/transient occurrences identified in the Updated Final Safety Analysis Report, Table 3.9-8, would be tracked through administrative procedures. Houston Lighting & Power Company (licensee) had previously submitted an amendment request by letter dated October 12, 1990, to delete Table 5.7-1. The October 25, 1991 submittal supersedes the October 12, 1990 letter, which includes and incorporates the NRC staff comments. The licensee's analysis of no significant hazards consideration has not changed, however, it will be repeated for completeness.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. The proposed change does not involve a significant increase in the probability or consequences of accidents previously evaluated.

The removal of cyclic or transient limits from the STPEGS [South Texas Project or STP] Technical Specifications has no influence or impact on the probability or consequences of any accident previously evaluated. The change is administrative in nature. The cyclic or transient limits will still be monitored in the operation of the STP plants.

2. The proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

This change is administrative in nature and involves no change to the design bases or operating procedures. Therefore, the proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed change does not result in a significant reduction in the margin of safety.

The margin of safety is not affected by the removal of cyclic or transient limits from the Technical Specifications. The margin of safety presently provided by current Technical Specifications remains unchanged.

The appropriate measures exist to control the values of these cyclic or transient limits. Therefore, the proposed changes are administrative in nature and do not impact the operation of STP in a manner that involves a reduction in the margin of safety. The proposed amendment continues to require operation within the cyclic or transient limits and appropriate actions to be taken when or if limits are violated remain unchanged.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the request for amendments involves no significant hazards consideration.

Local Public Document Room Location: Wharton County Junior College, J. M. Hodges Learning Center, 911 Boling Highway, Wharton Texas 77488

Attorney for licensee: Jack R. Newman, Esq., Newman & Holtzinger, P.C., 1615 L Street, NW, Washington, DC 20036

NRC Project Director: Suzanne C. Black

Illinois Power Company and Soyland Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois

Date of amendment request: September 20, 1991

Description of amendment request: In accordance with 10 CFR 50.90, Illinois Power Company (IP) proposed changes to the following Clinton Power Station (CPS) technical specification (TS) sections: (1) 3/4.3.1, "Reactor Protection System Instrumentation"; (2) 3/4.3.3, "Emergency Core Cooling System Actuation Instrumentation"; (3) 3/4.3.6, "Control Rod Block Instrumentation"; (4) 3/4.3.2, "Containment and Reactor Vessel Isolation Control System"; (5) 3/4.3.4.1, "ATWS Recirculation Pump Trip System Instrumentation"; (6) 3/4.3.4.2, "End-of-Cycle Recirculation Pump Trip System Instrumentation"; (7) 3/4.3.5, "Reactor Core Isolation System Actuation System Instrumentation"; (8) 3/4.3.6, "Control Rod Block Instrumentation"; (9) 3/4.3.7.1, "Radiation Monitoring Instrumentation"; (10) 3/4.3.9, " Plant Systems Actuation Instrumentation"; (11) 3/4.4.2.1, "Safety/Relief Valves"; (12) 3/4.4.2.2, "Safety/relief Valves Low-Low Set Function". The proposed TS changes involve revisions to the instrumentation repair allowable out-of-service time (AOT), surveillance AOT, channel functional test intervals, staggered test intervals, and editorial corrections.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The staff's review is presented below:

(1) These proposed changes do not involve a change to the plant design or operation, only to the allowable out-of-service time (AOT) and frequency at which testing of instrumentation is performed. Failure of instrumentation itself cannot create an accident. As a result, these proposed changes cannot increase the probability or significantly increase the consequences of any accident previously evaluated.

(2) These proposed changes do not result in any changes to the plant design or operation, only to the AOT and frequency at which testing of instrumentation is performed. Since failure of this instrumentation itself cannot create an accident, these proposed changes can at most affect only accidents which have been previously evaluated. Therefore, these proposed changes cannot create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) The combined effect of the changes proposed for the instrumentation should result in an overall improvement in plant safety. In addition, IP has confirmed that the proposed changes to the functional test intervals will not result in excessive instrument drift relative to current, established setpoints. Therefore, these proposed changes, taken as a whole, do not result in a significant reduction in a margin of safety.

Based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727

Attorney for licensee: Sheldon Zabel, Esq., Schiff, Hardin and Waite, 7200 Sears Tower, 233 Wacker Drive, Chicago, Illinois 60606

NRC Project Director: John N. Hannon

Illinois Power Company and Soyland Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois

Date of amendment request: October 22, 1991

Description of amendment request: In accordance with 10 CFR 50.90, Illinois Power Company (IP) proposes to change Clinton Power Station (CPS) Technical Specification (TS) 6.2.3.2, which describes the composition of the Independent Safety Evaluation Group (ISEG) to provide a second set of acceptable qualifications for ISEG members. The proposed change would allow a person who holds or has held a CPS Senior Reactor Operator (SRO) license and has at least five years of nuclear power experience to be a member of the ISEG. IP also proposes to include a restriction which would require at least four of the ISEG members to hold a bachelor's degree in engineering or related science. This restriction would limit the number of non-degreed SROs to no more than one of the five required ISEG members.

Basis for proposed no significant hazards consideration determination. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration which is presented below:

1. The proposed change is administrative in nature as it only addresses the qualification requirements of ISEG members and does not alter any plant equipment, system configurations, or operation. As a result, the proposed change cannot increase the probability or the consequences of any accident previously evaluated.

2. The proposed change only addresses the qualification requirements of ISEG members. The proposed change does not alter any plant equipment, system configurations or analyses. As a result, this proposed change does not introduce any new failure modes. Therefore, the proposed change cannot create the possibility of a new or different kind of accident from any accident previously evaluated.

3. The proposed change only addresses the qualification requirements of ISEG members. The proposed alternate qualification requirement of currently or previously holding an SRO license for CPS and having at least five years experience in the nuclear field is consistent with the qualification requirements recommended in Section 4.7.2 of ANS 3.1-1981. Additionally, the proposed change will continue to require that at least four of the ISEG members hold a bachelor's degree in engineering or related science. As a result, the proposed change will enhance the quality, knowledge level, and insight of the CPS ISEG in the areas of plant operations without any discernible reduction in technical knowledge or skills. Therefore, the proposed change will not result in a significant reduction in any margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

VOL 56 ISS 248 DEC 26 1991 UMI

Local Public Document Room location: Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727

NRC Project Director: John N. Hannon

Illinois Power Company and Soyland Power Cooperative, Inc., Docket No. 50-461, Clinton Power Station, Unit No. 1, DeWitt County, Illinois

Date of amendment request: October 22, 1991

Description of amendment request: In accordance with 10 CFR 50.90, Illinois Power Company (IP) proposes the following changes to the Clinton Power Station Specifications (TSs):

1. Technical Specification 3/4.8.3.1, 'Onsite Power Distribution Systems, Distribution-Operating'

a. Action Statement a.4 would be revised to address inoperability of the Reactor Protection System (RPS) solenoid buses (rather than only the inverters). A new Action a.4.a would be added to address continued operation with one RPS solenoid bus de-energized. The remaining subparts would be relettered to reflect the addition of the new Action a.4.a. Additionally, an option would be added to the current Action a.4.a (relettered Action a.4.b) to allow the solenoid bus to be de-energized when the associated inverter is inoperable, and commas and wording changes would be made to current Actions a.4.a and a.4.b (relettered as Actions a.4.b and a.4.c, respectively) to provide clarification.

b. Surveillance Requirement 4.8.3.1.2 would be modified to delete inoperability of an RPS bus power monitor as a condition which requires monitoring of the supply frequency.

c. Surveillance Requirement 4.8.3.1.3 would be deleted to remove a redundant TS.

d. Surveillance Requirement 4.8.3.1.4 would be modified to delete a redundant requirement to perform a CHANNEL CALIBRATION of the RPS bus power monitor.

2. Technical Specification 3/4.8.4.3, 'Reactor Protection System Electric Power Monitoring'

a. Surveillance Requirement 4.8.4.3.a would be revised to require the performance of a CHANNEL FUNCTIONAL TEST of the RPS bus power monitor each time the plant is in COLD SHUTDOWN for a period of more than 24 hours, unless performed in the previous 6 months, rather than at least once per 6 months as currently required.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration which is presented below:

(1) The proposed changes to the Action Statements of TS 3.8.3.1 address continued operation with one of the RPS solenoid buses de-energized. These proposed changes do not alter the limitations on continued operation with power being supplied by the alternate source. Since the associated RPS scram solenoids and MSIV [Main Steam Isolation Valve] solenoids are de-energized when the RPS solenoid bus is de-energized, operation with one RPS solenoid bus de-energized will not prevent a reactor scram or MSIV isolation when required. Additionally, continued operation with one RPS solenoid bus de-energized is currently allowed per Action a.4.b when both inverters are inoperable. The remaining changes to these Action Statements are editorial in nature and provide clarification without changing the technical requirements.

The proposed changes to the Surveillance Requirements of TS 3/4.8.3.1 address removal of unnecessary cross-references to TS 3/4.8.4.3 and removal of the requirement to verify the RPS solenoid bus supply frequency when the RPS power monitor is inoperable. Since TS 3/4.8.4.3 addresses the requirements for testing of the RPS power monitor, these proposed changes do not result in any change to the requirement to perform these tests. The requirement to verify RPS solenoid bus supply frequency every eight hours when the RPS power monitor is inoperable is unnecessary since TS 3.8.4.3 would require the RPS solenoid bus to be de-energized within 30 minutes.

The proposed change to Surveillance Requirement 4.8.4.3 is in conformance with GL 91-09 and reduces the possibility for inadvertent reactor scrams and challenges to safety systems during power operation by eliminating the requirement to perform functional testing of the EPAs during power operation. As provided in GL 91-09, the benefit to safety by reducing the potential for challenges to safety systems during power operation more than offsets the risk to safety from relaxing this surveillance requirement.

Based on the above, it is concluded that these proposed changes do not result in a significant increase in the probability or the consequences of any accident previously evaluated.

(2) The proposed changes do not involve any change to the plant design or operation from that currently allowed by the CPS TS. As a result, no new failure modes are introduced and plant operation continues to be limited to those conditions assumed in the safety analyses. Therefore, these proposed changes cannot create the possibility of a new or different kind of accident from any accident previously evaluated.

(3) The proposed changes to TS 3/4.8.3.1 do not alter the limitations on plant operation with an RPS solenoid bus powered by its alternate source. The proposed changes merely provide an allowance to de-energize the bus. Continued operation with one RPS solenoid bus de-energized is currently allowed when both inverters are inoperable and is acceptable because the associated RPS scram solenoids and MSIV solenoids would be de-energized and would allow actuation upon de-energization of the remaining solenoids. These proposed changes will continue to provide adequate assurance that the solenoids which receive power from the RPS solenoid buses will not be damaged by abnormal voltage or frequency conditions. The proposed changes to TS 3/4.8.4.3 reduce the possibility for inadvertent reactor scrams or challenges to safety systems caused by testing of EPAs during power operation. GL 91-09 concluded that the benefit to safety by reducing the potential for challenges to safety systems during power operation more than offsets the risk to safety from relaxing this requirement. Therefore, these proposed changes do not result in a significant reduction in any margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Vespasian Warner Public Library, 120 West Johnson Street, Clinton, Illinois 61727

Attorney for licensee: Sheldon Zabel, Esq., Schiff, Hardin and Waite, 7200 Sears Tower, 233 Wacker Drive, Chicago, Illinois 60606

NRC Project Director: John N. Hannon

Portland General Electric Company, et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: March 21, 1990

Description of amendment request: The licensee proposes to revise Definition 1.25 "PHYSICS TEST", and Section 5.0 of the Trojan Technical Specification (TTS) to clarify references to the Final Safety Analysis Report.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensees have provided their analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed license change involve a significant increase in the probability or consequences of an accident?

The FSAR is updated using the provision of 10 CFR 50.59. Clarifying the TTS to reflect the amended versus original FSAR is an administrative action that does not affect any current accident analysis and therefore has no effect on the probability or consequences of an accident.

2. Does the proposed license change create the possibility of a new or different kind of accident from any accident previously analyzed?

The proposed change merely clarifies that the TTS reference the amended FSAR and not the original FSAR. This is an administrative action that does not create any new accident scenarios and therefore does not create the possibility of a new or different kind of accident from any previously analyzed.

3. Does the license change involve a significant reduction in a margin of safety?

This is an administrative action that clarifies the TTS and as such does not involve a reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Branford Price Millar Library, Portland State University, 934 S.W. Harrison Street, P.O. Box 1151, Portland, Oregon 97207

Attorney for licensees: Leonard A. Girard, Esq., Portland General Electric Company, 121 S.W. Salmon Street, Portland, Oregon 97204

NRR Project Director: Theodore R. Quay

Portland General Electric Company, et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: May 7, 1990

Description of amendment request: The licensee proposed to revise Trojan Technical Specification (TTS) 3.5.1 "Emergency Core Cooling System - Accumulators" to delete Surveillance Requirement 4.5.1.d. The added requirement contained within this specification to verify that the valves open when reactor coolant system pressure reaches 1925 psig, or upon receipt of a safety injection test signal is unnecessary. These valves are normally open with the power supply disconnected during power operation, and therefore, can not respond to such signals. This proposed amendment request is designated by the licensee as LCA 199.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensees have provided their analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed license change involve a significant increase in the probability or consequences of an accident?

During a Loss-of-Coolant Accident (LOCA), the accumulators will force borated water into the reactor core should the RCS depressurize to approximately 600 psia. The proposed TTS change does not inhibit this accident mitigation function since these isolation valves are required to be open with power removed to prevent inadvertent closure. Therefore, there will be no increase in the probability or consequences on an accident due to the proposed change.

2. Does the proposed license change create the possibility of a new or different kind of accident from any accident previously analyzed?

Power is removed from the accumulator isolation valves during all modes of operation, except during the brief intervals when the valves must be repositioned during shutdown or startup (i.e., the valves are required to be closed when depressurizing below 1000 psig and opened when pressurized above 1000 psig). Immediately following both of these operations, the breakers are reopened. Thus, the valves do not function automatically regardless of their position. Because the automatic function is not relied upon, deletion of this surveillance requirement can not introduce a new or different kind of accident.

3. Does the proposed license change involve a significant reduction in a margin of safety?

The proposed TTS change does not affect the accumulator volume, boron concentration or pressure and maintains the accumulator isolation valves open when the accumulators are needed for possible accident mitigation. Therefore, the accumulators will still perform their design function of injecting borated water into the core, if required, and the margin of safety has not been reduced.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Branford Price Millar Library, Portland State University, 934 S.W. Harrison Street, P.O. Box 1151, Portland, Oregon 97207

Attorney for licensees: Leonard A. Girard, Esq., Portland General Electric Company, 121 S.W. Salmon Street, Portland, Oregon 97204

NRR Project Director: Theodore R. Quay

Portland General Electric Company, et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: May 7, 1990

Description of amendment request: The licensee proposes to revise the Trojan Technical Specification (TTS) 3.1.3.4, "Shutdown Rod Insertion Limit", Figure 3.1-1, "Rod Bank Insertion Limits Versus Thermal Power - Four Loop Operation" and Figure 3.1-2, "Rod Bank Insertion Limits Versus Thermal Power Three Loop Operation" to define fully withdrawn rods as greater than 223 steps.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensees have provided their analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed license change involve a significant increase in the probability or consequences of an accident?

Rod insertion limits are established to ensure that power distribution limits are met and the minimum shutdown margin is maintained. Since the proposed change does not change the insertion limit, it does not effect TTS 3/4.2, "Power Distribution Limits" or TTS 3.1.1.1, "Shutdown Margin". For the Cycle 12 Reload Report . . . the fully withdrawn position was calculated using the 224 steps position and shown to have a shutdown margin in excess of the required margin used in the accident analysis. [The Cycle 12 Reload Report] further concluded that using the 224 steps position or higher does not impact the accident analysis and as such the probability or consequences of an accident is not increased.

2. Does the proposed license change create the possibility of a new or different kind of accident from any accident previously analyzed?

A new or different kind of accident is not created since as discussed above, the power distribution limits and shutdown margins continue to be maintained.

3. Does the proposed license change involve a significant reduction in a margin of safety?

There is negligible impact upon the power distribution and shutdown margin because of the low rod worth in the top region of the core. There is sufficient shutdown margin to accommodate the all rod out position (ARO) to 224 steps for Cycle 12. [The Cycle 12 Reload Report] calculates a reactivity penalty of .07 percent [delta rho] for the proposed change. Since the available shutdown margin was 2.06 and 1.99 for Cycles 11 and 12 respectively versus the required margin of 1.60, the .07 penalty can be easily accommodated. Likewise sufficient peaking factors and Departure from Nucleate Boiling Ratio (DNBR) margins are available to accommodate the negligible effect on power distribution. Therefore, the proposed change does not significantly reduce a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

NRR Project Director: Theodore R. Quay

Portland General Electric Company, et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: June 28, 1991

Description of amendment request: The licensee proposes to revise the Trojan Technical Specifications (TTS) for the Reactor Coolant System (RCS) safety and relief valves, Overpressure Protection System, Emergency Core Cooling Subsystems (T_{avg} less than 350° F) and other associated Technical Specifications and Bases to incorporate the changes committed to in Portland General Electric Company's response to Generic Letter 90-06, "Resolution of Generic Issue 70, 'Power-Operated Relief Valve and Block Valve Reliability', and Generic Issue 94, 'Additional Low-Temperature Overpressure Protection for Light-Water Reactors', pursuant to 10 CFR 50.54(f)". This amendment request was designated by the licensee as LCA 211. Specifically, the licensee proposes to modify TS 3/4.4.3.2, "Safety and Relief Valves - Operating;" TS 3/4.4.9.3, "Overpressure Protection Systems;" TS 3/4.5.3.2 "ECCS Subsystems - T_{avg} less than 350° F;" TS 3/4.1.2.1, "Boration System Flow Path - Shutdown;" TS 3/4.1.2.3; "Charging Pump - Shutdown;" TS 6.9.2, "Special Reports;" and associated Bases.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensees have provided their analysis of the issue of no significant hazards consideration, which is presented below:

a. Does the proposed license change involve a significant increase in the probability or consequence of an accident previously evaluated?

The PORVs [Power Operated Relief Valves] are provided to prevent or mitigate overpressure transients in the RCS [Reactor Coolant System]. During operation, the PORVs prevent actuating the high pressure reactor trip for design transients and prevent undesirable opening of the safety valves. In addition, the PORVs are used during low temperature solid water conditions to prevent possible violations of 10 CFR [Code of Federal Regulations] 50, Appendix G reactor vessel temperature/pressure limits. The changes made in the PORV Technical Specifications serve to increase the availability of the PORVs and block valves by shortening the allowed outage time when the valves become inoperable. Also, in the case where the PORV is inoperable due to seat leakage, the block valves are closed but power is maintained to the valves so they can be manually opened to provide pressure relief capability. This change also improves the availability of the PORVs. The new requirement to test the PORVs in Modes 3 or 4 ensures the PORVs are operable prior to establishing conditions where the PORVs are required for low-temperature overpressure protection as well as to simulate temperature environmental effects on the valves.

In several instances, the action requirements for inoperable PORVs or block valves were changed to require the Plant to be placed in HOT SHUTDOWN rather than COLD SHUTDOWN as previously required. This change was made because the APPLICABILITY requirements of the specification do not extend past the HOT STANDBY mode.

Since these changes serve to increase the availability of overpressure protection equipment, they do not involve a significant increase in the probability or consequences of an accident previously evaluated.

The change to allow greater flexibility as to which pumps can remain OPERABLE during low temperature conditions has been analyzed to show that overpressure conditions will not occur with those pump conditions; therefore, the probability or consequences of an overpressure accident will not be increased.

b. Do the proposed license changes create the possibility of a new or different kind of accident from any accident previously evaluated?

Since the proposed changes serve to increase the availability of accident mitigation/prevention equipment, there is no possibility of a new or different kind of accident occurring. No physical changes are being made to the Plant that would create the possibility of a new or different kind of accident from any accident previously evaluated.

c. Do the proposed license changes involve a significant reduction in a margin of safety?

Since the proposed changes serve to increase the availability of accident mitigation/prevention equipment, the margin of safety for an overpressure accident is not reduced. The change to allow greater flexibility as to which pumps can remain OPERABLE during low temperature conditions has been analyzed to show that overpressure conditions will not occur with the given pump configurations; therefore, the margin of safety will not be reduced.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Branford Price Millar Library, Portland State University, 934 S.W. Harrison Street, P.O. Box 1151, Portland, Oregon 97207

Attorney for licensees: Leonard A. Girard, Esq., Portland General Electric Company, 121 S.W. Salmon Street, Portland, Oregon 97204

NRR Project Director: Theodore R. Quay

Portland General Electric Company et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: November 30, 1989, superseded by June 28, 1991 submittal.

Description of amendment request: The licensee proposes to modify the Trojan Technical Specification (TTS) by changing TTS Section 3.0 and 4.0 and associated Bases to reflect the general guidance provided in Generic Letter 87-09, "Section 3.0 and 4.0 of the Standard Technical Specification (STS) on the Applicability of Limiting Conditions for Operation and Surveillance Requirements," dated June 4, 1987. This is a Technical Specification line item improvement.

Additionally, the licensee requests modification of TTS 3.1.3.1, "Moveable Control Assemblies - Group Height" to lower the zero power ejected rod worth from less than or equal to .98 percent delta K to less than or equal to .90 percent delta K to match the value in the Updated Final Safety Analysis Report. Finally, the licensee requests that TTS 3.1.3.3 "Rod Drop Time" be modified to reflect current operating practice. These changes are administrative in nature. These requests for amendments were designated by the licensee as LCA 186, revision 1.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensees have provided their analysis of the issue of no significant hazards consideration, which is presented below:

1. The change to replace TTS 4.0.3 with the 4.0.3 specification provided in GL 87-09:

a. Does the proposed license change involve a significant increase in the probability or consequences of an accident previously evaluated?

The proposed change to TTS 4.0.3 does not change any surveillance requirements or the frequency in which they are performed. The change is administrative in that upon discovery of a missed surveillance, up to 24 hours will be allowed to perform the surveillance. The 24 hours is based on an NRC determination in GL 87-09 that this is an acceptable time limit for completing a missed surveillance when the allowable outage times of the ACTION are less than 24 hours.

If a Plant shutdown is required before a missed surveillance is completed, it is likely that the surveillance would be conducted while the Plant was being shut down because completion of the missed surveillance would terminate the shutdown requirement. This is undesirable since it increases the risk to Plant and public safety for two reasons. First, the Plant would be in a transient state involving changing Plant conditions that offer the potential for an upset that could lead to a demand for the system or component being tested. This would occur when the system or component is either out-of-service to allow performance of the surveillance test or there is a lower level of confidence in its operability because the normal surveillance interval was exceeded. If the surveillance did demonstrate that the system or component was inoperable, it usually would be preferable to restore it to operable status before making a major change in Plant operating conditions. Second, a shutdown would increase the pressure on the Plant staff to expeditiously complete the required surveillance so that the Plant could be returned to power operation. This would further increase the potential for a plant upset when both the shutdown and surveillance activities place a demand on the Plant operators.

In summary, accident probabilities or consequences will not be increased by this proposed license change.

b. Does the proposed license change create the possibility of a new or different kind of accident from any accident previously evaluated?

The proposed change is not related to accident creation because the TTS surveillance requirements remain unchanged in that neither what is to be performed, nor the frequency at which it is performed, is modified.

c. Does the proposed license change involve a significant reduction in a margin of safety?

The proposed change to TTS 4.0.3 conforms with the change recommended in GL 87-09 except for the revision to the Bases for Specification 4.0.3 as described above. This change does not relax any surveillance requirement or change the frequency at which surveillances are performed. The change merely allows for missed surveillances to be performed without resulting in a Plant shutdown. It is overly conservative to assume that systems or components are inoperable when a surveillance requirement has not been performed. The opposite is in fact the case. The vast majority of surveillances demonstrate that systems or components in fact are operable. When a surveillance is missed, it is primarily a question of operability that has not been verified by the performance of the required surveillance.

Because the allowable outage time limits of some ACTIONS do not provide an appropriate time limit for performing a missed surveillance before shutdown requirements may apply, the TTS should include a time limit that would allow a delay of the required actions to permit the performance of the missed surveillance. The 24-hour time limit balances the risks associated with an allowance for completing the surveillance within this period against the risks associated with the potential for a Plant upset and challenge to safety systems when the alternative is a shutdown to comply with ACTIONS before the surveillance can be completed. Consequently, margins of safety are not reduced.

2. The change to revise TTS 4.0.4 to include the provisions of GL 87-09:

a. Does the proposed license change involve a significant increase in the probability or consequences of an accident previously evaluated?

The proposed change to TTS 4.0.4 does not change any surveillance requirements or the frequency in which they are performed. This change is administrative in that it merely clarifies that passage through or to an operational mode is allowed to comply with the ACTION of an LCO. Accident probabilities or consequences are not increased.

b. Does the proposed license change create the possibility of a new or different kind of accident from any accident previously evaluated?

The proposed change is not related to accident creation because the TTS surveillance requirements remain unchanged in that neither what is to be performed, nor the frequency at which it is performed, is modified.

c. Does the proposed license change involve a significant reduction in a margin of safety?

As previously stated, the proposed change to TTS 4.0.4 conforms with the change recommended in GL 87-09. This change does not relax any surveillance requirement or change the frequency at which surveillances are performed. This change merely clarifies that passage through or to an operational mode is allowed to comply with the ACTION of an LCO.

3. The proposed changes to modify individual TTSs to include references to TTS 3.0.4 as not being applicable:

a. Does the proposed license change involve a significant increase in the probability or consequences of an accident previously evaluated?

GL 87-09, in the proposed bases for TTS 3.0.4, states "Compliance with ACTION requirements that permit continued operation of the facility for an unlimited period of time provides an acceptable level of safety for continued operation without regard to the status of the Plant before or after a mode change. Therefore, in this case, entry into an OPERATIONAL MODE or other specified condition may be made in accordance with the provisions of the ACTION requirements."

The individual TTSs for which revisions are proposed to add references to TTS 3.0.4 as being not applicable meet the above criteria, i.e., they contain actions that allow continued operation for an unlimited period of time. Consequently, entry into these ACTIONS provides an acceptable level of safety for continued operation, and do not result in a significant increase in the probability or consequences of an accident.

[The submittal] contains summary discussions of the proposed individual TTS revisions, affirming that the remedial measures prescribed for the affected ACTION statements are consistent with the updated Safety Analysis Report and its supporting safety analysis.

b. Does the proposed license change create the possibility of a new or different kind of accident from any accident previously evaluated?

These changes result in the ability to change modes while in an ACTION that allows continued, indefinite operation. Consequently, no new equipment configurations or accident scenarios are introduced.

c. Does the proposed license change involve a significant reduction in a margin of safety?

Since the ACTIONS themselves associated with this set of specific TTSs already exist and are considered to provide adequate levels of safety, entry into these actions should not cause a reduction in a margin of safety.

4. The proposed change to TTS 3.1.3.1, Group Height, to reflect the zero power ejected rod worth value of [less than or equal to] 0.90 percent rather than [less than or equal to] 0.98 percent:

a. Does the proposed license change involve a significant increase in the probability or consequences of an accident previously evaluated?

This change will achieve consistency between the TTS and the FSAR Accident Analyses. FSAR Table 15.4-3 lists the parameters used in the analysis of the RCCA [Rod Control Cluster Assemblies] ejection accident. Included is a value of 0.90 percent [delta] K for the zero power, end of cycle, ejected rod worth. This ejected rod worth value resulted from FSAR Amendment 11, which was generated to update the FSAR to reflect the Trojan Nuclear Plant fuel upgrade. The resultant change in reactor characteristics represented by a calculated maximum ejected rod worth of 0.90 percent rather than the previous value of 0.98 percent is a change in the positive safety direction. Consequently, this change will not increase the probability or consequences of an accident.

b. Does the proposed license change create the possibility of a new or different kind of accident from any accident previously evaluated?

The value of the ejected rod worth of 0.90 percent is the value used in the Accident Analyses represented in the FSAR. Consequently, no new different accident scenarios are introduced.

c. Does the proposed license change involve a significant reduction in a margin of safety?

No. The margin of safety involved in a rod ejection accident is enhanced by the lowering of the ejected rod worth.

5. The proposed change to TTS 3.1.3.3, Rod Drop Time, to delete the footnote and Action b.:

a. Does the proposed license change involve a significant increase in the probability or consequences of an accident previously evaluated?

The deletion of the footnote is an administrative change only. This footnote only had applicability until April 11, 1980.

The deletion of Action b. does not adversely affect the probability or consequences of an accident. Given other TTS restraints, rod drop times are not

VOL
56
ISS
248
DE
26
1991
UMI

determined with three coolant pumps operating.

b. Does the proposed license change create the possibility of a new or different kind of accident from any accident previously evaluated?

No. Deletion of the footnote is administrative. Deletion of the Action b. assures that rod drop time will be determined with four reactor coolant pumps operating, which is the preferred and safer situation.

c. Does the proposed license change involve significant reduction in a margin of safety?

No. Deletion of the footnote is administrative. Deletion of Action b. assures that rod drop times will be determined with four reactor coolant pumps operating. This is more accurate and results in better defined safety margins.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Branford Price Millar Library, Portland State University, 934 S.W. Harrison Street, P.O. Box 1151, Portland, Oregon 97207

Attorney for licensees: Leonard A. Girard, Esq., Portland General Electric Company, 121 S.W. Salmon Street, Portland, Oregon 97204

NRR Project Director: Theodore R. Quay

Portland General Electric Company et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: January 25, 1990, superseded by July 15, 1991

Description of amendment request: The licensee requests to revise the Trojan Technical Specifications (TTS) to reflect the guidance promulgated in Generic Letter 91-08, "Removal of Component Lists from Technical Specifications," dated May 6, 1991. Specifically, the licensee requests to delete TTS Table 3.6-1, "Containment Isolation Valves," in accordance with the generic letter. Other associated specifications and associated Bases will be modified to reflect the changes. This is a technical specification line item improvement.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensees have provided their analysis of the issue of no significant hazards consideration, which is presented below:

1. Does the proposed license change involve a significant increase in the probability or consequences of an accident previously evaluated?

The removal of Table 3.6-1 from TTS [Trojan Technical Specifications] and replacing it with a reference to Plant procedures and FSAR [Final Safety Analysis Report] Table 6.2-1 in the Bases section does not reduce the effectiveness of the TTS. In addition, there are no proposed changes to the LCOs [Limiting Conditions for Operations] and Surveillance Requirements other than discussed below; consequently, no changes in operability of the isolation valves will occur. Accordingly, there will be no effect on previously analyzed accidents. Making Specification 3.0.4 not applicable to TTS 3.6.3.1 allows Plant start-up with isolation valves closed and de-energized or the penetration isolated with a closed manual valve or a blind flange. This provides at least the same level of assurance (as that provided during operation) that the affected penetrations will be isolated when required. Since the ability to isolate the Containment is not adversely affected, there can be no adverse impact on the consequences or probability of any accident.

The clarification that TTS 3.6.3.1 Actions b. and c. will not apply to those isolation valves required for post-accident operation is more restrictive than the present TTS and will thus enhance safety. Again, there will be no adverse impact on the consequences or probability of any accident.

We have retained in the TTS the requirements for keeping the opening of certain valves under administrative control and for making others inoperable. These valves and their requirements remain the same as the current TTS. Thus, as the location of the requirement within the TTS has changed, the requirement itself has not; therefore, there is no impact upon any accident analysis.

Modification of TTS 4.6.3.1.1 was done for clarification in recognition that some Containment isolation valves require isolation times, but others do not. Thus, there will be no effect on previously analyzed accidents.

2. Does the proposed license change create the possibility of a new or different kind of accident from any accident previously evaluated?

Because deletion of Table 3.6-1 does not change the way the Plant is operated, the potential for an unanalyzed accident is not created.

The exemption added to TTS 3.6.3.1 will not affect the Plant response in any way, and no new failure modes are introduced which could create a new accident. The exemption applies to valves which have no safety function other than Containment isolation and that safety function can be met by meeting the conditions of TTS 3.6.3.1 Actions b. or c.

The retention of administrative control over specific valves cannot create a new accident since the requirements remain the same.

Clarification of TTS 4.6.3.1.1 and 3.6.3.1 does not create a new accident since the change will enhance interpretations of the TTS.

3. Does the proposed license change involve a significant reduction in a margin of safety?

Since the deletion of Table 3.6-1 does not affect the consequences of any accident previously analyzed, there is not a reduction in the margin of safety.

The proposed change to TTS 3.6.3.1 will apply when the inoperable Containment isolation valve(s) are isolated by use of at least one deactivated automatic valve secured in the closed position or by use of a closed manual valve or blind flange. Because the penetration is isolated, the proposed change does not have any adverse impact on the Containment boundary. The proposed change to TTS 3.6.3.1 Actions b. and c. applies to valves which are required to be open for post-accident operation. Accordingly, there will be no impact on safety margin.

Keeping the same administrative controls over specific valves does not affect the safety margins since the requirements remain the same.

The enhancement of TTS 4.6.3.1.1 and 3.6.3.1 provides needed clarification and thus, cannot reduce the safety margin.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Branford Price Millar Library, Portland State University, 934 S.W. Harrison Street, P.O. Box 1151, Portland, Oregon 97207

Attorney for licensees: Leonard A. Girard, Esq., Portland General Electric Company, 121 S.W. Salmon Street, Portland, Oregon 97204

NRR Project Director: Theodore R. Quay

Portland General Electric Company, et al., Docket No. 50-344, Trojan Nuclear Plant, Columbia County, Oregon

Date of amendment request: October 17, 1991

Description of amendment request: The licensee requests to revise Trojan Technical Specification (TTS) 3/4.7.1 "Turbine Cycle - Safety Valves" and associated Bases. This revision would clarify the actions required with inoperable safety valves and the surveillance testing requirements. Additionally, it would remove the provision for three loop operation. This amendment request was designated by the licensee as LCA 214.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensees have provided their analysis of the issue of no significant hazards consideration, which is presented below:

a. Revision of the LCO to include reference to Table 4.7-1 for safety valve required lift settings.

(1) Do the proposed license changes involve a significant increase in the probability or consequences of an accident previously evaluated?

This change is for clarification and is administrative. It does not modify the actual safety valve required lift settings. Consequently, no accident probabilities or consequences are affected.

(2) Do the proposed license changes create the possibility of a new or different kind of accident from any accident previously evaluated?

This change is for clarification and is administrative. It does not modify the actual safety valve required lift settings. Consequently, no new or different kinds of accidents from any accident previously evaluated are created.

(3) Do the proposed license changes involve a significant reduction in a margin of safety?

This change is administrative and does not involve a significant reduction in a margin of safety.

b. Revision of ACTION a to clarify ACTION requirements: (1) Do the proposed license changes involve a significant increase in the probability or consequences of an accident previously evaluated?

The proposed revision removes an anomaly from the ACTION statement. The existing statement has the result that continued operation in Mode 3 with inoperable safety valves is allowed if the Power Range Neutron Flux High Setpoint is reduced per Table 3.7-1. The Reactor Protection System (RPS) Specification 3.3.1 (Table 3.3-1) does not require the Power Range Neutron Flux System to be OPERABLE in MODE 3. The Source Range Neutron Flux System is required to be OPERABLE when the reactor trip system breakers are in the closed position and the control rod drive system is capable of rod withdrawal. The Source Range Neutron Flux Trip function provides protection against positive reactivity insertion transients originating in MODE 3, 4, and 5. Reduction of the Power Range Neutron Flux High Setpoint is logical when at power to assure that power remains reduced proportionately to the loss of relieving capacity due to inoperable main steam line code safety valves. The revised ACTION a clarifies that the Power Range Neutron Flux High Setpoint reduction is not applicable when in MODE 3. Based on the above, the changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed revision also changes the required MODE when more than 3 main steam line code safety valves are inoperable on any steam generator. The existing ACTION requires going to MODE 5, COLD SHUTDOWN, whereas the revised ACTION would require going to MODE 4, HOT SHUTDOWN. Since the Limiting Condition for Operation (LCO) of this Specification is applicable to MODES 1, 2, and 3, MODE 4 is sufficient to place the plant in a mode where the specification is no longer applicable.

Additionally, main steam line code safety valve operability is not required in MODES 4 and 5 since it is improbable that an overpressure condition could be achieved due to the reduced nominal operating pressure and temperature and the lack of significant thermal power. Consequently, the changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

(2) Do the proposed license changes create the possibility of a new or different kind of accident from any accident previously evaluated?

The changes do not introduce any new configurations or conditions other than allowing indefinite operation in MODE 3 without the Power Range Neutron Flux High Setpoint being OPERABLE and reduced, and allowing MODE 4 rather than MODE 5 as the MODE of residence with more than 3 main steam line code safety valves inoperable on any steam generator. The Power Range Neutron Flux trip functions are not required by TTS 3.3.1. The Source Range Neutron Flux trip function provides protection against positive reactivity insertion transients originating from MODES 3, 4, or 5. In addition to providing protection from positive reactivity insertion transients originating from power conditions, the Power Range Neutron Flux High Setpoint, when adjusted per Table 3.7-1, provides assurance that reduced thermal power will be maintained proportionately to the reduced relieving capacity due to one or more inoperable main steam line code safety valves. However, this function is not needed in MODE 3, which is a zero power MODE.

Allowing continued operation in MODE 4 rather than MODE 5 without operability of main steam line code safety valves is proposed since operability is not required in MODE 4. Power transients from this shutdown MODE are non-consequential, and the low temperature/pressure nominal values in this MODE are not sufficient to achieve overpressure conditions.

Based on the above, no new or different kinds of accidents from any accident previously evaluated are created.

(3) Do the proposed license changes involve a significant reduction in a margin of safety?

The changes do not involve creating new or non-conservative initial conditions contributing to accident severity or consequences, consequently there are no significant reductions in a margin of safety.

c. Deletion of ACTION b; f. Deletion of Table 3.7-2; and g. BASES revision:

(1) Do the proposed license changes involve a significant increase in the probability or consequences of an accident previously evaluated?

AND

(2) Do the proposed license changes create the possibility of a new or different kind of accident from any accident previously evaluated?

AND

(3) Do the proposed license changes involve a significant reduction in a margin of safety?

The deletion of ACTION b, the deletion of Table 3.7-2, and the BASES revision apply to 3-loop operation, and are administrative changes in that Trojan is effectively not licensed for 3-loop operation, consequently the 3-loop applicable TTSs are not needed. TTS 3.4.1.2 requires that all four reactor coolant loops be in operation in MODE 3 with any Control Rod Drive Mechanism (CRDM) energized. Therefore, this change does not involve a significant increase in the probability or consequences of an accident previously evaluated, does not create the possibility of a new or different kind of accident from any accident previously evaluated and does not involve a significant reduction in a margin of safety.

d. Renumbering of old ACTION c to become ACTION b:

This is purely an editorial change involving no significant hazards.

e. Revised wording for Surveillance Requirements 4.7.1.1:

(1) Do the proposed license changes involve a significant increase in the probability or consequences of an accident previously evaluated?

The proposed change does not result in a change to the actual surveillance testing of the main steam line code safety valves. The change will make the wording consistent with the standard Technical Specification for Westinghouse Pressurized Water Reactors (NUREG-0452, Rev. 4). The changes will also clarify that surveillance testing for OPERABILITY verification need not include orifice size determinations each time. Consequently, this change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

(2) Do the proposed license changes create the possibility of a new or different kind of accident from any accident previously evaluated?

The proposed change does not modify components, configuration, nor operating procedures of the Plant. Consequently, no new or different kinds of accidents from any accident previously evaluated are created.

(3) Do the proposed license changes involve a significant reduction in a margin of safety?

The proposed change does not modify component, configuration, nor operation of the Plant. No accident initial conditions nor evolutions are affected. The actual surveillance testing of the main steam line code safety valves will remain in compliance with TTS 4.0.5 requirements. Consequently, the proposed change does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Branford Price Millar Library, Portland State University, 934 S.W. Harrison Street, P.O. Box 1151, Portland, Oregon 97207

Attorney for licensees: Leonard A. Girard, Esq., Portland General Electric

VOL 56 ISS 248 DEC 26 1991 UMI

Company, 121 S.W. Salmon Street, Portland, Oregon 97204

NRC Project Director: Theodore R. Quay

Power Authority of the State of New York, Docket No. 50-333, James A. FitzPatrick Nuclear Power Plant, Oswego, New York

Date of amendment request: November 15, 1991

Description of amendment request: This proposed amendment to the James A. FitzPatrick Technical Specifications revises the schedule for visual inspection of snubbers. Specifically, the proposed schedule is based on the number of unacceptable snubbers found during the previous inspection in proportion to the size of the various snubber categories and increases the maximum inspection interval to forty-eight months. This proposed inspection schedule is consistent with the guidance provided in NRC Generic Letter 90-09.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Operation of the FitzPatrick plant in accordance with the proposed Amendment would not involve a significant hazards consideration as defined in 10 CFR 50.92, since it would not:

1. involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed changes involve no hardware changes, no changes to the operation of the snubbers, and do not change the ability of the snubbers to perform their intended functions. An increase in visual inspection frequency will not affect the confidence level in operability developed from functional testing.

2. create the possibility of a new or different kind of accident from those previously evaluated.

The proposed changes involve no hardware changes, no changes to the operation of the snubbers, and do not change the ability of the snubbers to perform their intended functions. The new visual inspection interval does not change the level of confidence in snubber operability developed from functional testing and therefore no unreviewed failure mechanism can result.

3. involve a significant reduction in the margin of safety.

The proposed changes involve no hardware changes, no changes to the operation of the snubbers, and do not change the ability of the snubbers to perform their intended functions. The proposed amendment incorporates the alternate Technical Specification requirements for visual inspection of snubbers identified in Generic Letter 90-09. The alternate visual inspection criteria consider the size of the category of snubbers when evaluating inspection intervals due to failure rates. They do not reduce the confidence level in snubber operability. The functional testing requirements remain unchanged and do not reduce operability confidence levels.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: State University of New York, Penfield Library, Reference and Documents Department, Oswego, New York 13126.

Attorney for licensee: Mr. Charles M. Pratt, 1633 Broadway, New York, New York 10019.

NRC Project Director: Robert A. Capra

Power Authority of The State of New York, Docket No. 50-286, Indian Point Nuclear Generating Unit No. 3, Westchester County, New York

Date of amendment request: November 15, 1991

Description of amendment request: The licensee requests an amendment to the Technical Specifications to revise Section 4.11 (Shock Suppressors (Snubbers)). This section would be revised to provide a schedule for visual inspection of snubbers that reflects the guidance provided in Generic Letter 90-09, "Alternate Requirements for Snubber Visual Inspection Intervals and Corrective Actions." The proposed amendment also corrects typographical errors.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

Consistent with the requirements of 10 CFR 50.92, the enclosed application is judged to involve no significant hazards based on the following information:

(1) Does the proposed license amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Response:

Operation of Indian Point 3 in accordance with the proposed license amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed change does not result in any physical change to the plant which could cause an increase in the probability or consequences of any previously evaluated accident.

(2) Does the proposed license amendment create the possibility of a new or different kind of accident from any accident previously evaluated?

Response:

Operation of Indian Point 3 in accordance with the proposed license amendment does not create the probability of a new or different kind of accident from any accident previously evaluated. The proposed amendment does not alter any plant operations, maintenance requirements, system design or functions other than the snubber visual inspection interval. The NRC staff has determined that the alternate visual inspection interval maintains the same confidence level in snubber operability. The Authority agrees with this determination. Therefore, no possibility of creating a new or different type of accident would result from the proposed amendment.

(3) Does the proposed amendment involve a significant reduction in a margin of safety?

Response:

Operation of Indian Point 3 in accordance with the proposed license amendment does not involve a significant reduction in a margin of safety. As stated above, the proposed amendment incorporates the alternate Technical Specification requirements for visual inspection of snubbers. These requirements were evaluated by the NRC staff in Generic Letter 90-09. The NRC staff has determined that the alternate visual inspection interval maintains the same confidence level in snubber operability as the current requirements. The Authority agrees with this determination. Therefore, the proposed license amendment does not involve a significant reduction in a margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York 10601.

Attorney for licensee: Mr. Charles M. Pratt, 10 Columbus Circle, New York, New York 10019.

NRC Project Director: Robert A. Capra

Public Service Electric & Gas Company, Docket No. 50-354, Hope Creek Generating Station, Salem County, New Jersey

Date of amendment request: November 29, 1991

Description of amendment request: The licensee proposes to revise Technical Specification (TS) 4.6.1.2.a to allow a one-time interval of 53 months for the Type A Containment Integrated Leak Rate Test (ILRT). The present TS require a 40 ±10 month interval. Additionally, the licensee is requesting

to delete the note pertaining to TS 4.6.1.2.d. This note allowed a one-time extension of the Type C test interval, for specific valves, to the first refueling outage. This note is no longer applicable and will not be applicable in the future.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

PSE&G has, pursuant to 10 CFR 50.92, reviewed the proposed amendment to determine whether our request involves a significant hazards consideration. We have determined that operation of the Hope Creek Generating Station in accordance with the proposed changes:

1. Will not involve a significant increase in the probability or consequences of an accident previously evaluated. Although the proposed change extends the 40 ± 10 month test interval by 3 months, [the] first Type A test was completed successfully. Since then, there has not been any modifications made to the plant which could adversely effect the test results.

Type B and C tests have been completed satisfactorily during each of the three previous Hope Creek outages and is scheduled to be performed during the upcoming fourth refuel[ing] outage. Demonstrated operability of the associated components and penetrations provides additional assurance that the integrated containment leak rate remains satisfactory.

2. Will not create the possibility of a new or different kind of accident from any accident previously evaluated. The proposed change does not adversely effect the design or operation of any system or component important to safety. No physical plant modifications or new operational configurations will result from this change.

3. Will not involve a significant reduction in a margin of safety. The first Type A test was completed satisfactorily. Type B and C tests have been completed satisfactorily and will be performed during the fourth refuel outage. No plant modifications have been made which could adversely effect Type A test results.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Pennsville Public Library, 190 S. Broadway, Pennsville, New Jersey 08070

Attorney for licensee: M. J. Wetterhahn, Esquire, Winston and Strawn, 1400 L Street, NW., Washington, DC 20005-3502

NRC Project Director: Charles L. Miller

Tennessee Valley Authority, Docket Nos. 50-327 and 50-328, Sequoyah Nuclear Plant, Units 1 and 2, Hamilton County, Tennessee

Date of amendment request: August 10, 1988 as supplemented May 18, 1989, March 22, September 18, and November 21, 1991 (TS 88-03 and 91-13). The staff's proposed no significant hazards consideration determination for the requested changes was previously published on September 7, 1988 (53 FR 34612).

Description of amendment request: The proposed amendment would revise various Technical Specifications (TS) related to the reactor coolant system power operated relief valves (PORVs) and their associated block valves. Also, the proposed amendment would add new requirements to address the low temperature overpressure protection (LTOP) requirements related to the PORVs, operability of the centrifugal charging pumps, reactor coolant pump startup, updating of LTOP setpoints, and cyclic limits to prevent excessive overpressure affects while the plant is in the low-temperature, water-solid condition. The proposed changes are designed to incorporate the guidance given in Generic Letter (GL) 90-06, "Resolution of Generic Issue 70, 'Power-Operated Relief Valves and Block Valve Reliability,' and Generic Issue 94, 'Additional Low-Temperature Overpressure Protection for Light-Water Reactors,' Pursuant to 10 CFR 50.54f." The proposed TS changes would result in the following: (1) addition of specific operability and surveillance requirements to provide low temperature overpressure protection (LTOP); (2) clarification of the operability requirements for the charging pumps when the plant is shut down; (3) changing the boration system requirements to conform with the administrative controls that support the LTOP requirements; (4) addition of new requirements to minimize the potential for heat input overpressure transients caused by the restart of a reactor coolant pump in Mode 4; (5) addition of LTOP considerations to the reactor vessel specimen surveillance program; (6) addition of cyclic limits for low-temperature, water-solid overpressure events; (7) deletion of an outdated footnote on page 3/4 1-10 of Unit 2 TS that expired in 1984; (8) replacing Figure 3.4-4 with an updated figure that is applicable to 16 Effective Full Power Years (EFPYs); (9) changes to the Power Operated Relief Valve (PORV) Specification 3.4.3.2 that would allow termination of a forced shutdown when the plant is in the hot shutdown condition rather than the cold shutdown condition; (10) changes to the shutdown time requirements for placing the plant into the hot shutdown condition for various PORV inoperable conditions from 30 hours to 6 hours; (11) specifying that PORV testing be performed while in Mode 4; and (12) modifications to the respective Bases sections and certain administrative-in-nature changes to reflect these proposed changes.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration. The NRC staff has reviewed the licensee's analysis against the standards of 10 CFR 50.92(c). The NRC staff's review is presented below.

Operation of Sequoyah Nuclear Plant (SQN) in accordance with the proposed amendment will not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated

The low-temperature overpressure events had been previously evaluated in the Final Safety Analysis Report (FSAR). The addition of operability and surveillance requirements for the LTOP system is administrative in nature because it incorporates existing requirements into the technical specifications. Conforming changes to Technical Specifications 3.1.2.1, 3.1.2.2, 3.1.2.3, 3.1.2.4, 3.4.1.3, 3.4.9.1, and 5.7 are necessary to fully integrate the LTOP system requirements. The addition of a special test condition for surveillance requirement 4.4.11.1(a) ensures that instrumentation common to both the Reactor Vessel Level Indication System (RVLIS) and LTOP system remains in service as required. The deletion of an outdated footnote to unit 2 Specification 3.5.2 is purely editorial in nature.

Following the replacement of SQN's Foxboro Company protection system with the Westinghouse Electric Corporation Eagle 21 system, SQN's LTOP setpoint analyses were revised to include the added process instrument delay time (i.e., 250 milliseconds). SQN's revised LTOP setpoint analyses also now include the effect of SQN's new reactor pressure-temperature (P-T) limits that were based on Revision 2 of NRC Regulatory Guide (RG) 1.99, "Radiation Embrittlement of Reactor Vessel Materials." As a result of these changes to SQN's LTOP setpoint analyses, TVA is submitting revised LTOP setpoints that will supersede the setpoints previously provided in TVA's August 10, 1988 letter.

The proposed change does not introduce new operating practices or

VOL
56
ISS
248
DE
26
1991
UMI

require further plant hardware modifications. SQN's LTOP setpoints will continue to provide protection against LTOP events previously evaluated in SQN's Final Safety Analysis Report (FSAR).

From an accident and transient mitigation standpoint, SQN's power-operated relief valves (PORVs) can be utilized to perform several safety-related functions. These include mitigation of a steam generator (SG) tube rupture accident and low-temperature overpressure protection of the reactor vessel. In addition, the PORVs can be an accident initiator in the case where a failed-open PORV results in a small break loss of coolant accident.

Under normal operating conditions, SQN's PORVS are designed to limit pressurizer pressure and prevent the undesirable opening of the pressurizer safety valves. The PORVs are also used for automatic and manual pressure control. The Final Safety Analysis Report analysis for overpressure protection in Modes 1, 2, and 3 assumes that the PORVs do not actuate. The pressurizer safety valves provide the required pressure relief.

TVA's proposed change adds surveillance testing of the PORVs in Mode 4. The intent of requiring PORVS to be tested during Mode 4 is to demonstrate operability of the PORVs between power operational modes (Modes 1 and 2) and Mode 5, when the plant is most vulnerable to a low-temperature overpressure transient. The proposed change remains consistent with the guidance provided in GL 90-06 and continues to provide operability assurance that SQN's PORVs will perform their safety-related functions.

TVA's proposed change to the ACTION statements for terminating a forced-shutdown at HOT SHUTDOWN rather than COLD SHUTDOWN provides consistency between the applicability requirements of the limiting condition of operation (LCO) and the forced-shutdown requirements. This change is considered to be an improvement for maintaining consistent LCO applicability and shutdown requirements within TSs. Accordingly, the proposed changes do not significantly increase the probability or consequences of an accident previously evaluated.

(2) Create the possibility of a new or different kind of accident from any previously analyzed

The low-temperature overpressure events had been previously evaluated in the FSAR. The addition of operability and surveillance requirements for the LTOP system and conforming changes to other technical specifications is administrative in nature. The deletion of an outdated footnote to Unit 2 Specification 3.5.2 is purely editorial in nature. The addition of a special test condition for Surveillance Requirement 4.4.11.1.(a) ensures that instrumentation common to both the RVLIS and LTOP systems remains in service as required.

TVA is submitting new LTOP setpoints that reflect SQN's current LTOP setpoint analyses. The new LTOP setpoints resulted from SQN's new reactor P-T limits and SQN's Eagle 21 upgrade. The new LTOP setpoints supersede SQN's setpoints that were previously provided in TVA's August 10, 1988 letter. The new LTOP setpoints have been determined for SQN and remain bounding for SQN's new P-T limit.

The proposed change does not introduce new operating practices or require further plant hardware modifications. SQN's LTOP setpoints continue to provide protection against LTOP events previously evaluated in SQN's FSAR.

The change to the surveillance requirement for testing PORVs in Mode 4 does not require any hardware changes. Existing surveillance instructions at SQN allow for testing PORVs while in Mode 4. The changes associated with the ACTION statements follow the guidance of GL 90-06 for providing consistency between forced-shutdown requirements and LCO applicability requirements. Thus, the possibility of a new or different kind of accident is not created.

(3) Involve a significant reduction in a margin of safety

The addition of operability and surveillance requirements for the LTOP system will increase the margin of safety by affording a higher level of administrative controls over LTOP system operability. The conforming changes to Technical Specifications 3.4.1.3, 3.4.9.1, and 5.7 will increase the margin of safety by also affording a higher level of administrative controls over related LTOP requirements. The changes to Technical Specifications 3.1.2.1, 3.1.2.2, 3.1.2.3, and 3.1.2.4 involve a reduction in the redundancy requirements for boration capability in Mode 4. However, this reduction is necessary to incorporate requirements that minimize the potential for and severity of mass input, low-temperature overpressure events by limiting the number of centrifugal charging pumps that can automatically inject into the RCS. The addition of a special test condition for Surveillance Requirement 4.4.11.1(a) ensures that instrumentation common to both the RVLIS and LTOP systems remains in service as required. NRC has acknowledged the greater importance of LTOP system requirements which resulted in generation of Generic Letter 90-06. TVA is adopting the Generic Letter and related requirements in the proposed amendment. The deletion of an outdated footnote is administrative in nature.

The proposed change does not introduce new operating practices or require further plant hardware modifications. SQN's LTOP setpoints continue to provide protection against LTOP events previously evaluated in SQN's FSAR. Consequently, the LTOP setpoint change would not involve a reduction in the margin of safety.

The intended design and operation of SQN's PORVs have not been changed. The safety-related functions of the PORVS (i.e., mitigation of a SG tube rupture and low-temperature overpressure protection) remain unchanged. Testing the PORVs in Mode 4 provides additional assurance of valve operability for performing safety-related functions. The additional changes associated with Specification 3.4.3.2 ACTION statements a, b, and c, provide a TS improvement by establishing consistency between the LCO applicability requirements and the forced-shutdown requirements. Accordingly, the margin of safety has not been changed.

Based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: Chattanooga-Hamilton County Library, 1101 Broad Street, Chattanooga, Tennessee 37402

Attorney for licensee: General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, E11 B33, Knoxville, Tennessee 37902.

NRC Project Director: Frederick J. Hebdon

TU Electric Company, Docket No. 50-445, Comanche Peak Steam Electric Station, Unit 1, Somervell County, Texas

Date of amendment request: April 22, 1991, as supplemented by letter dated November 4, 1991.

Description of amendment request: This was previously published in the **Federal Register** on July 10, 1991 (56 FR 31444). The April 22, 1991, amendment request proposed to change Comanche Peak Steam Electric Station (CPSES) Unit 1 Technical Specifications Paragraphs 6.2.3.1 and 6.2.3.4 concerning the reporting responsibilities for the CPSES Independent Safety Engineering Group (ISEG). Specifically, this change would replace the organizational position and function of the Vice President, Nuclear Engineering with the organizational position and function of the Executive Vice President, Nuclear Engineering and Operations. By letter dated November 4, 1991, TU Electric submitted a supplement to the April 22, 1991, amendment request. The supplement proposed to change the title of the Executive Vice President, Nuclear Engineering and Operations to Group Vice President, Nuclear Engineering and Operations. This requires that Technical Specification Sections 6.2 and 6.5 be changed.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration which is presented below:

1. Involve a significant increase in the probability or consequences of any accident previously evaluated?

The proposed change involves administrative changes at the executive level and does not impact nor affect accident analysis assumptions. Therefore, these assumptions are preserved and there is no change in the probability or consequences of any previously evaluated accident.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated?

This change is administrative only. No change is made to the plant or plant operating procedures that would create a new or different kind of accident.

3. Involve a significant reduction in the margin of safety?

As an administrative change, the proposed change does not impact nor affect any accidents or failure points and, therefore, does not reduce the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Local Public Document Room location: University of Texas at Arlington Library, Government Publications/Maps, 701 South Cooper, P. O. Box 19497, Arlington, Texas 76019

NRC Project Director: Suzanne C. Black

Virginia Electric and Power Company, Docket No. 50-338, North Anna Power Station, Unit No. 1, Louisa County, Virginia

Date of amendment request: November 7, 1991

Description of amendment request: The proposed changes would revise the Technical Specifications for the North Anna Power Station, Unit No. 1 (NA-1). Specifically, the proposed changes would revise the current NA-1 TS to ensure that the correct measurement range of the triaxial response spectrum recorders is reflected in the appropriate NA-1 TS table. The changes are being made to reflect the range of the instrumentation originally installed in the plant and excepted from Regulatory Guide 1.12, Revision 1, dated April 1974, as noted in Section 3A.12 of the Updated Final Safety Analysis Report (UFSAR).

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. There is not a significant increase in the probability of occurrence or consequences of any accident or malfunction of equipment which is important to safety and which has been evaluated in the UFSAR. No modifications have been made to the installed instrumentation. The proposed amendment is submitted to reflect the range of the installed equipment as noted in Section 3A.12 of the UFSAR. The availability and reliability of the four triaxial response spectrum recorders will remain the same. Therefore, the proposed changes will not increase the probability or consequences of an accident previously evaluated. Likewise, the consequences of the accidents will not increase as a result of the proposed Technical Specification changes.

2. The changes do not create the possibility of a new or different kind of accident from those previously evaluated in the safety analysis report. No modifications have been made to the installed instrumentation or accident analysis as a result of this proposed amendment. The proposed amendment is submitted to reflect the range of the installed equipment as noted in Section 3A.12 of the UFSAR. Therefore, the proposed changes will not create the possibility of a new or different kind of accident than any previously evaluated.

3. The proposed changes do not involve a significant reduction in the margin of safety. No physical plant modifications, changes in plant operations, or changes in accident analysis assumptions are being made. The proposed amendment is submitted to reflect the range of the installed equipment as noted in Section 3A.12 of the UFSAR. Therefore, the accident analysis assumptions remain bounding and safety margins remain unchanged.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

NRC Project Director: Herbert N. Berkow

Virginia Electric and Power Company, Docket Nos. 50-280 and 50-281, Surry Power Station, Unit Nos. 1 and 2, Surry County, Virginia

Date of amendment request: October 8, 1991

Description of amendment request: The proposed changes will upgrade portions of Sections 3.0 and 4.0 of the Surry Power Station Technical Specifications by incorporating conclusions reached in Generic Letter 87-09. The proposed changes restrict the changing of operational conditions while in Limiting Conditions for Operation (LCO), allow entry into an action statement due to a missed surveillance to be delayed for 24 hours, and require the completion of the surveillance requirements of an LCO prior to changing operational conditions. Exceptions to certain requirements of Sections 3.0 and 4.0 are also proposed. Paragraphs unaffected by this change would be relocated in some cases.

Basis for proposed no significant hazards consideration determination: As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) Operation of the facility in accordance with the proposed amendment[s] would not involve a significant increase in the probability or consequences of an accident previously evaluated.

Specification 3.0.3 has been added as a clarification to specifically limit entry into an operational condition when the conditions for the LCO are not met and the associated action statement requires a shutdown if they are not completed within a specified time interval. For [an] LCO that has action statement requirements permitting continued operation for an unlimited period of time or an exception to Specification 3.0.3, entry into an operational mode or other specified condition of operation should be permitted in accordance with those action statement

VOL 56 ISS 248 DEC 26 1991 UMI

requirements. This clarification is consistent with existing NRC regulatory requirements for [an] LCO.

Surveillances provide positive verification of operability. A 24-hour time limit has been included in Specification 4.0.3 allowing a delay of the required actions to permit the performances of the missed surveillance. This change is justified in that it is overly conservative to assume that systems or components are immediately inoperable when a surveillance requirement has not been performed. The NRC concluded in Generic Letter 87-09 that a 24-hour time limit balances the risks associated with an allowance for completing the surveillance within this period against the risks associated with the potential for a plant upset and challenge to safety systems when the alternative is a shutdown to comply with action statement requirements before the surveillance can be completed. The NRC concluded that the potential for a plant upset and challenge to safety systems is increased if surveillances are performed during actions to initiate a shutdown to comply with action statement requirements. We concur with this assessment and conclude that this change does not increase the probabilities or consequences of an accident.

Specification 4.0.4 has been modified to note that its provisions shall not prevent passage through or to operational conditions as required to comply with action statement requirements. This is consistent with the intent of the existing Technical Specifications and only represents a clarification.

No previously analyzed accident scenario is changed by [these amendments]. Initiating conditions and assumptions remain as previously analyzed.

(2) Use of the modified specification would not create the possibility of a new or different kind of accident from any accident previously evaluated.

As stated above, the proposed changes do not involve changes to the physical plant or operations.

The changes being proposed to achieve consistency with Generic Letter 87-09 are clarifications of existing specifications with the exception of the 24-hour time limit to perform a missed surveillance. As noted in the generic letter, that change addresses a balance between positive verification of operability and the potential risk of known transients or plant upsets which may occur during activities to initiate a shutdown. This change does not alter any accident scenarios. Therefore, the proposed changes do not create the possibility of a new or different kind of accident.

(3) Use of the modified specification would not involve a significant reduction in a margin of safety.

For the changes intended to achieve consistency with the recommendation of Generic Letter 87-09 "Sections 3.0 and 4.0 of the Standard Technical Specifications (STS) on the Applicability of Limiting Conditions [for] Operation and Surveillance Requirements," the NRC [s]taff has previously evaluated these changes in the generic letter and determined that the modifications will result in improved [T]echnical [S]pecifications. No other changes are proposed.

Therefore, use of the proposed specification would not involve a significant reduction in the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

Previously Published Notices Of Consideratioin Of Issuance of Amendments To Operating LIcenses and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices either because time did not allow the Commission to wait for this biweekly notice or because the action involved exigent circumstances. They are repeated here because the biweekly notice lists all amendments issued or proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the **Federal Register** on the day and page cited. This notice does not extend the notice period of the original notice.

Duke Power Company, et al., Docket Nos. 50-413 and 50-414, Catawba Nuclear Station, Units 1 and 2, York County, South Carolina

Date of application for amendments: November 20, 1991 as supplemented December 5, 1991

Brief Description of amendments request: The proposed amendments would change the parameters in Technical Specification Table 2.2-1 to compensate for potential nonconservatisms in the F-Delta I (axial flux differences) portion to the Overtemperature-Delta T reactor trip function. Date of publication of individual notice in **Federal Register:** November 29, 1991 (56 FR 61062)

Expiration date of individual notice: Comment period expires December 14, 1991; Notice period expires December 30, 1991.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina 29730

Attorney for licensee: Mr. Albert Carr, Duke Power Company, 422 South Church Street, Charlotte, North Carolina 28242

NRC Project Director: David B. Matthews

Notice Of Issuance Of Amendment To Facility Operating License

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with these actions was published in the **Federal Register** as indicated. No request for a hearing or petition for leave to intervene was filed following this notice.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluations and/or Environmental Assessments as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, D.C., and at the local public document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects.

Carolina Power & Light Company, Docket No. 50-261, H. B. Robinson Steam Electric Plant, Unit No. 2, Darlington County, South Carolina

Date of application for amendment: August 23, 1991

Brief description of amendment: The amendment removes Technical Specification 4.0.1c which limits the combined time interval for any three consecutive surveillance intervals to less than 3.25 times the specified surveillance interval.

Date of issuance: December 10, 1991

Effective date: December 10, 1991

Amendment No. 137

Facility Operating License No. DPR-23. Amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** October 30, 1991 (56 FR 55943) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated December 10, 1991

No significant hazards consideration comments received: No

Local Public Document Room location: Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina 29535

Commonwealth Edison Company, Docket Nos. 50-373 and 50-374, LaSalle County Station, Units 1 and 2, LaSalle County, Illinois

Date of application for amendments: October 10, 1990, as amended by letter dated October 16, 1991.

Brief description of amendments: This amendment modifies the Technical Specification (TS) requirements for the High Pressure Core Spray (HPCS) system by permanently aligning the HPCS suction to the suppression pool and removing all TS requirements for aligning the HPCS suction to the condensate storage tank. In addition, containment isolation requirements are added for the new Reactor Core Isolation Cooling (RCIC) full flow test line to the suppression pool.

Date of issuance: November 27, 1991

Effective date: November 27, 1991

Amendment Nos.: 81 and 65

Facility Operating License Nos. NPF-11 and NPF-18. The amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** November 14, 1990 (55 FR 47569) The October 16, 1991, letter provided additional clarifying information that did not change the initial proposed no significant hazards consideration. The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated November 27, 1991.

No significant hazards consideration comments received: No

Local Public Document Room location: Public Library of Illinois Valley Community College, Rural Route No. 1, Oglesby, Illinois 61348

Consumers Power Company, Docket No. 50-155, Big Rock Point Plant, Charlevoix County, Michigan

Date of application for amendment: September 26, 1991

Brief description of amendment: The proposed amendment would revise TS Sections 6.1.5(h), 6.2.2, 6.3.2, 7.3.5(e), and 7.5.7 to clarify equipment operability requirements during periods when all fuel is removed from the reactor vessel. This amendment request was submitted in response to a NRC Temporary Waiver of Compliance (TWC) granted to the Big Rock Point Plant on November 5, 1990.

Date of issuance: December 13, 1991

Effective date: December 13, 1991

Amendment No.: 106

Facility Operating License No. DPR-6. The amendment revises the Technical Specifications.

Date of initial notice in **Federal Register:** November 8, 1991 (56 FR 57360) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated December 13, 1991. No significant hazards consideration comments received: No.

Local Public Document Room location: North Central Michigan College, 1515 Howard Street, Petoskey, Michigan 49770.

Duke Power Company, Docket Nos. 50-369 and 50-370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina

Date of application for amendments: March 8, 1991

Brief description of amendments: The amendments revise Technical Specification 3.8.1.1 to increase the minimum volume of fuel oil for the emergency diesel generators from 28,000 gallons to 39,500 gallons for Modes 1 through 4.

Date of issuance: December 9, 1991

Effective date: December 9, 1991

Amendment Nos.: 129, 111

Facility Operating License Nos. NPF-9 and NPF-17: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** May 15, 1991 (56 FR 22463) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated December 9, 1991.

No significant hazards consideration comments received: No.

Local Public Document Room location: Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28223

Florida Power and Light Company, et al., Docket Nos. 50-335 and 50-389, St. Lucie Plant, Unit Nos. 1 and 2, St. Lucie County, Florida

Date of application for amendments: July 26, 1989

Brief description of amendments: These amendments revise Technical Specifications Section 3.7 for both units to clarify testing requirements for the main steam line isolation valves and for the main feedwater line isolation valves.

Date of Issuance: December 5, 1991

Effective Date: December 5, 1991

Amendment Nos.: 111 & 52

Facility Operating License Nos. DPR-67 and NPF-16: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** August 23, 1989 (54 FR 35102) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated December 5, 1991.

No significant hazards consideration comments received: No.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 34954-9003

Florida Power and Light Company, et al., Docket Nos. 50-335 and 50-389, St. Lucie Plant, Unit Nos. 1 and 2, St. Lucie County, Florida

Date of application for amendments: February 26, 1991

Brief description of amendments: These amendments make administrative changes to achieve consistency throughout the Technical Specifications by removing outdated material, making minor text changes, and correcting errors.

Date of Issuance: December 5, 1991

Effective Date: December 5, 1991

Amendment Nos.: 112 & 53

Facility Operating License Nos. DPR-67 and NPF-16: Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** April 17, 1991 (56 FR 15641) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated December 5, 1991.

No significant hazards consideration comments received: No.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 34954-9003

VOL 56 ISS 248 DEC 26 1991 UMI

Florida Power and Light Company, Docket Nos. 50-250 and 50-251, Turkey Point Plant Units 3 and 4, Dade County, Florida

Date of application for amendments: October 31, 1991

Brief description of amendments: These amendments allow operation with the AFD outside the ±5% target band, without accruing penalty deviation time, solely for the calibration of excore detectors, provided the AFD is within the acceptable operation limits of TS Figure 3.2-1. In addition, a footnote is modified to include that such surveillance testing will be performed below 90% of rated thermal power. A Temporary Waiver of Compliance concerning this change was verbally granted by the NRC on October 30, 1991, followed by an NRC letter dated October 31, 1991.

Date of issuance: December 6, 1991

Effective date: December 6, 1991

Amendment Nos. 150 & 145

Facility Operating Licenses Nos. DPR-31 and DPR-41: Amendments revised the Technical Specifications.

Public comments requested as to proposed no significant hazards consideration: Yes (56 FR 57537). That notice provided an opportunity to submit comments on the Commission's proposed no significant hazards consideration determination. No comments have been received. The notice also provided for an opportunity to request a hearing by December 12, 1991, but indicated that if the Commission makes a final no significant hazards consideration determination any such hearing would take place after issuance of the amendments. The Commission's related evaluation of this amendment is contained in a Safety Evaluation dated December 6, 1991.

Local Public Document Room location: Environmental and Urban Affairs Library, Florida International University, Miami, Florida 33199.

Gulf States Utilities Company, Docket No. 50-458, River Bend Station, Unit 1 West Feliciana Parish, Louisiana

Date of amendment request: June 26, 1991

Brief description of amendment: The amendment modifies Table 4.8.1.1.2-1 of the Technical Specifications (TS) related to the testing frequency of the Emergency Diesel Generators to permit returning to a regular monthly testing schedule from an increased test frequency when seven consecutive failure-free demands have been performed and the number of failures in the last 20 valid demands has been reduced to less than or equal to one regardless of which failure criteria in Table 4.8.1.1.2-1 had resulted in the increased testing frequency. This amendment also revises T.S. 4.8.1.1.3 "Reports" to allow failure statistics to be kept on a per-diesel-generator basis rather than on a per-nuclear-unit basis for the purpose of reporting failures.

Date of issuance: December 3, 1991

Effective date: December 3, 1991, to be implemented within 60 days

Amendment No.:

Amendment No. 62

Facility Operating License No. NPF-47. The amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** October 2, 1991 (56 FR 49918) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated December 3, 1991.

No significant hazards consideration comments received: No.

Local Public Document Room location: Government Documents Department, Louisiana State University, Baton Rouge, Louisiana 70803

Indiana Michigan Power Company, Docket Nos. 50-315 and 50-316, Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, Berrien County, Michigan

Date of application for amendments: April 16, 1991

Brief description of amendments: The Technical Specifications (TS) definitions and requirements relating to Units 1 and 2 containment integrity and containment air lock operability and surveillance were revised. The definition of CONTAINMENT INTEGRITY (TS 1.8) along with its the related surveillance requirement (TS 4.6.1.1.b), and containment leakage limitations (TS 4.6.1.2.e) was revised to indicate that for containment integrity to exist, air locks must be in compliance with the applicable operability requirements. Also, the amendment deleted a Unit 1 surveillance requirement (TS 4.6.1.3.a) that air locks be visually inspected after each opening to verify that the seal has not been damaged.

Date of issuance: December 5, 1991

Effective date: December 5, 1991

Amendments Nos.: 160 & 144 Facility Operating Licenses Nos. DPR-58 and DPR-74. Amendments revised the Technical Specifications.

Date of initial notice in **Federal Register:** October 2, 1991 (56 FR 49919). The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated December 5, 1991.

Notice of Issuance Of Amendment To Facility Operating License and Final Determination Of No Significant Hazards Consideration and Opportunity for Hearing (Exigent or Emergency Circumstances)

During the period since publication of the last biweekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Because of exigent or emergency circumstances associated with the date the amendment was needed, there was not time for the Commission to publish, for public comment before issuance, its usual 30-day Notice of Consideration of Issuance of Amendment and Proposed No Significant Hazards Consideration Determination and Opportunity for a Hearing. For exigent circumstances, the Commission has either issued a **Federal Register** notice providing opportunity for public comment or has used local media to provide notice to the public in the area surrounding a licensee's facility of the licensee's application and of the Commission's proposed determination of no significant hazards consideration. The Commission has provided a reasonable opportunity for the public to comment, using its best efforts to make available to the public means of communication for the public to respond quickly, and in the case of telephone comments, the comments have been recorded or transcribed as appropriate and the licensee has been informed of the public comments.

In circumstances where failure to act in a timely way would have resulted, for example, in derating or shutdown of a nuclear power plant or in prevention of either resumption of operation or of increase in power output up to the plant's licensed power level, the Commission may not have had an opportunity to provide for public

VOL 56 ISS 248 DEC 26 1991 UMI

comment on its no significant hazards determination. In such case, the license amendment has been issued without opportunity for comment. If there has been some time for public comment but less than 30 days, the Commission may provide an opportunity for public comment. If comments have been requested, it is so stated. In either event, the State has been consulted by telephone whenever possible.

Under its regulations, the Commission may issue and make an amendment immediately effective, notwithstanding the pendency before it of a request for a hearing from any person, in advance of the holding and completion of any required hearing, where it has determined that no significant hazards consideration is involved.

The Commission has applied the standards of 10 CFR 50.92 and has made a final determination that the amendment involves no significant hazards consideration. The basis for this determination is contained in the documents related to this action. Accordingly, the amendments have been issued and made effective as indicated.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the application for amendment, (2) the amendment to Facility Operating License, and (3) the Commission's related letter, Safety Evaluation and/or Environmental Assessment, as indicated. All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room for the particular facility involved.

A copy of items (2) and (3) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Reactor Projects.

The Commission is also offering an opportunity for a hearing with respect to the issuance of the amendment. By January 27, 1992, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room for the particular facility involved. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

Since the Commission has made a final determination that the amendment involves no significant hazards consideration, if a hearing is requested, it will not stay the effectiveness of the amendment. Any hearing held would take place while the amendment is in effect.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1-(800) 325-6000 (in Missouri 1-(800) 342-6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to **(Project Director)**: petitioner's name and telephone number, date petition was mailed, plant name, and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington.

DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d). **Washington Public Power Supply System, Docket No. 50-397, Nuclear Project No. 2, Benton County, Washington**

Date of application for amendment: November 25, 1991

Brief description of amendment: The amendment revised Technical Specifications 3.3.7.5 and 3.4.2 to allow continued plant operation with one safety relief valve acoustic monitor inoperable until the next refueling outage or until the first forced outage of sufficient duration to effect repair/replacement of the acoustic monitor.

Date of issuance: November 29, 1991

Effective date: November 29, 1991

Amendment No.: 96

Facility Operating License No. NPF-21: Amendment revised the Technical Specifications. Public comments requested as to no significant hazards consideration: No The Commission's related evaluation of the amendment, finding of emergency circumstances, and final determination of no significant hazards consideration determination are contained in a Safety Evaluated dated November 29, 1991.

BILLING CODE 7590-01-D

[Docket No. 50-213]

Connecticut Yankee Atomic Power Co.; Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-61, issued to Connecticut Yankee Atomic Power Company (the licensee), for operation of the Haddam Neck Plant located in Middlesex County, Connecticut.

The proposed amendment would modify Technical Specification (TS) 6.9.1.9, "Technical Report Supporting Cycle Operation," to add a reference that includes the analytical methods used to determine the core operating limits relative to Zircaloy fuel. In addition the licensee proposed to upgrade parts of their amendment request of June 27, 1991 to exigent circumstances. This action is not necessary as the proposed amendment has been previously noticed in the **Federal Register** on July 31, 1991 (56 FR 36175) and no comments or requests for hearing have been received. The proposed amendment is necessary to load the new Zircaloy fuel and operate the plant. Therefore, the exigent circumstances exist, as the current TS does not allow the fuel to be loaded and will delay the resumption of operation of the plant.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated.

All Chapter 15 accidents were reviewed to determine if they were impacted by the proposed change to Technical Specification 6.9.1.9. This proposed change is to the Technical Specifications only. There are no hardware changes associated with it and no equipment that is important to safety is affected by the proposed change. Adding the reference of the NRC SER for the LBLOCA analysis in no way will affect the plant response to design basis accidents.

The proposed change is to the Technical Specifications only and cannot be an initiating event for any previously analyzed accidents and as such does not affect the probability of occurrence of the previously evaluated accidents. Since plant operation and plant equipment important to safety are not affected by this proposed change, the offsite radiological releases from design basis accidents will not be increased and there will be no effect on the consequences of an accident previously analyzed.

2. Create the possibility of a new or different kind of accident from any previously evaluated.

As stated above, the proposed change is to the Technical Specifications only. The proposed change will not change plant conditions or plant response sufficiently to create an accident of a different type than previously evaluated. Adding a reference to the Technical Specifications will not affect plant conditions and thus, there is no possibility of a malfunction of a different type than previously analyzed.

3. Involve a Significant Reduction in a Margin of Safety.

Since there is no impact on the consequences of any accident, there can be no impact on any of the protective boundaries.

Adding the reference to Section 6.9.1.9 better defines the approved analytical methods used to determine the core operating limits. Therefore, the proposed change meets the intent of the technical specifications and does not impact the margin of safety.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within fifteen (15) days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications

1991
UMI

Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to room P–223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:15 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By January 27, 1992, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at the Russell Library, 123 Broad Street, Middletown, Connecticut 06457.

If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2 the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If the amendment is issued before the expiration of 30-days, the Commission will make a final determination on the issue of no significant hazards consideration. If a hearing is requested, the final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 15-day notice period. However, should circumstances change during the notice period, such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 15-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 325–6000 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram identification Number 3737 and the following message addressed to John F. Stolz: Petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Gerald Garfield, Esquire, Day, Berry & Howard, Counselors at Law, City Place, Hartford, Connecticut 06103–3499, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearings will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amended dated December 16, 1991, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room, located at the Russell Library, 123 Broad Street, Middletown, Connecticut 06457.

Dated at Rockville, Maryland, this 19th day of December 1991.

For the Nuclear Regulatory Commission.

Alan B. Wang,

Project Manager, Project Directorate I–4, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 91–30632 Filed 12–24–91; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–412]

Dequesne Light Co., Ohio Edison Co., the Cleveland Electric Illuminating Co., the Toledo Edison Co., Beaver Valley Power Station, Unit 2; Partial Denial of Amendment to Facility Operating License and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) has denied, in part, a request by Duquesne Light Company (DLC) for an amendment to Facility Operating License No. NPF–73, issued to DLC for operation of the Beaver Valley Power Station, Unit 2, located in Beaver County, Pennsylvania. Notice of Consideration of Issuance of this amendment was published in the **Federal Register** on August 20, 1991 (56 FR 41580).

The purpose of the DLC's amendment request was to revise the Technical Specifications (TS) by deleting a nonapplicable (first fuel cycle only) Action statement and reannotating the last two Action statements. It will also modify Table 3.3–11 by deleting a nonapplicable (first fuel cycle only) note.

Included in this proposal was a request to reduce the total number of channels specified in table 3.3–11 for the Reactor Vessel Level Indication System (RVLIS) from 2 to 1. The proposed reduction in RVLIS channels is not consistent with Generic Letter 83–37 which specifies 2 channels, nor is it consistent with the Westinghouse Standard Technical Specifications. Furthermore, the current requirements for RVLIS are not unique to Beaver Valley Unit 2. Therefore, the NRC staff has concluded that your request to reduce the total number of RVLIS channels from 2 to 1 is not acceptable.

All other provisions of the amendment request have been approved by amendment No. 41 dated December 13, 1991. Notice of Issuance of Amendment No. 41 will be published in the Commission's biweekly **Federal Register** notice.

The DLC was notified of the Commission's partial denial of the proposed change by letter dated December 13, 1991.

By January 27, 1992, the DLC may demand a hearing with respect to the denial described above. Any person whose interest may be affected by this proceeding may file a written petition for leave to intervene.

A request for hearing or petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date.

A copy of any petitions should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Gerald Charnoff, Esquire and Jay E. Silberg, Esquire, Shaw, Pittman, Potts & Trowbridge, 2300 N Street, NW., Washington, DC 20037, attorney for the DLC.

For further details with respect to this action, see (1) the application for amendment dated April 12, 1991, and (2) the Commission's letter to the DLC dated December 13, 1991.

These documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the B.F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001. A copy of item (2) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Document Control Desk.

Dated at Rockville, Maryland, this 13th day of December 1991.

For the Nuclear Regulatory Commission.

John F. Stolz,

Director, Project Directorate I–4, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

[FR Doc. 91–30628 Filed 12–24–91; 8:45 am]

BILLING CODE 7590–01–M

[Docket No. 50–289]

GPU Nuclear Corp.; Notice of Consideration of Issuance of Amendment To Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR–50, issued to GPU Nuclear Corporation, (the licensee), for operation of the Three Mile Island Nuclear Station, Unit 1 located in Dauphin County, Pennsylvania.

The proposed amendment would increase the number of spent fuel assemblies which may be stored in the spent fuel pool (SFP) from 749 assemblies to 1494 assemblies through use of high density spent fuel storage racks whose design incorporates Boral as a neutron absorber. The changes would affect Technical Specification Sections 5.4.1.a and 5.4.2. and adds a Figure 5–4.

Projections now indicate that full core discharge capability will be lost following the scheduled 1993 refueling outage. The increased storage capacity will extend his capability to the year 2023, well beyond the present license expiration date of 2014.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

1. Operation of the facility in accordance with the proposed amendment would not involve a significant increase in the probability of occurrence or the consequences of an accident previously evaluated. The following previously analyzed accident scenarios have been considered as part of the analyses required to support the

VOL
56
ISS
248
DE
26
1991
UMI

installation of high density spent fuel storage racks:

a. Spent Fuel Assembly Drop—The criticality acceptance criterion, K_{eff} [less than or equal to] 0.95, is maintained and the radiological consequences remain bounded by previous analysis. Therefore, the proposed change has no effect on this accident scenario.

b. Spent Fuel Cask Drop—TMI–1 Technical Specifications preclude movement of spent fuel cask when fuel is stored in the spent fuel storage pools. Therefore, the proposed change has no effect on this accident scenario.

c. Seismic Event—The new racks are designed and fabricated to remain functional during and after a Safe Shutdown Earthquake under all loading conditions. Analysis has demonstrated that no rack-to-rack or rack-to-wall impacts occur. The potential for overturning has been analyzed and shown to be not possible. Pool slab analysis has demonstrated adequate structural integrity for all postulated loading conditions. Therefore, the proposed change has no effect on this accident scenario.

d. Loss of Spent Fuel Pool Cooling—Sufficient time is available to provide an alternate means of cooling in the event of a failure in the cooling system. Therefore, the proposed change has no effect on this accident scenario.

Accordingly, the proposed modification does not increase the probability of occurrence or the consequences of an accident previously evaluated.

2. Operation of the facility in accordance with the proposed amendment would not create the possibility of a new or different kind of accident from any accident previously evaluated. Administrative controls during rack installation will preclude the movement of a new or existing rack[s] directly over any fuel. The new fuel storage vault and the decontamination pit will be equipped with structural impact shields adequate to sustain a potential rack drop. The Fuel Storage Building crane has sufficient safety factor to preclude potential single-failure mechanisms. Therefore, this change has no effect on the possibility of creating a new or different kind of accident from any accident previously evaluated.

3. Operation of the facility in accordance with the proposed amendment would not involve a significant reduction in a margin of safety. Analysis has demonstrated that the established critically acceptance criterion, K_{eff} [less than or equal to] 0.95 including uncertainties, is maintained with the racks fully loaded with fuel of the highest anticipated reactivity. Thermal-hydraulic analyses is not exceeded for the increase in pool heat load, and that the maximum local water temperature along with the hottest fuel assembly is below the nuclear boiling condition value. The maximum calculated bulk pool water temperature of 160°F results in a negligible decrease in the time-to-boil margin of safety. The rack materials used are compatible with the spent fuel pool and the spent fuel assemblies. The structural considerations have maintained margins of safety against tilting and deflection or movement. Therefore, this change has no effect on the margins of safety related to nuclear criticality, thermal and structural integrity, and material compatibility.

The proposed amendment is considered to be in the same category as example (x) of amendments that are considered not likely to involve significant hazards consideration as provided in the final NRC adoption of 10 CFR 50.92 published on page 7751 of the **Federal Register** Volume 51, No. 44, March 6, 1986. This example indicates that an amendment is not likely to involve a significant hazards condition as follows:

Criterion (1)

The storage expansion method consists of either replacing existing racks with a design which allows closer spacing between stored spent fuel assemblies or placing additional racks of the original design on the pool floor if space permits.

Proposed Amendment

The TMI–1 spent fuel pool rerack involves both replacing existing and adding new racks where space permits. The new racks allow closer spacing of the stored spent fuel by incorporating a neutron absorber and requiring that only burned fuel be stored in Region II. Region I is designed for allowing safe storage of fresh or irradiated fuel.

Criterion (2)

The storage expansion method does not involve rod consolidation or double tiering.

Proposed Amendment

The TMI–1 racks are not double tiered and all racks will sit on the spent fuel pool floor. Additionally, the amendment application does not involve consolidation of spent fuel.

Criterion (3)

The K_{eff} of the pool is maintained less than or equal to 0.95.

Proposed Amendment

The design of the new spent fuel racks contains a neutron absorber, Boral, to allow close storage of spent fuel assemblies while ensuring that the K_{eff} remains less than 0.95 under all operating conditions with pure water in the pool.

Criterion (4)

No new technology or unproven technology is utilized in either the construction process or the analytical techniques necessary to justify the expansion.

Proposed Amendment

The rack designer, Holtec International, has licensed at least ten (10) other racks of the same design. The construction processes and analytical techniques remain substantially the same as these other ten (10) rack installations. Thus, no new or unproven technology is utilized in the construction or analysis of the high density TMI–1 spent fuel racks.

Thus, the submittal meets example (x) presented in the supplementary information accompanying publication of the Final Rule and is considered as not involving significant hazards considerations.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within thirty (30) days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Written comments may be submitted by mail to the Regulatory Publications Branch, Division of Freedom of Information and Publications Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to room P–223, Phillips Building, 7920 Norfolk Avenue, Bethesda, Maryland, from 7:30 a.m. to 4:14 p.m. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555. The filing of requests for hearing and petitions for leave to intervene is discussed below.

By January 27, 1992, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555 and at the local public document room located at the Government Publications Section, State Library of Pennsylvania, Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania 17105. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at 1–(800) 325–6000 (in Missouri 1–(800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to John F. Stolz: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Ernest L. Blake, Jr., Esquire, Shaw, Pittman, Potts & Trowbridge, 2300 N Street, NW., Washington, DC 20037, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

The Commission hereby provides notice that this is a proceeding on an application for a license amendment falling within the scope of section 134 of the Nuclear Waste Policy Act of 1982 (NWPA), 42 U.S.C. 10154. Under section 134 of the NWPA, the Commission, at the request of any party to the proceeding, must use hybrid hearing procedures with respect to "any matter which the Commission determines to be in controversy among the parties." The hybrid procedures in section 134 provide for oral argument on matters in controversy, preceded by discovery under the Commission's rules, and the designation, following argument, of only those factual issues that involve a genuine and substantial dispute, together with any remaining questions of law, to be resolved in an adjudicatory hearing. Actual adjudicatory hearings are to be held on only those issues found to meet the criteria of section 134 and set for hearing after oral argument.

The Commission's rules implementing section 134 of the NWPA are found in 10 CFR part 2, subpart K, "Hybrid Hearing Procedures for Expansion of Spent Nuclear Fuel Storage Capacity at Civilian Nuclear Power Reactors" (published at 50 FR 41670, October 15, 1985) to 10 CFR 2.1101 *et seq.* Under those rules, any party to the proceeding may invoke the hybrid hearing procedures by filing with the presiding officer a written request for oral argument under 10 CFR 2.1109. To be timely, the request must be filed within 10 days of an order granting a request for hearing or petition to intervene. (As outlined above, the Commission's rules

VOL
56
ISS
248
DE
26
1991
UMI

in 10 CFR part 2, subpart G, and 2.714 in particular, continue to govern the filing of requests for a hearing or petitions to intervene, as well as the admission of contentions.) The presiding officer shall grant a timely request for oral argument. The presiding officer may grant an untimely request for oral argument only upon showing of good cause by the requesting party for the failure to file on time and after providing the other parties an opportunity to respond to the untimely request. If the presiding officer grants a request for oral argument, any hearing held on the application shall be conducted in accordance with the hybrid hearing procedures. In essence, those procedures limit the time available for discovery and require that an oral argument be held to determine whether any contentions must be resolved in adjudicatory hearing. If no party to the proceedings requests oral argument, or if all untimely requests for oral argument are denied, then the usual procedures in 10 CFR part 2, subpart G, apply.

For further details with respect to this action, see the application for amendment dated November 14, 1990, as supplemented June 6, June 14, and September 18, 1991, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC 20555, and at the local public document room located at the Government Publications Section, State Library of Pennsylvania, Walnut Street and Commonwealth Avenue, Box 1601, Harrisburg, Pennsylvania 17105.

Dated at Rockville, Maryland, this 18th day of December 1991.

For the Nuclear Regulatory Commission.

John F. Stolz,

Director, Project Directorate I–4, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

OFFICE OF PERSONNEL MANAGEMENT

Request for Extension of OPM Form 1530

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (title 44, U.S.C., chapter 35), this notice announces a request to extend an information collection from the public. OPM Form 1530, Report of Medical Examination of Person Electing Survivor Benefit Under the Civil Service Retirement System, is completed by employees who wish to provide a survivor benefit for a person who has an insurable interest in the applicant. This form is designed to collect information from both the applicant and the applicant's physician regarding the applicant's health.

Approximately 1,000 insurable interest survivor annuities are elected annually. It requires one hour and 30 minutes to assemble the needed information. The annual burden is 1500 hours.

For copies of this proposal, contact C. Ronald Trueworthy, on (703) 908–8550.

ADDRESSES: Send or deliver comments to:

Mary Beth Smith-Toomey, Program Clearance Officer, U.S. Office of Personnel Management, 1900 E. Street, NW., SBH22, Washington, DC 20415.

and

Joseph Lackey, OPM Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, NW., room 3002, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Mary Beth Smith-Toomey (202) 606–0623.

Office of Personnel Management.

Constance Berry Newman,

Director.

BILLING CODE 6325–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–30086; File No. SR–CBOE–91–46]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the Chicago Board Options Exchange, Inc., Relating to Telecommunication Charges

December 17, 1991.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on November 22, 1991, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the CBOE. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The CBOE proposed a new $10 per month fee to be charged to active clearing firms (those actually executing trades)[1] to recover the cost of an enhancement to the CBOE's trading floor telephone system. The enhancement will provide clearing firms with telephone access from the trading floor to the back offices of clearing firms. The text of the proposed rule change is available at the Office of the Secretary, CBOE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CBOE included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The CBOE has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis, for, the Proposed Rule Change

(1) Purpose

As an enhancement to intraday trade checking, the Exchange is providing telephone access from the trading floor to clearing firm back offices. Members will have direct access from each trading post and station to clearing firm back offices for the review of trade tickets and out-trade reports. In order to cover the cost of this service, the Exchange has determined to charge each active clearing firm ten dollars per months.

(2) Basis

The Exchange believes that the proposed rule change is consistent with

[1] The fee is only applicable to active clearing firms. Firms that are members of both the CBOE and the Options Clearing Corporation are eligible to self-clear. Not all such firms, however, are actively self-clearing. Some of such firms are executing through other clearing members, and others are inactive for various reasons. Only those firms that are actually executing trades on a daily basis will be deemed "active firms" and assessed the fee. See letter from Nancy L. Nielsen, Assistant Corporate Secretary, CBOE, to Mark McNair, Staff Attorney, Division of Market Regulation, dated December 9, 1991.

section 6(b) of the Act, in general, and furthers the objectives of section 6(b)(4), in particular, in that it provides for the equitable allocation of reasonable dues, fees, and other charges among its members.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The CBOE does not believe that the proposed rule change will impose any inappropriate burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing rule change establishes or changes a due, fee or other charge imposed by the Exchange, it has become effective pursuant to section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b–4 thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the CBOE. All submissions should refer to the file number in the caption above and should be submitted by January 16, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Jonathan G. Katz,

Secretary.

[FR Doc. 91–30823 Filed 12–24–91; 8:45 am]

BILLING CODE 8010–01–M

[Release No. 34–30101; File No. SR–OCC–91–20]

Self-Regulatory Organizations; the Options Clearing Corporation; Notice of Filing and Order Granting Accelerated Approval of Proposed Rule Change Relating to Rescission of Amendment No. 5 to Stockholders Agreement

December 18, 1991.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on December 18, 1991, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change described in Items I, II, and III below, which items have been prepared by the self-regulatory organization. The Commission is publishing this notice and order to solicit comments on the proposed rule change from interested persons and to approve the proposed rule change on an accelerated basis.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The purpose of the proposed rule change is to rescind Amendment No. 5 to the OCC Stockholders Agreement ("Amendment No. 5") and to repeal Article III, section 9(b) of the By-laws. Amendment No. 5 provided in substance that in the event of a sale or liquidation of OCC, OCC's stockholder would pay over a portion of the after-tax proceeds to Clearing Members. Article III, section 9(b) of the By-laws provided for the establishment of a Transaction Committee to represent the interests of Clearing Members in transactions covered by Amendment No. 5.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, OCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. OCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to rescind Amendment No. 5 and to repeal Article III, section 9(b) of OCC's By-laws. In a pending audit of OCC's income tax returns for the years 1987 through 1990, an Internal Revenue Service ("IRS") auditor preliminarily has asserted that OCC's Clearing Members should be treated as stockholders for federal income tax purposes. If this contention were to be sustained, OCC might be required to treat clearing fee refunds as non-deductible dividends rather than as deductible business expenses.

The IRS auditor has cited Amendment No. 5, which became effective in October 1990,[1] as support for his position. Amendment No. 5 provided in substance that in the event of a sale or liquidation of OCC, OCC's stockholders would pay over a portion of the after-tax proceeds to those entities that were then Clearing Members. The IRS auditor contends that Amendment No. 5 gives Clearing Members an economic interest in OCC's assets similar to that of a stockholder.

OCC considers the auditor's position to be without merit. Nevertheless, since the events that would trigger Amendment No. 5 are sufficiently remote, OCC does not believe that providing for them is important enough to warrant giving the IRS an additional argument, however weak, in support of its audit position.

The proposed rule change will approve a New Amendment No. 6 to the Stockholders Agreement that will rescind Amendment No. 5 retroactively to its effective date. The proposed rule change will also repeal article III, section 9(b) of OCC's By-laws, which provides for the establishment of a Transaction Committee to represent the interests of Clearing Members in transactions covered by Amendment No. 5. Lastly, the proposal will delete from article III, section 9 certain language that was replaced in a previous rule filing but inadvertently was not deleted.[2]

[1] Securities Exchange Act Release No. 28500 (October 1, 1990), 55 FR 41407 (File No. SR–OCC–90–07).

[2] Securities Exchange Act Release No. 27211 (September 1, 1989), 54 FR 37855.

VOL 56 ISS 248 DEC 26 1991 UMI

B. Self-Regulatory Organization's Statement on Burden on Competition

OCC does not believe that the proposed rule will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Comments on the proposed rule change were not and are not intended to be solicited by OCC, and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Commission believes the proposed rule change is consistent with the Act and in particular with sections 17A(b)(3) (A) and (F) of the Act.[3] Those Sections require that a clearing agency, such as OCC, be organized and that its rules be designed to assure the safeguarding of securities and funds which are in its custody and control or for which it is responsible. Clearing fees, a portion of which are returned periodically to Clearing Members, represent funds that are within the custody and control of OCC. The purpose of this proposed rule change is to modify the process by which the after-tax proceeds of a sale or liquidation of OCC are to be distributed to Clearing Members. By rescinding Amendment No. 5, OCC will help clarify the tax treatment of annual clearing fee refunds.

OCC has requested that the Commission find good cause for approving the proposed rule change prior to thirty days after the date of publication of this notice in the **Federal Register**. The Commission finds good cause for so approving the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof because of the Commission's belief that it is desirable that the proposed rule change be approved before OCC authorizes at its December 19, 1991, Board of Directors meeting any refund of clearing fees to be paid in 1991.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW, Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principle office of OCC. All submissions should refer to File No. SR-OCC-91-20 and should be submitted by January 16, 1992.

V. Conclusion

On the basis of the foregoing, the Commission finds the proposed rule change to be consistent with the Act and in particular with section 17A of the Act.

It is therefore ordered, pursuant to section 19(b)(2) of the Act [4] that the proposed rule change be, and hereby is, approved on an accelerated basis.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority. [5]

Jonathan G. Katz,

Secretary.

DEPARTMENT OF STATE

[Public Notice 1540]

United States Organization for the International Telegraph and Telephone Consultative Committee (CCITT); Study Group A Meeting; Meeting

The Department of State announces that CCITT Study Group A of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT) will meet on Thursday, January 16, 1992 in Conference Room 1107, commencing at 9:30 a.m. at the Department of State, 2201 C Street, NW, Washington, DC 20520.

The Agenda for this meeting will include a review of the results of the Baltimore Rapporteurs meeting of Study Group III, several SG-A ad hoc meetings to prepare for Study Groups II and III activities upcoming in January and February, 1992, and upcoming meetings of Study Group I. A more detailed draft agenda for the Study Group A meeting will be introduced at this meeting.

Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chair.

Please Note: Persons planning to attend the above meeting must announce this no later than five days before the meeting to the Department of State, Earl S. Barbely (202) 647-0201 (fax 202-647-7407). The announcement must include name, social security number, and date of birth, if you have not already provided this personal data to this office. The above includes government and non-government attendees. All attendees must use the C Street entrance.

Please bring 60 copies of documents to be considered at this meeting. If the document has been mailed, bring only 10 copies.

Dated: December 17, 1991.

Earl S. Barbely,

Director Telecommunications and Information Standards, Chairman, U.S. CCITT National Committee.

BILLING CODE 4710-07-M

[Public Notice 1536]

Overseas Schools Advisory Council; Meeting

The Overseas Schools Advisory Council, Department of State, will hold its Executive Committee meeting on Wednesday, January 22, 1992, at 9:30 a.m. in Conference Room 1105, Department of State Building, 2201 C Street, NW., Washington, DC. The meeting is open to the public.

The Overseas Schools Advisory Council works closely with the U.S. business community in improving those American-sponsored schools overseas which are assisted by the Department of State and which are attended by dependents of U.S. government families and children of employees of U.S. corporations and foundations abroad.

This meeting will deal with issues related to the work and the support provided by the Overseas Schools Advisory Council to the American-sponsored overseas schools.

Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chairman. Admittance of public members will be limited to the seating available. Access to the State Department is controlled and individual building passes are required for each attendee. Entry will be facilitated if arrangements are made in advance of the meeting. Persons who plan to attend should so advise the office of Dr. Ernest N. Mannino, Department of State, telephone 703-875-7800, prior to January 20. All attendees must use the C Street entrance to the building.

Dated: December 11, 1991.

Ernest N. Mannino,

Executive Secretary, Overseas Schools Advisory Council.

Shipping Coordinating Committee; Subcommittee on Safety of Life at Sea; Working Group on Carriage of Dangerous Goods; Meeting

The Working Group on Carriage of Dangerous Goods of the Subcommittee on Safety of Life at Sea (SOLAS) will conduct an open meeting at 9:30 a.m. on January 15, 1992, in room 2415, at U.S. Coast Guard Headquarters, 2100 2d Street, SW., Washington, DC 20593-0001. The purpose of the meeting is to finalize preparations for the 43rd Session of the Subcommittee on the Carriage of Dangerous Goods of the International Maritime Organization (IMO) which is scheduled for January 27-31, 1992, at the IMO Headquarters in London. The agenda items include:

a. Amendments to the International Maritime Dangerous Goods (IMDG) Code.

b. Implementation of the IMDG Code.

c. Amendments to section 13 of the General Introduction to the IMDG Code

VOL
56
ISS
248
DE
26
1991
UMI

to cover transport in tanks of solid dangerous substances including molten substances in solidified form, and the transport of dangerous substances under heated conditions.

d. Revision of section 21 of the General Introduction—Controlled temperature requirements.

e. Development of criteria for stowage and segregation requirements.

f. Development of criteria for the hermetic sealing of receptacles, packages and Intermediate Bulk Containers.

g. Amendments to the Emergency Procedures for Ships Carrying Dangerous Goods and the Medical First Aid Guide for Use in Accidents involving Dangerous Goods.

h. Implementation of Annex III of the Marine Pollution Convention (MARPOL 73/78), as amended, and amendments to the IMDG Code to cover pollution aspects (including immersion testing of packages for marine pollutants).

i. Carriage of dangerous goods on vehicle decks of passenger ships.

j. Requirements for hazardous ships' stores.

k. Transboundary movement of wastes by sea.

l. Stowage and segregation in open-top container ships.

m. Relations with other organizations.

n. Requirements for carriage of irradiated nuclear fuel.

o. Marking of explosives for detectability.

p. Reports on incidents involving packaged dangerous goods or marine pollutants on board ships or in port areas.

q. Dangerous goods in passengers' baggage and cars.

r. Carriage of dangerous goods documentation.

s. Updating of the Recommendations on the Safe Transport, Handling and Storage of Dangerous Goods in Port Areas.

t. Review of existing ships' safety standards.

u. Review of the Hazardous and Noxious Substances (HNS) Working Group Reports—Draft HNS Convention.

v. Night signals on ships carrying dangerous goods.

Members of the public may attend this meeting up to the seating capacity of the room. Interested persons may seek information by writing: CDR K. J. Eldridge, U.S. Coast Guard (G–MTH–1), 2100 Second Street, SW., Washington, DC 20593–0001 or by calling (202) 267–1577.

Dated: December 17, 1991.

Bruce Carter,

Executive Secretary, Shipping Coordinating Committee.

DEPARTMENT OF TRANSPORTATION

Aviation Proceedings; Agreements Filed During the Week Ended December 13, 1991

The following Agreements were filed with the Department of Transportation under the provisions of 49 U.S.C. 412 and 414. Answers may be filed within 21 days of date of filing.

Docket Number: 47904.
Date filed: December 9, 1991.
Parties: Members of the International Air Transportation Association
Subject: PAC/Reso/371 dated December 2, 1991. Finally Adopted Resolutions, R–1 to R–21. PAC/Meet/115 dated December 2, 1991–Minutes.
Proposed Effective Date: April 1, 1992.

Docket Number: 47905.
Dated Filed: December 9, 1991.
Parties: Members of the International Air Transport Association.
Subject: Telex dated December 5, 1991. Reso 024f—Fare Changes From Sri Lanka.
Proposed Effective Date: Upon Necessary Government Approvals.

Docket Number: 47906.
Date filed: December 9, 1991.
Parties: Members of the International Air Transport Association.
Subject: Telex dated December 2, 1991. Mail Vote 525–Belgium to Libya GIT fares (Reso 084gg).
Proposed Effective Date: January 1, 1992.

Docket Number: 47907.
Date filed: December 9, 1991.
Parties: Members of the International Air Transport Association.
Subject: TC23 Reso/P0476 dated November 20, 1991. Middle East–TC3 Expedited Resos R–1 to R–4.
Proposed Effective Date: March 1, 1992.

Docket Number: 47914.
Dated filed: December 13, 1991.
Parties: Members of the International Air Transport Association.
Subject: Telex dated December 5, 1991. Mail Vote 526 (China-Japan fares) R–1 to R–4.
Proposed Effective Date: January 4, 1992.

Docket Number: 47915.
Date filed: December 13, 1991.
Parties: Members of the International Air Transport Association.
Subject: TC2 Reso/P 1172 dated December 5, 1991. Europe-Middle East Expedited Resos R–1 to R–5.
Proposed Effective Date: February 1, 1992.

BILLING CODE 4910–62–M

Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart Q During the Week Ended December 13, 1991

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under subpart Q of the Department of Transportation's Procedural Regulations (See 14 CFR 302.1701 et seq.). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: 47911.
Date filed: December 11, 1991.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: January 8, 1992.
Description: Application of Delta Air Lines, Inc., pursuant to section 401 of the Act and subpart Q of the Regulations applies for a new or amended certificate of public convenience and necessity to permit Delta to provide foreign air transportation between Honolulu, Hawaii and Nagoya, Japan.

Docket Number: 47912.
Date filed: December 12, 1991.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: January 9, 1992.

Description: Application of Patriot Airlines, Inc., pursuant to section 401 of the Act and subpart Q of the Regulations, for issuance of a certificate of public convenience and necessity so as to authorize Patriot to provide interstate and overseas air transportation of persons, property and mail between various points in the United States.

Docket Number: 47917.
Date filed: December 13, 1991.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: January 10, 1992.
Description: Application of USAir, Inc., pursuant to section 401 of the Act and subpart Q of the Act applies for a new or amended certificate of public convenience and necessity so as to authorize USAir to provide scheduled foreign air transportation on a nonstop basis between Baltimore/Washington and Tampa, on the one hand, and Grand Cayman, Cayman Islands, on the other hand.

Docket Number: 44992.
Date filed: December 10, 1991.
Due Date for Answers, Conforming Applications, or Motion to Modify Scope: January 7, 1992.
Description: Application of Compania de Aviacion "Faucet," S.A., pursuant to section 402 of the Act and subpart Q of the Regulations, applies for renewal of its foreign air carrier permit to engage in scheduled foreign air combination passenger, property and mail service between the United States and Peru.

Docket Number: 44944.
Date filed: December 11, 1991.
Due Date for Answers, Conforming Application, or Motion to Modify Scope: January 8, 1992.
Description: Application of Aeronaves Del Peru, pursuant to section 402 of the Act, requests renewal of its foreign air carrier permit for an additional indefinite period authorizing it to engage in scheduled foreign air transportation of property and mail twice weekly between Lima, Peru; via the intermediate points Panama City, Panama; Guayaquil, Ecuador (blind sector); Bogata and Cali, Columbia (blind sectors); and the terminal point Miami, Florida.

DEPARTMENT OF THE TREASURY

Customs Service

Current IRS Interest Rate Used In Calculating Interest on Overdue Accounts and Refunds

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of calculation and interest.

SUMMARY: This notice advises the public of the interest rates for overpayments and underpayments of Customs duties. The rates are 8 percent for overpayments and 9 percent for underpayments for the quarter beginning January 1, 1992. This notice is being published for the convenience of the importing public and Customs personnel.

EFFECTIVE DATE: January 1, 1992.

FOR FURTHER INFORMATION CONTACT: Robert B. Hamilton, Jr., Revenue Branch, National Finance Center, (317) 298–1245.

SUPPLEMENTARY INFORMATION:

Background

Pursuant to 19 U.S.C. 1505 and Treasury Decision 85–93, published in the **Federal Register** on May 29, 1985 (50 FR 21832), the interest rate paid on applicable overpayments or underpayments of Customs duties shall be in accordance with the Internal Revenue Code rate established under 20 U.S.C. 6621. Interest rates are determined based on the short-term Federal rate. The interest rate that Treasury pays on overpayments will be the short-term Federal rate plus two percentage points. The interest rate paid to the Treasury for underpayments will be the short-term Federal rate plus three percentage points. The rates will be rounded to the nearest full percentage.

The interest rates are determined by the Internal Revenue Service on behalf of the Secretary of the Treasury based on the average market yield on outstanding marketable obligations of the U.S. with remaining periods to maturity of 3 years or less and are to fluctuate quarterly. The rates are determined during the first month of a calendar quarter and become effective for the following quarter.

The rates of interest for the period of January 1, 1992—March 31, 1992, are 8 percent for overpayments and 9 percent for underpayments. These rates will remain in effect through March 31, 1992, and are subject to change on April 1, 1992.

Dated: December 20, 1991.

Michael H. Lane,

Acting Commissioner of Customs.

BILLING CODE 7533-01-M

UNITED STATES POSTAL SERVICE BOARD OF GOVERNORS

The Board of Governors of the United States Postal Service, pursuant to its Bylaws (39 C.F.R. Section 7.5) and the Government in the Sunshine Act (5 U.S.C. Section 552b), hereby gives notice that it intends to hold a meeting at 1:00 p.m. on Monday, January 6, 1992, and at 8:30 a.m. on Tuesday, January 7, 1992, in Washington, D.C. The January 6 meeting, at which the Board will consider the Postal Rate Commission's November 22, 1991, Opinion and Recommended Decision Approving Stipulation and Agreement in Docket No. MC91-2, is closed to the public. (See 56 FR 64543, December 10, 1991)

The January 7 meeting is open to the public and will be held in the Benjamin Franklin Room on the 11th floor of U.S. Postal Service Headquarters, 475 L'Enfant Plaza, S.W. The Board expects to discuss the matters stated in the agenda which is set forth below. Requests for information about the meeting should be addressed to the Secretary of the Board, David F. Harris, at (202) 268-4800.

AGENDA

Monday Session

January 6-1:00 p.m. (Closed)

1. Conservation of the Postal Rate Commission's November 22, 1991, Opinion and Recommended Decision Approving Stipulation and Agreement in Docket No. MC91-2.

Tuesday Session

January 7-8:30 a.m. (Open)

1. Minutes of the Previous Meeting, December 2-3, 1991.
2. Remarks of the Postmaster General. (Anthony M. Frank)
3. Annual Report on Open Meeting Compliance. (David F. Harris, Secretary of the Board)
4. Report on Quality Program. (David H. Charters, Senior Assistant Postmaster General, Quality)
5. Status Report on Strategic Plan. (Frank R. Power, Assistant Postmaster General, Planning Department)
6. Annual Report of the Postmaster General. (Edward E. Horgan, Jr., Associate Postmaster General)
7. Report on Human Resources Group. (Joseph J. Mahon, Jr., Senior Assistant Postmaster General, Human Resources Group)
8. Annual Report on EEO/Affirmative Action. (Donna A. Galloway, Executive Director, Office of Equal Employment Opportunity)
9. Report on Technology Resource Department. (Karen T. Uemoto, Assistant Postmaster General, Technology Resource Department)
10. Capital Investments.
   a. Small Parcel and Bundle Sorter. (William J. Dowling, Assistant Postmaster General, Engineering and Technical Support Department)
   b. Raleigh, North Carolina, GMF and VMF. (Stanley W. Smith, Assistant Postmaster General, Facilities Department, and William J. Henderson, Greensboro Field Division General Manager/Postmaster)
   c. Columbia, South Carolina, GMF and VMF. (Mr. Smith and Bill R. Austin, Columbia Field Division General Manager/Postmaster)
   d. Bangor, Maine, Mail Processing Facility. (Mr. Smith and Ray D. Stewart, Manchester, New Hampshire, Field Division General Manager/Postmaster)
   e. Norman, Oklahoma, Technical Training Center Facility Deviation Request. (Mr. Smith and Elwood A. Mosley, Assistant Postmaster General, Training and Development Department)
11. Election of Chairman and Vice Chairman.
12. Tentative Agenda for February 3-4, 1992, meeting in Miami, Florida.

David F. Harris,

Secretary.

Title 3—

The President

Proclamation 6398 of December 23, 1991

National Ellis Island Day, 1992

By the President of the United States of America

A Proclamation

The ethnic diversity that we so proudly celebrate in the United States mirrors our rich heritage as a Nation of immigrants. "Here is not merely a Nation," wrote Walt Whitman, "but a teeming nation of nations . . . . Here is the hospitality which forever indicates heroes." One of the greatest symbols of American hospitality stands at Ellis Island in Upper New York Bay.

A century ago, on January 1, 1892, the immigrant station on Ellis Island was opened as a gateway to America. Between 1892 and 1954, nearly 17 million immigrants entered the United States through this portal. Many sought refuge from tyranny and persecution. All sought new lives in this great land of freedom and opportunity.

At Ellis Island, millions of immigrants from around the world were able to look across the Bay toward our magnificent Statue of Liberty, the famed "Mother of Exiles" who lifts her lamp "beside the golden door." During the mass wave of immigration that spanned from 1900 to 1914, they came, especially immigrants from throughout Southern and Eastern Europe. Indeed, 100 million Americans, some 40 percent of our population, can trace their ancestry through Ellis Island.

The course of immigration to this country has fluctuated throughout the history of the United States. Recent years, for example, have seen increased numbers of immigrants of Hispanic and Asian origin. But whatever their place of origin or point of entry, each generation of immigrants has bettered America.

Indeed, it is fitting that the restoration of Ellis Island has constituted the largest historic renovation project in the history of the United States. After all, immigration has been one of the largest single factors in our Nation's social, cultural, and economic development. Walt Whitman aptly noted that, in the eyes of the poet, "the other continents arrive as contributions . . . he gives them reception for their sake and for his own sake." That has always been true, for immigrants have enriched the United States beyond measure, bringing many contributions to our society along with the unique customs and traditions of their ancestral homeland. Most important, they have shared eagerly in the hard work of freedom, helping to defend the ideals of liberty and self-government and helping to build our churches, schools, factories, farms, and railroads.

Visiting Ellis Island today or seeing pictures of this place evokes strong chords in our national memory—the relief immigrants felt upon landing, the strangeness of new surroundings, the babble of languages, the pain of separation from family and friends remaining in the Old World, the despair felt by those few who were not admitted and forced to return to their countries. Whatever our personal histories, who does not recall the pictures—a woman in a head scarf holding a wide-eyed child, a man burdened with his belongings and tools of his trade, a 45-star flag perched above a full waiting room of anxious people—and not felt a breath of recognition; a twinge of silent pain; or, most of all, a feeling of gratitude that our ancestors chose to live or remain in this, the freest, greatest country on Earth?

VOL
56
ISS
248
DE
26
1991
UMI

America's history has long been a story of immigrants, and today Ellis Island stands as a glorious reminder that new chapters are being added to that narrative each day. Thus, as we celebrate the 100th anniversary of this historic place, evocative symbol of so much of our Nation's heritage, let us not only salute the many generous contributors who made its renovation possible but also offer a warm welcome to the immigrants of today—our fellow Americans of tomorrow.

The Congress, by Public Law 102–177, has designated January 1, 1992, as "National Ellis Island Day" and has authorized and requested the President to issue a proclamation in observance of this day.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim January 1, 1992, as National Ellis Island Day. I invite all Americans to observe this day with appropriate programs, ceremonies, and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of December, in the year of our Lord nineteen hundred and ninety-one, and of the Independence of the United States of America the two hundred and sixteenth.

George Bush

LIST OF PUBLIC LAWS

Note: This completes the listing of public laws enacted during the first session of the 102d Congress.

The list will be resumed when bills are enacted into public law during the second session of the 102d Congress, which convenes on January 3, 1992. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202-523-6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202-512-2470).

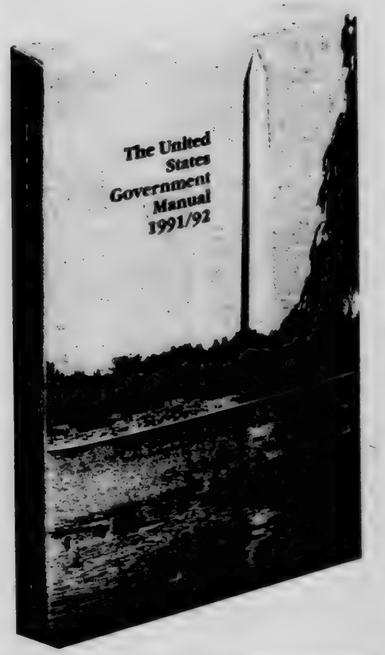
S. 1462/Pub. L. 102-243

Telephone Consumer Protection Act of 1991. (Dec. 20, 1991; 105 Stat. 2394; 9 pages) Price: $1.00

Last List December 24, 1991

Order Now!

The United States Government Manual 1991/92



As the official handbook of the Federal Government, the *Manual* is the best source of information on the activities, functions, organization, and principal officials of the agencies of the legislative, judicial, and executive branches. It also includes information on quasi-official agencies and international organizations in which the United States participates.

Particularly helpful for those interested in where to go and who to see about a subject of particular concern is each agency's "Sources of Information" section, which provides addresses and telephone numbers for use in obtaining specifics on consumer activities, contracts and grants, employment, publications and films, and many other areas of citizen interest. The *Manual* also includes comprehensive name and agency/subject indexes.

Of significant historical interest is Appendix C, which lists the agencies and functions of the Federal Government abolished, transferred, or changed in name subsequent to March 4, 1933.

The *Manual* is published by the Office of the Federal Register, National Archives and Records Administration.

$23.00 per copy

The Federal Register

Regulations appear as agency documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**

The **Federal Register**, published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool for you to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps you up to date on the Federal regulations currently in effect.

Mailed monthly as part of a **Federal Register** subscription are the LSA (List of CFR Sections Affected) which leads users of the **Code of Federal Regulations** to amendatory actions published in the daily **Federal Register**; and the cumulative **Federal Register Index**.

The **Code of Federal Regulations** (CFR) comprising approximately 196 volumes contains the annual codification of the final regulations printed in the **Federal Register**. Each of the 50 titles is updated annually.

Individual copies are separately priced. A price list of current **CFR** volumes appears both in the **Federal Register** each Monday and the monthly **LSA** (List of **CFR** Sections Affected). Price inquiries may be made to the Superintendent of Documents, or the Office of the Federal Register.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 56 FR 12345.

Rules and Regulations

Federal Register
Vol. 56, No. 249
Friday, December 27, 1991

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1030

[DA-91-020]

Milk in the Chicago Regional Marketing Area; Revision of Supply Plant Shipping Percentages

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Revision of rules.

SUMMARY: This action revises certain provisions of the Chicago Regional milk order for the month of December 1991. The action reduces the shipping percentages for pooling individual supply plants by 4 percentage points (from 5 to 1 percent of receipts) and units of supply plants by 6 percentage points (from 10 to 4 percent of receipts). The revision is made in response to a request by Central Milk Producers Cooperative, a federation of cooperatives that represents producers who supply the market. The action is necessary to prevent uneconomic shipments of milk from supply plants to distributing plants.

EFFECTIVE DATE: December 27, 1991.

FOR FURTHER INFORMATION CONTACT: John F. Borovies, Marketing Specialist, USDA/AMS/Division, Order Formulation Branch, room 2968, South Building, P.O. Box 96456, Washington, DC 20090-6456, 202-720-6274.

SUPPLEMENTARY INFORMATION: Prior document in this proceeding: Notice of Proposed Revision of Supply Plant Shipping Percentages: Issued November 27, 1991; published December 4, 1991 (56 FR 63470).

The Regulatory Flexibility Act (5 U.S.C. 601-612) requires the Agency to examine the impact of a proposed rule on small entities. Pursuant to 5 U.S.C. 605(b), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities. The action reduces the regulatory impact of the order on certain milk handlers and tends to ensure that the market will be adequately supplied with milk for fluid use with a smaller proportion of milk shipments from pool supply plants.

This final rule has been reviewed under Executive Order 12291 and Departmental Regulation 1512-1 and has been determined to be a "non-major" rule under the criteria contained therein.

This revision is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and the provisions of § 1030.7(b)(5) of the Chicago Regional order.

Statement of Consideration

After consideration of all relevant material, including the proposal set forth in the aforesaid notice, and other available information, it is hereby found and determined that the supply plant shipping percentages should be lowered by 4 percentage points (from 5 to 1 percent of receipts) for individual supply plants and by 6 percentage points (from 10 to 4 percent of receipts) for supply plant units during December 1991.

Currently, the order provides that individual supply plants must ship at least 5 percent of milk receipts to other plants to qualify as pool plants while a unit of supply plants must ship at least 10 percent of total receipts for pooling purposes during the months of September through December. During other months the shipping standards are 3 percent for individual plants and 6 percent for a unit of plants.

The Chicago order provides that the market administrator may adjust the shipping standards for individual plants and units of plants by up to 2 percentage points. The order also provides that the Director of the Dairy Division may increase the shipping standards by up to 5 percentage points or decrease the shipping standards up to 10 percentage points. The adjustments can be made to encourage additional milk shipments or to prevent uneconomic shipments.

The revision was requested by Central Milk Producers Cooperative (CMPC), a federation of cooperative associations that represent a substantial number of the producers who supply the market. CMPC contends that a reduction of the shipping percentages is necessary to prevent uneconomic shipments of milk from distant supply plants solely for pooling purposes.

Based on supply and sales estimates, CMPC requested that the market administrator reduce the shipping percentages by 2 percentage points during December. A reduction of shipping percentages by the market administrator has been issued for December.

Based on the most recent supply and demand estimates, CMPC indicated that a further reduction of the shipping percentages for December was necessary. CMPC contends that in order to make the most efficient use of available milk supplies as much as possible of nearby milk supplies will have to be utilized with reliance on distant supplies only on days when nearer milk supplies have been exhausted. For the month of December, CMPC indicates that such efficiencies can only be realized if the shipping standards for individual plants and units of supply plants are reduced to 1 and 4 percent of receipts, respectively.

In view of the supply/demand relationship for the market, the supply plant shipping percentages should be reduced for December 1991. A reduction of the shipping percentages will contribute to orderly marketing in that costly and inefficient shipments of milk from distant supply plants will not be necessary. Thus, dairy farmers who have supplied the market will continue to have their milk pooled under the order.

It is hereby found and determined that 30 days' notice of the effective date hereof is impractical, unnecessary, and contrary to public interest in that:

(a) This revision is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area for the month of December;

(b) This revision does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) Notice of the proposed revision was given interested parties and they were afforded opportunity to file written data, views, or arguments concerning this issue. No opposing views were received.

Therefore, good cause exists for making this revision effective upon publication in the **Federal Register**.

List of Subjects in 7 CFR Part 1030

Milk marketing orders.

It is therefore ordered, that the following provisions of § 1030.7(b) of the Chicago Regional milk order are hereby revised for the month December 1991.

PART 1030—MILK IN THE CHICAGO REGIONAL MARKETING AREA

1. The authority for 7 CFR part 1030 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended (7 U.S.C. 601–674).

§ 1030.7 [Amended]

2. In the introductory text of § 1030.7(b), the provision "5 percent" is revised to "1 percent" and the provision "10 percent" is revised to "4 percent" for the month of December 1991.

Signed at Washington, DC, on December 19, 1991.

W.H. Blanchard,

Director, Dairy Division.

BILLING CODE 3410–02–M

Commodity Credit Corporation

7 CFR Part 1403

Debt Settlement Policies and Procedures

AGENCY: Commodity Credit Corporation (CCC), USDA.

ACTION: Final rule.

SUMMARY: A proposed rule was published in the **Federal Register** on May 21, 1991, at 56 FR 23250, amending 7 CFR part 1403, which sets forth the debt settlement policies and procedures of CCC. This final rule adopts the provisions of the proposed rule. The regulations at 7 CFR part 1403 are currently applicable to debts by and against CCC arising out of domestic transactions. This final rule amends the regulations to provide that they will be applicable to all debts by and against CCC, whether or not they arise from domestic transactions. This final rule also makes special provisions for collection of price support loans, amends other existing provisions for clarity and makes technical changes.

EFFECTIVE DATE: December 27, 1991.

FOR FURTHER INFORMATION CONTACT: Carol Spencer, Debt Management and Contract Procedures Branch, Financial Management Division, ASCS, (202) 720–8975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed in conformance with Executive Order 12291 and Departmental Regulation 1512–1 and has been classified as "not major" because it will not result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs and prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, or innovation or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This action does not constitute a review as to need, currency, clarity, and effectiveness of these regulations under Departmental Regulation 1512–1. No sunset review date has been set for this regulation because review is ongoing.

This action will not increase the Federal paperwork burden for individuals, small businesses, and others and will not have a significant impact on a substantial number of small entities. Therefore, this action is exempt from the provisions of the Regulatory Flexibility Act and no Regulatory Flexibility Analysis was prepared.

This action will not have a significant impact specifically upon area and community development; therefore, review as established by Executive Order 12372 (July 14, 1982) was not used to assure that units of local government are informed of this action.

Background

The Federal Claims Collection Act of 1966, as amended by the Debt Collection Act of 1982 (the Act), (31 U.S.C. 3711 *et seq.*), and the joint regulations promulgated thereunder by the Comptroller General and the Attorney General (4 CFR parts 101–105) provide minimum standards for the administrative collection of claims by the United States. The Act also provides that nothing therein shall diminish the existing authority of the head of an agency to settle, compromise, or close claims. The CCC Charter Act, as amended (15 U.S.C. 714 *et seq.*), provides that CCC shall have authority to make final and conclusive settlement and adjustment of any claims by or against it, irrespective of the amount at issue. CCC is, therefore, not subject to the provisions of the Federal Claims Collection Act or its implementing regulations. However, it has been CCC policy to follow the Federal Claims Collection Standards (FCCS) to the maximum practicable extent. The FCCS require each federal agency to take aggressive action to collect debts owed it, and to cooperate with other federal agencies in their debt collection activities. Federal agencies are required to promulgate regulations consistent with the standards.

The regulations applicable to debts by and against CCC arising out of domestic transactions are currently set forth at 7 CFR part 1403. These transactions give rise to, among other types of claims, cargo losses and damage claims arising under title II of the Agricultural Trade Development and Assistance Act of 1954 ("Pub. L. 480"), as amended, or other export relief programs and section 416 of the Agricultural Act of 1949, as amended. Since CCC may, on occasion, enter into transactions outside of the United States, CCC has amended these regulations to provide that they will be applicable to all CCC transactions. This action ensures a uniform debt settlement policy for all CCC debts. This rule applies only to private debt. "Government-to-Government" debt settlement procedures are not affected.

This final rule also amends 7 CFR part 1403 to revise the definitions of "carrier" and "shipment" in order to include all CCC related transactions by all carriers, whether or not CCC actually owns the commodity being transported since, in many foreign transactions, CCC does not own the commodity but has provided significant financial assistance concerning the sale or shipment of the commodity.

In addition, this final rule amends 7 CFR part 1403 to clarify the manner in which administrative offset will be taken with respect to unsettled loans. Generally, the final rule provides that in order to adequately protect the rights of CCC debtors, similar to the procedure for other delinquent debts, administrative offset would not be taken until after a CCC loan has been delinquent for at least 30 days and the borrower has been timely notified that offset may be taken.

This final rule also amends 7 CFR part 1403 to provide that, with respect to debts resulting from price support loans, later payment interest shall begin to accrue from the date on which a claim is established, rather than from the date on which notice of the debt is first mailed or hand-delivered to the debtor. This change was necessary to prevent the charging of both loan interest and late payment interest during the period between the date of the demand letter and the date of claim establishment. As a result of this amendment, in order to maintain conformity, it was also necessary to change the date on which additional interest will be assessed on

debts arising from price support loans to sixty days after the late payment interest start date rather than ninety days after the late payment interest start date. Furthermore, since no late payment interest is being charged on debts arising from price support loans during the period between the date of the demand letter and the date of claim establishment, there is no need for late payment interest to be waived during that period. Therefore, the section providing for the waiver of late payment interest on a debt which is paid within 30 days after the date on which late payment interest began to accrue has been amended to exclude debts arising from price support loans.

Finally, this final rule makes minor technical changes to conform more closely with current procedures.

No comments were received on the proposed rule published in the **Federal Register** on May 21, 1991 (56 FR 23250).

List of Subjects in 7 CFR Part 1403

Claims, Income taxes, Loan programs—Agriculture.

Accordingly, 7 CFR part 1403 is amended as follows:

PART 1403—DEBT SETTLEMENT POLICIES AND PROCEDURES

1. The authority citation for 7 CFR part 1403 continues to read as follows:

Authority: 15 U.S.C. 714b and 714c.

§ 1403.1 [Amended]

2. Section 1403.1 is amended by removing the phrase "arising out of domestic transactions".

3. Section 1403.3 is amended by revising the definitions of "Carrier," "Delinquent debt" and "Shipment" to read as follows:

§ 1403.3 Definitions.

* * * * *

Carrier means a person or other entity, including but not limited to railroads, motor carriers, ocean carriers or piggyback enterprises, which provide transportation or other transportation-related services for compensation.

* * * * *

Delinquent debt means: (1) Any debt owed to CCC that has not been paid by the date specified in the applicable statute, regulation, contract, or agreement; or

(2) any debt that has not been paid by the date of an initial notification of indebtedness mailed or hand-delivered pursuant to § 1403.4.

* * * * *

Shipment means a carload, truckload, containerload, or other conveyance load of freight shipped from one location by one shipper for delivery. Such shipment must move in accordance with the terms of a commercial or ocean bill or lading, or other similar agreement between the carrier and CCC. In the case of export shipments, the agreement may also be between the carrier and a private voluntary organization, foreign government, or the Agency for International Development.

* * * * *

4. Section 1403.4 is amended by revising paragraphs (a) introductory text, (a)(4) and (a)(5)(i) to read as follows:

§ 1403.4 Demand for payment of debts.

(a) When a debt is due CCC, an initial written demand for payment of such amount shall be mailed or hand-delivered to the debtor. If the debt is not paid in full by the date specified in the initial demand letter, or if a repayment schedule acceptable to CCC has not been arranged with the debtor, the initial demand may be followed by two subsequent written demands at approximately 30-day intervals. The initial or subsequent demand letters shall specify the following:

* * * * *

(4) CCC's intent, if applicable, to collect the debt 30 days from the date of the initial demand letter, or other applicable period of time, by administrative offset from any CCC or ASCS payments due or to become due to the debtor, and that the claim may be reported to other agencies of the Federal government for offset from any amounts due or to become due to the debtor;

(5) * * *

(i) Existence or amount of the debt, it must be made within 15 days from the date of the letter, unless a different time period is specified in the contract, agreement or program regulation;

* * * * *

5. Section 1403.7 is amended by revising paragraph (b)(3) and adding paragraph (t) to read as follows:

§ 1403.7 Collection by administrative offset.

* * * * *

(b) * * *

(3) The debtor has been notified in writing that the debt may be collected by administrative offset if not paid; and

* * * * *

(t)(1) Notwithstanding the provisions of paragraph (b) of this section and § 1403.4, with respect to debts which are based upon an unsettled CCC loan, offset action may be taken when the debtor has been:

(i) Provided written notification of the maturity date of the loan and the debtor has not repaid the loan by the maturity date or, in the case of a nonrecourse price support loan, has not repaid the loan or forfeited the loan collateral to CCC by the date specified by CCC;

(ii) Notified of CCC's intent to establish an account on a debt record 30 days after the maturity date, or other applicable period of time, if the loan is not settled in accordance with the loan agreement;

(iii) Notified of the right to pursue an administrative appeal in accordance with Part 780 of this title if such an opportunity has not been previously provided;

(iv) Provided an opportunity to inspect and copy CCC records related to the debt; and

(v) Notified in writing that the debt may be collected by administrative offset if the loan is not repaid or, with respect to nonrecourse loans only, settled through forfeiture of the loan collateral.

(2) After a claim has been established by CCC with respect to a loan which has not been settled by the date specified in the loan agreement:

(i) In the event CCC takes possession of the collateral which is security for a nonrecourse of recourse loan made in accordance with parts 1421, 1427, 1434, or 1435 of this chapter, the value of such loan collateral shall be determined by CCC in accordance with the provisions of such parts which are used to determine the settlement value of the collateral. The value of such collateral shall be applied to the claim. Any amount remaining due on the claim must be paid by the debtor.

(ii) In the event CCC takes possession of the collateral which is the security for any other loan, the value of such collateral, as determined by CCC, less any costs incurred by CCC in taking possession and disposing of the collateral, shall be applied to the claim. Any amount remaining due on the claim must be paid by the debtor.

6. Section 1403.9 is amended by revising paragraphs (d)(2), (e), and (g) to read as follows:

§ 1403.9 Late payment interest and administrative charges.

* * * * *

(d) * * *

(2) With respect to debts not resulting from a statute, regulation, contract or agreement containing specific provisions for late payment interest and payment

VOL
56
ISS
249
DE
27
1991
UMI

due date, late payment interest shall begin to accrue from the date on which notice of the debt is first mailed or hand-delivered to the debtor, except that, with respect to debts resulting from price support loans, late payment interest shall begin to accrue from the date on which a claim is established.

* * * * *

(e)(1) Except as specified in paragraphs (a)(2) and (e)(2) of this section, an additional interest rate of three (3) percent per annum will be assessed on any portion of a debt which remains unpaid 90 days after the date described in paragraph (d)(1) or (d)(2) of this section, if no repayment schedule satisfactory to CCC has been agreed upon. Such rate will be assessed retroactively from the date late payment interest began to accrue and apply on a daily basis. Such rate shall continue to accrue until the delinquent debt has been paid.

(2) With respect to debts resulting from price support loans, an additional interest rate of three (3) percent per annum will be assessed on an portion of a debt which remains unpaid 60 days after the date on which a claim was established. Such rate will be assessed retroactively from the date of claim establishment and apply on a daily basis. Such rate shall continue to accrue until the delinquent debt has been paid.

* * * * *

(g) When a debt is paid in partial or installment payments, payments will be applied first to administrative charges, second to additional interest assessed in accordance with paragraph (e) of this section and late payment interest, and third to outstanding principal.

7. Section 1403.10 is amended by revising paragraphs (a) and (b) to read as follows:

§ 1403.10 Waiver of late payment interest, additional interest and administrative charges.

(a) Except for debts resulting from price support loans, CCC shall waive the collection of late payment interest and administrative charges on a debt or any portion of a debt which is paid within 30 days after the date on which late payment interest began to accrue.

(b) CCC may waive the assessment and collection of all or a portion of the additional interest on debts which are appealed in accordance with 7 CFR part 780, or other applicable appeal procedures, from either the date of the appeal or the date of delinquency, as determined by CCC, until the date a final administrative determination is issued. However, with respect to CCC programs administered by the Foreign Agricultural Service, CCC shall waive the assessment and collection of additional interest on debts which are appealed in accordance with 7 CFR part 780, or other applicable appeal procedures, from the date of delinquency until 30 days after the date of the letter informing the appellant of the final administrative determination. The waiver provisions of the paragraph shall not apply during any period of delay due to:

* * * * *

8. Section 1403.11 is revised to read as follows:

§ 1403.11 Administrative appeal.

If the opportunity to appeal the determination has not previously been provided under part 24 or 780 of this title or any other appeal procedure, a debtor may obtain an administrative review under part 780 of this title, or other applicable appeal procedures, of CCC's determination concerning the existence or amount of a debt, if a request is filed with the authority who made the determination within 15 days of the date of CCC's initial demand letter, unless a longer period is specified in the initial demand letter.

9. Section 1403.12 is revised to read as follows:

§ 1403.12 Additional administrative collection action.

Nothing contained in this part shall preclude the use of any other administrative or contractual remedy which may be available to CCC to collect debts owed to the Government.

10. Section 1403.16 is amended by revising paragraph (a) and adding paragraph (l) to read as follows:

§ 1403.16 Referral of delinquent debts to credit reporting agencies.

(a) This section specifies the procedures that will be followed by CCC and the rights that will be afforded to farm producers when CCC reports delinquent debts to credit reporting agencies.

* * * * *

(l) Notwithstanding the provisions of paragraphs (a) through (k) of this section, all commercial debts owed by debtors other than farm producers may be reported to credit reporting agencies.

Signed at Washington, DC, on December 19, 1991.

John A. Stevenson,

Acting Executive Vice President, Commodity Credit Corporation.

[FR Doc. 91-30869 Filed 12-26-91; 8:45 am]

BILLING CODE 3410-05-M

Farmers Home Administration

7 CFR Parts 1910, 1930, 1940, 1944, 1951 and 1965

Implementation of Sections 206, 207 and 401 of the Housing and Urban Development Reform Act of 1989 as Amended by the Cranston-Gonzalez National Affordable Housing Act of 1990

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration (FmHA) amends its regulations to implement recently enacted legislation and to incorporate comments from the public which were solicited during the interim rule stage published in the **Federal Register** 55 FR 29558 and 55 FR 25072. The intended outcome is to provide guidance on: charging a surcharge on occupied units in projects with initial loans made or insured pursuant to a contract entered into on or after December 15, 1989; registration and reporting requirements of persons paid to influence the making of an FmHA housing loan and or grant; and equity takeout incentives for new rural rental housing loans. There are portions of the aforementioned Interim Rule (55 FR 29558) which will be more appropriately addressed in a Final Rule dealing with prepayment and tenant displacement issues.

EFFECTIVE DATE: January 27, 1992.

FOR FURTHER INFORMATION CONTACT: Regarding section 207, contact Carolyn B. Cooksie, Senior Loan Specialist, Multiple Housing Servicing and Property Management Division, room 5328-S, telephone (202) 382-9728. Regarding section 401 and section 206, contact Joyce H. Akers, Senior Loan Specialist, Multiple Family Housing Processing Division, room 5347-S, telephone (202) 382-1622. The address is: USDA-FmHA, South Agriculture Building, 14th and Independence Ave., SW., Washington, DC 20250.

SUPPLEMENTARY INFORMATION:

Classification

This rulemaking action has been reviewed under USDA procedures established in Departmental Regulation 1512-1, which implements Executive Order 12291 and has been determined to be "nonmajor" since the annual effect on the economy is less than $100 million and there will be no significant increase in cost or prices for consumers, individual industries, Federal, State or local Government agencies, or

geographic regions. Furthermore, there will be no adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Environmental Impact Statement

This document has been reviewed in accordance with 7 CFR Part 1940, Subpart G, "Environmental Program." It is the determination of FmHA that this action does not constitute a major Federal action significantly affecting the quality of the human environment and, in accordance with the National Environmental Policy Act of 1969, Public Law 91-90, an Environmental Impact Statement is not required.

Programs Affected

These programs/activities are listed in the Catalog of Federal Domestic Assistance under Nos:

10.405 Farm Labor Housing Loans and Grants
10.410 Low Income Housing Loans
10.411 Rural Housing Site Loans
10.415 Rural Rental Housing Loans
10.417 Very Low Income Housing Repair Loans and Grants
10.420 Rural Self-Help Housing Technical Assistance Grants
10.427 Rural Rental Assistance Payments
10.433 Housing Preservation Grants

Intergovernmental Consultation

For the reasons set forth in the Final Rule related Notice(s) to 7 CFR part 3015, subpart V, Nos. 10.410 and 10.417 are excluded from the scope of Executive Order 12372 which requires Intergovernmental consultation with State and local officials. The remaining programs are subject to intergovernmental consultation with State and local officials.

Regulatory Flexibility Act

In compliance with the Regulatory Flexibility Act (Pub. L. 96-354), the undersigned has determined and certified by signature of this document that this rule will not have a significant economic impact on a substantial number of small entities since this rulemaking action does not involve a new or expanded program, and the reporting/registration requirements are imposed by statute.

Background and Addressing Comments (55 FR 29558)

An interim rule was published in the **Federal Register** (55 FR 29558) on July 20, 1990. It amended several regulations to facilitate the implementation and intent of the HUD Reform Act of 1989. Comments on the interim rule were invited from the public until September 18, 1990. Seven comments were received from the public and were carefully considered.

One commenter stated § 1910.4 should be enlarged to cover the situation where an applicant is determined eligible but notified by the AD-622 that funds are not available at that time and questioned whether this is an adverse decision. Determining eligibility, issuance of AD-622s and adverse decisions were not part of the HUD Reform Act and will not be addressed at this time. This issue will be addressed in a proposed rule to be published in the **Federal Register**.

One commenter stated the definition of other government assistance included tax benefits under related assistance and questioned whether this assistance should be identified on SF 424.2 as an annual amount of low income housing tax credit, a total 10 year amount or developer's fee. The SF 424.2 should indicate that tax credits will be sought; however, an arbitrary amount would not be appropriate. On Form FmHA 1924-13, if a tax credit fee is indicated, such fee should be identified and the basis for calculating the fee should be defined.

One commenter recommended all complete preapplications on hand be ranked and included in the weighted-decision process to ensure those preapplications on hand less than 45 days would not be excluded from funding consideration. Timeframes were not part of the HUD Reform Act and will not be addressed at this time. However, this issue is addressed in the "Processing Preapplications for Rural Rental Housing (RRH) Assistance" changes which were published in the **Federal Register** as a proposed rule on October 31, 1991.

One commenter recommended processing timeframes and standards for preapplications should apply to applications as well, and, these standards and timeframes should be enlarged to include State Office housing staffs. Again, this issue will be addressed in a proposed rule to be published in the **Federal Register**.

One commenter stated the 45 day review period for District Directors to determine eligibility, feasibility and ranking must be met. Again, the processing timeframe was not a part of the HUD Reform Act and this issue will not be addressed at this time. This issue will be addressed in a proposed rule to be published in the **Federal Register**.

Five (5) commenters addressed the requirements or recommended changes to Exhibit A-9 of subpart E of part 1944 which was developed as a guide for administrative processing when FmHA applicants are applying for low-income housing tax credits. In most cases, changes were suggested based on the administrative process utilized by the commenter's state low-income housing tax credit agency. The Agency has reviewed all of the comments related to the processing relationships between FmHA and the State Agency. Exhibit A-9, now renumbered as Exhibit A-10, was developed in concert with the FmHA and the National Council of State Housing Finance Agencies. We have made minor editorial changes to the exhibit, added a paragraph providing FmHA State Offices the option of using the guide as written or developing their own State supplement complementing the local State Agency's administrative process for processing tax credits, and removed the processing timeframes at various milestones.

A tenant advocate commented that the interim rule covering § 1965.89 states that guaranteed equity loans twenty years after post December 15, 1989, loans are made are provided to ensure that projects remain in the program for the remainder of the loan period while in reality these loans will be available as an inducement to borrowers to take the initial loan. All references to the reason for the provision have been removed from the regulation.

A tenant advocate stated that § 1965.89 should be amended to require evidence that the equity loan will not impose an undue hardship on tenants. This has been added although the reference to the procedure for equity loans would have assured this condition.

One commenter stated there is a basic conflict between two rules published by FmHA on July 20, 1990. FmHA recognizes these conflicts. All comments received on §§ 1944.215, 1944.236, 1944.237, 1944.238, 1951.251, and 1965.90 will be consolidated with comments received pursuant to the proposed rule published on July 20, 1990 (55 FR 29601), and will be addressed in a forthcoming Final Rule on prepayment and tenant displacement issues.

Background and Discussion of Comments (55 FR 25072)

An interim rule was published in the **Federal Register** (55 FR 25072) on June 20, 1990. It amended several regulations to facilitate the implementation and intent of the HUD Reform Act of 1989. The changes in this final rule are based upon the comments, as discussed below, and the Cranston-Gonzalez National Affordable Housing Act of 1990, which changed much of the law to allow

VOL 56 ISS 249 DEC 27 1991 UMI

FmHA to be much more responsive to the comments.

Comments on this interim rule were invited from the public until August 20, 1990. Comments were received from eleven sources (of the public) and were all carefully considered.

Nine comments were received concerning various issues related to exhibit B of subpart K of part 1951, "Occupancy Surcharge Payments."

Five of the comments were concerned with whether collecting additional monies from tenants is the appropriate method to fund the equity takeout, and two of these comments gave alternative routes for funding the equity takeout. The equity takeout provisions were authorized in a mandate allowing each unit in the project to be at the same surcharge rate and the tenant only paying the affordable part of the rate. That deletes much of the bulky recording requirements and makes the surcharge assessment easy to keep up with since the bottom line of whether a tenant pays the surcharge, and in what amount, will now be based strictly on income level as reported on the present tenant certification.

Three commenters were concerned over the impact of surcharge on tax credits. The new law which requires that no tenant pay more than 30 percent of their income for rent, utilities and occupancy surcharge will alleviate most of the tax credit issue.

Three commenters were concerned with the provision that "replacement tenants" pay the same surcharge level as the previous tenant would cause undue hardship on some tenants. This is no longer a problem since the "replacement tenant" has been deleted from the regulation and each tenant will now pay surcharge at the rate they can afford up to 30 percent. The rate any tenant pays is no longer dependent upon the rate the previous tenant paid.

One commenter asked for a clarification of the definition of "initial tenant." The term "initial tenant" has been deleted from the regulation and is no longer applicable.

Three commenters said that FmHA's interpretation of the law was wrong when we said that in year 20 of the loan the annual surcharge increase period stops, but the surcharge will continue at that rate for the remaining life of the loan. We believe that that is indeed what is written into the law so this will remain the same in the final regulation.

Three commenters said that they did not believe the law was interpreted by FmHA correctly when we said that if a subsequent loan was made that the surcharge annual increase period extends for an additional 20 year period. Since the Cranston-Gonzalez Act mandated that subsequent loans will not make projects subject to the surcharge, this is no longer applicable and has been deleted from the regulation.

One commenter was concerned that prospective tenants, when filing an application, could not be advised in advance of the specific amount of rent they are required to pay since the surcharge is based upon income levels. Presently, when an application is filed and income verified, the determination could be made at that time of how much rent that applicant is eligible to pay. The surcharge rate, though an additional charge, could also be arrived at since it is also based on the applicant's present income level.

Two commenters questioned whether Congress had really looked at the continued affordability of surcharge to the rental assistance account since rental assistance will now be depleted much quicker. FmHA cannot answer that question.

One commenter suggested that FmHA create different Tenant Certifications and Project Worksheets to use in projects subject to the surcharge and continue to use the present forms for projects not subject to surcharge. Two commenters reminded FmHA that those two forms need to be revised to incorporate the surcharge requirements. The Tenant Certification and Project Worksheet forms will be revised to include the surcharge requirements. It is our opinion that to have two versions of the same form would be costly and confusing. The forms will be revised for where only the applicable entries to that tenant will need to be made.

One commenter suggested that FmHA incorporate exact language in the regulation for the lease clause. We have not incorporated the exact lease language but FmHA has expanded on the requirements of what is expected to be incorporated into that lease clause.

Three commenters wanted FmHA to allow the annual surcharge increase to become effective on the same date as the annual tenant recertification. We reviewed this matter closely and are still of the opinion that the surcharge anniversary date must be a date separate and apart from the recertification date in order to keep the automated system up with the annual increases and keep each unit at the same surcharge rate.

Three comments were received regarding subpart S of part 1940, "Accountability Requirements of Persons Paid to Influence the Making of an FmHA Housing Loan and/or Grant." Two commenters opposed the regulation in its entirety commenting that compliance with same was too burdensome. The subject regulation was developed to implement a mandatory provision of the HUD Reform Act and FmHA believes it implemented same with the minimum amount of burden to the public.

One commenter urged FmHA to adopt the prelitigation exception proposed by HUD and mentioned in FmHA's rulemaking document. HUD requested comments in this area especially on how to minimize the potential for abuse with a prelitigation exception. Public comment did not provide enough support or guidance in this area. Therefore HUD and FmHA have decided not to adopt this provision.

One commenter felt the regulation was unfair to applicants in our Multi-Family Housing (MFH) Program as opposed to our Single Family Housing (SFH) Program. FmHA recognizes that the majority of burden to comply with this regulation is on applicants for our MFH program. This is because the regulation deals with persons paid to influence the making of an FmHA housing loan and/or grant. Applicants in our SFH program are very-low and low-income families who are unable to obtain credit elsewhere. They generally do not have the resources to "pay" someone to influence the making of the FmHA loan. On the other hand, applicants in our MFH program generally have more resources and often pay outside parties to assist them in completing a loan proposal.

Comments were also received requesting FmHA to provide categorical exclusions from registration and reporting requirements for certain professions. FmHA considered these comments, and does not believe categorical exclusions can meet the intent of the HUD Reform Act. The most common comment was for a categorical exclusion for packagers. Generally, a packager assembles the documents necessary to submit a complete proposal to FmHA for consideration. Such activities are exempted under the current regulations. However, not all packagers provide the same services. Some may be paid to influence the making of the FmHA loan. Since there is no practical way for FmHA to know what services are being paid for by an applicant, a categorical exclusion would not meet the registration and reporting requirements of the HUD Reform Act.

Subpart S of part 1940, subparts A and D of part 1944, and subpart F of part 1951 as published in the interim rule, are adopted as final. FmHA is adding references to subpart S of part 1940 in subparts I, J and N of part 1944.

List of Subjects

7 CFR Part 1910

Applicants, Credit, Marital status, Discrimination, Sex discrimination.

7 CFR Part 1930

Accounting, Administrative practice and procedure, Grant programs—Housing and community development, Loan programs—Housing and community development, Low and moderate income Housing—Rental, Reporting requirements.

7 CFR Part 1940

Accountability, Administrative practice and procedure, Grant programs—Housing and community development, Loan programs—Housing and community development, Low and moderate income Housing—Rental, Reporting requirements.

7 CFR Part 1944

Administrative practice and procedure, Aged, Farm labor Housing, Grant programs—Housing and community development, Handicapped, Home improvement, Loan programs—Housing and community development, Low and moderate income Housing—Rental, Migrant labor, Mobile homes, Mortgages, Nonprofit organizations, Public Housing, Rent subsidies, Rural Housing, Subsidies.

7 CFR Part 1951

Account Servicing, Grant programs—Housing and community development, Loan programs—Housing and community development, Reporting requirements, Rural areas.

7 CFR Part 1965

Administrative practice and procedure, Low and moderate income Housing—Rental, Mortgages.

Accordingly, the interim rules published on June 20, 1990 (55 FR 25072), and July 20, 1990 (55 FR 29558) of chapter XVIII, title 7, Code of Federal Regulations are adopted as a final rule with the following amendments:

PART 1910—GENERAL

1. The authority citation for part 1910 continues to read as follows:

Authority: 7 U.S.C. 1989, 42 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23 and 2.70.

Subpart A—Receiving and Processing Applications

§ 1910.1 [Amended]

2. Section 1910.1 is amended by removing paragraph (d).

3. Section 1910.3 is amended by redesignating current paragraphs (a) (3), (4) and (5) as paragraphs (a) (4), (5) and (6), respectively, and adding a new paragraph (a) (3) to read as follows:

§ 1910.3 Receiving applications.

* * * * *

(a) * * *

(3) SF 424.2, "Application for Federal Assistance (For Construction)," with the requirements outlined in the applicable program exhibits will be used by all applicants applying for RRH and LH loans.

* * * * *

§ 1910.3 [Amended]

4. Section 1910.3 is amended in newly redesignated paragraph (a)(4)(i) by changing the reference from "paragraph (a)(3)(ii)" to "paragraph (a)(4)(ii)", and in newly redesignated paragraph (a)(4)(ii), by changing the reference from "paragraph (a)(3)(i)" to "paragraph (a)(4)(i)."

§ 1910.4 [Amended]

5. Section 1910.4 (a)(9) is amended by changing the reference from "§ 1910.3 (a)(3) and (4)" to "§ 1910.3 (a)(4) and (5)."

§ 1910.4 [Amended]

6. Section 1910.4 (b)(14) is amended by changing the reference from "§ 1910.3 (a)(3)(i)" to "§ 1910.3 (a)(4)(i)."

7. Section 1910.4 (i) is amended by italicizing "Except for RRH and LH loans" in the first sentence, italicizing "For RH loans" in the third sentence, revising the fourth sentence and adding a new sentence after the fourth sentence to read as follows:

§ 1910.4 Processing applications.

* * * * *

(i) * * * RRH and LH preapplications must be determined eligible and feasible (RRH preapplications must also be ranked) and the applicant notified in writing in accordance with applicable program regulations not later than 45 days after receipt of a complete application. This eligibility determination will be made regardless of ranking or funding levels * * *

* * * * *

PART 1930—GENERAL

8. The authority citation for part 1930 continues to read as follows:

Authority: 42 U.S.C. 1480; 7 CFR 2.23; 7 CFR 2.70.

Subpart C—Management and Supervision of Multiple Family Housing Borrowers and Grant Recipients

9. Exhibit B to subpart C is amended by revising paragraphs II EE and VIII A-3 to read as follows:

Exhibit B—Multiple Family Housing Management Handbook

* * * * *

II. Definitions

* * * * *

EE. Occupancy Surcharge. A monthly surcharge on units in projects where the initial loan was made or insured pursuant to a contract entered into on or after December 15, 1989. This surcharge will be collected from tenants by borrowers and transmitted to FmHA and set aside to offset any rent increases which may result when the project becomes eligible for a guaranteed equity loan, 20 years from the date of the loan in the project which made the project subject to surcharge.

* * * * *

VIII. Lease Agreements

* * * * *

A. * * *

3. Projects in which occupancy surcharge collection is required should contain an appropriate lease clause permitting possible increases in the surcharge assessed. This clause should contain at least the following:

a. That occupancy surcharges are mandated by law, therefore, they must be paid by the tenant in addition to regular rent. If they are not paid, these unpaid surcharges constitute good cause for possible eviction.

b. That the occupancy surcharge unit rate will began at $2 per unit in the first year and will increase annually on the surcharge anniversary date by $2 per unit for a 19 year period.

c. That the portion of the unit surcharge assessment which the tenant pays will be based upon the tenant household income, and will not cause the tenant's contribution for rent and occupancy charge, plus utility allowance to exceed 30 percent of adjusted income.

d. That tenant households may experience increases or decreases in the amount of occupancy surcharge they pay prior to the expiration of the lease.

* * * * *

Exhibit B to Subpart C [Amended]

10. Exhibit B to subpart C is amended in paragraph II. RR. in the first sentence by removing the comma after the word "allowance" and inserting the words "and occupancy surcharge."

Exhibit B to Subpart C [Amended]

11. Exhibit B to subpart C is amended in paragraph VII. F. 5. b. by inserting a comma and the words "or maximum occupancy surcharge," in the second sentence after the words "market rent."

VOL 56 ISS 249 DEC 27 1991 UMI

Exhibit B to Subpart C [Amended]

12. Exhibit B to subpart C is amended in paragraph VII. F. 5. c. in the third sentence by inserting a comma and removing the word "and" after the word "credit" and inserting the words "and occupancy surcharges" between the words "overages" and "while."

Exhibit E of Subpart C [Amended]

13. Exhibit E of subpart C is amended in paragraph II. F. in the first sentence by adding the words "and occupancy surcharge" between the words "allowance" and "when."

PART 1940—GENERAL

14. The authority citation for part 1940 continues to read as follows:

Authority: 42 U.S.C. 1480; 7 CFR 2.23; 7 CFR 2.70.

Subpart L—Methodology and Formulas for Allocation of Loan and Grant Program Funds

15. Section 1940.551 (c) is amended by revising the last sentence to read as follows:

§ 1940.551 Purpose and general policy.

* * * * *

(c) * * * FmHA will publish a Notice of Availability of Rural Housing funds in the **Federal Register** each year.

PART 1944—HOUSING

16. The authority citation for part 1944 continues to read as follows:

Authority: 42 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart E—Section 515 Rural Rental and Rural Cooperative Housing Loan Policies, Procedures, and Authorizations

17. Section 1944.205 is amended by revising the definition of "State Agency" to read as follows:

§ 1944.205 Definitions.

* * * * *

State Agency. The Agency within a State that has been given the responsibility to allocate low-income tax credits.

* * * * *

§ 1944.212 [Amended]

17a. Section 1944.212(n) is amended by changing the reference "§ 1944.215(t)" to read "§ 1944.215(v)."

18. Section 1944.213 is amended by revising paragraph (a) to read as follows:

§ 1944.213 Limitations.

(a) *Loan Limits.* The State Director must certify that assistance provided any housing project is not more than is necessary to make the project affordable. The applicant must disclose, at all times, beginning with the preapplication package, other Government assistance, as defined in § 1944.205 of this subpart, proposed for the project. At the time of loan approval, the State Director will take into account any other such assistance when determining the FmHA loan amount to be granted. SF 424.2, "Application for Federal Assistance (For Construction)" will be used by an applicant to disclose all assistance being sought.

* * * * *

§ 1944.213 [Amended]

19. Section 1944.213(b)(1) is amended by changing the reference "1944.215(w)" to read "1944.215(v)."

20. Section 1944.231 is amended by redesignating current paragraph (a)(9)(iii) as paragraph (a)(9)(ii)(C), and by revising paragraph (a)(9)(i)(D) and newly designated paragraph (a)(9)(ii)(C) to read as follows:

§ 1944.231 Processing preapplications.

* * * * *

(a) * * *

(9) * * *

(i) * * *

(D) After a preapplication is determined eligible, feasible and ranks high enough for funding in the current fiscal year, if applicable, a copy of the AD–622 and related documentation will be forwarded to the State Agency in accordance with exhibit A–10 of this subpart or any State supplement.

* * * * *

(ii) * * *

(C) After a preapplication is determined eligible, feasible and ranks high enough for funding in the current fiscal year, if applicable, a copy of the AD–622 and related documentation will be forwarded to the State Agency in accordance with Exhibit A–10 of this subpart or any State supplement.

* * * * *

§ 1944.231 [Amended]

21. Section 1944.231 (a)(9)(ii)(A)(*5*) is amended by changing the reference "§ 1944.215(p)" to read "§ 1944.215(r)."

22. and 23. Exhibit A–10 of subpart E of part 1944 is revised to read as follows:

Exhibit A–10—Administrative Process for Combining Farmers Home Administration (FmHA) Assistance with Low-Income Housing Tax Credits

I. Purpose

A. This exhibit will be used by States to coordinate efforts with State Agencies administering tax credits. This exhibit will be utilized unless a State develops its own State supplement in which case the State supplement will supersede this exhibit.

B. The State Agency administering tax credits is required under section 42 of the U.S. Internal Revenue Code to select projects to receive the tax credits from applications according to tax credit allocation plans developed by the State Agency. Each application submitted to the State Agency is to be evaluated to determine the amount of credit necessary to make the proposal financially feasible and viable. When making this evaluation, the State Agency is required to consider the "sources and uses" of funds and the total financing planned for the project, as well as the proceeds expected to be generated by reason of tax benefits.

II. Administrative Process

A. FmHA will review preapplications from applicants seeking FmHA assistance when those applicants submit SF 424.2, "Application for Federal Assistance (For Construction)," and the requirements of Exhibit A–6 of this subpart. When a preapplication is determined by FmHA to be eligible, feasible and has sufficient points to be funded, the applicant will be notified by issuance of an AD–622, "Notification of Preapplication Review," to develop a complete loan application. The State Agency will also be sent a copy of Form AD–622 with a copy of SF 424.2 on which FmHA based its preliminary determination regarding funding. When a preapplication is determined by FmHA to be eligible and feasible but lacks sufficient priority points for funding consideration, or, if a preapplication is rejected by FmHA, the applicant(s) and the State Agency will only receive a copy of the AD–622 in accordance with § 1944.231(a)(9)(i) of this subpart.

1. Under the State allocation plan criteria, only projects receiving a favorable review, which reflect they are likely to be funded in the current fiscal year, will be eligible to apply to the State Agency for low income tax credit allocations. It is the responsibility of the applicant to provide the State Agency with any additional information or clarification of funding sources as may be necessary. The State Agency will evaluate the applicant's request for a tax credit allocation in accordance with its application processing criteria, using the AD–622 and any attachments. When the evaluation is completed, a copy of the tax credit reservation will be transmitted to FmHA by the State Agency.

2. After FmHA finalizes its processing of SF 424.2 and related materials constituting a full loan application, FmHA will submit to the State Agency a copy of Form FmHA 1944–51, "Multiple Family Housing Obligation—Fund Analysis," as well as a copy of the updated financial assistance analysis.

3. The State Agency will then evaluate the project based on any changes in funding sources and amounts resulting from the FmHA loan obligation. A formal tax credit commitment is made by the State Agency at this time and a copy of the tax credit commitment notice will be sent to FmHA by the State Agency. Since the loan obligation and the tax credit commitment are likely to occur in one calendar year and the final loan closing and the tax credit allocation in a later calendar year, the State Agency may award a carryover commitment to the project. A carryover commitment provides that the project must be placed in service by the end of the second calendar year following the year in which the carryover is awarded.

B. At loan closing, FmHA will send the final terms of the FmHA loan to the State Agency. The State Agency will make a final tax credit award calculation based upon any changes in the FmHA loan which may have taken place between obligation and closing. The State Agency will allocate the tax credits based on documentation received either at loan closing or immediately after loan closing. An executed Form 8609, "Low-Income Housing Credit Allocation Certification," will be transmitted to FmHA by the State Agency. Form 8609 will be retained in the project file for the life of the loan, along with supporting final documentation on the sources and uses of funds upon which the low-income housing tax credit allocation was made.

III. In evaluating projects to determine tax credit awards, the State Agency may rely upon the loan amount and terms determined by FmHA. If FmHA also provides rental assistance to units in the project, the State Agency may rely on FmHA's judgment and determination that such assistance is necessary.

IV. The State Agency and FmHA will transmit to each other, as soon as possible, the appropriate documentation at each milestone in the loan processing/tax credit allocation process. Materials transmitted and correspondence received will be retained by FmHA as part of the permanent project file.

V. Form 8609 will be issued by the State Agency in accordance with authorizing statutes to ensure that financial assistance provided on behalf of the project is not more than is necessary to provide affordable housing.

VI. The FmHA State Director will make a certification by Memorandum to the FmHA Administrator that the assistance provided to the project is not more than is necessary to make the project affordable. This certification will be based on FmHA processing and the State Agency's certification (Form 8609). The State Director's certification memorandum and State Agency certification will be filed in the FmHA loan docket with other loan security instruments and kept as a permanent part of the loan file for the life of the loan.

VII. A diagram of the administrative process between FmHA and the State Agency is provided as part of this exhibit.

Subpart I—Self-Help Technical Assistance Grants

24. Section 1944.408 is added to read as follows:

§ 1944.408 Accountability.

Applicants should be made aware of the accountability requirements of persons paid to influence the making of an FmHA housing loan and/or grant as described in subpart S of part 1940 of this chapter.

Subpart J—Section 504 Rural Housing Loans and Grants

25. Section 1944.466 is added to read as follows:

§ 1944.466 Accountability.

Applicants should be made aware of the accountability requirements of persons paid to influence the making of an FmHA housing loan and/or grant as described in subpart S of part 1940 of this chapter.

Subpart N—Housing Preservation Grants

26. Section 1944.662 is added to read as follows:

§ 1944.662 Accountability.

Applicants should be made aware of the accountability requirements of persons paid to influence the making of an FmHA housing loan and/or grant as described in subpart S of part 1940 of this chapter.

PART 1951—SERVICING AND COLLECTIONS

27. The authority citation for part 1951 continues to read as follows:

Authority: U.S.C. 1989, 42 U.S.C. 1480, 5 U.S.C. 301, 7 CFR 2.70.

Subpart K—Predetermined Amortization Schedule System (PASS) Account Servicing

28. Section 1951.504 is amended by revising paragraph (k) and (l) to read as follows:

§ 1951.504 Definitions and statements of policy.

* * * * *

(k) *Occupancy surcharges.* A monthly surcharge on units in projects where the initial loan was made or insured pursuant to a contract entered into on or after December 15, 1989. These surcharges will be collected from the tenant by the borrower on the same day and in addition to regular rents. The amounts to be collected will be in accordance with exhibit B of this subpart.

(l) *Overage.* This term refers to both "overage" and "surcharge" described in exhibit H to subpart C of part 1930 of this chapter.

* * * * *

29. Section 1951.509 is revised to read as follows:

§ 1951.509 Occupancy surcharges.

(a) *Authorization to Collect Occupancy Surcharge.* Public Law 101–235 enacted December 15, 1989, and amended by Public Law 101–625, prescribes provisions for FmHA to collect an additional monthly amount from borrowers on all initial section 515 loans made or insured pursuant to a contract entered into on or after December 15, 1989.

(1) A contract entered into for this purpose is when a completed Form FmHA 1944–51, "Multiple Family Housing Obligation—Fund Analysis," is properly delivered to the borrower on or after December 15, 1989. (That delivery date is the date entered in Item 51 on Form FmHA 1944–51).

(2) The term *occupancy surcharge* shall be used hereafter to describe this additional monthly charge.

(b) *Occupancy Surcharge Payments.* These monthly payments shall be made from project income which will be collected from tenants or from subsidy which the tenant will be entitled to. The amount of surcharge assessed per unit, in the initial year of operation will be $2 per unit. This surcharge assessment will increase by $2 per unit each year thereafter for 19 years. The amount of the surcharge assessment which the tenant pays will be based on the income level of each tenant household. Tenant households who pay more than 30 percent of their annual adjusted income in rent and utilities will not be required to pay occupancy surcharge.

(1) Annual increases will cease 20 years from the date of the first surcharge payment due on the initial or oldest loan in the project.

(2) Surcharge payments will continue after the annual increase period has expired, but surcharge unit assessments will remain at the levels established at year 20 of the initial loan for the remaining life of the loan.

(3) If a subsequent loan is made and the initial loan in the project is subject to occupancy surcharge, the annual increase period will still expire 20 years from the first surcharge payment due on the initial loan.

(c) *Increases in Tenant Contribution Due to Occupancy Surcharges.* Borrowers/Managers are responsible for initiating and monitoring surcharge annual increases and all surcharge

VOL
56
ISS
249
DE
27
1991
UMI

increases and decreases due to change in tenant contributions. These changes require no prior review by FmHA. All tenants must be notified of any changes in their surcharge contribution in the following manner:

(1) Tenants moving into newly constructed projects in their first year of operation should be informed of the occupancy surcharge requirements when their lease and initial tenant certification is signed. They should also be apprised at that time of possible surcharge changes based on their income levels.

(2) When there are surcharge changes due to income changes and regular recertifications, the current signed tenant certification showing the level of surcharge due will serve as notification of the change.

(3) Tenants who experience surcharge changes due to the annual $2 per unit increase on the surcharge anniversary date must be sent a notification of the change in accordance with exhibit B of this subpart.

(d) *Occupancy Surcharge Account.* Occupancy surcharge monies collected by FmHA will be deposited in the Rural Housing Insurance Fund (RHIF) in such a manner as to accrue interest on the total amount of funds collected. These monies will be made available only for payments of principal and interest on guaranteed equity loans made under the authorization of section 515 of the HUD Act of 1989. Payments from the occupancy surcharge account will only be in amounts necessary to ensure that additional project expense from the incurred guaranteed equity loan does not raise rent payments above prescribed maximum rent levels necessary to operate the project. Any monies not expended in the project from which the payments were made will be used in other projects to make payments of principal and interest on a guaranteed equity loan.

(e) *Occupancy Surcharge Takeout.* The method for allowing payments on these guaranteed equity loans out of the occupancy surcharge account will be forthcoming a such time as needed and will conform with appropriate legislative requirements in effect at that time.

(f) *Collection of Occupancy Surcharge by FmHA.* The policies and methods for collecting surcharge are set forth in exhibit B of this subpart.

30. Exhibit B of subpart K is revised to read as follows:

Exhibit B of Subpart K—Occupancy Surcharge Payments

I. Objectives

This exhibit prescribes the methods for arriving at monthly occupancy surcharge rates for tenants in Farmers Home Administration (FmHA) Rural Rental Housing (RRH) and Rural Cooperative Housing (RCH) section 515 projects. This exhibit affects all initial loans made or insured pursuant to a contract entered into (when a properly completed Form FmHA 1944–51, "Multiple Family Housing Obligation—Fund Analysis," is delivered to the borrower. This delivery date is the date entered in item 51 on the 1944–51) on or after December 15, 1989.

II. Eligible Projects

A. Initial loans made pursuant to contracts entered into on or after December 15, 1989, will be subject to all occupancy surcharge requirements contained within this exhibit.

B. Subsequent loans will be subject to occupancy surcharge unless the initial loan in the project is subject to occupancy surcharge.

C. Project consolidations will make the new consolidated project subject to occupancy surcharge when one or more of the loans are subject to occupancy surcharge and will be handled in accordance with subpart B of part 1965 of this chapter.

III. Initial Understanding With Borrower

All RRH and RCH applicants will be informed at the application stage of the Agency's occupancy surcharge requirements and procedures. All borrowers will be advised that all occupancy surcharge charges must comply with this Exhibit.

IV. Initial Understanding With Tenant

Tenants moving into projects that are subject to occupancy surcharge requirements should be informed by the borrower/manager of those requirements when the lease and initial tenant certification are signed by the tenant. They should also be apprised at that time of possible surcharge changes based on tenant household income levels.

V. Surcharge Payment Due Dates

The first monthly occupancy surcharge payment and all payments thereafter will have the same due dates as amortized loan installment due dates. Surcharges will be based on tenants in residence on the first of the month prior to the payment due date.

VI. Defining Occupancy Surcharge

Occupancy surcharge is a monthly charge on units in projects where the initial loan was made or insured pursuant to a contract entered into on or after December 15, 1989. The surcharge assessment due will be collected from borrowers by FmHA and set aside to offset any rent increases which may result when the project becomes eligible for a guaranteed equity loan, 20 years from the date the initial loan was made or insured.

The amount of surcharge assessed in the initial year will be $2 per unit, per month, with annual increases of $2 per unit for a 19 year period. At the expiration of the 20 year period, annual increases will stop but the surcharge payment will continue at that established rate for the remaining life of the loan.

The residing tenant will only be required to pay the portion of the surcharge assessment that would be included within 30 percent of their annual adjusted gross income.

Example: (No RA Available for Unit)

Basic Rent for Project—$200 per month
Occupancy Surcharge Assessment for Year One is $2
Net Tenant Contribution (NTC)—$195
Tenant Pays—$200—No Occupancy Surcharge (To pay any portion of the $2 would have put the tenant over 30 percent of their annual adjusted income).

Borrowers will not be required to pay the unpaid portion of the surcharge assessment that exceeds the tenant contribution.

Vacant units will not be subject to surcharge payments but will be subject to annual increases in unit surcharge rates on surcharge anniversary dates.

VII. Adjustments to Occupancy Surcharge Due to Changes In Tenant's Income

A. If a tenant's income increases, and that tenant was not previously paying surcharge at the maximum level assessed to the unit, they may become subject to paying a higher level of surcharge. This amount of surcharge increase is not to exceed the maximum surcharge assessed to the unit by annual increases.

B. If a tenant's income decreases and that decrease will cause the level of surcharge previously paid to exceed 30 percent of their annual adjusted income, the surcharge payments will be decreased accordingly.

C. Annual increases in occupancy surcharges will always be in $2 increments but tenants may qualify to pay any portion of the surcharge unit assessment, rounded up to the nearest $1.

Example: Basic Rent for Project—$200 per month
Occupancy Surcharge Assessment for Year 2 is $4
Tenant NTC—$203
Tenant Pays $200 + $3 Occupancy Surcharge

VIII. Tenants Receiving Rental Assistance (RA)

Tenants receiving RA will always be subject to the maximum occupancy surcharge assessments because their rent contributions will never exceed 30 percent of their annual adjusted gross income.

Example: Basic Rent in Project—$200 per month
Tenant NTC = $150
Year One—Tenant Pays $150 and RA Pays $52 = $202 ($50 Basic Rent + $2 Surcharge)
Year Two—Tenant Pays $150 and RA Pays $54 = $204 ($50 Basic Rent + $4 Surcharge)
If the tenant continues to receive RA, annual increase surcharge assessments will continue to be paid from RA.

IX. Tenants Paying Overage

Tenants paying overage will be subject to maximum surcharge assessments until their rent, utilities and surcharge equals 30 percent of their annual adjusted gross income. The amount of overage tenants pay will reduce by the amount of surcharge assessed to the unit.

Example: Basic Rent for Project is $200 per month
Tenants NTC—$210 (No change in income throughout example)

Year One—Tenant Pays $210 ($200 basic + $2 Surcharge + $8 overage)
Year Two—Tenant Pays $210 ($200 basic + $4 Surcharge + $6 overage)
Year Five—Tenant pays $210 ($200 basic + $10 Surcharge + $0 overage)
Year Six—Tenant Pays $210 ($200 + $10 Surcharge) While the unit surcharge increases to $12, the tenant experienced no surcharge annual increase because, at this point, 30 percent of their annual adjusted gross income will only cover rent, utilities and a $10 occupancy surcharge.

X. Tenants Paying Market Rent

Tenants paying market rent will pay up to the maximum surcharge assessments plus any annual increases until rent, utilities and the surcharge level equals 30 percent of their annual adjusted gross income.

Note: An easy formula to use for market tenants is:
Take the lesser figure of Tenant's 30 Percent or Maximum Contribution (Market plus Surcharge).
Minus Basic Rent.
Minus Occupancy Surcharge unit assessment.
Balance is Overage.

Example: Basic Rent is $200 per month.
Market Rent is $425 per month
Tenant NTC—$430 (no change in income throughout example)
Tenant's maximum contribution is $425 plus surcharge rate
Year One—Tenant Pays $427 ($425 Market Rent + $2 Surcharge) minus basic Rent minus Surcharge = $225 Overage
Year Two—Tenant Pays $429 ($425 Market Rent + $4 Surcharge) minus Basic Rent minus Surcharge = $225 Overage
Year Three—Tenant Pays $430 ($425 Market Rent + $5 Surcharge) minus Basic Rent minus Surcharge = $224 overage
Year Four—Tenant Still Pays $430. Tenant did not pay surcharge annual increase for this year because they are now paying 30 percent of their annual adjusted gross income for rent, utilities and surcharge.

XI. Projects Receiving Rental Assistance From Sources Other Than FmHA

A. Projects subject to occupancy surcharge provisions where tenants are receiving sources of rental assistance other than from FmHA (private project RA, HUD Section 8, State Funded RA, etc.) should be handled on a case-by-case basis and in consultation with the National Office.

B. Whether occupancy surcharge will be paid by rental assistance coming from sources other than FmHA is dependent upon the terms of the contracts from which the funds are expended.

XII. Annual Increases of Occupancy Surcharges

A. The annual surcharge increases will continue for a period of 19 years from the first surcharge anniversary date of the loan in the project that established the surcharge.

B. After the 19 year annual increase period expires, tenants will continue surcharge payments for the remaining life of the loan at the unit rate established on the anniversary date of year 19. The tenant will continue to pay the portion of that unit rate that is within 30 percent of their annual adjusted gross income.

XIII. Surcharge Anniversary Date

The surcharge anniversary date is the effective date for the $2 per unit annual increase assessment. This date will always be established one year from the first surcharge payment due. The first surcharge payment is due at the same time the first amortized loan installment is due which is one month from the Amortized Effective Date (AED).

Example:
Loan Closed—10/12/91
AED Date—11/01/91
1st Amortized Payment Due—12/01/91
1st Surcharge Payment Due—12/01/91
Surcharge Anniversary Date—12/01 for all Subsequent Years
No Further Annual Increases after Year 2011

XIV. Occupancy Surcharge Changes

A. Changes in the amount of surcharge tenants pay due to income changes, the regular tenant recertification process and surcharge anniversary increases will always be handled as separate actions, even though they could be effective on the same date. Examples of change in tenant surcharge payments are:

1. Changes in tenant income during the year can increase or decrease the portion of the assessed surcharge per unit which the tenant must pay.

2. The amount of surcharge paid by the tenant can increase or decrease on the yearly recertification date of Form FmHA "Tenant Certification" if the tenants income has changed.

3. The amount of surcharge paid by the tenant can increase on the surcharge anniversary date.

4. Tenants paying market rent may experience a increase/decrease in the amount of cash they pay for surcharge as a result of the anniversary increase and any income changes.

B. When there are surcharge changes due to income changes and regular recertifications, the current signed tenant certification showing the level of surcharge due will serve as notification of the change.

C. Prior to the project anniversary date, all current Forms FmHA 1944–8, "Tenant Certification" must be reviewed for any changes occurring during the year that would change the status of the tenant related to a surcharge annual increase. Surcharge anniversary reviews must be accomplished by the borrower/manager in a timely manner. The process requires no prior review by FmHA and should be handled in accordance with the following:

1. Prior to the surcharge anniversary date established for the project, all current tenant certifications on file must be reviewed.

2. All tenants in the project will be sent a notification that the surcharge unit assessment has increased by $2, that a review of their income has occurred and notice of any change in their contribution brought about by the surcharge annual increase. Tenants who will actually experience an increase in their Net Tenant Contribution (tenants paying market rent) should be notified at least 30 to 60 days (or in accordance with State or local statutes) prior to the effective date of the increase. These notifications should do the following:

a. Make all tenants aware of the review of their tenant certification and of any changes in the amount of RA they receive, overage they pay or any changes in cash they pay as a result of the review.

b. Offer the tenants an opportunity to meet with management to discuss the changes brought about by the review. (The point of discussion should be based solely on information contained on the tenant certification since the occupancy surcharge requirement is mandated by law).

D. If there are surcharge changes due the tenant as a result of the surcharge anniversary date, it should be manually recorded on the current tenant certification by marking through the old recorded surcharge rate and inserting the new rate.

XV. Responsibility To Pay Occupancy Surcharge

A. Payment of occupancy surcharge must be a viable part of the lease agreement between the tenant and the borrower/manger in accordance with paragraph VIII A 3 of exhibit B of subpart C of part 1930 of this chapter.

B. Nonpayment of occupancy surcharge by the tenant is a violation of that lease and can be used as grounds for eviction.

C. If the borrower/manager has correctly followed the certification procedure as outlined in paragraph VII F of exhibit B of subpart C of part 1930 of this chapter, and there is still no current valid Tenant Certification on file for the tenant at the time of the surcharge anniversary review, and it is determined the fault of the tenant, the tenant will automatically be subject to paying market rent plus the maximum surcharge assessed to the unit. The tenant should be notified of this action in accordance with paragraph VII F 5 b of exhibit B of subpart C of part 1930 of this chapter.

D. The District Director can authorize a waiver of occupancy surcharge while eviction is being actively pursued up to resolution of the eviction action in two instances.

1. When there is not a valid tenant certification on file and it is the fault of the tenant.

2. When the tenant refuses to pay occupancy surcharge.

E. If it is concluded that the lack of current tenant certification is the fault of the borrower/manager, then the borrower/manager (project) must pay market rent plus the maximum occupancy surcharge due for that unit until there is a current certification.

XVI. Subsequent Loans

A. If the initial loan in the project is subject to occupancy surcharge, all other loans in the project will be subject to occupancy surcharge.

B. Subsequent loans, made for any purpose, will not subject a project to paying occupancy surcharge if the initial loan in the project is not subject to occupancy surcharge.

C. If units are added with a subsequent loan and the project is subject to surcharge because of the initial loan, the anniversary

VOL
56
ISS
249
DE
27
1991
UMI

date for the project will remain the same as the one already established by the initial loan. See paragraph XII A for how occupancy surcharge increases apply, and paragraph XII B for period of duration of collection.

1. Tenants moving into the new units will be subject to the level of surcharge assessment already reached for the project by annual increases.

2. The first surcharge payment for the new tenants will begin when their first rent payment for the project is due.

3. On the project anniversary date, all Tenant Certifications for the project will be checked for tenant eligibility for any occupancy surcharge changes.

XVII. Consolidations of Projects Subject to Occupancy Surcharge

A. If none of the loans in any of the projects to be consolidated are subject to the occupancy surcharge provisions, the new consolidated project will not be subject to occupancy surcharge.

B. If one of the projects being consolidated is subject to the occupancy surcharge provisions and one project is not, the following conditions apply:

1. The total units in the project after consolidation will be subject to the occupancy surcharge.

2. The level of the surcharge assessment for the consolidated project will be the same as the assessment for the oldest project already subject to the surcharge. (EXAMPLE: If the project with the oldest surcharge is in its fourth year, the assessment for all units in the new consolidated project will begin at $8 per unit).

3. All tenants in the project, who were not previously subject to surcharge but will now be subject to surcharge because of the consolidation, must be notified 30 to 60 days prior to the first surcharge payment due date.

4. All leases not previously modified to include occupancy surcharge must be modified.

5. The first occupancy surcharge payment for the new consolidated project is due when the first new amortized loan installment is due for the project.

6. The anniversary date established for the project already subject to the occupancy surcharge will be the anniversary date for the new consolidated project.

7. The annual surcharge increase period will expire twenty (20) years from the due date of the first occupancy surcharge payment for the first project that was subject to the assessment prior to consolidation.

C. If all projects being consolidated are subject to the occupancy surcharge provisions, but have different anniversary dates and different twenty (20) year expiration dates, the following conditions apply:

1. The earliest anniversary date of the projects being consolidated will be the anniversary date for the newly consolidated project.

Example:
Project 01–1: Anniversary Date on 10/1/90
Project 02–2: Anniversary Date on 5/1/91
Consolidated Project Anniversary Date is 10/1

2. The beginning level of the surcharge assessment for the consolidated project will be the same as the project with the earliest surcharge payment due date.

Example:
Project 01–1 First Surcharge Payment 10/1/90
Project 02–2 First Surcharge Payment 5/1/91
Date of Consolidation 12/1/91
Project 01–1 is in the 2nd Year of Surcharge
Tenants in project 02–2 will be assessed $4 per unit, effective 1/1/92
All tenants in the consolidated project will be reviewed for the surcharge anniversary increase on 10/1/92

3. The annual surcharge increase period will expire twenty (20) years from the due date of the first occupancy surcharge payment for the newest loan of the projects being consolidated.

XVIII. Surcharge Collection Process

A. Project owners/managers will collect the occupancy surcharge amount from tenants at the same time they collect monthly rents.

B. Project owners/managers will collect information from Forms FmHA 1944–8 and report the amount of surcharge due FmHA on Form FmHA 1944–29, "Project Worksheet for Interest Credit and Rental Assistance," both as a project total and per unit amounts.

C. Project owners will remit the collected amount to FmHA when they remit their monthly loan payments as a part of that payment. The method of RA "netting" will also apply to occupancy surcharges.

D. If occupancy surcharges are not remitted to FmHA in correct amounts and in the specified timely manner, and the project account becomes delinquent as a result, late fees, if applicable, will be assessed to the account.

E. FmHA will remit the collected amount to the Finance Office in accordance with the prescribed collection process in FmHA Instruction 1951–B and of 1951–K of this subpart.

XIX. Tracking Responsibilities

A. The occupancy surcharge monies collected nationwide by FmHA will be deposited in the Rural Housing Insurance Fund (RHIF) and will accrue interest to the account on the total amount of funds collected.

B. FmHA will track occupancy surcharge balances by project through the use of the Automated Multi-Housing Accounting System (AMAS).

C. FmHA will report to borrowers the amount of surcharge collected per project once a year on Form FmHA 1951–54, "Annual Statement of Account."

PART 1965—REAL PROPERTY

31. The authority citation for part 1965 continues to read as follows:

Authority: 7 U.S.C. 1480; 5 U.S.C. 301; 7 CFR 2.23; 7 CFR 2.70.

Subpart B—Security Servicing for Multiple Housing Loans

§ 1965.65 [Amended]

32. Section 1965.65 is amended by removing paragraph (b)(13).

33. Section 1965.68 is amended by adding a new paragraph (c)(8) to read as follows:

§ 1965.68 Consolidation.

* * * * *

(c) * * *

(8) If any of the loans being consolidated are subject to the occupancy surcharge provisions, they will be handled in accordance with subpart 1951–K, exhibit B.

§ 1965.70 [Amended]

34. Section 1965.70 is amended by removing paragraph (b)(3)(viii) and redesignating paragraphs (b)(3)(ix), (x) and (xi) as paragraphs (b)(3)(viii), (ix) and (x), respectively.

35. Section 1965.89 is amended by revising the introductory text and paragraphs (c) and (d) to read as follows:

§ 1965.89 Equity take-out for loans made after December 15, 1989.

For initial loans made or insured pursuant to contracts entered into on or after December 15, 1989, equity loans may be guaranteed by FmHA after a 20-year period, from the date of the loan, has elapsed. The following steps will be followed when a borrower wishes to receive this equity:

* * * * *

(c) In accordance with the conditions outlined in Exhibit E of this subpart, FmHA will offer to guarantee an equity loan to the borrower which may be repaid from an occupancy surcharge account in accordance with subpart K of part 1951 of this chapter. In addition it must be determined that such an equity loan would not impose undue hardship on tenants or unreasonable cost to the Federal Government. The guaranteed loan will not exceed the lesser of:

(1) The amount determined and calculated in accordance with the equity loan instructions contained in exhibit E of this subpart or (2) 30 percent of the appraised value of the project at the time of the initial loan as shown on the appraisal for that loan.

(d) If the borrower indicates preliminary acceptance of the equity loan, an application will be completed in accordance with subpart E of part 1944 of this chapter and two appraisals will be conducted in the manner outlined in paragraph VI A of exhibit E of this subpart for loans to nonprofit organizations.

BILLING CODE 3410–07–M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 214

[INS No. 1436–91]

RIN 1115–AC71

Aliens in Religious Occupations (R Nonimmigrants)

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule promulgates final regulations for implementation of section 209 of the Immigration Act of 1990, Public Law 101–649, November 29, 1990, by providing procedures for admission to the United States of nonimmigrant religious workers under section 101(a)(15)(R) of the Immigration and Nationality Act (Act). This rule will conform Immigration and Naturalization Service (Service) policy on this classification, and clarify for the general public and religious organizations the requirements for classification, admission, and maintenance of status.

EFFECTIVE DATE: December 27, 1991.

FOR FURTHER INFORMATION CONTACT: Edward H. Skerrett, Senior Immigration Examiner, or Carla J. Hengerer, Immigration Examiner, Adjudications Division, Immigration and Naturalization Service, 425 I Street, NW., room 7122, Washington, DC 20536, telephone (202) 514–3946.

SUPPLEMENTARY INFORMATION: On July 24, 1991, at 56 FR 33886, the Immigration and Naturalization Service published a proposed rule in the **Federal Register** and requested comments from interested parties by August 23, 1991. The Service received 27 comments on the proposed rule and considered each of the comments in writing the final rule. The following discussion summarizes the comments, describes how the proposed rule has been altered, and explains the Service's reasons for either making or declining to make changes suggested in the comments.

General Issues

Ten commenters noted that the proposed rule did not specifically allow aliens already lawfully in the United States under other nonimmigrant classifications to change their status to that of nonimmigrant religious worker. The Service initially saw no need to describe this procedure specifically, since section 248 of the Act and 8 CFR part 248 permit such changes of classification generally, with certain exceptions.

To be clear, however, the final rule states that eligible nonimmigrants may change to R–1 classification by filing Form I–129, Petition for Nonimmigrant Worker. Although no petition is required for initial visa issuance, or for initial admission if the alien is visa-exempt, Form I–129 will be used for changes of status, extensions of stay, and changes of employers. A draft of Form I–129 was published at 56 FR 50365 on October 4, 1991. Until this form is available, an alien wishing to change from another nonimmigrant classification to R classification will use Form I–506, Application for Change of Nonimmigrant Status. An alien wishing to extend a stay or change employers will use Form I–539, Application to Extend Time of Temporary Stay.

Two commenters felt that a petition should be required for the initial visa issuance, or for the initial admission of those who are visa-exempt. This would mean that only immigration examiners at Service Centers would make individual R classification decisions. If instead petitions are not required, then applications for R classification can also be decided by immigration inspectors at ports of entry for those who are visa exempt, and by Department of State consular officers for others. Section 214(c)(1) of the Act requires that petitions be filed for aliens seeking H, L, O, or P classification. The Act imposes no such requirement, however, for the R classification. Although the Service could impose such a requirement by regulation, it has consulted with the Department of State and has chosen not to do so. Both Department of State and Service personnel have had long experience issuing visas to and admitting religious workers under B–1 nonimmigrant classification, and thus are well-equipped to administer the new R classification.

Definitions

Three commenters felt that the definition of *bona fide nonprofit religious organization in the United States* was overly restrictive. These commenters maintained that, although the statute requires that the organization be nonprofit, there is no requirement that it be tax-exempt. The Service regards this requirement as a fair one, however, and will retain it in the final rule. Whether an organization qualifies for exemption from federal income taxation provides a ready test of that organization's nonprofit status. The Internal Revenue Service (IRS) routinely makes decisions concerning the non-profit nature of any organization seeking tax-exempt status. Whenever the IRS has already made a determination in this regard, the Service will defer to that deicision. However, the final rule has been amended to provide that, if for any reason an organization has never sought such tax-exempt status from the IRS, the Service will allow the organization to submit to the Service the same documentation as would be required by the IRS.

Seven commenters felt that requiring affiliated organizations to be tax-exempt as religious organizations was too restrictive. These commenters noted that religious organizations are often affiliated with other entities which are tax-exempt for other than religious reasons. The Act does not specifically answer this question. Since this section of the Act pertains to religious workers, however, it is the Service's view that the benefits of this section should be restricted to those in the religious sphere. Therefore, the Service has not changed the final rule in this regard.

Three commenters objected to the proposed requirement that, to be considered affiliated, an organization must be closely related to the religious denomination "in the subordinate or dependent position." These commenters worried that the proposed definition might exclude those faiths not organized as formal hierarchies. Organizations may be closely related to such faiths yet not dependent upon them. The proposed definition might likewise exclude inter-denominational organizations, which may not be subordinate to any denomination. The Service wishes to avoid this result. Accordingly, it has revised the definition of *bona fide organization which is affiliated with the religious denomination* by eliminating the phrase "in a subordinate or dependent position."

Two commenters read the proposed rule to mean that aliens who wish to qualify as ministers must have a baccalaureate degree. The proposed rule imposed no such requirement, however; nor does the final rule. Instead, it must be demonstrated that a recognized religious denomination has authorized the alien to conduct religious worship and to perform other duties usually performed by authorized members of the clergy of that religion.

Six commenters objected to the requirement that, to be considered a

VOL 56 ISS 249 DEC 27 1991 UMI

professional religious worker, an alien must have at least a United States baccalaureate degree or its foreign equivalent. These commenters argued first that, because the Act does not specifically require a degree, neither should the regulations. Second, if a degree is required, the regulations should permit an alien religious worker to meet the requirement through some level of experience alone. In contrast, two commenters felt that the proposed definition of *professional capacity* was not restrictive enough and suggested that more than a baccalaureate degree should be required.

The degree requirement is consistent with the rule governing immigrant religious workers, and the Service will retain it in the nonimmigrant rule. This requirement follows from both the Act and its legislative history. The Act itself creates distinct categories: one for those working in a religious vocation or occupation, and another for those working in a religious vocation or occupation in a professional capacity. While the Act does not define the term *professional* in the context of religious workers, it does so at section 203(b)(3)(A) in the context of "skilled workers, professionals, and other workers" who seek immigrant visas. There the Act specifies that a "professional" must have a baccalaureate degree. This strongly suggests that Congress regards a baccalaureate degree as a critical feature distinguishing professionals from nonprofessionals. Therefore, the Service will require an alien seeking nonimmigrant entry as a professional religious worker to have such a degree.

The Act does not require the degree to come from a United States institution, and the Service will recognize an equivalent foreign degree. Nor, however, does the Act refer to gaining baccalaureate degree equivalency through experience, as the legislative history of section 203(b)(2) does with respect to an advanced degree and the Act itself does at section 214(i)(2)(C) with respect to specialty occupations. Therefore, the final rule does not permit baccalaureate degree equivalency through experience.

In any event, the distinction between professional religious workers and other workers in a religious vocation or occupation will have little practical effect. An alien in a religious professional position whose claim to professional status is not based on a degree, but on experience alone or a combination of education and experience, would fall into the category of an alien in a religious vocation or occupation.

One commenter felt that, to qualify as a professional religious worker, an alien should not be required to engage in a traditionally religious profession. The Act itself, however, requires the professional worker to be working "in a professional capacity in a religious vocation or occupation." The final rule reflects this requirement.

The Service also received several comments and questions on the proposed definitions of *religious occupation* and *religious vocation*. These comments ranged from objections that the definitions were overrestrictive to objections that they were overpermissive. While the Act itself does not hint at the definitions of these terms, the legislative history does. The Service based these definitions on H.R. Rep. 101-723, p. 75. The definition of *religious vocation* includes examples taken from the legislative history. Likewise, the definition of *religious occupation* is based on the key admonition in the legislative history that the religious worker provisions "relate to traditional religious functions." As one commenter noted, the exclusion of janitors, maintenance workers, and clerks demonstrates that the occupation must have religious significance. If the job has no religious significance, then the fact that a person is a member of a religious denomination working in a facility run by the denomination would not by itself make that person a religious worker. For example, Catholic nurses do not qualify as religious workers simply by working in a Catholic hospital. Rather, it must be shown that the work relates to a traditional religious function.

Five commenters objected that the proposed definition of *religious vocation*—a calling to religious life "as evidenced by the taking of vows"—was overly restrictive. The Service agrees that the definition should not exclude those in faiths in which "a calling to religious life" may be demonstrated by comparable means other than taking vows. The definition has been revised accordingly.

Two commenters asked that the regulation specifically indicate that religious volunteers need not be compensated. The final rule has been revised to account more clearly for uncompensated volunteers, whose services are engaged but who are not technically employees. Any alien who receives wages or other remuneration for services is an employee. In such a case, the specific organizational unit of the religious organization employing the alien should maintain Form I-9, Employment Eligibility Verification.

Miscellaneous Comments

One commenter asked whether study is permissible for R-2 dependents. The rule only forbids the R-1 alien's dependents to accept employment while in the United States. As with those in other nonimmigrant dependent classifications, such as H-4 and L-2, study is permissible.

Two commenters asked that the B-1 classification continue to be available for short-term religious workers. In the legislative history of this provision at H.R. 101-723, p. 75, the House Committee on the Judiciary noted that "currently, nonimmigrant religious workers are required to pursue business-related visas, such as B, H and L, for admission to the United States." The Committee further noted that "the bill establishes three categories of religious workers" and that "these three categories apply to both immigrants and nonimmigrants alike." This indicates that Congress's purpose in creating the R classification was to incorporate into one classification the various prior means of admitting nonimmigrant religious workers. The B-1 classification should therefore become unnecessary. Both the Service and the Department of State plan regulatory action that will affect the B-1 classification. Until such action is taken, however, the B-1 provisions for religious workers remain in effect.

One commenter expressed concern that ministers might subvert the purpose of the Act after entering the United States by accepting other, non-religious employment. The final rule need not change in this regard, however, since both it and the Act would clearly forbid such employment. The minister of religion must be coming to the United States solely to pursue the vocation of minister. This requirement must be met at the time of the visa application, the application for admission, or the change of nonimmigrant status.

One commenter felt that the rule should be toughened in several ways. This commenter believed that the rule should require bonds, forbid religious workers to change employers, require employers to notify the Service of any change in the religious worker's employment status, and require a longer period between nonimmigrant stays as a religious worker.

The Service does not believe that such measures are necessary. The Act does not require bonds for nonimmigrant religious workers, and to impose such a requirement by regulation would be unnecessarily cumbersome and severe. The rule permits changes of employers but creates specific requirements that the Service believes are sufficient to prevent abuse. In addition, section 274A of the Act imposes strong employment controls. Finally, although the Service must require an alien to leave the United States between stays as a religious worker, since the Act mandates that such stays shall not exceed five years, one year outside the United States is a sufficient minimum period. That period has previously been used satisfactorily for H-1 and L-1 nonimmigrants, and the Service will also use it for R nonimmigrants.

In accordance with 5 U.S.C. 605(b), the Commissioner of the Immigration and Naturalization Service certifies that this rule does not have a significant economic impact on a substantial number of small entities. This rule is not considered to be a major rule within the meaning of section 1(b) of E.O. 12291, nor does this rule have Federalism implications warranting the preparation of a Federalism Assessment in accordance with E.O. 12612.

The information collection requirements contained in this rule have been cleared by the Office of Management and Budget under the provisions of the Paperwork Reduction Act. Clearance numbers for these collections are contained in 8 CFR 299.5, Display of Control Numbers.

List of Subjects in 8 CFR Part 214

Administrative practice and procedure, Aliens, Authority delegation (Government agencies), Employment, Organization and functions (Government agencies), Passports and visas.

Accordingly, chapter I of title 8 of the Code of Federal Regulations is amended as follows:

PART 214—NONIMMIGRANT CLASSES

1. The authority citation for part 214 continues to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1184, 1186a, 8 CFR part 2.

2. Section 214.2 is amended by adding a new paragraph (r) to read as follows:

§ 214.2 Special requirements for admission, extension, and maintenance of status.

* * * * *

(r) *Religious workers*—(1) *General.* Under section 101(a)(15)(R) of the Act, an alien who, for at least the two (2) years immediately preceding the time of application for admission, has been a member of a religious denomination having a bona fide nonprofit religious organization in the United States, may be admitted temporarily to the United States to carry on the activities of a religious worker for a period not to exceed five (5) years. The alien must be coming to the United States for one of the following purposes: solely to carry on the vocation of a minister of the religious denomination; to work for the religious organization at the request of the organization in a professional capacity; or to work for the organization, or a bona fide organization which is affiliated with the religious denomination, at the request of the organization in a religious vocation or occupation.

(2) *Definitions.* As used in this section:

Bona fide nonprofit religious organization in the United States means an organization exempt from taxation as described in section 501(c)(3) of the Internal Revenue Code of 1986 as it relates to religious organizations, or one that has never sought such exemption but establishes to the satisfaction of the Service that it would be eligible therefor if it had applied for tax exempt status.

Bona fide organization which is affiliated with the religious denomination means an organization which is both closely associated with the religious denomination and exempt from taxation as described in section 501(c)(3) of the Internal Revenue Code of 1986 as it relates to religious organizations.

Minister means an individual duly authorized by a recognized religious denomination to conduct religious worship and to perform other duties usually performed by authorized members of the clergy of that religion. In all cases, there must be a reasonable connection between the activities performed and the religious calling of the minister. The term does not include a lay preacher not authorized to perform such duties.

Professional capacity means an activity in a religious vocation or occupation for which the minimum of a United States baccalaureate degree or a foreign equivalent degree is required.

Religious denomination means a religious group or community of believers having some form of ecclesiastical government, a creed or statement of faith, some form of worship, a formal or informal code of doctrine and discipline, religious services and ceremonies, established places of religious worship, and religious congregations, or comparable indicia of a bona fide religious denomination. For the purposes of this definition, an interdenominational religious organization which is exempt from taxation pursuant to section 501(c)(3) of the Internal Revenue Code of 1986 will be treated as a religious denomination.

Religious occupation means an activity which relates to a traditional religious function. Examples of persons in religious occupations include, but are not limited to, liturgical workers, religious instructors, religious conselors, cantors, catechists, workers in religious hospitals or religious health care facilities, missionaries, religious translators, or religious broadcasters. This group does not include janitors, maintenance workers, clerks, fund raisers, or persons involved solely in the solicitation of donations.

Religious vocation means a calling to religious life evidenced by the demonstration of commitment practiced in the religious denomination, such as the taking of vows. Examples of persons with a religious vocation include, but are not limited to, nuns, monks, and religious brothers and sisters.

(3) *Initial evidence.* An alien seeking classification as a nonimmigrant religious worker shall present to a United States consular officer, or, if visa exempt, to an immigration officer at a United States port of entry, documentation which establishes to the satisfaction of the consular or immigration officer that the alien will be providing services to a bona fide nonprofit religious organization in the United States or to an affiliated religious organization as defined in paragraph (r)(2) of this section, and that the alien meets the criteria to perform such services. If the alien is in the United States in another valid nonimmigrant classification and desires to change nonimmigrant status to classification as a nonimmigrant religious worker, this documentation should be presented with an application for change of status (Form I-129, Petition for a Nonimmigrant Worker). The documentation shall consist of:

(i) Evidence that the organization qualifies as a non-profit organization, in the form of either:

(A) Documentation showing that it is exempt from taxation in accordance with section 501(c)(3) of the Internal Revenue Code of 1986 as it relates to religious organizations (in appropriate cases, evidence of the organization's assets and methods of operation and the organization's papers of incorporation under applicable state law may be requested); or

(B) Such documentation as is required by the Internal Revenue Service to establish eligibility for exemption under section 501(c)(3) of the Internal Revenue Code of 1986 as it relates to religious organizations; and

VOL 56 ISS 249 DE 27 1991 UMI

(ii) A letter from an authorized official of the specific organizational unit of the religious organization which will be employing the alien or engaging the alien's services in the United States. If the alien is to be employed, this letter should come from the organizational unit that will maintain the alien's Form I–9, Employment Eligibility Verification, that is, the organizational unit that is either paying the alien a salary or otherwise remunerating the alien in exchange for services rendered. This letter must establish:

(A) That, if the alien's religious membership was maintained, in whole or in part, outside the United States, the foreign and United States religious organizations belong to the same religious denomination;

(B) That, immediately prior to the application for the nonimmigrant visa or application for admission to the United States, the alien has the required two (2) years of membership in the religious denomination;

(C) As appropriate:

(*1*) That, if the alien is a minister, he or she is authorized to conduct religious worship for that denomination and to perform other duties usually performed by authorized members of the clergy of that denomination, including a detailed description of those duties;

(*2*) That, if the alien is a religious professional, he or she has at least a United States baccalaureate degree or its foreign equivalent and that at least such a degree is required for entry into the religious profession; or

(*3*) That, if the alien is to work in another religious vocation or occupation, he or she is qualified in the religious vocation or occupation. Evidence of such qualifications may include, but need not be limited to, evidence establishing that the alien is a monk, nun, or religious brother or that the type of work to be done relates to a traditional religious function;

(D) The arrangements made, if any, for remuneration for services to be rendered by the alien, including the amount and source of any salary, a description of any other types of remuneration to be received (including housing, food, clothing, and any other benefits to which a monetary value may be affixed), and a statement whether such remuneration shall be in exchange for services rendered;

(E) The name and location of the specific organizational unit of the religious organization for which the alien will be providing services within the United States; and

(F) If the alien is to work in a non-ministerial and nonprofessional capacity for a bona fide organization which is affiliated with a religious denomination, the existence of the affiliation; and

(iii) Any appropriate additional evidence which the examining officer may request relating to the religious organization, the alien, or the affiliated organization. Such additional documentation may include, but need not be limited to, diplomas, degrees, financial statements, or certificates of ordination. No prior petition, labor certification, or prior approval shall be required.

(4) *Initial admission.* The initial admission of a religious worker, spouse, and unmarried children under twenty-one years of age shall not exceed three (3) years. A Form I–94, Arrival-Departure Record, shall be provided to every alien who qualifies for admission as an R nonimmigrant. The Form I–94 for the religious worker shall be endorsed with the name and location of the specific organizational unit of the religious organization for which the alien will be providing services within the United States. The admission symbol for the religious worker shall be R–1; the admission symbol for the worker's spouse and childen shall be R–2.

(5) *Extension of stay.* The organizational unit of the religious organization employing the nonimmigrant religious worker admitted under this section shall use Form I–129, Petition for a Nonimmigrant Worker, along with the appropriate fee, to extend the stay of the worker. The petition shall be filed at the Service Center having jurisdiction over the place of employment. An extension may be authorized for a period of up to two (2) years. The worker's total period of stay may not exceed five (5) years. The petition must be accompanied by a letter from an authorized official of the organizational unit confirming the worker's continuing eligibility for classification as an R–1 nonimmigrant.

(6) *Change of employers.* A different or additional organizational unit of the religious denomination seeking to employ or engage the services of a religious worker admitted under this section shall file Form I–129 with the appropriate fee. The petition shall be filed with the Service Center having jurisdiction over the place of employment. The petition must be accompanied by evidence establishing that the alien will continue to qualify as a religious worker under this section. Any unauthorized change to a new religious organizational unit will constitute a failure to maintain status within the meaning of section 241(a)(1)(C)(i) of the Act.

(7) *Limitation on stay.* An alien who has spent five (5) years in the United States under section 101(a)(15)(R) of the Act may not be readmitted to the United States under the R visa classification unless the alien has resided and been physically present outside the United States for the immediate prior year, except for brief visits for business or pleasure. Such visits do not end the period during which an alien is considered to have resided and been physically present outside the United States, but time spent during such visits does not count toward the requirement of this paragraph.

(8) *Spouse and children.* The religious worker's spouse and unmarried children under twenty-one years of age are entitled to the same nonimmigrant classification and length of stay as the religious worker, if the religious worker will be employed and residing primarily in the United States, and if the spouse and unmarried minor children are accompanying or following to join the religious worker in the United States. Neither the spouse nor any child may accept employment while in the United States in R–2 nonimmigrant status.

Dated: December 18, 1991.

Gene McNary,

Commissioner, Immigration and Naturalization Service.

BILLING CODE 4410–10–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 139

Development of an Airport Signage Plan; Certification and Operations: Land Airports Serving Certain Air Carriers

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of requirement for airport signage plan.

SUMMARY: This notice informs all certificated airport owners and operators subject to FAR part 139 that they must have an approved airport signage plan by November 1, 1992.

FOR FURTHER INFORMATION CONTACT: William DeLoach, Office of Airport Safety and Standards, Airport Safety and Operations Division, AAS–300, Federal Aviation Administration, 800 Independence Ave. SW, Washington, DC 20591. Telephone (202)–267–3085.

SUPPLEMENTARY INFORMATION: Federal Aviation Regulations, 14 CFR part 139, § 139.205(b)(12) and § 139.213(b)(10) contain the requirement to include in the Airport Certification Manual or the Airport Certification Specifications, as applicable, the following: "A description of, and procedures for maintaining, the marking and lighting systems as required by § 139.311." Additionally, §§ 139.205(b)(28) and § 139.213(b)(16) state that the airport certification manual and airport certification specifications must contain any other item which the Administrator of the Federal Aviation Administration (FAA) finds is necessary in the public interest.

The purpose of this notice is to inform all certificated airport owners and operators that the FAA finds that the inclusion of the airport signage plan in the airport certification manual or the airport certification specifications is in the public interest and requires that airports subject to Federal Aviation Regulation part 139 prepare a signage plan for FAA approval. This plan will detail the type and the location of each sign required by § 139.311.(a) (3), (4), and (5). Any airport subject to FAR part 139 must have an approved airport signage plan no later than November 1, 1992. Additionally, any airport subject to FAR part 139 must have an approved sign plan in order to be eligible for Airport Improvement Program funds for such signing.

Advisory Circular No. 150/5340–18C was adopted July 31, 1991 and contains acceptable standards to satisfy these signage plan requirements.

Authority: 49 U.S.C. App. 1354(a) and 1432; 49 U.S.C. section 106(g) (Revised, Pub. L. 97–449, January 12, 1983).

Issued in Washington, DC, on December 16, 1991.

Raymond T. Uhl,

Deputy Director, Office of Airport Safety and Standards.

DEPARTMENT OF COMMERCE

Technology Administration

15 CFR Part 265

Regulations Governing Traffic and Conduct on the Grounds of the National Institute of Standards and Technology, Gaithersburg, MD, and Boulder and Fort Collins, CO

AGENCY: National Institute of Standards and Technology, Commerce.

ACTION: Final Rule; nomenclature change.

SUMMARY: Pursuant to a reorganization of certain offices within the National Institute of Standards and Technology (hereinafter "NIST"), during which many of NIST's functions and activities have been renamed and reassigned, it became necessary to revise and update NIST's administrative structure. Accordingly, relevant sections of the Code of Federal Regulations must be amended to reflect these changes.

EFFECTIVE DATE: December 27, 1991.

FOR FURTHER INFORMATION CONTACT: Philip J. Greene (202) 377–5394.

SUPPLEMENTARY INFORMATION: Because this rulemaking document concerns agency organization and management, it is not a rule or regulation within the meaning of section 1(a) of Executive Order 12291, and is not subject to the requirements of that order.

Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedures Act (5 U.S.C. 553), or by any other law, no regulatory flexibility analysis has to be or will be prepared for purposes of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)).

This final rule does not contain policies with Federalism implications sufficient to warrant preparation of a Federalism assessment under Executive Order 12612. This rule does not contain collections of information for purposes of the Paperwork Reduction Act.

List of Subjects in 15 CFR Part 265

Federal buildings and facilities; Traffic regulations.

For the reasons set forth in the Preamble, 15 CFR part 265 is amended as follows:

PART 265 [AMENDED]

1. The authority citation for 15 CFR part 265 continues to read as follows:

Authority: Sec. 9, 31 Stat. 1450, as amended (15 U.S.C. 277). Applies sec. 1, 72 Stat 1711, as amended, (15 U.S.C. 278e(b)).

§ 265.31 [Amended]

2. In 15 CFR 265.31, remove the words "Deputy Director, IBS/Boulder" and add, in their place, the words "Director, NIST Boulder Laboratories."

§ 265.42 [Amended]

3. In 15 CFR 265.42(a), remove the words "Office of Information Activities of the National Institute of Standards and Technology (Chief, Program Information Office, IBS/Boulder for sites in Colorado)" and add, in their place, the words "Public Affairs Division of the National Institute of Standards and Technology (Public Affairs Officer for Boulder for sites in Colorado.)"

§ 265.42 [Amended]

4. In 15 CFR 265.42(b), remove the words "Associate Director for Administration (Executive Officer, IBS/Boulder, for sites in Colorado," and add, in their place, the words "Director of Administration (Executive Office, Boulder, for sites in Colorado)."

Dated: December 19, 1991.

John W. Lyons,

Director, National Institute of Standards and Technology.

BILLING CODE 3510–13–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 172

[Docket No. 91F–0059]

Food Additives Permitted for Direct Addition to Food for Human Consumption; Cocoa Butter Substitute

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of a synthetic triglyceride mixture as a cocoa butter substitute. This action is in response to a petition filed by Huls America, Inc.

DATES: Effective December 27, 1991; written objections and requests for a hearing by January 27, 1992.

ADDRESSES: Written objections to the Docket Management Branch (HFA–305), Food and Drug Administration, room 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Andrew D. Laumbach, Center for Food Safety and Applied Nutrition (HFF–334), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–426–5487.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of March 14, 1991 (56 FR 10903), FDA announced that a food additive petition (FAP 7A4025) had been filed by Huls America, Inc., 80 Centennial Ave., P.O. Box 456, Piscataway, NJ 08855–0456, proposing that the food additive regulations be amended to provide for the safe use of synthetic triglyceride

VOL 56 ISS 249 DEC 27 1991 UMI

mixture (CAS Reg. No. 85665–33–4), obtained by reacting fatty acids derived from coconut or palm kernel oil with glycerol, as a cocoa butter substitute.

FDA has evaluated data in the petition and other relevant material. The agency concludes that the proposed food additive use is safe, and that the regulations in 21 CFR part 172 should be amended as set forth below. Because the notice of filing of March 14, 1991, may have been ambiguous, in the amendment set forth below, FDA is clarifying that the food additive may be composed of fatty acids derived solely from coconut oil, fatty acids derived solely from palm kernel oil, or a combination of fatty acids derived from both oils.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action. FDA has concluded that the action will not have a significant impact on the human environment, and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Any person who will be adversely affected by this regulation may at any time on or before January 27, 1992 file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on the objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 172

Food additives, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, 21 CFR part 172 is amended as follows:

PART 172—FOOD ADDITIVES PERMITTED FOR DIRECT ADDITION TO FOOD FOR HUMAN CONSUMPTION

1. The authority citation for 21 CFR part 172 continues to read as follows:

Authority: Secs. 201, 401, 402, 409, 701, 706 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321, 341, 342, 348, 371, 376).

2. New § 172.861 is added to subpart I to read as follows:

§ 172.861 Cocoa butter substitute from coconut oil, palm kernel oil, or bath oils.

The food additive, cocoa butter substitute from coconut oil, palm kernel oil, or both oils, may be safely used in food in accordance with the following conditions:

(a) Cocoa butter substitute from coconut oil, palm kernel oil (CAS Reg. No. 85665–33–4), or both oils is a mixture of triglycerides. It is manufactured by esterification of glycerol with food-grade fatty acids (complying with § 172.860) derived from edible coconut oil, edible palm kernel oil, or both oils.

(b) The ingredient meets the following specifications:

Acid number	Not to exceed 0.5.
Saponification number.	220 to 260.
Iodine number	Not to exceed 3.
Melting range	30 to 44 °C.

(c) The ingredient is used or intended for use as follows:

(1) As coating material for sugar, table salt, vitamins, citric acid, succinic acid, and spices; and

(2) In compound coatings, cocoa creams, cocoa-based sweets, toffees, caramel masses, and chewing sweets as defined in § 170.3 (n)(9) and (n)(38) of this chapter, except that the ingredient may not be used in a standardized food unless permitted by the standard of identity.

(d) The ingredient is used in accordance with current good manufacturing practice and in an amount not to exceed that reasonably required to accomplish the intended effect.

Dated: December 17, 1991.

Fred R. Shank,

Director, Center for Food Safety and Applied Nutrition.

[FR Doc. 91–30923 Filed 12–26–91; 8:45 am]

BILLING CODE 4160–01–M

DEPARTMENT OF STATE

Bureau of Economic and Business Affairs

[Public Notice 1542]

22 CFR Part 89

Foreign Prohibitions on Longshore Work by U.S. Nationals

AGENCY: Department of State.

ACTION: Final rule.

SUMMARY: The final rule contains a revised list, of longshore work by particular activity, of countries where performance of such a particular activity is prohibited by law, regulation or in practice in the country concerned. This list is being issued pursuant to section 258(d) of the Immigration and Nationality Act of 1952, as amended, 8 U.S.C. 1288, as added by the Immigration Act of 1990, Pub. L. 101–649 of November 29, 1990.

DATES: Effective Date: January 1, 1992.

ADDRESSES: For mailing public comments: Office of Maritime and Land Transport (EB/TRA/MA), room 5828, Department of State, Washington, DC 20520–5816.

FOR FURTHER INFORMATION CONTACT: Stephen Miller, Office of Maritime and Land Transport, Department of State, Washington, DC 20520–5816. (202) 647–6961.

SUPPLEMENTARY INFORMATION: Section 258(d)(2) of the Immigration and Nationality Act of 1952, as amended, (hereinafter: the Act) directs the Secretary of State (hereinafter: the Secretary) to "compile and annually maintain a list, of longshore work by particular activity, of countries where performance of such work by crewmembers aboard United States vessels is prohibited by law, regulation or in practice in the country." As announced in the Notice of Proposed Rulemaking dated February 27, 1991, the Department of State (hereinafter: the Department) is establishing such a list from reports received from United States diplomatic posts abroad concerning relevant laws, regulations and practices of their host countries and from comments received from interested parties. On May 30, 1991, the Department issued a list in the form of an interim final rule with a request for comments (56 FR 24338). Upon publication of the interim final rule, the Department asked the U.S. Embassies in the countries cited to inform their host governments of the rulemaking and its effects and to investigate reports of restrictive practices received in comments to the interim final rule.

Comments From Interested Parties

The Department has received the following comments in response to the interim final rule.

The American Great Lakes Ports (the Ports), which make up the U.S. members of the International Association of Great Lakes Ports, commends the Department for its effort to carry out the letter and intent of section 258 of the Act in a practical manner that takes account of the complexities of the shipping industry. In particular, the Ports agree with the Department's interpretation of geographic scope. The Ports also support listing particular activities in order to apply reciprocity to activities prohibited by other countries, as specified by the Act. In cases where governments are involved in local prohibitions, the Ports believe that the Department should consider whether the government role is similar to that of a commercial entity. Finally, the Ports take the position that the Department's list should govern application of the reciprocity exemption by other agencies.

On behalf of its domestic member companies, the American Iron and Steel Institute expressed strong support for the interim final rule, in particular for the interpretation of the term "in practice", which the Institute believes is fully consistent with section 258 of the Act.

Writing on behalf of the Canadian Shipowners Association, the Canadian-American Company (CANAMCO), fully concurs with the Department's interim final rule. In particular, CANAMCO agrees with the interpretation regarding collective bargaining agreements and general practice.

The Federation of American Controlled Shipping (FACS), whose membership consists of U.S. companies with interests in open registry shipping, believes that the interim final rule has properly construed the longshore provisions of the Act. In particular, FACS concurs with the Department's interpretation of the term "in practice". FACS takes the view that to deny reciprocity to friendly foreign countries whose governments had no role in restrictions in private agreements would be akin to holding the U.S. Government responsible for practices privately negotiated by longshore unions and stevedoring firms in this country. FACS observes that the Act defers to collective bargaining arrangements in U.S. ports which may have the effect of reserving certain activities to longshoremen. From this, FACS concludes that Congress views such private arrangements as both permissible and controlling in the U.S. and that in the same law, Congress would not treat similar arrangements in other countries as improper in the sense that these restrictions would create grounds for denial of a reciprocal exemption. FACS also points to the practical difficulties of monitoring private sector practices throughout the world. Finally, FACS believes that the decision to list only countries that actually have had operative restrictions against U.S. mariners in the past year is reasonable, justifiable and consistent with the spirit and purpose of the reciprocity exemption.

Georgia-Pacific Corporation (G–P) supports the interim final rule as fairly and effectively implementing the spirit and intent of Congress in the Act. G–P agrees with the Department's interpretation regarding collective bargaining agreements and general practice. G–P reports that it owns three foreign-flag ships and depends on other U.S. and foreign-flag carriers for the import and export of raw materials and finished goods. G–P underscores the importance of free and fair international trade to U.S. interests and takes the position that U.S. regulations must not impose unnecessary restrictions or barriers in ocean transportation.

The International Council of Cruise Lines (ICCL) requests an exemption for passenger ships registered in Italy. The ICCL identifies itself as the representative of thirteen foreign-flag passenger cruise lines that carry more than ninety percent of the overnight, deep-water passenger cruise capacity in the North American market. The ICCL recalls that it submitted an earlier statement that the Act does not apply to passenger vessels. Since several ICCL vessels are registered in Italy, which appears on the list published in the interim final rule, ICCL wanted to submit further comments on this particular point. The ICCL submits that the Department should make a finding that Italian law, regulation or practice has not restricted the crews of U.S. passenger vessels from performing longshore work because no U.S.-flag passenger vessel has called on any Italian port in the past year. The ICCL points out that the Department, in its cable to U.S. diplomatic posts, did not make any reference to non-cargo related loading activities of U.S. passenger vessels. The ICCL understands that there is no national policy in Italy regarding longshore work and that each port sets its own policy.

The Lake Carrier's Association supports the Department's finding that Canada does not prohibit longshore work to the crews of U.S.-flag bulk vessels.

The Shippers for Competitive Ocean Transportation (SCOT) has submitted comments as the representative of major companies and associations accounting for more than 60 percent of all U.S. liner exports and for substantial exports by bulk shipping. SCOT supports the Department's interim final rule. In particular, SCOT applauds the effort to determine precise restrictions of each country and to apply reciprocal restrictions only to the degree foreign countries restrict U.S. mariners. SCOT strongly concurs with the Department's interpretation of the geographic scope of foreign restrictions and with the decision not to include countries where no U.S. ship has called in the past year. SCOT urges the Department to clarify whether the restrictions listed apply to different kinds of shipping services. As an example, SCOT notes that in its experience, the restrictions listed for Belgium have not applied to liquid bulk terminals in that country. SCOT observes that the law excludes tankers under the provisions dealing with hazardous materials and environmental protection.

In contrast to industry comments, labor union representatives oppose the Department's interpretation of the Act.

In the view of the International Longshoremen's Association, AFL–CIO and the International Longshoremen and Warehousemen's Union, AFL–CIO (the longshoremen's unions), the Department's standards for reciprocity exception articulated in the interim final rule are not consistent with the guidelines set by Congress in the Act. The longshoremen's unions hold that the Act has the objective of preserving longshore work in the U.S. for U.S. longshoremen. The longshoremen's unions believe that alien longshoremen are doing such work in U.S. ports while U.S. nationals are not able to perform the same activities in foreign countries. The longshoremen's unions express the

VOL
56
ISS
249
DEC
27
1991
UMI

concern that the Department's list will enable countries to avail themselves of a reciprocity exemption to which they are not entitled.

Specifically, the longshoremen's unions observe that the statute refers to activities "prohibited by law, regulation or in practice *in* the country. (Emphasis added by the longshoremen's unions.) The longshoremen's unions believe that this construction applies to any private agreement that prohibits U.S. mariners from carrying out longshore work in a foreign country. The longshoremen's unions do not believe that Congress would allow reciprocal exemptions for beneficiaries whose countries did not extend the same privileges to U.S. vessels and mariners.

The longshoremen's unions also take exception to the Department's interpretation of the effect of compensation of local port workers and geographic scope. The longshoremen's unions refer to reports from the International Transport Workers Federation attached to their comments to demonstrate that practices can vary among the ports of a single country. The longshoremen's unions do not believe that the omission of Liberia from the list is warranted because the Department has not made a finding that any longshore activities have been normally performed in Liberia during the past year or during the year preceeding the arrival of a Liberian ship in U.S. coastal waters. The longshoremen's unions further question the terms for the reciprocal treatment of U.S. mariners in Panama. The longshoremen's unions do not believe that Peru should be granted a reciprocal exception because regulations prohibit longshore work by U.S. mariners. Finally, the longshoremen's unions ask about the reasons for the exemptions of Canada, China, Denmark, Germany, Japan, Korea, Portugal and other unspecified countries.

The North American Caucus of the International Transport Workers' Federation (ITF) believes that the Department has misinterpreted the intent of the Act, in particular the term "in practice" as it relates to union contracts, industry agreements, or traditional practices. The ITF takes the position that this section of the Act has the objective of protecting the long-term security of jobs traditionally performed by U.S. longshoremen.

The Transportation Trades Department of the AFL–CIO believes that the Department has misinterpreted the intent of the Act, in particular the term "in practice" as it relates to union contracts, industry agreements, or traditional practices. The AFL–CIO takes the position that this section of the Act has the objective of protecting the long-term security of jobs traditionally performed by U.S. longshoremen.

Representatives Jack Brooks, Howard Berman, William Ford and George Miller submitted a joint statement expressing concerns about the Department's interim final rule and calling upon the Department to modify the final rule. The Congressmen advise that section 258(d) of the Act only provides for a narrow exception from an otherwise broad and deliberate effort to stop foreign mariners from doing longshore work. The Congressmen do not accept the Department's interpretation of the term "in practice" as it relates to private collective bargaining agreements. They note that Congress neither explicitly stated nor implicitly inferred that a private agreement would have to be imposed or approved by the government in order to disqualify a country from receiving a reciprocal exemption. They refer to a colloquy in the October 26, 1990 edition of the Congressional Record between Senators Brock Adams and Edward Kennedy about practices that could constitute a prohibition "in practice."

Definition of Longshore Work

Section 258(b) defines the term "longshore work" as "any activity relating to the loading or unloading of cargo, the operation of cargo-related equipment (whether or not integral to the vessel), and the handling of mooring lines on the dock when the vessel is made fast or let go, in the United States or the coastal waters thereof."

Information developed by the Department indicates that there is no international consensus on what constitutes "longshore work". The laws and regulations of many countries which prohibit crews of U.S. ships from performing longshore work do not provide a definition of the term and do not enumerate particular activities which are covered. Other countries specify particular activities exempt from their restrictions on longshore work. It is possible that activities covered by the Act's definition of "longshore work" may not be viewed in other countries as "longshore work" for the purposes of their laws and regulations. In order to compile as detailed a list as possible, the Department sought information regarding restrictions on particular shipboard activities, e.g. opening of hatches, rigging of ship's gear and handling of lines.

Several comments asked the Department to list practices that apply to different types of shipping services, such as bulk and passenger shipping. The regulations of many countries are not sufficiently detailed to differentiate between practices applying to dry bulk, tanker and liner shipping. Where identified, exceptions from restrictions on longshore work are noted in the list of countries established in accord with section 258(d)(2) of the Act.

Standards for Reciprocity Exception

The Department is listing those countries where restrictions on longshore activities by crewmembers of U.S. ships are imposed or approved by the foreign government on a national basis.

—By law or regulation,
—Through a collective bargaining agreement directly negotiated by the foreign government with other parties, or
—Through restrictions in private collective bargaining agreements imposed or approved by the foreign government.

In view of the sharp differences in opinion prompted by the interim final rule, the Department wishes to review in detail the Act and its legislative history.

Role of Government in Restrictions in Practice

Section 258(d)(1) of the Act sets the general conditions for the reciprocity exemption:

* * * the Attorney General shall permit an alien crewman to perform an activity constituting longshore work if—

(A) The vessel is registered in a *country that by law, regulation, or in practice does not prohibit such activity* by crewmembers aboard United States vessels; and (emphasis added by the Department.)

(B) nationals of *a country (or countries) which by law, regulation, or in practice does not prohibit such activity* by crewmembers aboard United States vessels hold a majority of the ownership interest in the vessel. (Emphasis added by the Department.)

Section 258(d)(3) defines "in practice" as

"an activity normally performed in such country during the one-year period preceding the arrival of such vessel into the United States or coastal waters thereof."

In interpreting the legislation, the Department consulted the conference report, which contains brief references to the exemptions from the general prohibition in section 258 against longshore work by the crews of foreign vessels:

The section provides * * * exemptions * * * for international reciprocity between the United States and *countries that do not prohibit crewmen from performing particular longshore activities* aboard U.S. vessels in their respective ports. (Emphasis added by the Department.)

The conference report further specifies that

"(t)he exception for reciprocity requires a foreign vessel to be registered in a country, and owned by nationals of a country, *each of which does not prohibit by law, regulation or general practice crewmen from performing longshore activities* aboard U.S. vessels in its ports. (Emphasis added by the Department.)

In addition, the colloquy between Senators Kennedy and Adams offers an insight into the intent of Congress:

Mr. ADAMS. Mr. President, concerning the international reciprocity provision in section 203, the bill's section on longshore work, I want to confirm the conference committee's agreement on the degree of protection this provision provides for U.S. longshoremen. It is my understanding that another country's "prohibition in practice" of U.S. or other foreign crewmen performing longshore work is to consist of any effective restriction *imposed or sanctioned by the other country's government.* * * * (emphasis added by the Department.)

Mr. KENNEDY. The Senator is correct.

The Department takes the view that the general conditions set in section 258(d)(1) govern the implementation of the reciprocity exception. The Department agrees with the comment that Congress does not want to grant an exception to crews of countries that do not accord U.S. crews the same treatment. Section 258(d)(1), however, only refers to restrictions in which the government has an active role. The conference report uses the same construction. Moreover, the colloquy explicitly refers to restrictions sanctioned or imposed by a country's government. The Department has therefore concluded that a reasonable interpretation of the Act would only apply to restrictions actively imposed or sanctioned by a foreign government.

Collective Bargaining Agreements

Under the policy of reciprocal treatment established by the Act, collection bargaining agreements duly negotiated under a foreign country's labor law should not affect that country's eligibility for reciprocal exemption unless the country's government imposes or sanctions the agreements. The mere existence of agreements restricting longshore activities by crewmen does not mean that the government supports or requires such restrictions. As in the U.S., the labor laws of many other countries guarantee the right of collective bargaining but do not dictate the terms of collective bargaining agreements. In each case, the Department examined the extent of government intervention in the collective bargaining process.

The Department agrees with the comment that section 258(d)(3) recognizes collective bargaining activities as a distinct sphere of activity not subject to provisions of the Act. In this connection, the Department makes note of a statement by Senator Kennedy on this matter in the colloquy cited earlier:

[This section] does not extent (sic) into the area of labor law and would not disturb any U.S. longshore collective bargaining agreements that reserve work for U.S. workers.

Geographic Scope

The Department is only listing countries where restrictions generally prevail throughout the country. The conference report establishes "general practice" as a test for reciprocity exemption. Some parties submitting comments claim no knowledge of discussions in Congress to examine each region of countries contiguous to the United States rather than considering activities on a nationwide basis. Even if Congress rejected such a proposal, these parties believe that the legislation requires a separate examination of the practices in each region of a foreign country. The Department notes that Administration representatives from the Departments of State and Transportation took an active part in discussions with the conferees about this proposal and made clear that the Administration firmly rejected such an approach. Comments to the interim final rule have not changed the Department's views.

Commercial Practice

Several comments submitted in response to the notice of proposed rulemaking observed that carriers may use local longshore workers as a matter of established commercial practice. The Department agrees that carriers may voluntarily employ local workers for reasons other than governmentally imposed or approved constraints. In the absence of evidence of restrictive laws, regulations or practices, the Department presumes that the choice to use local longshoremen results from purely voluntary commercial decisions.

Compensation of Port Workers

The Department is not including as restrictions requirements to compensate local workers for wages foregone if crewmembers perform longshore work unless the compensation does not reflect the ordinary market wages for such work.

Status of Individual Countries

Some parties raised questions about the status of individual countries. The Department made its finding on Liberia after determining that no U.S. ships have called in Liberian ports during the past year and consequently have not been subject to any restrictions on longshore work. After further consultations with the Panamanian Government, the Department has not found any prohibition against longshore work by U.S. crewmembers in law, regulation or in practice. Therefore, the Department is not placing Panama on the list. The finding on Peru is based on reports from the U.S. Embassy in Lima on discussions with U.S. carriers as well as Peruvian government officials. These sources confirm that Peru no longer prevents U.S. mariners from doing longshore work.

Some comments contained allegations about restrictions in several other countries. Some of the countries (Belgium, Brazil, Italy and Turkey) are already included on the list. Further investigation into the allegations about Japan uncovered regulations that prohibit the crews of U.S. ships from doing longshore work. The Department also determined that Germany requires U.S. mariners to have a work permit in order to perform certain on-shore longshore activities. Germany and Japan have consequently been added to the list. The Department also investigated reports of restrictive collective bargaining agreements in Denmark and has reconfirmed that the Danish Government has not approved or imposed these restrictions. Therefore, Denmark is not included in the list.

Information collected after publication of the interim final rule indicates that Algeria prohibits U.S. mariners from performing longshore work. That country has been added to the list. The Department has incorporated changes into the final rule concerning prohibitions in Italy, Spain, Taiwan and Trinidad and Tobago to reflect more precisely the laws, regulations, and practices of these countries and regions.

In its comments, one party questioned whether Italy has a national policy on longshore work. The U.S. Embassy in Rome reports that Article 110 of the Navigation Code governs longshore work by foreign mariners. The law makes no distinction between types of ships.

List of Subjects in 22 CFR Part 89

Aliens, Crewmembers, Immigration, Labor, Longshore Work.

VOL
56
ISS

1991
UMI

For the reasons set out in the preamble, 22 CFR chapter I is amended as follows.

PART 89—PROHIBITIONS ON LONGSHORE WORK BY U.S. NATIONALS

Part 89 is amended by revising § 89.1 to read as follows:

§ 89.1 Prohibitions on Longshore work by U.S. nationals; listing by country.

The Secretary of State has determined that, in the following countries, longshore work by crewmembers aboard United States vessels is prohibited by law, regulation, or in practice, with respect to the particular activities noted:

Algeria

(a) All longshore activities.

Argentina

(a) Loading and discharge of cargo.

Australia

(a) Handling of cargo or ballast in connection with the loading or discharge of a ship, including rigging of ship's gear, unless there is insufficient shore labor.

(b) Exceptions: Operation of self discharging equipment and other automatic loading/unloading mechanisms.

Belgium

(a) Cargo loading and discharge.

(b) Exception: Operation of cargo-related machinery on board the ship.

Belize

(a) Loading and unloading cargo vessels and handling of containers.

(b) Exception: Operation of shipboard cranes to load and offload containers.

Brazil

(a) Movement of cargo.

(b) Lashing or unlashing of containers.

(c) Operation of cargo related equipment, whether or not on board the ship.

(d) Activities performed by cargo checkers, tally clerks, watchmen, and coopers.

Burma

(a) Loading and discharge of cargo from and in any sea-going vessels coming to any dock, wharf, quay, stage, jetty or pier.

(b) Handling of mooring lines.

(c) Exceptions: Shipboard activities including opening hatches and rigging ship's gear; loading or discharge of cargo when the equipment or cargoes require special handling; and loading or discharge of other cargoes, by special agreement with port authorities.

Chile

(a) Any and all functions relating to the loading and unloading of cargo and other tasks appropriate to a port, whether on board boats and ships in the port or in the dock area, including the operation of cargo-related equipment, whether or not integral to the vessel, including hatches and rigging of ship's gear.

(b) Exceptions:

(1) Placement and removal of mooring ropes from dock bitts and operation of the capstans aboard the vessel, when under the control of the harbor pilot; and

(2) Doing a vessel's mess and purveying alongside the ship with the provisions, loading and placement of the provisions in the ship's larder or stores.

China, Peoples Republic of

(a) All longshore activities.

Columbia

(a) All activities related to the loading and discharge of cargo, including operation of cargo-related equipment integral to the vessel.

Congo

(a) All longshore activities.

Costa Rica

(a) Operation of loading and unloading equipment affixed to the pier.

Cote d'Ivoire

(a) All longshore activities.

Egypt

(a) Cargo loading and unloading activities not on board the ship.

El Salvador

(a) Port operations, including the loading and discharge of cargo, the operation of equipment, whether on the ship or not, and the handling of lines.

France

(a) All loading and unloading of ocean-going ships.

(b) Exception: Movement of personal belongings and machinery belonging to the ship.

Germany

(a) All longshore activities on shore without a labor permit.

Guatemala

(a) All port operations except for the opening of hatches and entrances to ship storage areas.

Guinea

(a) All longshore activities.

Honduras

(a) All longshore activities, including loading and discharge of cargo, handling of containers, operation of cranes, hoisting machinery and roll-on/roll-off equipment.

(b) Exception: Handling of toxic or hazardous materials, with clearances obtained through the national port authority prior to entry into port.

India

(a) All on-board activities relating to loading and discharge of cargo and operation of cargo-related equipment, including rigging of derricks, and opening and closing of hatches.

(b) All movement of cargo on shore.

(c) Berthing vessels and handling of mooring lines on dock when the vessel is made fast or let go.

Indonesia

(a) All longshore activities, including opening of hatches, rigging of ship's gear and line handling, as long as there are Indonesian longshoremen available.

(b) Exceptions: Activities for which local workers lack the requisite skills; in an emergency situation, duties ordinarily performed by longshoremen; and loading and discharge of hazardous chemicals at industrial ports if no Indonesian workers are available for the job.

Israel

(a) All longshore activities, including loading and unloading of cargo, operation of cargo-related equipment, and handling of mooring lines.

(b) Exception: Jobs related to the maintenance of the ship itself.

Italy

(a) All longshore activities, including operation of on board equipment and the loading and discharge of new automobiles.

(d) Exceptions:

(1) Operation of automated loading and discharge equipment on board the vessel and associated manual activities, including loading and discharging containers from container vessels manually or with automatic or semi-automatic spreaders,

(2) Operation and movement of fixed or mobile mechanical equipment owned or leased by port companies and used for operations.

(3) Ancillary activities connected with documenting goods,

(4) Restoration of packaging,

(5) All activities, including moving goods, carried out within areas operated under a concession granted by the port authority,

(6) Activities strictly connected with the operation and security of navigation, or otherwise within the competence of the crew,

(7) Handling of the lifts on ferries,

(8) Preparation of on board derricks, winches and cranes,

(9) Opening and closing of hatches,

(10) Loading and discharge operations related to barges from LASH vessels,

(11) Installation of bulkheads to secure cargo,

(12) Lashing and unlashing operations, and

(13) Securing of cargo.

Jamaica

(a) Activities normally carried out by stevedores, lineamen, gangmen or longshoremen, including:

(1) All on-shore activities dealing with the handling and placement of cargo;

(2) All movement of cargo from or onto ships whether by gangplank or crane;

(3) All stacking and slinging of pallets within the ship's cargo holds;

(4) Mooring and unmooring of ships, including handling of mooring lines aboard ships; and

(5) Any other activity involving the discharge of cargo into Jamaica.

(b) All activities associated with the discharge of grain and loading of grain products, with the exception of handling of on-board machinery to keep the ship righted:

(c) Exception: Direction of supervisors by the ship's officers only insofar as necessary to identify which cargo is to be palletized, shifted, or off-loaded.

Kenya

(a) All longshore activities.

Madagascar

(a) All longshore activities.

Mauritania

(a) All longshore activities.

(b) Exception: Supervision by the vessel's master or loadmaster.

Morocco

(a) Handling of any product, crates, boxes, bales or containers destined for unloading.

(b) Exception: Any shipboard activities not relating to loading or discharge operations and not having any commercial character, including opening hatches, rigging of ship's gear and line handling.

Mozambique

(a) All longshore activities.

Namibia

(a) Port services and cargo loading and discharge.

(b) Exception: Handling of cargo only while it remains on the vessel.

Oman

(a) Longshore work without a labor permit, including loading or discharge of cargo, handling of containers or any other activity not related to a crewman's job on the ship or to basic ship repair.

(b) Exceptions: Opening of hatches, rigging of the ship's gear and handling of lines aboard ship.

Pakistan

(a) All longshore activities.

(b) Exceptions: Shipboard activities other than opening of hatches; with prior approval from Ministry of Communications officials, loading or discharge of special cargoes with on-board equipment in cases where dockside equipment operated by longshoremen cannot safely moved the cargoes.

Philippines

(a) All longshore activities.

Portugal

(a) All operations associated with loading or unloading cargo and complementary operations within the port area, including lashing.

(b) Expections:

(1) Opening and closing of hatches;

(2) Rigging of ship's gear;

(3) Handling of lines;

(4) Military vessels or the operation of military material in areas under military jurisdiction;

(5) The supply of bulk operating fuels and lubricating oils to a ship;

(6) The movement of spare parts, supplies, ship's stores, fuels and lubricants when the quantities to be moved are less than three tons per vessels;

(7) The loading, unloading and transfer of fuels and bulk liquid petroleum products;

(8) The loading, unloading and transfer of chemical products whose characteristics require special handling;

(9) The loading, unloading and packing of fresh, refrigerated or frozen fish from a fishing vessel, except when such cargo is listed on the manifest; and

(10) The movement of goods and materials within naval construction and repair yards or petroleum terminals.

Romania

(a) All longshore activities not on board the ship.

St Lucia

(a) All longshore activities.

Sierra Leone

(a) All longshore activities on shore.

South Africa

(a) Cargo handling without a license issued by the port authority.

Spain

(a) Longshore operations, including any loading, offloading, stowage and transfer of goods within port intended for maritime transport by ship.

(b) Exceptions include:

(1) Handling of goods, material, and machinery belonging to the port authorities;

(2) Material of the Ministry of Defense unless operations are carried out by a stowage company;

(3) Mail loading and offloading;

(4) Private vehicles offloaded by owners or drivers and complementary grip tasks carried out by ship's crew;

(5) Offloading, transport to storage and complementary work of fresh fish from ships of less than 100 gross tons capacity or those above this size under special contract when carried out by the crew;

(6) Operations carried out within the port directly related to processing plants, industrial zones or canning factories, as long as they are not carried out by a stowage company;

(7) Handling of personal belongings of passengers and crewmembers;

(8) Loading and offloading of maintenance goods as long as it does not require hiring additional personnel or operations carried out by pipelines;

(9) The use of cranes and tractor devices not assigned to port operations as long as they are used by their regular personnel; and

(10) Driving, coupling and coupling tractor devices to load and unload trailers as long as transport is carried out without interruption from outside of the port area until their loading, or from the ship to the outside of the port area.

Sri Lanka

(a) All longshore activities.

(b) Exceptions: With a waiver granted by the Minister of Ports and Shipping upon application through the ports authority, handling of long lines of ships awaiting unloading and other activities under exceptional circumstances.

Taiwan

(a) Loading and discharge activities, including opening of hatches and rigging of ship's gear.

(b) Handling of mooring lines on the dock for all vessels.

(c) Exceptions: Loading and discharge of cargo if the longshoremen cannot handle the cranes of a particular ship; and operation of automatic hatch opening equipment that longshoremen are unable to operate.

Thailand

(a) All longshore activities, including opening of hatches, riggings ship's gear and line handling once the ship has berthed.

(b) Exception: Operation of onboard cargo machinery integral to the ship.

Togo

(a) Handling of mooring lines on the dock.

Trinidad and Tobago

(a) All longshore activities, including loading and discharge of cargo; lashing and unlashing of containers; operation of cargo-related equipment, unless the required skill is unavailable at port; and activities normally performed by cargo checkers, tally clerks and watchmen.

Tunisia

(a) All longshore or dock activities, including the operation of on-board hoists.

Turkey

(a) Work done on the pier, including mooring, cargo handling, crane operations and ground vehicle transportation.

(b) Exceptions: activities on board vessels to assist in loading and discharge of cargo.

Uruguay

(a) All longshore activities, including the opening of hatches, rigging of ship's gear and line handling.

(b) Exception: loading and discharge of cargo where Uruguayan workers cannot operate on board loading cranes.

Yemen

(a) All longshore activities.

(8 U.S.C. 1288, Pub. L. 010–649, 104 Stat. 4878)

Eugene J. McAllister,

Assistant Secretary, Economic and Business Affairs, Department of State.

BILLING CODE 4710–07–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Housing-Federal Housing Commissioner

24 CFR Parts 201, 203, and 234

[Docket No. N–91–3348; FR–3188–N–01]

Loan and Mortgage Insurance; Changes to the Maximum Loan and Mortgage Limits for Single Family Residences, Condominiums and Manufactured Homes and Lots

AGENCY: Office of the Assistant Secretary for Housing-Federal Housing Commissioner, HUD.

ACTION: Notice of revisions to FHA maximum loan and mortgage limits for high-cost areas.

SUMMARY: This Notice amends the list of areas eligible for "high-cost" loan and

VOL 56 ISS 249 DEC 27 1991 UMI

mortgage limits under certain of HUD's insuring authorities under the National Housing Act (NHA) by increasing the mortgage limits for Caroline County, Virginia; Kent County, Maryland; Pinellas County, Florida; Hamilton County, Tennessee; Livingston County, Michigan; Jefferson County, Colorado; Douglas County, Nevada; the Bremerton, Takoma, Spokane and Olympia, Washington MSAs; and Mason and Skagit Counties, Washington; and by adding to the list of high cost areas: Penobscot County, Maine; Carroll County, New Hampshire; Pike County, Pennsylvania; Lake, Charlotte and Flagler Counties, Florida; Whitfield County, Georgia; Cowlitz, Chelan and Douglas Counties, Washington.

This Notice also corrects several errors and omissions that appeared in the notice of revisions published in the **Federal Register** on August 1, 1991 (56 FR 36980). The corrections include reflecting that Salem County, New Jersey and Cecil County, Maryland have the same limits as the rest of the Wilmington, DE–NJ–MD PMSA; reflecting that York County, South Carolina has the same limits as the rest of the Charlotte-Gastonia-Rock Hill, NC–SC MSA, and that Lapeer County, Michigan has the same limits as the rest of the Detroit, MI PMSA. This notice also reflects correct limits for Manatee County, Florida; Santa Cruz County, Arizona; and Clackamas and Washington Counties, Oregon.

Loan and mortgage limits are adjusted in an area when the Secretary determines that middle- and moderate-income persons have limited housing opportunities because of high prevailing housing sales prices.

EFFECTIVE DATE: December 27, 1991.

FOR FURTHER INFORMATION CONTACT: For single family: Morris Carter, Director, Single Family Development Division, room 9272; telephone (202) 708–2700. For manufactured homes: Robert J. Coyle, Director, title I Insurance Division, room 9158; telephone (202) 708–2880; 451 Seventh Street, SW., Washington, DC 20410. (These are not toll-free numbers.).

SUPPLEMENTARY INFORMATION:

Background

The National Housing Act, 12 U.S.C. 1703 and 1709 *et. seq.*, authorizes HUD to insure loans and mortgages for single family residences (from one- to four-family structures), condominiums, manufactured homes, manufactured home lots, and manufactured homes and lots in combination. The NHA, as amended by the Housing and Community Development Amendments of 1980 and the Housing and Community Development Amendments of 1981, permits HUD to increase the maximum loan and mortgage limits under most of these programs to reflect regional differences in the cost of housing. In addition, section 214 of the NHA provides for special high-cost limits for insured mortgages in Alaska, Guam, Hawaii, and the Virgin Islands.

The last comprehensive list of high-cost areas was published on August 1, 1991 (56 FR 36980) listing all areas eligible for "high-cost" loan and mortgage limits under certain of HUD's insuring authorities under the National Housing Act, and the applicable limits for each area.

This Document

Today's document increases high-cost loan and mortgage limits for Caroline County, Virginia; Kent County, Maryland; Pinellas County, Florida; Hamilton County, Tennessee; Livingston County, Michigan; Jefferson County, Colorado; Douglas County, Nevada; the Bremerton, Takoma, Spokane and Olympia, Washington MSAs; and Mason and Skagit Counties, Washington; and adds high-cost loan and mortgage limits for Penobscot County, Maine; Carroll County, New Hampshire; Pike County, Pennsylvania; Lake, Charlotte and Flagler Counties, Florida; Whitfield County, Georgia; Cowlitz, Chelan and Douglas Counties, Washington.

This document also corrects several errors and omissions appearing in the notice of revisions published in the **Federal Register** on August 1, 1991 (56 FR 36980). The corrections include reflecting that Salem County, New Jersey and Cecil County, Maryland have the same limits as the rest of the Wilmington, DE-NJ-MD PMSA; reflecting that York County, South Carolina has the same limits as the rest of the Charlotte-Gastonia-Rock Hill, NC-SC MSA, and that Lapeer County, Michigan has the same limits as the rest of the Detroit, MI PMSA. This notice also reflects the correct limits for Manatee County, Florida; Santa Cruz County, Arizona; and Clackamas and Washington Counties, Oregon.

These amendments appear in two parts. Part I explains how the high-cost limits are calculated for manufactured home and lot loans insured under title I of the National Housing Act. Part II lists each high-cost area, with applicable limits for single family residences (including condominiums) insured under sections 203(b), 234(c) and 214 of the National Housing Act.

List of Subjects

24 CFR Part 201

Health facilities, Historic preservation, Home improvement, Loan programs—housing and community development, Manufactured homes, Mortgage insurance, Reporting and recordkeeping requirements.

24 CFR Part 203

Hawaiian Natives, Home Improvement, Loan programs—housing and community development, Mortgage insurance, Reporting and recordkeeping requirements, Solar energy.

24 CFR Part 234

Condominiums, Mortgage insurance, Reporting and recordkeeping requirements.

Accordingly, the Department publishes the revised dollar limitations as follows:

National Housing Act High Cost Loan and Mortgage Limits

Part I: Method of Computing Limits Under Title I, National Housing Act

A. *Section 2(b)(1)(D). Combination manufactured home and lot (excluding Alaska, Guam, Hawaii, and the Virgin Islands):* To determine the high-cost limit for a combination manufactured home and lot loan, multiply the dollar amount in the "one family" column of Part II of this list by .80. For example, Penobscot County, ME has a one-family limit of $77,900. The combination home and lot loan limit is $77,900 x .80, or $62,320.

B. *Section 2 (b)(1)(E): Lot only (excluding Alaska, Guam, Hawaii and the Virgin Islands):* To determine the high-cost limit for a lot loan, multiply the dollar amount in the "one-family" column of Part II of this list by .20. For example, Penobscot County, ME has a one-family limit of $77,900. The lot-only loan limit is $77,900 x .20, or $15,580.

C. *Section 2(b)(2). Alaska, Guam, and Hawaii limits:* The maximum dollar limits for Alaska, Guam and Hawaii may be 140% of the statutory loan limits set out in section 2(b)(1).

Accordingly, the dollar limits for Alaska, Guam, and Hawaii are as follows:

1. For manufactured homes: $56,700. ($40,500 X 140%).

2. For combination manufactured homes and lots: $75,600. ($54,000 X 140%).

3. For lots only: $18,900. ($13,500 X 140%).

D. *Limits in the Virgin Islands:* For the Virgin Islands, the maximum mortgage amount for a one-family residence has been increased under section 203(b) to 185% of the basic mortgage limit. Accordingly, the combination home and lot limit is $99,900 ($54,000 x 185%). The lot limit is $24,975 ($13,500 x 185%).

Part II. Updating of FHA Sections 203(b), 234(c) and 214 Area-Wide Mortgage Limits

REGION I

Market area designation and local jurisdictions	1-family and condo unit	2-family	3-family	4-family
HUD Field Office—Bangor:

BILLING CODE 4210–27–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[TD 8365]

RIN 1545–AP75

Allocations Attributable to Partnership Nonrecourse Liabilities

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the allocation among partners of certain losses or deductions and certain income or gain attributable to partnership nonrecourse liabilities. The final regulations affect partnerships and their partners, and are necessary to provide them with guidance needed to comply with the applicable tax law.

EFFECTIVE DATE: These regulations are effective December 28, 1991, and generally apply to partnership taxable years beginning on or after December 28, 1991.

FOR FURTHER INFORMATION CONTACT: Susan Pace Hamill, 202–377–9470 (not a toll free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in these final regulations has been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1990 (44 U.S.C. 3504(h)) under control number 1545–1090. The estimated annual burden per respondent varies from 3 minutes to 8 minutes, depending on individual circumstances, with an estimated average of 5 minutes.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents may require greater or less time, depending on their particular circumstances.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, T:FP, Washington, DC 20224 and to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Introduction

This document adds new regulation § 1.704–2 to the Income Tax Regulations (26 CFR part 1) under section 704(b) of the Internal Revenue Code of 1986 and removes existing § 1.704–1(b)(4)(iv) and § 1.704–1T(b)(4)(iv).

Background

On December 30, 1988, temporary regulations (TD 8237) relating to allocations attributable to nonrecourse liabilities were published in the **Federal Register**. A notice of proposed rulemaking (PS–229–84) cross referencing the temporary regulations was published in the **Federal Register** the same day. On November 21, 1989, amendments to the temporary regulations (TD 8274) were published. Written comments were received and a public hearing was held on October 30, 1991. After consideration of the comments, the proposed regulations are adopted as simplified and revised by this Treasury decision, and the corresponding temporary regulations are removed.

Explanation of Provisions

I. Introduction

Under section 704(b) of the Internal Revenue Code and the regulations thereunder, allocations of a partnership's income and deductions must have substantial economic effect to be valid for federal income tax purposes—that is, they must affect, in a substantial way, the economic stakes of the partners in the partnership apart from the tax consequences. The substantial economic effect portion of the section 704(b) regulation (§ 1.704–1(b)(1) and (b)(2)) contains a number of requirements designed to ensure that partners who are allocated losses bear the economic burden associated with those losses, and partners who are allocated income receive the economic benefit associated with that income. Allocations that do not have substantial economic effect under the tests in the section 704(b) regulations are reallocated according to the partners' interests in the partnership.

Nonrecourse liabilities are liabilities for which no partner is personally liable. Accordingly, allocations of deductions attributable to partnership nonrecourse liabilities (nonrecourse deductions) cannot have substantial economic effect because the nonrecourse lender, rather than the partners, ultimately bears any economic loss attributable to those deductions. Similarly, allocations of the gain that would be realized if the property securing the debt were surrendered for no consideration other than full satisfaction of the liability cannot have substantial economic effect because these allocations merely offset the nonrecourse deductions.

The final regulations provide rules that: (1) Determine when a partnership has nonrecourse deductions; (2) provide a safe harbor, including a minimum gain chargeback requirement, under which allocations of nonrecourse deductions are deemed to be in accordance with the partners' interests in the partnership; and (3) determine when a partnership must allocate income to the partners who were previously allocated nonrecourse deductions, pursuant to the minimum gain chargeback requirement.

II. Explanation of the Rules Common to the Temporary and Final Regulations

A. Minimum Gain

Allocations attributable to partnership nonrecourse liabilities are based on the concept of minimum gain. The amount of minimum gain with respect to a nonrecourse liability is the gain the partnership would realize if the property securing the liability were disposed of for no consideration other than relief from the liability. Consequently, minimum gain exists to the extent the amount of the liability exceeds the property's adjusted tax basis. The amount of minimum gain increases as the difference between the property's adjusted tax basis and the amount of the liability gets larger (for example as depreciation deductions are taken); minimum gain decreases as the difference between the property's adjusted tax basis and the amount of the liability gets smaller (for example if the property subject to the debt is disposed of or if the liability is paid).

B. Nonrecourse Deductions

In any taxable year, the amount of a partnership's nonrecourse deductions equals the net increase in the partnership's minimum gain reduced by any distributions of nonrecourse debt proceeds that are allocable to an increase in partnership minimum gain. A net increase or decrease in the partnership's minimum gain is an aggregate figure that is determined by comparing the current year's minimum gain with the prior year's minimum gain. If the partnership has a net increase in minimum gain, partnership deductions are generally treated as nonrecourse deductions to the extent of the net increase. Nonrecourse deductions must be allocated in accordance with the partners' interests in the partnership. The regulations provide a safe harbor under which an allocation of nonrecourse deductions is deemed to be in accordance with the partners' interests in the partnership. If the partnership has a net decrease in minimum gain, generally the minimum gain chargeback rules require income to be allocated to the partners who were previously allocated nonrecourse deductions or received distributions attributable to nonrecourse debt proceeds.

The partnership's nonrecourse deductions consist first of depreciation or cost recovery deductions from property subject to nonrecourse debt. If there are not enough depreciation or cost recovery deductions to cover the partnership's nonrecourse deductions, a pro rata portion of the partnership's other deductions are treated as nonrecourse deductions. If the amount of nonrecourse deductions exceeds these other items, then the excess is treated as an increase in partnership minimum gain (to be aggregated with any other minimum gain increases and decreases) for the next taxable year.

C. Allocations of Nonrecourse Deductions and Minimum Gain Chargebacks

Allocations of nonrecourse deductions are deemed to be in accordance with the partners' interests in the partnership if certain requirements are met. First, the partnership must meet all of the requirements of the economic effect rules under § 1.704–1(b) of the regulations. (The final regulations clarify the temporary regulations by explicitly listing the requirement that partners agree to a qualified income offset or an unconditional deficit restoration obligation with the other economic effect requirements that must be satisfied.) Second, the partnership must allocate the nonrecourse deductions in a manner that is reasonably consistent with the allocation that has substantial economic effect of another significant item attributable to property secured by nonrecourse debt (the reasonable consistency requirement). Finally, the partnership agreement must also contain a minimum gain chargeback provision that complies with the regulations. Part III below describes the minimum gain chargeback requirement in the temporary regulations, and Part IV describes the minimum gain chargeback requirement in the final regulations.

The reasonable consistency requirement governs the ratio in which the partners are permitted to share the nonrecourse deductions. The ratio for sharing nonrecourse deductions must correspond to other allocations that are related to the nonrecourse deductions and that have substantial economic

VOL

DEC
27
1991
UMI

effect. The examples illustrate situations that meet the reasonable consistency requirement where the nonrecourse deductions are allocated according to how the partners share losses or profits, or any ratio between those two figures.

Generally, when a partnership has a net decrease in minimum gain, there is a requirement to charge back minimum gain (the minimum gain chargeback requirement) (see parts III and IV below). The minimum gain chargeback requirement ensures that the nonrecourse deductions are replaced with income allocations at the appropriate time. The partnership's income used to satisfy the minimum gain chargeback requirement first consists of gains from the sale of property subject to nonrecourse debt. Any remaining minimum gain chargeback requirement is satisfied with a pro rata portion of the partnership's other items of income and gain (except gain from the sale of property subject to partner nonrecourse debt, which is treated separately). If there are not enough income items to satisfy the minimum gain chargeback requirement, the excess is carried over as a minimum gain chargeback requirement to succeeding taxable years until there is enough income to satisfy the minimum gain chargeback requirement. In certain circumstances, the temporary and the final regulations permit deferral of the minimum gain chargeback requirement until the occurrence of a subsequent event that triggers the chargeback. The temporary and final regulations also do not require the chargeback of minimum gain to a partner if the partner's share of minimum gain is or will be replaced with capital contributions.

D. Nonrecourse Deductions and Minimum Gain Chargebacks if There is a Book/Tax Disparity

Book/tax disparities may exist if contributed property is subject to section 704(c) or if the partnership's property is revalued pursuant to § 1.704–1(b)(2)(iv)(*f*). If partnership property is reflected on the partnership's books at a value that is different from the adjusted tax basis, the minimum gain increases and decreases are determined with reference to the book value. The regulations contain examples illustrating this determination.

If a revaluation of partnership property subject to nonrecourse liabilities causes an increase to the partners' capital accounts (a book-up), the regulations contain a special rule designed to prevent an inappropriate net decrease in minimum gain in the year the revaluation occurs. The partnership first calculates the net increase or decrease in minimum gain using the new book values and the prior year's minimum gain amount. Then, any decrease in minimum gain arising solely from the revaluation is added back (treated as an increase in minimum gain) to the net increase or decrease determined in the first step. In subsequent partnership taxable years, net increases or decreases in partnership minimum gain are determined using book values instead of adjusted tax basis. A special rule to compute minimum gain in the year of revaluation is not needed if the partners' capital accounts are decreased (a book-down). An artificial increase in minimum gain cannot occur if capital accounts are booked down because property cannot be revalued below the amount of any nonrecourse indebtedness to which it is subject. See section 7701(g) and § 1.704–1(b)(2)(iv)(*f*)(*1*).

E. Distributions of Nonrecourse Liability Proceeds

Encumbering property with additional nonrecourse debt that is not used to improve the property often causes an increase in minimum gain because the difference between the basis of the property and the total amount of the debt immediately increases. If the partnership distributes the proceeds of a nonrecourse liability, the distributee partner enjoys the economic benefit of the immediate use of the proceeds but does not bear the economic risk of loss if the partnership cannot pay the debt. If a nonrecourse liability encumbering the property causes minimum gain to increase and a distribution is allocable to the proceeds of this nonrecourse liability, the partner receiving this distribution also receives an additional share of minimum gain, which will be subject to the minimum gain chargeback requirement when the partnership's minimum gain decreases. Any reasonable method (including the rules under § 1.163–8T for allocating debt proceeds among expenditures) may be used to determine if a distribution is allocable to nonrecourse debt proceeds. If a net increase in minimum gain arising from nonrecourse borrowing is carried over to a later taxable year (usually because the proceeds are not distributed in the year of the encumbrance and the partnership does not otherwise have enough deductions to cover the increase in minimum gain), the carried-over portion of the net increase is allocable to any distribution of nonrecourse debt proceeds in the succeeding taxable year.

F. Tiered Partnerships

The regulations contain general rules that determine what effect a lower-tier partnership's items have on the upper-tier partnership's minimum gain. The rules are designed to allow the partners of the upper-tier partnership to look through and account for the lower-tier partnership's items as directly as possible. All nonrecourse deductions and distributions of nonrecourse debt proceeds from the lower-tier partnership increase the upper-tier partnership's minimum gain proportionately. The upper-tier partnership's share of the lower-tier partnership's net decrease in minimum gain is treated as a decrease in the upper-tier partnership's minimum gain (to be aggregated with the upper-tier partnership's other minimum gain increases or decreases). Distributions of nonrecourse debt proceeds from the lower-tier partnership generally retain their status (as nonrecourse debt proceeds) when received by the upper-tier partnership. Nonrecourse deductions allocated by the lower-tier partnership to the upper-tier partnership are treated as depreciation or cost recovery deductions arising from property owned by the upper-tier partnership.

G. Rules For Partner Nonrecourse Debt

The regulations contain rules, which generally parallel the rules applicable to nonrecourse debt, covering nonrecourse debt for which a partner bears the economic risk of loss ("partner nonrecourse debt"). A liability is treated as partner nonrecourse debt to the extent a partner bears the economic risk of loss solely because the partner or a related person (within the meaning of the section 752 regulations) is the creditor or the guarantor and the debt is considered nonrecourse for purposes of § 1.1001–2.

The regulations require the deductions attributable to partner nonrecourse debt to be allocated to the lending or guaranteeing partner. This is accomplished by requiring minimum gain calculations for each separate partner nonrecourse debt. If there is a net increase in the minimum gain attributable to a specific partner nonrecourse debt, the depreciation or cost recovery deductions generated by the property subject to the debt must be allocated to the lending or guaranteeing partner. If there are still not enough depreciation or cost recovery deductions to cover the entire net increase in minimum gain, a pro rata portion of the partnership's other loss items (except for depreciation or cost recovery deductions

on property subject to a partnership nonrecourse liability) is used. A carryover rule applies if there are not enough losses to cover the minimum gain increase.

If there is a net decrease in the minimum gain attributable to a particular partner nonrecourse debt, a minimum gain chargeback requirement generally applies to the partner who was previously allocated the losses (or who received distributions) attributable to the debt. (See parts III and IV below). The minimum gain chargeback requirement is satisfied first with gain from the sale of the property subject to the partner nonrecourse debt and then by a pro rata portion of the partnership's other income and gain items (except to the extent these items have been allocated to satisfy a partnership minimum gain chargeback requirement). Unsatisfied minimum gain chargeback requirements carry over to succeeding taxable years.

III. Description of Minimum Gain Chargeback Approach in the Temporary Regulations

The temporary regulations based a partner's minimum gain chargeback requirement (with respect to both nonrecourse and partner nonrecourse debt) on a "two-prong" calculation. A partner's minimum gain chargeback equaled the greater of (1) the partner's share of the net decrease in minimum gain attributable to a disposition of property securing nonrecourse liabilities, or (2) the partner's deficit capital account, as specially defined. The computation of the partner's deficit capital accounts required a number of deemed increases and decreases that generally—but not precisely—paralleled the alternate test for economic effect under the section 704(b) regulations.

The two-prong approach contained no explicit exceptions. If prong one applied to the net decrease in minimum gain, a chargeback was always imposed. Prong two, however, effectively provided partial relief from the minimum gain chargeback requirement in certain situations. When nonrecourse debt converted to recourse debt or to partner nonrecourse debt (by, for example, the creation of a guarantee) prong two precluded the chargeback to the extent the partner bore the risk of loss, so long as no part of the net decrease in minimum gain was attributable to a disposition of property. When calculating the minimum gain chargeback requirement, prong two increased the partner's deficit capital account to the extent the partner bore the risk of loss for partnership liabilities. Moreover, if the partners had previously restored the nonrecourse deductions and distributions attributable to nonrecourse debt proceeds with income allocations or capital contributions, prong two (but not prong one) did not impose a minimum gain chargeback to the extent the deficits in the partners' capital accounts had been eliminated by these income allocations and capital contributions.

IV. Modifications to the Minimum Gain Chargeback Requirement Made by the Final Regulations

A. Reasons For the Modifications

The complexity of the two-prong calculation was heavily criticized in the comments. The comments stated that the second prong did not always preclude inappropriate chargebacks when debt was converted, refinanced, or otherwise changed. Moreover, the comments stated that, depending on whether the property was sold at the time of the decrease in minimum gain, the two-prong approach treated similar situations inconsistently if the partners restored their nonrecourse deductions with other income allocations (or capital contributions) before the partnership had a net decrease in minimum gain. Under the temporary regulations, if the partners restored their nonrecourse deductions with income allocations or capital contributions and prong one later applied to the net decrease in minimum gain, the minimum gain chargeback always applied and often created economic distortions. However, if prong two applied and if the income allocations and capital contributions fully restored the deficits in the partners' capital accounts, the minimum gain chargeback was not required. The final regulations address these concerns by basing the minimum gain chargeback solely on the partners' shares of minimum gain and providing exceptions where a chargeback is inappropriate.

B. Minimum Gain Chargeback Requirement in the Final Regulations

The final regulations contain a minimum gain chargeback requirement (for both nonrecourse and partner nonrecourse debt), with appropriate exceptions, based exclusively on the partners' shares of minimum gain. Specifically, a partner's minimum gain chargeback equals the partner's share of the partnership's net decrease in minimum gain. A partner's share of the net decrease is measured by that partner's percentage share of the partnership's total minimum gain. For example, if a partner had a 20 percent share of the partnership's total minimum gain and the partnership had a net decrease in minimum gain of $500, the partner's share of the net decrease (and minimum gain chargeback) is $100 (20 percent of $500). A partner's share of minimum gain equals the sum of all past nonrecourse deductions allocated to the partner and distributions attributable to nonrecourse debt proceeds received by the partner; those are the items that need to be restored by the minimum gain chargeback requirement.

A number of exceptions to the mandatory minimum gain chargeback are included to address inappropriate chargebacks. A partner is not subject to a minimum gain chargeback to the extent (1) the partner's share of the net decrease in minimum gain is caused by a guarantee, refinancing, or other change in the debt instrument causing it no longer to be partially or wholly nonrecourse, and (2) the partner bears the economic risk of loss (under the section 752 regulations) for the new liability. A chargeback is inappropriate in this circumstance because partners who bear the risk of loss for the former nonrecourse debt have replaced their nonrecourse deductions with obligations either to contribute money to the partnership or to pay the creditor if the partnership cannot pay the liability. The minimum gain chargeback also does not apply to a partner to the extent the partner contributes capital to the partnership and that capital is used to repay the nonrecourse liability.

The final regulations also contain exceptions to the minimum gain chargeback requirement for partner nonrecourse debt. If partner nonrecourse debt converts to partnership nonrecourse debt, the minimum gain chargeback is deferred. The partner is allocated a share of partnership minimum gain to the extent the chargeback is deferred and thus is subject to the deferred minimum gain chargeback when that debt is paid off or the encumbered property is sold. Other exceptions parallel the exceptions for partnership nonrecourse liabilities.

The final regulations do not allow partners to reduce their shares of minimum gain if the nonrecourse deductions (or distributions of nonrecourse debt proceeds) are restored before there is a net decrease in minimum gain. However, the Commissioner has the discretion to waive the minimum gain chargeback requirement at the partnership's request if the partnership has a net decrease in minimum gain, the minimum gain chargeback would cause economic distortions, and it is not expected that the partnership will have sufficient other income to correct these distortions. In

VOL 56 ISS 249 DEC 27 1991 UMI

order for a waiver to be considered, the partnership must demonstrate that: (1) The partners have restored the previous nonrecourse deductions (and distributions of nonrecourse debt proceeds) with net income allocations or capital contributions; and (2) the income allocations that do not meet the minimum gain chargeback requirement more accurately reflect the partners' economic arrangement, as evidenced by the partnership's allocations and distributions and the partners' contributions.

V. Other Comments on the Temporary Regulations

A. Guarantees of Partnership Nonrecourse Debt

Commentators have suggested that allocations attributable to partnership nonrecourse liabilities that have been guaranteed by a partner (or a related party) can be more appropriately treated under the substantial economic effect rules of § 1.704–1(b)(2) than under the partner nonrecourse debt rules. These commentators have argued that guaranteed nonrecourse debt should be distinguished from direct nonrecourse loans made by partners (or related parties) because, to the extent the debt can be satisfied by the guarantee, the partnership will not recognize gain if the lender forecloses on the property. Commentators advocate the distinction on the premise that, in the case of guaranteed debt, partners other than the guarantor may bear the economic burden under the substantial economic effect rules. The rights and obligations of partners and lenders under guarantee arrangements, however, may vary greatly from case to case. As a result, the distinction sought by the commentators may not always be appropriate; in many instances, guaranteed nonrecourse debt is more appropriately treated under the partner nonrecourse debt rules. In addition, the Service and the Treasury believe that, in the case of guaranteed nonrecourse debt and partner nonrecourse loans, transactions may be structured to ensure that partner nonrecourse deductions are allocated properly to the partners that economically bear the risk of loss attributable to those loans. Moreover, some of the commentators' concerns regarding the complexity of the partner nonrecourse debt rules may have been alleviated by the modifications made to the nonrecourse debt rules that are described in part IV above. Therefore, the final regulations continue to treat guaranteed nonrecourse debt under the partner nonrecourse debt rules. Nonetheless, the Service and the Treasury request comments on whether further simplification of the partner nonrecourse debt rules is needed and welcome suggestions for alternative approaches to accounting for allocations attributable to partner nonrecourse debt.

B. Minimum Gain Calculations for Exculpatory Liabilities

A partnership may have a liability that is not secured by any specific property and that is recourse to the partnership as an entity, but explicitly not recourse to any partner (exculpatory liability). Section 1.704–2(b)(3) of the final regulations defines nonrecourse liability by referring to the definition of nonrecourse liability in the regulations under section 752. Under that definition, an exculpatory liability is a nonrecourse liability. The application of the nonrecourse debt rules of § 1.704–2—more specifically, the calculation of minimum gain—may be difficult in the case of an exculpatory liability, however, because the liability is not secured by specific property and the bases of partnership properties that can be reached by the lender in the case of an exculpatory liability may fluctuate greatly. Section 1.704–2 does not prescribe precise rules addressing the allocation of income and loss attributable to exculpatory liabilities. Taxpayers, therefore, are left to treat allocations attributable to these liabilities in a manner that reasonably reflects the principles of section 704(b). Commentators have requested that the treatment of allocations attributable to exculpatory liabilities under the nonrecourse debt rules be clarified. The Service and the Treasury solicit further suggestions on the appropriate treatment of allocations attributable to these liabilities. Suggestions should take into account the practical concerns of partnerships as well as the Service's concerns about the proper allocation of loss and gain items attributable to these liabilities.

VI. Effective Dates and Transition Rules

Comments stated that the transition rules do not correspond exactly with the grandfather provisions of section 752 and are complex. However, a major change to the transition rules could adversely affect some partnerships retroactively. Therefore, the final regulations contain the transition rules as they appear in the temporary regulations with one modification.

The modification expands the grandfather rule for related-party partner nonrecourse debt. But section 752 and the temporary regulations grant permanent grandfather status to nonrecourse loans or guarantees of nonrecourse debt made before January 30, 1989, by persons related to partners as long as there are no material modifications to the debt. The grandfather rule in the temporary regulations for related-party partner nonrecourse debt fails to grandfather certain situations, such as guarantees of interest and certain guarantees of a lower-tier partnership's debt by upper-tier partners. The final regulations amend the related-party grandfather provision to include all pre-January 30, 1989, debt, other than direct partner nonrecourse loans or guarantees of partnership nonrecourse debt, that is grandfathered under the section 752 regulations so long as all the partners in the partnership consistently treat the liability as nonrecourse.

Special Analyses

These final regulations are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It is hereby certified that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations.

It is hereby certified that these rules do not have a significant impact on a substantial number of small entities. Therefore, a final Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. chapter 6) is not required. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking for the regulations was submitted to the Administrator of the Small Business Administration for comments on their impact on small businesses.

Drafting Information

The principal author of these regulations is Susan Pace Hamill, Office of the Assistant Chief Counsel (Passthroughs and Special Industries). However personnel from other offices in the Internal Revenue Service and the Treasury Department participated in their development.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR Part 1 is amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority for part 1 continues to read in part as follows:

Authority: Sec. 7805, 68A Stat. 917; 26 U.S.C. 7805 * * *

§ 1.704–1 [Amended]

Par. 2. In § 1.704–1(b)(0), the entry for § 1.704–1(b)(4)(iv) is amended by revising the heading to read "Allocations Attributable to Nonrecourse Liabilities."

Par. 3. Section 1.704–1(b)(0) is further amended by removing from the table all headings and section numbers for § 1.704–1(b)(4)(iv) (*a*) through (*h*).

Par. 4. Section 1.704–1(b)(1)(i) is amended by adding the language "and § 1.704–2" at the end of the sixth sentence.

Par. 5–6. Section 1.704–1(b)(2)(ii)(*d*)(*6*) is amended by adding "under § 1.704–2(f)" at the end of the paragraph.

Par. 7. Section 1.704–1(b)(4)(iv) is revised to read as follows:

§ 1.704–1 Partner's distributive share.

* * * * *

(b) * * *

(4) * * *

(iv) *Allocations attributable to nonrecourse liabilities.* The rules for allocations attributable to nonrecourse liabilities are contained in § 1.704–2.

* * * * *

Par. 8. Section 1.704(b)(5) is amended by removing *Examples* (*20*) through (*23*).

Par. 9. Section 1.704–1T(b)(4)(iv) is removed.

Part. 10. New § 1.704–2 is added to read as follows:

§ 1.704–2. Allocations attributable to nonrecourse liabilities.

(a) *Table of contents.* This paragraph contains a listing of the major headings of this § 1.704–2.

§ 1.704–2 Allocations attributable to nonrecourse liabilities.

(a) Table of contents.
(b) General principles and definitions.
(1) Definition of and allocations of nonrecourse deductions.
(2) Definition of and allocations pursuant to a minimum gain chargeback.
(3) Definition of nonrecourse liability.
(4) Definition of partner nonrecourse debt.
(c) Amount of nonrecourse deductions.
(d) Partnership minimum gain.
(1) Amount of partnership minimum gain.
(2) Property subject to more than one liability.
(i) In general.
(ii) Allocating liabilities.
(3) Partnership minimum gain if there is a book/tax disparity.
(4) Special rule for year of revaluation.
(e) Requirements to be satisfied.
(f) Minimum gain chargeback requirement.
(1) In general.
(2) Exception for certain capital conversions and refinancings.
(3) Exception for certain contributions.
(4) Waiver for certain income allocations that fail to meet minimum gain chargeback requirement if minimum gain chargeback distorts economic arrangement.
(5) Additional exceptions.
(6) Partnership items subject to the minimum gain chargeback requirement.
(7) Examples.
(g) Shares of partnership minimum gain.
(1) Partner's share of partnership minimum gain.
(2) Partner's share of the net decrease in partnership minimum gain.
(3) Conversions of recourse or partner nonrecourse debt into nonrecourse debt.
(h) Distribution of nonrecourse liability proceeds allocable to an increase in partnership minimum gain.
(1) In general.
(2) Distribution allocable to nonrecourse liability proceeds.
(3) Option when there is an obligation to restore.
(4) Carryover to immediately succeeding taxable year.
(i) Partnership nonrecourse liabilities where a partner bears the economic risk of loss.
(1) In general.
(2) Definition of and determination of partner nonrecourse deductions.
(3) Determination of partner nonrecourse debt minimum gain.
(4) Chargeback of partner nonrecourse debt minimum gain.
(5) Partner's share of partner nonrecourse debt minimum gain.
(6) Distribution of partner nonrecourse debt proceeds allocable to an increase in partner nonrecourse debt minimum gain.
(j) Ordering rules.
(1) Treatment of partnership losses and deductions.
(i) Partner nonrecourse deductions.
(ii) Partnership nonrecourse deductions.
(iii) Carryover to succeeding taxable year.
(2) Treatment of partnership income and gains.
(i) Minimum gain chargeback.
(ii) Chargeback attributable to decrease in partner nonrecourse debt minimum gain.
(iii) Carryover to succeeding taxable year.
(k) Tiered partnerships.
(1) Increase in upper-tier partnership's minimum gain.
(2) Decrease in upper-tier partnership's minimum gain.
(3) Nonrecourse debt proceeds distributed from the lower-tier partnership to the upper-tier partnership.
(4) Nonrecourse deductions of lower-tier partnership treated as depreciation by upper-tier partnership.
(5) Coordination with partner nonrecourse debt rules.
(l) Effective dates.
(1) In general.
(i) Prospective application.
(ii) Partnerships subject to temporary regulations.
(iii) Partnerships subject to former regulations.
(2) Special rule applicable to pre-January 30, 1989, related party nonrecourse debt.
(3) Transition rule for pre-March 1, 1984, partner nonrecourse debt.
(4) Election.
(m) Examples.

(b) *General principles and definitions*—(1) *Definition of and allocations of nonrecourse deductions.* Allocations of losses, deductions, or section 705(a)(2)(B) expenditures attributable to partnership nonrecourse liabilities ("nonrecourse deductions") cannot have economic effect because the creditor alone bears any economic burden that corresponds to those allocations. Thus, nonrecourse deductions must be allocated in accordance with the partners' interests in the partnership. Paragraph (e) of this section provides a test that deems allocations of nonrecourse deductions to be in accordance with the partners' interests in the partnership. If that test is not satisfied, the partners' distributive shares of nonrecourse deductions are determined under § 1.704–1(b)(3), according to the partners' overall economic interests in the partnership. See also paragraph (i) of this section for special rules regarding the allocation of deductions attributable to nonrecourse liabilities for which a partner bears the economic risk of loss (as described in paragraph (b)(4) of this section).

(2) *Definition of and allocations pursuant to a minimum gain chargeback.* To the extent a nonrecourse liability exceeds the adjusted tax basis of the partnership property it encumbers, a disposition of that property will generate gain that at least equals that excess ("partnership minimum gain"). An increase in partnership minimum gain is created by a decrease in the adjusted tax basis of property encumbered by a nonrecourse liability below the amount of that liability and by a partnership nonrecourse borrowing that exceeds the adjusted tax basis of the property encumbered by the borrowing. Partnership minimum gain decreases as reductions occur in the amount by which the nonrecourse liability exceeds the adjusted tax basis of the property encumbered by the liability. Allocations of gain attributable to a decrease in partnership minimum gain (a "minimum gain chargeback," as required under paragraph (f) of this section) cannot have economic effect because the gain merely offsets nonrecourse deductions previously claimed by the partnership. Thus, to avoid impairing the economic effect of other allocations, allocations pursuant to a minimum gain chargeback must be made to the partners that either were allocated nonrecourse deductions or received distributions of proceeds attributable to a nonrecourse borrowing. Paragraph (e) of this section provides a test that, if met, deems allocations of partnership income pursuant to a minimum gain chargeback to be in accordance with the partners' interests

VOL 56 ISS 249 DEC 27 1991 UMI

in the partnership. If property encumbered by a nonrecourse liability is reflected on the partnership's books at a value that differs from its adjusted tax basis, paragraph (d)(3) of this section provides that minimum gain is determined with reference to the property's book basis. See also paragraph (i)(4) of this section for special rules regarding the minimum gain chargeback requirement for partner nonrecourse debt.

(3) *Definition of nonrecourse liability.* "Nonrecourse liability" means a nonrecourse liability as defined in § 1.752–1(a)(2).

(4) *Definition of partner nonrecourse debt.* "Partner nonrecourse debt" or "partner nonrecourse liability" means any partnership liability to the extent the liability is nonrecourse for purposes of § 1.1001–2, and a partner (or related person (within the meaning of § 1.752–4(b)) bears the economic risk of loss under § 1.752–2 because, for example, the partner or related person is the creditor or a guarantor.

(c) *Amount of nonrecourse deductions.* The amount of nonrecourse deductions for a partnership taxable year equals the net increase in partnership minimum gain during the year (determined under paragraph (d) of this section), reduced (but not below zero) by the aggregate distributions made during the year of proceeds of a nonrecourse liability that are allocable to an increase in partnership minimum gain (determined under paragraph (h) of this section). See paragraph (m), *Examples* (1)(i) and (vi), (2), and (3) of this section. However, increases in partnership minimum gain resulting from conversions, refinancings, or other changes to a debt instrument (as described in paragraph (g)(3)) do not generate nonrecourse deductions. Generally, nonrecourse deductions consist first of certain depreciation or cost recovery deductions and then, if necessary, by a pro rata portion of other partnership losses, deductions, and section 705(a)(2)(B) expenditures for that year; excess nonrecourse deductions are carried over. See paragraphs (j)(1) (ii) and (iii) of this section for more specific ordering rules. See also paragraph (m), *Example* (1)(iv) of this section.

(d) *Partnership minimum gain*—(1) *Amount of partnership minimum gain.* The amount of partnership minimum gain is determined by first computing for each partnership nonrecourse liability any gain the partnership would realize if it disposed of the property subject to that liability for no consideration other than full satisfaction of the liability, and then aggregating the separately computed gains. The amount of partnership minimum gain includes minimum gain arising from a conversion, refinancing, or other change to a debt instrument, as described in paragraph (g)(3) of this section, only to the extent a partner is allocated a share of that minimum gain. For any partnership taxable year, the net increase or decrease in partnership minimum gain is determined by comparing the partnership minimum gain on the last day of the immediately preceding taxable year with the partnership minimum gain on the last day of the current taxable year. See paragraph (m), *Examples* (1) (i) and (iv), (2), and (3) of this section.

(2) *Property subject to more than one liability.* (i) *In general.* If property is subject to more than one liability, only the portion of the property's adjusted tax basis that is allocated to a nonrecourse liability under paragraph (d)(2)(ii) of this section is used to compute minimum gain with respect to that liability.

(ii) *Allocating liabilities.* If property is subject to two or more liabilities of equal priority, the property's adjusted tax basis is allocated among the liabilities in proportion to their outstanding balances. If property is subject to two or more liabilities of unequal priority, the adjusted tax basis is allocated first to the liability of the highest priority to the extent of its outstanding balance and then to each liability in descending order of priority to the extent of its outstanding balance, until fully allocated. See paragraph (m), *Example* (1) (v) and (vii) of this section.

(3) *Partnership minimum gain if there is a book/tax disparity.* If partnership property subject to one or more nonrecourse liabilities is, under § 1.704–1(b)(2)(iv) (*d*), (*f*), or (*r*), reflected on the partnership's books at a value that differs from its adjusted tax basis, the determinations under this section are made with reference to the property's book value. See section 704(c) and § 1.704–1(b)(4)(i) for principles that govern the treatment of a partner's share of minimum gain that is eliminated by the revaluation. See also paragraph (m), *Example* (3) of this section.

(4) *Special rule for year of revaluation.* If the partners' capital accounts are increased pursuant to § 1.704–1(b)(2)(iv) (*d*), (*f*), or (*r*) to reflect a revaluation of partnership property subject to a nonrecourse liability, the net increase or decrease in partnership minimum gain for the partnership taxable year of the revaluation is determined by:

(i) First calculating the net decrease or increase in partnership minimum gain using the current year's book values and the prior year's partnership minimum gain amount; and

(ii) Then adding back any decrease in minimum gain arising solely from the revaluation. See paragraph (m), *Example* (3)(iii) of this section. If the partners' capital accounts are decreased to reflect a revaluation, the net increases in partnership minimum gain are determined in the same manner as in the year before the revaluation, but by using book values rather than adjusted tax bases. See section 7701(g) and § 1.704–1(b)(2)(iv)(*f*)(*1*) (property being revalued cannot be booked down below the amount of any nonrecourse liability to which the property is subject).

(e) *Requirements to be satisfied.* Allocations of nonrecourse deductions are deemed to be in accordance with the partners' interests in the partnership only if—

(1) Throughout the full term of the partnership requirements (*1*) and (*2*) of § 1.704–1(b)(2)(ii)(*b*) are satisfied (*i.e.*, capital accounts are maintained in accordance with § 1.704–1(b)(2)(iv) and liquidating distributions are required to be made in accordance with positive capital account balances), and requirement (*3*) of either § 1.704–1(b)(2)(ii)(*b*) or § 1.704–1(b)(2)(ii)(*d*) is satisfied (*i.e.*, partners with deficit capital accounts have an unconditional deficit restoration obligation or agree to a qualified income offset);

(2) Beginning in the first taxable year of the partnership in which there are nonrecourse deductions and thereafter throughout the full term of the partnership, the partnership agreement provides for allocations of nonrecourse deductions in a manner that is reasonably consistent with allocations that have substantial economic effect of some other significant partnership item attributable to the property securing the nonrecourse liabilities;

(3) Beginning in the first taxable year of the partnership that it has nonrecourse deductions or makes a distribution of proceeds of a nonrecourse liability that are allocable to an increase in partnership minimum gain, and thereafter throughout the full term of the partnership, the partnership agreement contains a provision that complies with the minimum gain chargeback requirements of paragraph (f) of this section; and

(4) All other material allocations and capital account adjustments under the partnership agreement are recognized under § 1.704–1(b) (without regard to whether allocations of adjusted tax basis and amount realized under section 613A(c)(7)(D) are recognized under § 1.704–1(b)(4)(v)).

(f) *Minimum gain chargeback requirement*—(1) *In general.* If there is a net decrease in partnership minimum gain for a partnership taxable year, the minimum gain chargeback requirement applies and each partner must be allocated items of partnership income and gain for that year equal to that partner's share of the net decrease in partnership minimum gain (within the meaning of paragraph (g)(2)).

(2) *Exception for certain conversions and refinancings.* A partner is not subject to the minimum gain chargeback requirement to the extent the partner's share of the net decrease in partnership minimum gain is caused by a guarantee, refinancing, or other change in the debt instrument causing it to become partially or wholly recourse debt or partner nonrecourse debt, and the partner bears the economic risk of loss (within the meaning of § 1.752–2) for the newly guaranteed, refinanced, or otherwise changed liability.

(3) *Exception for certain capital contributions.* A partner is not subject to the minimum gain chargeback requirement to the extent the partner contributes capital to the partnership that is used to repay the nonrecourse liability, and the partner's share of the net decrease in partnership minimum gain results from the repayment. See paragraph (m), *Example* (1)(iv) of this section.

(4) *Waiver for certain income allocations that fail to meet minimum gain chargeback requirement if minimum gain chargeback distorts economic arrangement.* In any taxable year that a partnership has a net decrease in partnership minimum gain, if the minimum gain chargeback requirement would cause a distortion in the economic arrangement among the partners and it is not expected that the partnership will have sufficient other income to correct that distortion, the Commissioner has the discretion, if requested by the partnership, to waive the minimum gain chargeback requirement. The following facts must be demonstrated in order for a request for a waiver to be considered:

(i) The partners have made capital contributions or received net income allocations that have restored the previous nonrecourse deductions and the distributions attributable to proceeds of a nonrecourse liability; and

(ii) The minimum gain chargeback requirement would distort the partners' economic arrangement as reflected in the partnership agreement and as evidenced over the term of the partnership by the partnership's allocations and distributions and the partners' contributions.

(5) *Additional Exceptions.* The Commissioner may, by revenue ruling, provide additional exceptions to the minimum gain chargeback requirement.

(6) *Partnership items subject to the minimum gain chargeback requirement.* Any minimum gain chargeback required for a partnership taxable year consists first of certain gains recognized from the disposition of partnership property subject to one or more partnership nonrecourse liabilities and then if necessary consists of a pro rata portion of the partnership's other items of income and gain for that year. If the amount of the minimum gain chargeback requirement exceeds the partnership's income and gains for the taxable year, the excess carries over. See paragraphs (j)(2) (i) and (iii) of this section for more specific ordering rules.

(7) *Examples.* The following examples illustrate the provisions in § 1.704–2(f).

Example 1. Partnership AB consists of two partners, limited partner A and general partner B. Partner A contributes $90 and Partner B contributes $10 to the partnership. The partnership agreement has a minimum gain chargeback provision and provides that, except as otherwise required by section 704(c), all losses will be allocated 90 percent to A and 10 percent to B; and that all income will be allocated first to restore previous losses and thereafter 50 percent to A and 50 percent to B. Distributions are made first to return initial capital to the partners and then 50 percent to A and 50 percent to B. Final distributions are made in accordance with capital account balances. The partnership borrows $200 on a nonrecourse basis from an unrelated third party and purchases an asset for $300. The partnership's only tax item for each of the first three years is $100 of depreciation on the asset. A's and B's shares of minimum gain (under paragraph (g) of this section) and deficit capital account balances are $180 and $20 respectively at the end of the third year. In the fourth year, the partnership earns $400 of net operating income and allocates the first $300 to restore the previous losses (*i.e.*, $270 to A and $30 to B); the last $100 is allocated $50 each. The partnership distributes $200 of the available cash that same year; the first $100 is distributed $90 to A and $10 to B to return their capital contributions; the last $100 is distributed $50 each to reflect their ratio for sharing profits.

	A	B
Capital account on formation	$90	$10
Less: net loss in years 1–3	($270)	($30)
Capital account at end of year 3	($180)	($20)
Allocation of operating income to restore nonrecourse deductions	$180	$20
Allocation of operating income to restore capital contributions	$90	$10
Allocation of operating income to reflect profits	$50	$50
Capital accounts after allocation of operating income	$140	$60
Distribution reflecting capital contribution	($90)	($10)
Distribution in profit-sharing ratio	($50)	($50)
Capital accounts following distribution	($0)	($0)

In the fifth year, the partnership sells the property for $300 and realizes $300 of gain. $200 of the proceeds are used to pay the nonrecourse lender. The partnership has $300 to distribute, and the partners expect to share that equally. Absent a waiver under paragraph (f)(4) of this section, the minimum gain chargeback would require the partnership to allocate the first $200 of the gain $180 to A and $20 to B, which would distort their economic arrangement. This allocation, together with the allocation of the $100 profit $50 to each partner, would result in A having a positive capital account balance of $230 and B having a positive capital account balance of $70. The allocation of income in year 4 in effect anticipated the minimum gain chargeback that did not occur until year 5. Assuming the partnership would not have sufficient other income to correct the distortion that would otherwise result, the partnership may request that the Commissioner exercise his or her discretion to waive the minimum gain chargeback requirement and recognize allocations that would allow A and B to share equally the gain on the sale of the property. These allocations would bring the partners' capital accounts to $150 each, allowing them to share the last $300 equally. The Commissioner may, in his or her discretion, permit this allocation pursuant to paragraph (f)(4) of this section because the minimum gain chargeback would distort the partners' economic arrangement over the term of the partnership as reflected in the partnership agreement and as evidenced by the partner's contributions and the partnerships allocations and distributions.

Example 2. A and B form a partnership, contribute $25 each to the partnership's capital, and agree to share all losses and profits 50 percent each. Neither partner has an unconditional deficit restoration obligation and all the requirements in paragraph (e) of this section are met. The partnership obtains a nonrecourse loan from an unrelated third party of $100 and purchases two assets, stock for $50 and depreciable property for $100. The nonrecourse loan is secured by the partnership's depreciable property. The partnership generates $20 of depreciation in each of the first five years as its only tax item. These deductions are properly treated as nonrecourse deductions and the allocation of these deductions 50 percent to A and 50 percent to B is deemed to be in accordance with the partners' interests in the partnership. At the end of year five, A and B each have a $25 deficit capital account and a $50 share of partnership minimum gain. In the beginning of year six, (at the lender's request), A guarantees the entire nonrecourse liability.

VOL 56 ISS 249 DEC 27 1991 UMI

Pursuant to paragraph (d)(1) of this section, the partnership has a net decrease in minimum gain of $100 and under paragraph (g)(2) of this section, A's and B's shares of that net decrease are $50 each. Under paragraph (f)(1) of this section (the minimum gain chargeback requirement), B is subject to a $50 minimum gain chargeback. Because the partnership has no income in year six, the entire $50 carries over as a minimum gain chargeback requirement to succeeding taxable years until their is enough income to cover the minimum gain chargeback requirement. Under the exception to the minimum gain chargeback in paragraph (f)(2) of this section, A is not subject to a minimum gain chargeback for A's $50 share of the net decrease because A bears the economic risk of loss for the liability. Instead, A's share of partner nonrecourse debt minimum gain is $50 pursuant to paragraph (i)(3) of this section. In year seven, the partnership earns $100 of net operating income and uses the money to repay the entire $100 nonrecourse debt (that A has guaranteed). Under paragraph (i)(3) of this section, the partnership has a net decrease in partner nonrecourse debt minimum gain of $50. B must be allocated $50 of the operating income pursuant to the carried over minimum gain chargeback requirement; pursuant to paragraph (i)(4) of this section, the other $50 of operating income must be allocated to A as a partner nonrecourse debt minimum gain chargeback.

(g) *Shares of partnership minimum gain—(1) Partner's share of partnership minimum gain.* Except as increased in paragraph (g) (3) of this section, a partner's share of partnership minimum gain at the end of any partnership taxable year equals:

(i) The sum of nonrecourse deductions allocated to that partner (and to that partner's predecessors in interest) up to that time and the distributions made to that partner (and to that partner's predecessors in interest) up to that time of proceeds of a nonrecourse liability allocable to an increase in partnership minimum gain (see paragraph (h)(1) of this section); minus

(ii) The sum of that partner's (and that partner's predecessors' in interest) aggregate share of the net decreases in partnership minimum gain plus their aggregate share of decreases resulting from revaluations of partnership property subject to one or more partnership nonrecourse liabilities.

For purposes of § 1.704(b)(2)(ii)(*d*), a partner's share of partnership minimum gain is added to the limited dollar amount, if any, of the deficit balance in the partner's capital account that the partner is obligated to restore. See paragraph (m), *Examples* (1)(i) and (3)(i) of this section.

(2) *Partner's share of the net decrease in partnership minimum gain.* A partner's share of the net decrease in partnership minimum gain is the amount of the total net decrease multiplied by the partner's percentage share of the partnership's minimum gain at the end of the immediately preceding taxable year. A partner's share of any decrease in partnership minimum gain resulting from a revaluation of partnership property equals the increase in the partner's capital account attributable to the revaluation to the extent the reduction in minimum gain is caused by the revaluation. See paragraph (m), *Example* (3)(ii) of this section.

(3) *Conversions of recourse or partner nonrecourse debt into nonrecourse debt.* A partner's share of partnership minimum gain is increased to the extent provided in this paragraph (g)(3) if a refinancing, the lapse of a guarantee, or other change to a debt instrument causes a recourse or partner nonrecourse liability to become partially or wholly nonrecourse. If a recourse liability becomes a nonrecourse liability, a partner has a share of the partnership's minimum gain that results from the conversion equal to the partner's deficit capital account (determined under § 1.704–1(b)(2)(iv)) to the extent the partner no longer bears the economic burden for the entire deficit capital account as a result of the conversion. For purposes of the preceding sentence, the determination of the extent to which a partner bears the economic burden for a deficit capital account is made by determining the consequences to the partner in the case of a complete liquidation of the partnership immediately after the conversion applying the rules described in § 1.704–1(b)(2)(iii)(*c*) that deem the value of partnership property to equal its basis, taking into account section 7701(g) in the case of property that secures nonrecourse indebtedness. If a partner nonrecourse debt becomes a nonrecourse liability, the partner's share of partnership minimum gain is increased to the extent the partner is not subject to the minimum gain chargeback requirement under paragraph (i)(4) of this section.

(h) *Distribution of nonrecourse liability proceeds allocable to an increase in partnership minimum gain—*(1) *In general.* If during its taxable year a partnership makes a distribution to the partners allocable to the proceeds of a nonrecourse liability, the distribution is allocable to an increase in partnership minimum gain to the extent the increase results from encumbering partnership property with aggregate nonrecourse liabilities that exceed the property's adjusted tax basis. See paragraph (m), *Example* (1)(vi) of this section. If the net increase in partnership minimum gain for a partnership taxable year is allocable to more than one nonrecourse liability, the net increase is allocated among the liabilities on a pro rata basis based on the outstanding balance of each liability.

(2) *Distribution allocable to nonrecourse liability proceeds.* A partnership may use any reasonable method to determine whether a distribution by the partnership to one or more partners is allocable to proceeds of a nonrecourse liability. The rules prescribed under § 1.163–8T for allocating debt proceeds among expenditures (applying those rules to the partnership as if it were an individual) constitute a reasonable method for determining whether the nonrecourse liability proceeds are distributed to the partners and the partners to whom the proceeds are distributed.

(3) *Option when there is an obligation to restore.* A partnership may treat any distribution to a partner of the proceeds of a nonrecourse liability (that would otherwise be allocable to an increase in partnership minimum gain) as a distribution that is not allocable to an increase in partnership minimum gain to the extent the distribution does not cause or increase a deficit balance in the partner's capital account that exceeds the amount the partner is otherwise obligated to restore (within the meaning of § 1.704–1(b)(2)(ii)(*c*)) as of the end of the partnership taxable year in which the distribution occurs.

(4) *Carryover to immediately succeeding taxable year.* The carryover rule of this paragraph applies if the net increase in partnership minimum gain for a partnership taxable year that is allocable to a nonrecourse liability under paragraph (h)(2) of this section exceeds the distributions allocable to the proceeds of the liability ("excess allocable amount"), and all or part of the net increase in partnership minimum gain for the year is carried over as an increase in partnership minimum gain for the immediately succeeding taxable year (pursuant to paragraph (j)(1)(iii) of this section). If the carryover rule of this paragraph applies, the excess allocable amount (or the amount carried over under paragraph (j)(1)(iii) of this section, if less) is treated in the succeeding taxable year as an increase in partnership minimum gain that arose in that year as a result of incurring the nonrecourse liability to which the excess allocable amount is attributable. See paragraph (m), *Example* (1)(vi) of this section. If for a partnership taxable year there is an excess allocable amount with respect to more than one partnership nonrecourse liability, the excess allocable amount is allocated to each liability on a pro rata basis based on the outstanding balance of each liability.

(i) *Partnership nonrecourse liabilities where a partner bears the economic risk of loss—*(1) *In general.* Partnership losses, deductions, or section 705(a)(2)(B) expenditures that are attributable to a particular partner nonrecourse liability ("partner nonrecourse deductions," as defined in paragraph (i)(2) of this section) must be allocated to the partner that bears the economic risk of loss for the liability. If more than one partner bears the economic risk of loss for a partner nonrecourse liability, any partner nonrecourse deductions attributable to that liability must be allocated among the partners according to the ratio in which they bear the economic risk of loss. If partners bear the economic risk of loss for different portions of a liability, each portion is treated as a separate partner nonrecourse liability.

(2) *Definition of and determination of partner nonrecourse deductions.* For any partnership taxable year, the amount of partner nonrecourse deductions with respect to a partner nonrecourse debt equals the net increase during the year in minimum gain attributable to the partner nonrecourse debt ("partner nonrecourse debt minimum gain"), reduced (but not below zero) by proceeds of the liability distributed during the year to the partner bearing the economic risk of loss for the liability that are both attributable to the liability and allocable to an increase in the partner nonrecourse debt minimum gain. See paragraph (m), *Example* (1) (viii) and (ix) of this section. The determination of which partnership items constitute the partner nonrecourse deductions with respect to a partner nonrecourse debt must be made in a manner consistent with the provisions of paragraphs (c) and (j)(1) (i) and (iii) of this section.

(3) *Determination of partner nonrecourse debt minimum gain.* For any partnership taxable year, the determination of partner nonrecourse debt minimum gain and the net increase or decrease in partner nonrecourse debt minimum gain must be made in a manner consistent with the provisions of paragraphs (d) and (g)(3) of this section.

(4) *Chargeback of partner nonrecourse debt minimum gain.* If during a partnership taxable year there is a net decrease in partner nonrecourse debt minimum gain, any partner with a share of that partner nonrecourse debt minimum gain (determined under paragraph (i)(5) of this section) as of the beginning of the year must be allocated items of income and gain for the year (and, if necessary, for succeeding years) equal to that partner's share of the net decrease in the partner nonrecourse debt minimum gain. A partner's share of the net decrease in partner nonrecourse debt minimum gain is determined in a manner consistent with the provisions of paragraph (g)(2) of this section. A partner is not subject to this minimum gain chargeback, however, to the extent the net decrease in partner nonrecourse debt minimum gain arises because the liability ceases to be partner nonrecourse debt due to a conversion, refinancing, or other change in the debt instrument that causes it to become partially or wholly a nonrecourse liability. The amount that would otherwise be subject to the partner nonrecourse debt minimum gain chargeback is added to the partner's share of partnership minimum gain under paragraph (g)(3) of this section. In addition, rules consistent with the provisions of paragraphs (f) (2), (3), (4), and (5) of this section apply with respect to partner nonrecourse debt in appropriate circumstances. The determination of which items of partnership income and gain must be allocated pursuant to this paragraph (i)(4) is made in a manner that is consistent with the provisions of paragraph (f)(5) of this section. See paragraph (j)(2) (ii) and (iii) of this section for more specific rules.

(5) *Partner's share of partner nonrecourse debt minimum gain.* A partner's share of partner nonrecourse debt minimum gain at the end of any partnership taxable year is determined in a manner consistent with the provisions of paragraphs (g)(1) and (g)(3) of this section with respect to each particular partner nonrecourse debt for which the partner bears the economic risk of loss. For purposes of § 1.704–1(b)(2)(ii)(*d*), a partner's share of partner nonrecourse debt minimum gain is added to the limited dollar amount, if any, of the deficit balance in the partner's capital account that the partner is obligated to restore, and the partner is not otherwise considered to have a deficit restoration obligation as a result of bearing the economic risk of loss for any partner nonrecourse debt. See paragraph (m), *Example* (1)(viii) of this section.

(6) *Distribution of partner nonrecourse debt proceeds allocable to an increase in partner nonrecourse debt minimum gain.* Rules consistent with the provisions of paragraph (h) of this section apply to distributions of the proceeds of partner nonrecourse debt.

(j) *Ordering Rules.* For purposes of this section, the following ordering rules apply to partnership items.

Notwithstanding any other provision in this section and § 1.704–1, allocations of partner nonrecourse deductions, nonrecourse deductions, and minimum gain chargebacks are made before any other allocations.

(1) *Treatment of partnership losses and deductions.* (i) *Partner nonrecourse deductions.* Partnership losses, deductions, and section 705(a)(2)(B) expenditures are treated as partner nonrecourse deductions in the amount determined under paragraph (i)(2) of this section (determining partner nonrecourse deductions) in the following order:

(A) First, depreciation or cost recovery deductions with respect to property that is subject to partner nonrecourse debt;

(B) Then, if necessary, a pro rata portion of the partnership's other deductions, losses, and section 705(a)(2)(B) items.

Depreciation or cost recovery deductions with respect to property that is subject to a partnership nonrecourse liability is first treated as a partnership nonrecourse deduction and any excess is treated as a partner nonrecourse deduction under this paragraph (j)(1)(i).

(ii) *Partnership nonrecourse deductions.* Partnership losses, deductions, and section 705(a)(2)(B) expenditures are treated as partnership nonrecourse deductions in the amount determined under paragraph (c) of this section (determining nonrecourse deductions) in the following order:

(A) First, depreciation or cost recovery deductions with respect to property that is subject to partnership nonrecourse liabilities;

(B) Then, if necessary, a pro rata portion of the partnership's other deductions, losses, and section 705(a)(2)(B) items.

Depreciation or cost recovery deductions with respect to property that is subject to partner nonrecourse debt is first treated as a partner nonrecourse deduction and any excess is treated as a partnership nonrecourse deduction under this paragraph (j)(1)(ii). Any other item that is treated as a partner nonrecourse deduction will in no event be treated as a partnership nonrecourse deduction.

(iii) *Carryover to succeeding taxable year.* If the amount of partner nonrecourse deductions or nonrecourse deductions exceed the partnership's losses, deductions, and section 705(a)(2)(B) expenditures for the taxable year (determined under paragraphs (j)(1)(i) and (ii) of this section), the excess is treated as an increase in partner nonrecourse debt minimum gain or

VOL 56 ISS 249 DEC 27 1991 UMI

partnership minimum gain in the immediately succeeding partnership taxable year. See paragraph (m), *Example* (1)(vi) of this section.

(2) *Treatment of partnership income and gains.* (i) *Minimum gain chargeback.* Items of partnership income and gain equal to the minimum gain chargeback requirement (determined under paragraph (f) of this section) are allocated as a minimum gain chargeback in the following order:

(A) First, gain from the disposition of property subject to partnership nonrecourse liabilities;

(B) Then, if necessary, a pro rata portion of the partnership's other items of income and gain for that year. Gain from the disposition of property subject to partner nonrecourse debt is allocated to satisfy a minimum gain chargeback requirement for partnership nonrecourse debt only to the extent not allocated under paragraph (j)(2)(ii) of this section.

(ii) *Chargeback attributable to decrease in partner nonrecourse debt minimum gain.* Items of partnership income and gain equal to the partner nonrecourse debt minimum gain chargeback (determined under paragraph (i)(4) of this section) are allocated to satisfy a partner nonrecourse debt minimum gain chargeback in the following order:

(A) First, gain from the disposition of property subject to partner nonrecourse debt;

(B) Then, if necessary, a pro rata portion of the partnership's other items of income and gain for that year. Gain from the disposition of property subject to a partnership nonrecourse liability is allocated to satisfy a partner nonrecourse debt minimum gain chargeback only to the extent not allocated under paragraph (j)(2)(i) of this section. An item of partnership income and gain that is allocated to satisfy a minimum gain chargeback under paragraph (f) of this section is not allocated to satisfy a minimum gain chargeback under paragraph (i)(4).

(iii) *Carryover to succeeding taxable year.* If a minimum gain chargeback requirement (determined under paragraphs (f) and (i)(4) of this section) exceeds the partnership's income and gains for the taxable year, the excess is treated as a minimum gain chargeback requirement in the immediately succeeding partnership taxable years until fully charged back.

(k) *Tiered partnerships.* For purposes of this section, the following rules determine the effect on partnership minimum gain when a partnership ("upper-tier partnership") is a partner in another partnership ("lower-tier partnership").

(1) *Increase in upper-tier partnership's minimum gain.* The sum of the nonrecourse deductions that the lower-tier partnership allocates to the upper-tier partnership for any taxable year of the upper-tier partnership, and the distributions made during that taxable year from the lower-tier partnership to the upper-tier partnership of proceeds of nonrecourse debt that are allocable to an increase in the lower-tier partnership's minimum gain, is treated as an increase in the upper-tier partnership's minimum gain.

(2) *Decrease in upper-tier partnership's minimum gain.* The upper-tier partnership's share for its taxable year of the lower-tier partnership's net decrease in its minimum gain is treated as a decrease in the upper-tier partnership's minimum gain for that taxable year.

(3) *Nonrecourse debt proceeds distributed from the lower-tier partnership to the upper-tier partnership.* All distributions from the lower-tier partnership to the upper-tier partnership during the upper-tier partnership's taxable year of proceeds of a nonrecourse liability allocable to an increase in the lower-tier partnership's minimum gain are treated as proceeds of a nonrecourse liability of the upper-tier partnership. The increase in the upper-tier partnership's minimum gain (under paragraph (k)(1) of this section) attributable to the receipt of those distributions is, for purposes of paragraph (h) of this section, treated as an increase in the upper-tier partnership's minimum gain arising from encumbering property of the upper-tier partnership with a nonrecourse liability of the upper-tier partnership.

(4) *Nonrecourse deductions of lower-tier partnership treated as depreciation by upper-tier partnership.* For purposes of paragraph (c) of this section, all nonrecourse deductions allocated by the lower-tier partnership to the upper-tier partnership for the upper-tier partnership's taxable year are treated as depreciation or cost recovery deductions with respect to property owned by the upper-tier partnership and subject to a nonrecourse liability of the upper-tier partnership with respect to which minimum gain increased during the year by the amount of the nonrecourse deductions.

(5) *Coordination with partner nonrecourse debt rules.* The lower-tier partnership's liabilities that are treated as the upper-tier partnership's liabilities under § 1.752–4(a) are treated as the upper-tier partnership's liabilities for purposes of applying paragraph (i) of this section. Rules consistent with the provisions of paragraphs (k)(1) through (k)(5) of this section apply to determine the allocations that the upper-tier partnership must make with respect to any liability that constitutes a nonrecourse debt for which one or more partners of the upper-tier partnership bear the economic risk of loss.

(l) *Effective dates*—(1) *In general*—(i) *Prospective application.* Except as otherwise provided in this paragraph (l), this section applies for partnership taxable years beginning on or after December 28, 1991. For the rules applicable to taxable years beginning after December 29, 1988, and before December 28, 1991, see former § 1.704–1T(b)(4)(iv). For the rules applicable to taxable years beginning on or before December 29, 1988, see former § 1.704–1(b)(4)(iv).

(ii) *Partnerships subject to temporary regulations.* If a partnership agreement entered into after December 29, 1988, and before December 28, 1991, complied with the provisions of former § 1.704–1T(b)(4)(iv) before December 28, 1991—

(A) The provisions of former § 1.704–1T(b)(4)(iv) continue to apply to the partnership for any taxable year beginning on or after December 28, 1991, (unless the partnership makes an election under paragraph (l)(4) of this section) and ending before any subsequent material modification to the partnership agreement; and

(B) The provisions of this section do not apply to the partnership for any of those taxable years.

(iii) *Partnerships subject to former regulations.* If a partnership agreement entered into on or before December 29, 1988, complied with the provisions of former § 1.704–1(b)(4)(iv)(*d*) on or before that date—

(A) The provisions of former § 1.704–1(b)(4)(iv) (*a*) through (*f*) continue to apply to the partnership for any taxable year beginning after that date (unless the partnership made an election under § 1.704–1T(b)(4)(iv)(*m*)(*4*) in a partnership taxable year ending before December 28, 1991, or makes an election under paragraph (l)(4) of this section and ending before any subsequent material modification to the partnership agreement; and

(B) The provisions of this section do not apply to the partnership for any of those taxable years.

(2) *Special rule applicable to pre-January 30, 1989, related party nonrecourse debt.* For purposes of this section and former § 1.704–1T(b)(4)(iv), if—

(i) A partnership liability would, but for this paragraph (l)(2) of this section, constitute a partner nonrecourse debt; and

(ii) Sections 1.752–1 through –3 or former §§ 1.752–1T through –3T (whichever is applicable) do not apply to the liability;

the liability is, notwithstanding paragraphs (i) and (b)(4) of this section, treated as a nonrecourse liability of the partnership, and not as a partner nonrecourse debt, to the extent the liability would be so treated under this section (or § 1.704–1T(b)(4)(iv)) if the determination of the extent to which one or more partners bears the economic risk of loss for the liability under § 1.752–1 or former § 1.752–1T were made without regard to the economic risk of loss that any partner would otherwise be considered to bear for the liability by reason of any obligation undertaken or interest as a creditor acquired prior to January 30, 1989, by a person related to the partner (within the meaning of § 1.752–4(b) or former § 1.752–1T(h)). For purposes of the preceding sentence, if a related person undertakes an obligation or acquires an interest as a creditor on or after January 30, 1989, pursuant to a written binding contract in effect prior to January 30, 1989, and at all times thereafter, the obligation or interest as a creditor is treated as if it were undertaken or acquired prior to January 30, 1989. However, for partnership taxable years beginning on or after December 28, 1991, a pre-January 30, 1989, liability, other than a liability subject to paragraph (i)(3) of this section or former § 1.704–1T(b)(4)(iv)(*m*)(*3*) (whichever is applicable), that is treated as grandfathered under former §§ 1.752–1T through –3T (whichever is applicable) will be treated as a nonrecourse liability for purposes of this section provided that all partners in the partnership consistently treat the liability as nonrecourse for partnership taxable years beginning on or after December 28, 1988.

(3) *Transition rule for pre-March 1, 1984, partner nonrecourse debt.* If a partnership liability would, but for this paragraph (l)(3) or former § 1.704–1T(b)(4)(iv), constitute a partner nonrecourse debt and the liability constitutes grandfathered partner nonrecourse debt that is appropriately treated as a nonrecourse liability of the partnership under § 1.752–1 (as in effect prior to December 29, 1988)—

(i) The liability is, notwithstanding paragraphs (i) and (b)(4) of this section, former § 1.704–1T(b)(4)(iv), and former § 1.704–1(b)(4)(iv), treated as a nonrecourse liability of the partnership for purposes of former § 1.704–1T(b)(4)(iv) and former § 1.704–1(b)(4)(iv) to the extent of the amount, if any, by which the smallest outstanding balance of the liability during the period beginning at the end of the first partnership taxable year ending on or after December 31, 1986, and ending at the time of any determination under this paragraph (l)(3)(i) or former § 1.704–1T(b)(4)(iv)(*m*)(*3*)(*i*) exceeds the aggregate amount of the adjusted basis (or book value) of partnership property allocable to the liability (determined in accordance with former § 1.704–1(b)(4)(iv)(*c*) (*1*) and (*2*) at the end of the first partnership taxable year ending on or after December 31, 1986); and

(ii) In applying this section to the liability, former § 1.704–1(b)(4)(iv)(*c*) (*1*) and (*2*) is applied as if all of the adjusted basis of partnership property allocable to the liability is allocable to the portion of the liability that is treated as a partner nonrecourse debt and as if none of the adjusted basis of partnership property that is allocable to the liability is allocable to the portion of the liability that is treated as a nonrecourse liability under this paragraph (l)(3) and former § 1.704–1T (b)(4)(iv)(*m*)(*3*)(*i*).

For purposes of the preceding sentence, a grandfathered partner debt is any partnership liability that was not subject to former § § 1.752–1T and –3T but that would have been subject to those sections under § 1.752–4T(b) if the liability had arisen (other than pursuant to a written binding contract) on or after March 1, 1984. A partnership liability is not considered to have been subject to § § 1.752–2T and –3T solely because a portion of the liability was treated as a liability to which those sections apply under § 1.752–4(e).

(4) *Election.* A partnership may elect to apply the provisions of this section to the first taxable year of the partnership ending on or after December 28, 1991. An election under this paragraph (l)(4) is made by attaching a written statement to the partnership return for the first taxable year of the partnership ending on or after December 28, 1991. The written statement must include the name, address, and taxpayer identification number of the partnership making the statement and must declare that an election is made under this paragraph (l)(4).

(m) *Examples.* The principles of this section are illustrated by the following examples:

Example 1. Nonrecourse deductions and partnership minimum gain. For *Example 1*, unless otherwise provided, the following facts are assumed. LP, the limited partner, and GP, the general partner, form a limited partnership to acquire and operate a commercial office building. LP contributes $180,000, and GP contributes $20,000. The partnership obtains an $800,000 nonrecourse loan and purchases the building (on leased land) for $1,000,000. The nonrecourse loan is secured only by the building, and no principal payments are due for 5 years. The partnership agreement provides that GP will be required to restore any deficit balance in GP's capital account following the liquidation of GP's interest (as set forth in § 1.704–1 (b)(2)(ii)(*b*)(T33)), and LP will not be required to restore any deficit balance in LP's capital account following the liquidation of LP's interest. The partnership agreement contains the following provisions required by paragraph (e) of this section: a qualified income offset (as defined in § 1.704–1(b)(2)(ii)(*d*)); a minimum gain chargeback (in accordance with paragraph (f) of this section); a provision that the partners' capital accounts will be determined and maintained in accordance with § 1.704–1(b)(2)(ii)(*b*)(*1*); and a provision that distributions will be made in accordance with partners' positive capital account balances (as set forth in § 1.704–1(b)(2)(ii)(*b*)(*2*)). In addition, as of the end of each partnership taxable year discussed herein, the items described in § 1.704–1(b)(2)(ii)(*d*) (*4*), (*5*), and (*6*) are not reasonably expected to cause or increase a deficit balance in LP's capital account. The partnership agreement provides that, except as otherwise required by its qualified income offset and minimum gain chargeback provisions, all partnership items will be allocated 90 percent to LP and 10 percent to GP until the first time when the partnership has recognized items of income and gain that exceed the items of loss and deduction it has recognized over its life, and all further partnership items will be allocated equally between LP and GP. Finally, the partnership agreement provides that all distributions, other than distributions in liquidation of the partnership or of a partner's interest in the partnership, will be made 90 percent to LP and 10 percent to GP until a total of $200,000 has been distributed, and thereafter all the distributions will be made equally to LP and GP. In each of the partnership's first 2 taxable years, it generates rental income of $95,000, operating expenses (including land lease payments) of $10,000, interest expense of $80,000, and a depreciation deduction of $90,000, resulting in a net taxable loss of $85,000 in each of those years. The allocations of these losses 90 per percent of LP and 10 percent to GP have substantial economic effect.

	LP	GP
Capital account on formation	$180,000	$20,000
Less: net loss in years 1 and 2	(153,000)	(17,000)
Capital account at end of year 2	27,000	3,000

In the partnership's third taxable year, it again generates rental income of $95,000, operating expenses of $10,000, interest expense of $80,000, and a depreciation deduction of $90,000, resulting in net taxable

VOL 56 ISS 249 DE 27 1991 UMI

loss of $65,000. The partnership makes no distributions.

(i) *Calculation of nonrecourse deductions and partnership minimum gain.* If the partnership were to dispose of the building in full satisfaction of the nonrecourse liability at the end of the third year, it would realize $70,000 of gain ($800,000 amount realized less $730,000 adjusted tax basis). Because the amount of partnership minimum gain at the end of the third year (and the net increase in partnership minimum gain during the year) is $70,000, there are partnership nonrecourse deductions for that year of $70,000, consisting of depreciation deductions allowable with respect to the building of $70,000. Pursuant to the partnership agreement, all partnership items comprising the net taxable loss of $85,000, including the $70,000 nonrecourse deduction, are allocated 90 percent to LP and 10 percent to GP. The allocation of these items, other than the nonrecourse deductions, has substantial economic effect.

	LP	GP
Capital account at end of year 2	$27,000	$3,000
Less: net loss in year 3 (without nonrecourse deductions)	(13,500)	(1,500)
Less: nonrecourse deductions in year 3	(63,000)	(7,000)
Capital account at end of year 3	(49,500)	(5,500)

The allocation of the $70,000 nonrecourse deduction satisfies requirement (2) of paragraph (e) of this section because it is consistent with allocations having substantial economic effect of other significant partnership items attributable to the building. Because the remaining requirements of paragraph (e) of this section are satisfied, thee allocation of nonrecourse deductions is deemed to be in accordance with the partners' interests in the partnership. At the end of the partnership's third taxable year, LP's and GP's shares of partnership minimum gain are $63,000 and $7,000, respectively. Therefore, pursuant to paragraph (g)(1) of this section, LP is treated as obligated to restore a deficit capital account balance of $63,000, so that in the succeeding year LP could be allocated up to an additional $13,500 of partnership deductions, losses, and section 705(a)(2)(B) items that are not nonrecourse deductions. Even though this allocation would increase a deficit capital account balance, it would be considered to have economic effect under the alternate economic effect test contained in § 1.704–1(b)(2)(ii)(*d*). If the partnership were to dispose of the building in full satisfaction of the nonrecourse liability at the beginning of the partnership's fourth taxable year (and had no other economic activity in that year), the partnership minimum gain would be decreased from $70,000 to zero, and the minimum gain chargeback would require that LP and GP be allocated $63,000 and $7,000, respectively, of the gain from that disposition.

(ii) *Illustration of reasonable consistency requirement.* Assume instead that the partnership agreement provides that all nonrecourse deductions of the partnership will be allocated equally between LP and GP. Furthermore, at the time the partnership agreement is entered into, there is a reasonable likelihood that over the partnership's life it will realize amounts of income and gain significantly in excess of amounts of loss and deduction (other than nonrecourse deductions). The equal allocation of excess income and gain has substantial economic effect.

	LP	GP
Capital account on formation	$180,000	$20,000
Less: net loss in years 1 and 2	(153,000)	(17,000)
Less: net loss in year (without nonrecourse deductions)	(13,500)	(1,500)
Less: nonrecourse deductions in year 3	(35,000)	(35,000)
Capital account at end of year 3	(21,500)	(33,500)

The allocation of the $70,000 nonrecourse deduction equally between LP and GP satisfies requirement (2) of paragraph (e) of this section because the allocation is consistent with allocations, which will have substantial economic effect, of other significant partnership items attributable to the building. Because the remaining requirements of paragraph (e) of this section are satisfied, the allocation of nonrecourse deductions is deemed to be in accordance with the partners' interests in the partnership. The allocation of the nonrecourse deductions 75 percent to LP and 25 percent to GP (or in any other ratio between 90 percent to LP/10 percent to GP and 50 percent of LP/50 percent to GP) also would satisfy requirement (2) of paragraph (e) of this section.

(iii) *Allocation of nonrecourse deductions that fails reasonable consistency requirement.* Assume instead that the partnership agreement provides that LP will be allocated 99 percent, and GP 1 percent, of all nonrecourse deductions of the partnership. Allocating nonrecourse deductions this way does not satisfy requirement (2) of paragraph (e) of this section because the allocations are not reasonably consistent with allocations, having substantial economic effect, of any other significant partnership item attributable to the building. Therefore, the allocation of nonrecourse deductions will be disregarded, and the nonrecourse deductions of the partnership will be reallocated according to the partners' overall economic interests in the partnership, determined under § 1.704–1(b)(3)(ii).

(iv) *Capital contribution to pay down nonrecourse debt.* At the beginning of the partnership's fourth taxable year, LP contributes $144,000 and GP contributes $16,000 of addition capital to the partnership, which the partnership immediately uses to reduce the amount of its nonrecourse liability from $800,000 to $640,000. In addition, in the partnership's fourth taxable year, it generates rental income of $95,000, operating expenses of $10,000, interest expense of $64,000 (consistent with the debt reduction), and a depreciation deduction of $90,000, resulting in a net taxable loss of $69,000. If the partnership were to dispose of the building in full satisfaction of the nonrecourse liability at the end of that year, it would realize no gain ($640,000 amount realized less $640,000 adjusted tax basis). Therefore, the amount of partnership minimum gain at the end of the year is zero, which represents a net decrease in partnership minimum gain of $70,000 during the year. LP's and GP's shares of this net decrease are $63,000 and $7,000 respectively, so that at the end of the partnership's fourth taxable year, LP's and GP's shares of partnership minimum gain are zero. Although there has been a net decrease in partnership minimum gain, pursuant to paragraph (f)(3) of this section LP and GP are not subject to a minimum gain chargeback.

	LP	GP
Capital account at end of year 3	($49,500)	($5,500)
Plus: contribution	144,000	16,000
Less: net loss in year 4	(62,100)	(6,900)
Capital account at end of year 4	32,400	3,600
Minimum gain chargeback carryforward	0	0

(v) *Loans of unequal priority* Assume instead that the building acquired by the partnership is secured by a $700,000 nonrecourse loan and a $100,000 recourse loan, subordinate in priority to the nonrecourse loan. Under paragraph (d)(2) of this section, $700,000 of the adjusted basis of the partnership's third taxable year is allocated to the nonrecourse liability (with the remaining $30,000 allocated to the recourse liability) so that if the partnership disposed of the building in full satisfaction of the nonrecourse liability at the end of the year, it would realize no gain (700,000 amount realized less $700,000 adjusted tax basis). Therefore, there is no minimum gain (or increase in minimum gain) at the end of the partnership's third taxable year. If, however, the $700,000 nonrecourse loan were subordinate in priority to the $100,000 recourse loan, under paragraph (d)(2) of this section, the first $100,000 of adjusted tax basis in the building would be allocated to the recourse liability, leaving only $630,000 of the adjusted basis of the building to be allocated to the $700,000 nonrecourse loan. In that case, the balance of the $700,000 nonrecourse liability would exceed the adjusted tax basis of the building by $70,000, so that there would be $70,000 of minimum gain (and a $70,000 increase in partnership minimum gain) in the partnership's third taxable year.

(vi) *Nonrecourse borrowing; distribution of proceeds in subsequent year.* The partnership obtains an additional nonrecourse loan of $200,000 at the end of its fourth taxable year, secured by a second mortgage on the building, and distributes $180,000 of this cash to its partners at the beginning of its fifth taxable year. In addition, in its fourth and fifth taxable years, the partnership again

generates rental income of $95,000, operating expenses of $10,000, interest expense of $80,000 ($100,000 in the fifth taxable year reflecting the interest paid on both liabilities), and a depreciation deduction of $90,000, resulting in a net taxable loss of $85,000 ($105,000 in the fifth taxable year reflecting the interest paid on both liabilities). The partnership has distributed its $5,000 of operating cash flow in each year ($5,000 of rental income less $10,000 of operating expense and $80,000 of interest expenses) to LP and GP at the end of each year. If the partnership were to dispose of the building in full satisfaction of both nonrecourse liabilities at the end of its fourth taxable year, the partnership would realize $360,000 of gain ($1,000,000 amount realized less $640,000 adjusted tax basis). Thus, the net increase in partnership minimum gain during the partnership's fourth taxable year is $290,000 ($360,000 of minimum gain at the end of the fourth year less $70,000 of minimum gain at the end of the third year). Because the partnership did not distribute any of the proceeds of the loan it obtained in its fourth year during that year, the potential amount of partnership nonrecourse deductions for that year is $290,000. Under paragraph (c) of this section, if the partnership had distributed the proceeds of that loan to its partners at the end of its fourth year, the partnership's nonrecourse deductions for that year would have been reduced by the amount of that distribution because of the proceeds of that loan are allocable to an increase in partnership minimum gain under paragraph (h)(1) of this section. Because the nonrecourse deductions of $290,000 for the partnership's fourth taxable year exceed its total deductions for that year, all $160,000 of the partnership's deductions for that year are treated as nonrecourse deductions, and the $110,000 excess nonrecourse deductions are treated as an increase in partnership minimum gain in the partnership's fifth taxable year under paragraph (c) of this section.

	LP	GP
Capital account at end of year 3 (including cash flow distributions)	($63,000)	($7,000)
Plus: rental income in year 4	85,500	9,500
Less: nonrecourse deductions in year 4	(162,000)	(18,000
Less: cash flow distributions in year 4	(4,500)	(500)
Capital account at end of year 4	(144,000)	(16,000)

At the end of the partnership's fourth taxable year, LP's and GP's shares of partnership minimum gain are $225,000 and $25,000, respectively (because the $110,000 excess of nonrecourse deductions is carried forward to the next year). If the partnership were to dispose of the building in full satisfaction of the nonrecourse liabilities at the end of its fifth taxable year, the partnership would realize $450,000 of gain (1,000,000 amount realized less 550,000 adjusted tax basis). Therefore, the net increase in partnership minimum gain during the partnership's fifth taxable year is $200,000 ($110,000 deemed increase plus the $90,000 by which minimum gain at the end of the fifth year exceeds minimum gain at the end of the fourth year ($450,000 less $360,000)). At the beginning of its fifth year, the partnership distributes $180,000 of the loan proceeds (retaining $20,000 to pay the additional interest expense). Under paragraph (h) of this section, the first $110,000 of this distribution (an amount equal to the deemed increase in partnership minimum gain for the year) is considered allocable to an increase in partnership minimum gain for the year. As a result, the amount of nonrecourse deductions for the partnership's fifth taxable year is $90,000 (200,000 net increase in minimum gain less $110,000 distribution of nonrecourse liability proceeds allocable to an increase in partnership minimum gain), and the nonrecourse deductions consist solely of the $90,000 depreciation deduction allowable with respect to the building. As a result of the distributions during the partnership's fifth taxable year, the total distributions to the partners over the partnership's life equal $205,000. Therefore, the last $5,000 distributed to the partners during the fifth year will be divided equally between them under the partnership agreement. Thus, out of the $185,000 total distribution during the partnership's fifth taxable year, the first 180,000 is distributed 90 percent to LP and 10 percent to GP, and the last $5,000 is divided equally between them.

	LP	GP
Capital account at end of year 4	($144,000)	($16,000)
Less: net loss in year 5 (without nonrecourse deductions)	(13,500)	(1,500)
Less: nonrecourse deductions in year 5	(81,000)	(9,000)
Less: distribution of loan proceeds	(162,000)	(18,000)
Less: cash flow distribution in year 5	(2,500)	(2,500)
Capital account at end of year 5	(403,000)	(47,000)

At the end of the partnership's fifth taxable year, LP's share of partnership minimum gain is $405,000 ($225,000 share of minimum gain at the end of the fourth year plus $81,000 of nonrecourse deductions for the fifth year and a $99,000 distribution of nonrecourse liability proceeds that are allocable to an increase in minimum gain) and GP's share of partnership minimum gain is $45,000 ($25,000 share of minimum gain at the end of the fourth year plus $9,000 of nonrecourse deductions for the fifth year and an $11,000 distribution of nonrecourse liability proceeds that are allocable to an increase in minimum gain).

(vii) *Partner guarantee of nonrecourse debt.* LP and GP personally guarantee the "first" $100,000 of the $800,000 nonrecourse loan (*i.e.*, only if the building is worth less than $100,000 will they be called upon to make up any deficiency). Under paragraph (d)(2) of this section, only $630,000 of the adjusted tax basis of the building is allocated to the $700,000 nonrecourse portion of the loan because the collateral will be applied first to satisfy the $100,000 guaranteed portion, making it superior in priority to the remainder of the loan. On the other hand, if LP and GP were to guarantee the "last" $100,000 (*i.e.*, if the building is worth less than $800,000, they will be called upon to make up the deficiency up to $100,000), $700,000 of the adjusted tax basis of the building would be allocated to the $700,000 nonrecourse portion of the loan because the guaranteed portion would be inferior in priority to it.

(viii) *Partner nonrecourse debt.* Assume instead that the $800,000 loan is made by LP, the limited partner. Under paragraph (b)(4) of this section, the $800,000 obligation does not constitute a nonrecourse liability of the partnership for purposes of this section because LP, a partner, bears the economic risk of loss for that loan within the meaning of § 1.752–2. Instead, the $800,000 loan constitutes a partner nonrecourse debt under paragraph (b)(4) of this section. In the partnership's third taxable year, partnership minimum gain would have increased by $70,000 if the debt were a nonrecourse liability of the partnership. Thus, under paragraph (i)(3) of this section, there is a net increase of $70,000 in the minimum gain attributable to the $800,000 partner nonrecourse debt for the partnership's third taxable year, and $70,000 of the $90,000 depreciation deduction from the building for the partnership's third taxable year constitutes a partner nonrecourse deduction with respect to the debt. See paragraph (i)(4) of this section. Under paragraph (i)(2) of this section, this partner nonrecourse deduction must be allocated to LP, the partner that bears the economic risk of loss for that liability.

(ix) *Nonrecourse debt and partner nonrecourse debt of differing priorities.* As in *Example* 1 (viii) of this paragraph (m), the $800,000 loan is made to the partnership by LP, the limited partner, but the loan is a purchase money loan that "wraps around" a $700,000 underlying nonrecourse note (also secured by the building) issued by LP to an unrelated person in connection with LP's acquisition of the building. Under these circumstances, LP bears the economic risk of loss with respect to only $100,000 of the liability within the meaning of § 1.752–2. See § 1.752–2(f) (*Example* 8). Therefore, for purposes of paragraph (d) of this section, the $800,000 liability is treated as a $700,000 nonrecourse liability of the partnership and a $100,000 partner nonrecourse debt (inferior in priority to the $700,000 liability) of the partnership for which LP bears the economic risk of loss. Under paragraph (i)(2) of this section, $70,000 of the $90,000 depreciation deduction realized in the partnership's third taxable year constitutes a partner nonrecourse deduction that must be allocated to LP.

Example 2. *Netting of increases and decreases in partnership minimum gain.* For *Example* 2 unless otherwise provided, the

VOL 56 ISS 249 DEC 27 1991 UMI

following facts are assumed. X and Y form a general partnership to acquire and operate residential real properties. Each partner contributes $150,000 to the partnership. The partnership obtains a $1,500,000 nonrecourse loan and purchases 3 apartment buildings (on leased land) for $720,000 ("Property A"), $540,000 ("Property B"), and $540,000 ("Property C"). The nonrecourse loan is secured only by the 3 buildings, and no principal payments are due for 5 years. In each of the partnership's first 3 taxable years, it generates rental income of $225,000, operating expenses (including land lease payments) of $60,000, interest expense of $175,000, and depreciation deductions on the 3 properties of $150,000 ($60,000 on Property A and $45,000 on each of Property B and Property C), resulting in a net taxable loss of $150,000 in each of those years. The partnership makes no distributions to X or Y.

(i) *Calculation of net increases and decreases in partnership minimum gain.* If the partnership were to dispose of the 3 apartment buildings in full satisfaction of its nonrecourse liability at the end of its third taxable year, it would realize $150,000 of gain ($1,500,000 amount realized less $1,350,000 adjusted tax basis). Because the amount of partnership minimum gain at the end of that year (and the net increase in partnership minimum gain during that year) is $150,000, the amount of partnership nonrecourse deductions for that year is $150,000, consisting of depreciation deductions allowable with respect to the 3 apartment buildings of $150,000. The result would be the same if the partnership obtained 3 separate nonrecourse loans that were "cross-collateralized" (*i.e.*, if each separate loan were secured by all 3 of the apartment buildings).

(ii) *Netting of increases and decreases in partnership minimum gain when there is a disposition.* At the beginning of the partnership's fourth taxable year, the partnership (with the permission of the nonrecourse lender) disposes of Property A for $835,000 and uses a portion of the proceeds to repay $600,000 of the nonrecourse liability (the principal amount attributable to Property A), reducing the balance to $900,000. As a result of the disposition, the partnership realizes gain of $295,000 ($835,000 amount realized less $540,000 adjusted tax basis). If the disposition is viewed in isolation, the partnership has generated minimum gain of $60,000 on the sale of Property A ($600,000 of debt reduction less $540,000 adjusted tax basis). However, during the partnership's fourth taxable year it also generates rental income of $135,000, operating expenses of $30,000, interest expense of $105,000, and depreciation deductions of $90,000 ($45,000 on each remaining building). If the partnership were to dispose of the remaining two buildings in full satisfaction of its nonrecourse liability at the end of the partnership's fourth taxable year, it would realize gain of $180,000 ($900,000 amount realized less $720,000 aggregate adjusted tax basis), which is the amount of partnership minimum gain at the end of the year. Because the partnership minimum gain increased from $150,000 to $180,000 during the partnership's fourth taxable year, the amount of partnership nonrecourse deductions for that year is $30,000, consisting of a ratable portion of depreciation deductions allowable with respect to the two remaining apartment buildings. No minimum gain chargeback is required for the taxable year, even though the partnership disposed of one of the properties subject to the nonrecourse liability during the year, because there is no net decrease in partnership minimum gain for the year. See paragraph (f)(1) of this section.

Example 3. Nonrecourse deductions and partnership minimum gain before third partner is admitted. For purposes of Example 3, unless otherwise provided, the following facts are assumed. Additional facts are given in each of Examples 3 (ii), (iii), and (iv). A and B form a limited partnership to acquire and lease machinery that is 5-year recovery property. A, the limited partner, and B, the general partner, contribute $100,000 each to the partnership, which obtains an $800,000 nonrecourse loan and purchases the machinery for $1,000,000. The nonrecourse loan is secured only by the machinery. The principal amount of the loan is to be repaid $50,000 per year during each of the partnership's first 5 taxable years, with the remaining $550,000 of unpaid principal due on the first day of the partnership's sixth taxable year. The partnership agreement contains all of the provisions required by paragraph (e) of this section, and, as of the end of each partnership taxable year discussed herein, the items described in § 1.704–1(b)(2)(ii)—(*d*)(*4*), (*5*), and (*6*) are not reasonably expected to cause or increase a deficit balance in A's or B's capital account. The partnership agreement provides that, except as otherwise required by its qualified income offset and minimum gain chargeback provisions, all partnership items will be allocated equally between A and B. Finally, the partnership agreement provides that all distributions, other than distributions in liquidation of the partnership or of a partner's interest in the partnership, will be made equally between A and B. In the partnership's first taxable year it generates rental income of $130,000, interest expense of $80,000, and a depreciation deduction of $150,000, resulting in a net taxable loss of $100,000. In addition, the partnership repays $50,000 of the nonrecourse liability, reducing that liability to $750,000. Allocations of these losses equally between A and B have substantial economic effect.

	A	B
Capital account on formation	$100,000	$100,000
Less: net loss in year 1	(50,000)	(50,000)
Capital account at end of year 1	50,000	50,000

In the partnership's second taxable year, it generates rental income of $130,000, interest expense of $75,000, and a depreciation deduction of $220,000, resulting in a net taxable loss of $165,000. In addition, the partnership repays $50,000 of the nonrecourse liability, reducing that liability to $700,000, and distributes $2,500 of cash to each partner. If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability at the end of that year, it would realize $70,000 of gain ($700,000 amount realized less $630,000 adjusted tax basis). Therefore, the amount of partnership minimum gain at the end of that year (and the net increase in partnership minimum gain during the year) is $70,000, and the amount of partnership nonrecourse deductions for the year is $70,000. The partnership nonrecourse deductions for its second taxable year consist of $70,000 of the depreciation deductions allowable with respect to the machinery. Pursuant to the partnership agreement, all partnership items comprising the net taxable loss of $165,000, including the $70,000 nonrecourse deduction, are allocated equally between A and B. The allocation of these items, other than the nonrecourse deductions, has substantial economic effect.

	A	B
Capital account at end of year 1	$50,000	$50,000
Less: net loss in year 2 (without nonrecourse deductions)	(47,500)	(47,500)
Less: nonrecourse deductions in year 2	(35,000)	(35,000)
Less: distribution	(2,500)	(2,500)
Capital account at end of year 2	(35,000)	(35,000)

(i) *Calculation of nonrecourse deductions and partnership minimum gain.* Because all of the requirements of paragraph (e) of this section are satisfied, the allocation of nonrecourse deductions is deemed to be made in accordance with the partners' interests in the partnership. At the end of the partnership's second taxable year, A's and B's shares of partnership minimum gain are $35,000 each. Therefore, pursuant to paragraph (g)(1) of this section, A and B are treated as obligated to restore deficit balances in their capital accounts of $35,000 each. If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability at the beginning of the partnership's third taxable year (and had no other economic activity in that year), the partnership minimum gain would be decreased from $70,000 to zero. A's and B's shares of that net decrease would be $35,000 each. Upon that disposition, the minimum gain chargeback would require that A and B each be allocated $35,000 of that gain before any other allocation is made under section 704 (b) with respect to partnership items for the partnership's third taxable year.

(ii) *Nonrecourse deductions and restatement of capital accounts.* (a) *Additional facts.* C is admitted to the partnership at the beginning of the partnership's third taxable year. At the time of C's admission, the fair market value of the machinery is $900,000. C contributes $100,000 to the partnership (the partnership invests $95,000 of this in undeveloped land and holds the other $5,000 in cash) in exchange for an interest in the partnership. In connection with C's admission to the partnership, the partnership's machinery is revalued on the partnership's books to reflect its fair market value of $900,000. Pursuant to § 1.704–1(b)(2)(iv)(*f*), the capital accounts of A and B are adjusted upwards to $100,000 each to reflect the revaluation of the partnership's machinery. This adjustment reflects the manner in which the partnership gain of $270,000 ($900,000 fair market value minus $630,000 adjusted tax basis) would be shared if the machinery were sold for its fair market value immediately prior to C's admission to the partnership.

	A	B
Capital account before C's admission	($35,000)	($35,000)
Deemed sale adjustment	135,000	135,000
Capital account adjusted for C's admission	100,000	100,000

The partnership agreement is modified to provide that, except as otherwise required by its qualified income offset and minimum gain chargeback provisions, partnership income, gain, loss, and deduction, as computed for book purposes, are allocated equally among the partners, and those allocations are reflected in the partners' capital accounts. The partnership agreement also is modified to provide that depreciation and gain or loss, as computed for tax purposes, with respect to the machinery will be shared among the partners in a manner that takes account of the variation between the property's $630,000 adjusted tax basis and its $900,000 book value, in accordance with § 1.704–1(b)(2)(iv)(*f*) and the special rule contained in § 1.704–1(b)(4)(i).

(b) *Effect of revaluation.* Because the requirements of § 1.704–1(b)(2)(iv)(*g*) are satisfied, the capital accounts of the partners (as adjusted) continue to be maintained in accordance with § 1.704–1(b)(2)(iv). If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability immediately following the revaluation of the machinery, it would realize no book gain ($700,000 amount realized less $900,000 book value). As a result of the revaluation of the machinery upward by $270,000, under part (i) of paragraph (d)(4) of this section, the partnership minimum gain is reduced from $70,000 immediately prior to the revaluation to zero; but under part (ii) of paragraph (d)(4) of this section, the partnership minimum gain is increased by the $70,000 decrease arising solely from the revaluation. Accordingly, there is no net increase or decrease solely on account of the revaluation, and so no minimum gain chargeback is triggered. All future nonrecourse deductions that occur will be the nonrecourse deductions as calculated for book purposes, and will be charged to all 3 partners in accordance with the partnership agreement. For purposes of determining the partners' shares of minimum gain under paragraph (g) of this section, A and B's shares of the decrease resulting from the revaluation are $35,000 each. However, as illustrated below, under section 704(c) principles, the tax capital accounts of A and B will eventually be charged $35,000 each, reflecting their 50 percent shares of the decrease in partnership minimum gain that resulted from the revaluation.

(iii) *Allocation of nonrecourse deductions following restatement of capital accounts.* (a) *Additional facts.* During the partnership's third taxable year, the partnership generates rental income of $130,000, interest expense of $70,000, a depreciation deduction of $210,000, and a book depreciation deduction (attributable to the machinery) of $300,000. As a result, the partnership has a net taxable loss of $150,000 and a net book loss of $240,000. In addition, the partnership repays $50,000 of the nonrecourse liability (after the data of C's admission), reducing the liability to $850,000 and distributes $5,000 of cash to each partner.

(b) *Allocations.* If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability at the end of the year, $50,000 of book gain would result ($650,000 amount realized less $600,000 book basis). Therefore, the amount of partnership minimum gain at the end of the year is $50,000, which represents a net decrease in partnership minimum gain of $20,000 during the year (This is so even though there would be an increase in partnership minimum gain in the partnership's third taxable year if minimum gain were computed with reference to the adjusted tax basis of the machinery.) Nevertheless, pursuant to paragraph (d)(4) of this section, the amount of nonrecourse deductions of the partnership for its third taxable year is $50,000 (the net increase in partnership minimum gain during the year determined by adding back the $70,000 decrease in partnership minimum gain attributable to the revaluation of the machinery to the $20,000 net decrease in partnership minimum gain during the year). The $50,000 of partnership nonrecourse deductions for the year consist of book depreciation deductions allowable with respect to the machinery of $50,000. Pursuant to the partnership agreement all partnership items comprising the net book loss of $240,000, including the $50,000 nonrecourse deduction, are allocated equally among the partners. The allocation of these items, other than the nonrecourse deductions, has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in § 1.704–1(b)(4)(i), the partnership agreement provides that the depreciation deduction for tax purposes of $210,000 for the partnership's third taxable year is, in accordance with section 704(c) principles, shared $55,000 to A, $55,000 to B, and $100,000 to C.

	A		B		C	
	Tax	Book	Tax	Book	Tax	Book
Capital account at beginning of year 3	(35,000)	$100,000	(35,000)	$100,000	$100,000	$100,000
Less: nonrecourse deductions	(9,166)	(16,666)	(9,166)	(16,666)	(16,666)	(16,666)
Less: items other than nonrecourse deductions in year 3	(25,834)	(63,334)	(25,834)	(63,334)	(63,334)	(63,334)
Less: distribution	(5,000)	(5,000)	(5,000)	(5,000)	(5,000)	(5,000)
Capital account at end of year 3	($75,000)	$15,000	($75,000)	$15,000	$15,000	$15,000

Because the requirements of paragraph (e) of this section are satisfied, the allocation of the nonrecourse deduction is deemed to be made in accordance with the partners' interests in the partnership. At the end of the partnership's third taxable year, A's, B's, and C's shares of partnership minimum gain are $16,666 each.

(iv) *Subsequent allocation of nonrecourse deductions following restatement of capital accounts.* (a) *Additional facts.* The partners' capital accounts at the end of the second and third taxable years of the partnership are as stated in *Example* 3(iii) of this paragraph (m). In addition, during the partnership's fourth taxable year the partnership generates rental income of $130,000, interest expense of $65,000, a tax depreciation deduction of $210,000, and a book depreciation deduction (attributable to the machinery) of $300,000. As a result, the partnership has a net taxable loss of $145,000 and a net book loss of $235,000. In addition, the partnership repays $50,000 of the nonrecourse liability, reducing that liability to $600,000, and distributes $5,000 of cash to each partner.

(b) *Allocations.* If the partnership were to dispose of the machinery in full satisfaction of the nonrecourse liability at the end of the fourth year, $300,000 of book gain would result ($600,000 amount realized less $300,000 book value). Therefore, the amount of partnership minimum gain as of the end of the year is $300,000, which represents a net increase in partnership minimum gain during the year of $250,000. Thus, the amount of partnership nonrecourse deductions for that year equals $250,000, consisting of book depreciation deductions of $250,000. Pursuant to the partnership agreement, all partnership items comprising the net book loss of $235,000, including the $250,000 nonrecourse deduction, are allocated equally among the partners. That allocation of all items, other than the nonrecourse deductions, has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in § 1.704–1(b)(4)(i), the partnership agreement provides that the depreciation deduction for tax purposes of $210,000 in the partnership's fourth taxable year is, in accordance with

VOL 56 ISS 249 DEC 27 1991 UMI

section 704(c) principles, allocated $55,000 to A, $55,000 to B, and $100,000 to C.

	A		B		C	
	Tax	Book	Tax	Book	Tax	Book
Capital account at end year 3	(75,000)	$15,000	(75,000)	$15,000	$15,000	$15,000
Less: nonrecourse deductions	(45,833)	(83,333)	(45,833)	(83,333)	(83,333)	(83,333)
Plus: items other than nonrecourse deduction in year 4	12,499	5,000	12,499	5,000	5,000	5,000
Less: distribution	(5,000)	(5,000)	(5,000)	(5,000)	(5,000)	(5,000)
Capital account at end of year 4	($113,334)	($68,333)	($113,333)	($68,333)	($68,333)	($68,333)

The allocation of the $250,000 nonrecourse deduction equally among A, B, and C satisfies requirement (2) of paragraph (e) of this section. Because all of the requirements of paragraph (e) of this section are satisfied, the allocation is deemed to be in accordance with the partners' interests in the partnership. At the end of the partnership's fourth taxable year A's, B's, and C's shares of partnership minimum gain are $100,000 each.

(v) *Disposition of partnership property following restatement of capital accounts.* (a) *Additional facts.* The partners' capital accounts at the end of the fourth taxable year of the partnership are as stated above in (iv). In addition, at the beginning of the partnership's fifth taxable year it sells the machinery for $650,000 (using $600,000 of the proceeds to repay the nonrecourse liability), resulting in a taxable gain of $440,000 ($650,000 amount realized less $210,000 adjusted tax basis) and a book gain of $350,000 ($650,000 amount realized less $300,000 book basis). The partnership has no other items of income, gain, loss, or deduction for the year.

(b) *Effect of disposition.* As a result of the sale, partnership minimum gain is reduced from $300,000 to zero, reducing A's, B's, and C's shares of partnership minimum gain to zero from $100,000 each. The minimum gain chargeback requires that A, B, and C each be allocated $100,000 of that gain (an amount equal to each partner's share of the net decrease in partnership minimum gain resulting from the sale) before any allocation is made to them under section 704(b) with respect to partnership items for the partnership's fifth taxable year. Thus, the allocation of the first $300,000 of book gain $100,000 to each of the partners is deemed to be in accordance with the partners' interests in the partnership under paragraph (e) of this section. The allocation of the remaining $50,000 of book gain equally among the partners has substantial economic effect. Consistent with the special partners' interests in the partnership rule contained in § 1.704–1(b)(4)(i), the partnership agreement provides that the $440,000 taxable gain is, in accordance with section 704(c) principles, allocated $161,667 to A, $161,667 to B, and $116,666 to C.

	A		B		C	
	Tax	Book	Tax	Book	Tax	Book
Capital account at end of year 4	($113,334)	($68,333)	($113,334)	($68,333)	($68,333)	($68,333)
Plus: minimum gain chargeback	138,573	100,000	138,573	100,000	100,000	100,000
Plus: additional gain	23,094	16,666	23,094	16,666	16,666	16,666
Capital account before liquidation	$48,333	$48,333	$48,333	$48,333	$48,333	$48,333

Example (4). *Allocations of increase in partnership minimum gain among partnership properties.* For *Example* 4, unless otherwise provided, the following facts are assumed. A partnership owns 4 properties, each of which is subject to a nonrecourse liability of the partnership. During a taxable year of the partnership, the following events take place. First, the partnership generates a depreciation deduction (for both book and tax purposes) with respect to Property W of $10,000 and repays $5,000 of the nonrecourse liability secured only by that property, resulting in an increase in minimum gain with respect to that liability of $5,000. Second, the partnership generates a depreciation deduction (for both book and tax purposes) with respect to Property X of $10,000 and repays none of the nonrecourse liability secured by that property, resulting in an increase in minimum gain with respect to that liability of $10,000. Third, the partnership generates a depreciation deduction (for both book and tax purposes) of $2,000 with respect to Property Y and repays $11,000 of the nonrecourse liability secured only by that property, resulting in a decrease in minimum gain with respect to that liability of $9,000 (although at the end of that year, there remains minimum gain with respect to that liability). Finally, the partnership borrows $5,000 on a nonrecourse basis, giving as the only security for that liability Property Z, a parcel of undeveloped land with an adjusted tax basis (and book value) of $2,000, resulting in a net increase in minimum gain with respect to that liability of $3,000.

(i) *Allocation of increase in partnership minimum gain.* The net increase in partnership minimum gain during that partnership taxable year is $9,000, so that the amount of nonrecourse deductions of the partnership for that taxable year is $9,000. Those nonrecourse deductions consist of $3,000 of depreciation deductions with respect to Property W and $6,000 of depreciation deductions with respect to Property X. See paragraph (c) of this section. The amount of nonrecourse deductions consisting of depreciation deductions is determined as follows. With respect to the nonrecourse liability secured by Property Z, for which there is no depreciation deduction, the amount of depreciation deductions that constitutes nonrecourse deductions is zero. Similarly, with respect to the nonrecourse liability secured by Property Y, for which there is no increase in minimum gain, the amount of depreciation deductions that constitutes nonrecourse deductions is zero. With respect to each of the nonrecourse liabilities secured by Properties W and X, which are secured by property for which there are depreciation deductions and for which there is an increase in minimum gain, the amount of depreciation deductions that constitutes nonrecourse deductions is determined by the following formula:

net increase in partnership minimum gain × total depreciation deductions on the specific property securing the nonrecoure liability, to the extent of the minimum gain on that liability ÷ total depreciation deductions on all properties securing nonrecourse liabilities with minimum gain, to the extent of the aggregate increase in minimum gain on all those liabilities

Thus, for the liability secured by Property W, the amount is $9,000 times $5,000/$15,000, or $3,000. For the liability secured by Property X, the amount is $9,000 times $10,000/$15,000, or $6,000. (If one depreciable property secured two partnership nonrecourse liabilities, the amount of depreciation or book depreciation with respect to that property would be allocated among those liabilities in accordance with the method by which adjusted basis is allocated under paragraph (d)(2) of this section).

(ii) *Alternative allocation of increase in partnership minimum gain among partnership properties.* Assume instead that the loan secured by Property Z is $15,000 (rather than $5,000), resulting in a net increase in minimum gain with respect to that liability of $13,000. Thus, the net increase in partnership minimum gain is $19,000, and the amount of nonrecourse deductions of the partnership for that taxable year is $19,000. Those nonrecourse deductions consist of $5,000 of depreciation deductions with respect to Property W, $10,000 of depreciation deductions with respect to Property X, and a pro rata portion of the partnership's other items of deduction, loss, and section 705(a)(2)(B) expenditure for that year. The method for computing the amounts of depreciation deductions that constitute nonrecourse deductions is the same as in (i) of this *Example* 4 for the liabilities secured by Properties Y and Z. With respect to each of the nonrecourse liabilities secured by Properties W and X, the amount of depreciation deductions that constitutes nonrecourse deductions equals the total depreciation deductions with respect to the partnership property securing that particular liability to the extent of the increase in minimum gain with respect to that liability.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 11. The authority for part 602 continues to read as follows:

Authority: [28 U.S.C. 7805].

§ 602.101 [Amended]

Par. 12. Section 602.101(c) is amended by removing the citation "1.704–1T * * * 1545–1090" and adding the following citation to read as follows:

"1.704–2 * * * 1545–1090.

Disclosure of Tax Return Information for Purposes of Quality or Peer Reviews; Due to Incapacity or Death of Tax Return Preparer

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations § 301.7216–2(o) prescribing the circumstances under which tax return information may be disclosed for purposes of conducting quality or peer reviews. These regulations are necessary to provide tax return preparers with the guidance needed to comply with changes to the applicable law made by the Omnibus Budget Reconciliation Act of 1989. This document also contains final regulations § 301.7216–2(p) regarding disclosures necessitated by a tax return preparer's incapacity or death.

EFFECTIVE DATE: These regulations are effective on December 28, 1990.

FOR FURTHER INFORMATION CONTACT: David L. Meyer, Office of the Assistant Chief Counsel (Income Tax and Accounting), Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224 (Attention: CC:CORP:T:R), or by telephone at 202–566–5985 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in these regulations has been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1980, (44 U.S.C. 3504(h)), under control number 1545–1209. The estimated annual burden per recordkeeper varies from 15 minutes to 2 hours, depending on individual circumstances, with an estimated average of 1 hour.

These estimates are an approximation of the average time expected to be necessary for a collection of information. They are based on such information as is available to the Internal Revenue Service. Individual recordkeepers may require greater or less time, depending on their particular circumstances.

Comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Internal Revenue Service, Attn: IRS Reports Clearance Officer T:FP, Washington, DC 20224, with copies to the Office of Management and Budget, Attention: Desk Officer for the Department of Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503.

Background

These regulations were published in temporary and proposed form in the **Federal Register** on December 28, 1990 (55 FR 53295, 55 FR 53313). This document adds rules under section 7216(b)(3) of the Internal Revenue Code of 1986 to the Regulations on Procedure and Administration (26 CFR part 301). A number of comments were received in response to the notice of proposed rulemaking. A public hearing was held on June 3, 1991. After consideration of the public comments received, the regulations are adopted as revised by this Treasury decision.

Explanation of Provisions

The explanation contained in the preamble to the temporary regulations applies equally to the final regulations except as described below.

The temporary regulations define a quality or peer review as a review that is undertaken to evaluate, monitor, and improve the quality and accuracy of a tax return preparer's tax preparation services. Some commentators suggested that the definition is too broad and might defeat the statutory purpose of maintaining the confidentiality of tax return information. Other commentators suggested that this definition is too restrictive. They noted that some preparers must undergo a review of their auditing and accounting services to satisfy government concerns. While these reviews are only incidentally related to tax return preparation, tax return information sometimes must be disclosed to properly complete the review. The commentators are concerned that the definition in the temporary regulations will not allow these reviews to be accomplished.

The final regulations slightly expand the definition of a quality or peer review to include accounting and auditing services. It is believed that concerns about unauthorized disclosures or uses of tax return information are adequately addressed by the safeguards contained in the regulations together with the criminal and civil penalties of sections 7216(a) and 6713 of the Code. The safeguards contained in the regulations include: (a) Limiting the scope of reviews to address only tax return preparation, accounting, and auditing services; (b) requiring that any taxpayer identifying information be excised from any final evaluative reports that may be accessible to anyone other than the reviewer or the preparer being reviewed; (c) treating any person who obtains tax return information in the course of a review as a tax return preparer for purposes of sections 7216(a) and 6713(a) of the Code; and (d) limiting those who may conduct reviews to persons who are subject to the provisions of Treasury Department Circular 230 ("Circular 230").

Persons permitted to conduct quality or peer reviews under the tamporary regulations (i.e. persons subject to Circular 230) are attorneys, certified public accountants, enrolled agents, and enrolled actuaries who are not under suspension or disbarment from practice before the Service. Some commentators suggested that the classes of persons permitted to conduct a quality or peer review be expanded to include non-

VOL 56 ISS 249 DEC 27 1991 UMI

certified, licensed public accountants ("LPAs") who are neither enrolled agents, nor otherwise eligible to practice before the Service. Unenrolled LPAs are not subject to the provisions of Circular 230. The Service believes that permitting only persons subject to Circular 230 to conduct a quality or peer review helps to prevent unauthorized disclosures of tax return information. Accordingly, the final regulations do not adopt this suggestion.

Finally, some commentators suggested that the temporary regulations should be revised to permit franchisees to disclose tax return information to their franchisor for purposes that are unrelated to a quality or peer review. Along similar lines, one commentator suggested that a franchisor's employees who are not eligible to practice before the Service should nonetheless be permitted to conduct quality or peer reviews. Neither suggestion was adopted. The first suggestion raised concerns that were not within the scope of these regulations. The second suggestion would not further the statutory purpose of maintaining the confidentiality of tax return information.

Special Analyses

These rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. Although this Treasury decision was preceded by a notice of proposed rulemaking that solicited public comments, the notice was not required by 5 U.S.C. 553 since the regulations proposed in that notice and adopted by this Treasury decision are interpretive. Therefore, a final Regulatory Impact Analysis is not required by the Regulatory Flexibility Act (5 U.S.C. chapter 6). Pursuant to section 7805(f) of the Internal Revenue Code, a copy of the temporary and proposed regulations was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Drafting Information

The principal author of these regulations is David L. Meyer, Office of Assistant Chief Counsel, Income Tax and Accounting, Internal Revenue Service. However, personnel from other offices of the IRS and Treasury Department participated in their development.

List of Subjects

26 CFR Part 301

Administrative practice and procedure, Alimony, Bankruptcy, Child support, Continental shelf, Courts, Crime, Disclosure of information, Employment taxes, Estate taxes, Excise taxes, Filing requirements, Gift tax, Income taxes, Investigations, Law enforcement, Oil pollution, Penalties, Pensions, Reporting and recordkeeping requirements, Statistics, Taxes.

26 CFR Part 602

Reporting and recordkeeping requirements.

Amendments to the Regulations

For the reasons set forth in the preamble, 26 CFR parts 301 and 602 are amended as follows.

PART 301—PROCEDURE AND ADMINISTRATION

Paragraph 1. The authority for part 301 is amended by adding the following citation to read:

Authority: Sec. 7805, I.R.C. 1954; 68A Stat. 917; 26 U.S.C. 7805 * * * Section 301.7216–2, paragraphs (o) and (p) also issued under 26 U.S.C. 7216(b)(3).

Par. 2. The authority citation located at the end of § 301.7216–2 is removed and § 301.7216–2 is amended by adding paragraphs (o) and (p) to read as follows:

§ 301.7216–2 Disclosure or use without formal consent of taxpayer.

* * * * *

(o) *Disclosure or use of information for quality or peer reviews.* The provisions of section 7216(a) and § 301.7216–1 do not apply to any disclosure of tax return information permitted by this paragraph (o) made after December 28, 1990. Tax return information may be disclosed for the purpose of a quality or peer review to the extent necessary to accomplish the review. A quality or peer review is a review that is undertaken to evaluate, monitor, and improve the quality and accuracy of a tax return preparer's tax preparation, accounting, or auditing services. A quality or peer review may be conducted only by attorneys, certified public accountants, enrolled agents, and enrolled actuaries who are eligible to practice before the Internal Review Service. See Department of the Treasury Circular 230, 31 CFR part 10. Disclosure of tax return information is also authorized to persons who provide administrative or support services to an individual who is conducting a quality or peer review under this paragraph (o), but only to the extent necessary for the reviewer to conduct the review. Tax return information gathered in conducting a review may be used only for purposes of a review. No tax return information identifying a taxpayer may be disclosed in any evaluative reports or recommendations that may be accessible to any person other than the reviewer or the preparer being reviewed. The preparer being reviewed shall maintain a record of the review including the information reviewed and the identity of the persons conducting the review. After completion of the review, no documents containing information that may identify any taxpayer by name or identification number may be retained by a reviewer or by the reviewer's administrative or support personnel. Any person (including administrative and support personnel) receiving tax return information in connection with a quality or peer review is a tax return preparer for purposes of sections 7216(a) and 6713(a).

(p) *Disclosure of tax return information due to a tax return preparer's incapacity or death.* The provisions of section 7216(a) and § 301.7216–1 do not apply to any disclosure of tax return information permitted by this paragraph (p) made after December 28, 1990. In the event of incapacity or death of a tax return preparer, disclosure of tax return information may be made for the purpose of assisting the tax return preparer or his legal representative (or the representative of a deceased preparer's estate) in operating the business. Any person receiving tax return information under the provisions of this paragraph (p) is a tax return preparer for purposes of sections 7216(a) and 6713(a).

Par. 3. Section 301.7216–2T is removed.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

Par. 4. The authority for part 602 continues to read as follows:

Authority: (26 U.S.C. 7805).

Par. 5. The table of OMB Control Numbers in § 602.101 is amended by revising the entry in the table for "§ 301.7216–2T" to read as follows:

"§ 301.7216–2(o) * * * 1545–1209".

Fred T. Goldberg, Jr.,

Commissioner of Internal Revenue.

Approved: December 5, 1991.

Kenneth W. Gideon,

Assistant Secretary of the Treasury.

BILLING CODE 4830–01–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 261

[SW–FRL–4088–1]

Hazardous Waste Management System; Identification and Listing of Hazardous Waste; Final Amendment to an Exclusion

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA or Agency) today is finalizing a proposed amendment to an exclusion previously granted, in March 11, 1988, in response to a petition submitted for the EPA Mobile Incineration System (MIS) in McDowell, Missouri. This exclusion applied to certain wastes that were to be generated by the MIS during the incineration of cancelled 2,4,5-T and Silvex pesticide products. In amending the March 1988 exclusion, the Agency is transferring the exclusion to wastes to be generated by a different incinerator that is owned and operated by Aptus, Incorporated, located in Coffeyville, Kansas. This action responds to a delisting petition submitted under 40 CFR 260.20, which allows any person to petition the Administrator to modify or revoke any provision of parts 260 through 265 and 268 of title 40 of the Code of Federal Regulations, and under 40 CFR 260.22, which specifically provides generators the opportunity to petition the Administrator to exclude a waste on a "generator-specific" basis from the hazardous waste lists.

EFFECTIVE DATE: December 27, 1991.

ADDRESSES: The public docket for this final rule is located at the U.S. Environmental Protection Agency, 401 M Street, SW. (room M2427), Washington, DC 20460, and is available for viewing from 9 a.m. to 4 p.m., Monday through Friday, excluding Federal holidays. Call (202) 260–9327 for appointments. The reference number for this docket is "F–91–CPAF–FFFFF". The public may copy material from any regulatory docket at a cost of $0.15 per page.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Hotline, toll free at (800) 424–9346, or at (703) 920–9810. For technical information concerning this rule, contact Robert Kayser, Office of Solid Waste (OS–333), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460, (202) 260–2224.

SUPPLEMENTARY INFORMATION:

I. Background

A. Authority

Under 40 CFR 260.20 and 260.22, facilities may petition the Agency to remove their wastes from hazardous waste control by excluding them from the lists of hazardous wastes contained at 40 CFR 261.31 and 261.32. Petitioners must provide sufficient information to EPA to allow the Agency to determine that: (1) The waste to be excluded is not hazardous based upon the criteria for which it was listed, and (2) no other hazardous constituents or factors that could cause the waste to be hazardous are present in the waste at levels of regulatory concern.

B. History of this Rulemaking

In February 1979, the Administrator issued emergency suspension orders and notices of intent to cancel the registration for a number of uses of the pesticides 2,4,5-T and Silvex. Among the products affected by the Administrator's actions were certain 2,4,5-T and Silvex products registered by Union Carbide Corporation. Union Carbide's 2,4,5-T and Silvex registrations were finally cancelled in November 1984. Pursuant to section 19 of FIFRA (prior to its amendment in 1988), upon request, EPA was required to accept for safe disposal Union Carbide's existing stocks of suspended and cancelled 2,4,5-T and Silvex. EPA later accepted title to the cancelled 2,4,5-T and Silvex pesticides stored at the Byers Warehouse in St. Joseph, Missouri.

The Agency originally planned to incinerate these wastes in the EPA Mobile Incineration System (MIS) and, as such, the EPA Releases Control Branch (RCB), Office of Research and Development, submitted a petition and received an exclusion from the lists of hazardous wastes contained in 40 CFR 261.31 and 261.32 for the wastes that would have been generated by the MIS (see 53 FR 31, January 4, 1988, and 53 FR 7903, March 11, 1988). RCB's petition was for an "upfront" exclusion, an exclusion conditioned upon testing the MIS residues, once generated, to ensure that levels of hazardous constituents would not present a threat to human health and the environment.

EPA applied to the state of Missouri for a permit modification to allow the incineration of the cancelled pesticides to proceed. However, the modification was not obtained and the Agency has since dismantled the MIS. The Agency's Superfund contractor entered into a contract with Aptus, Incorporated, to incinerate the same stockpiles of wastes identified in the MIS exclusion.

Aptus petitioned the Agency to amend the MIS exclusion so that the incineration of the cancelled pesticide materials can occur in its own state-of-the-art incinerator located in Coffeyville, Kansas. After evaluating the petition, EPA proposed, on October 25, 1991, to transfer the March 1988 MIS exclusion to wastes that will be generated from Aptus' state-of-the-art incinerator (see 56 FR 55257, October 25, 1991).

This rulemaking addresses public comments received on the proposal and finalizes the proposed decision to amend the March 1988 MIS exclusion and to transfer the exclusion to Aptus, Incorporated.

II. Disposition of Delisting Petition

A. Aptus, Incorporated, Coffeyville, Kansas

1. Petition to Amend 40 CFR Part 261, Appendix IX

Aptus, Incorporated (Aptus), located in Coffeyville, Kansas, is a hazardous waste treatment facility, with a permit under RCRA to store hazardous waste materials. Upon successful completion of a trial burn, Aptus will also have a fully effective permit to incinerate hazardous waste. Aptus petitioned the Agency to amend the March 11, 1988, exclusion previously granted in response to a petition submitted for the EPA MIS in McDowell, Missouri. The MIS exclusion applied to wastes that were to be generated during the incineration of dioxin-contaminated pesticides, listed as hazardous pursuant to 40 CFR 261.3(c)(2)(i). The pesticides, which include 2,4,5-T and Silvex, are presently listed as EPA Hazardous Waste No. F027—Discarded unused formulations containing tri-, tetra-, or pentachlorophenol or discarded unused formulations containing compounds derived from these chlorophenols. The listed constituents of concern for EPA Hazardous Waste No. F027 are tetra-, penta-, and hexachlorodibenzo-p-dioxins; tetra-, penta-, and hexachlordibenzofurans; and tri-, tetra-, and pentachlorophenols and their chlorophenoxy derivative acids, esters, ethers, amines, and other salts (see 40 CFR part 261, appendix VII).

In its petition, Aptus requested that the Agency amend the MIS exclusion so that the incineration of the cancelled pesticide materials can occur in its own, state-of-the-art incinerator located in Coffeyville, Kansas. Aptus also requested that the applicable verification testing requirements, which would have allowed for delisting of incineration residues from the MIS,

VOL 56 ISS 249 DEC 27 1991 UMI

continue to apply to the incineration residues generated from its facility. Aptus intends to incinerate the same materials that were covered by the original 1988 exclusion.

In support of its petition, Aptus provided detailed descriptions of its incinerator. Aptus also requested that the Agency rely on petition information submitted for the MIS, in particular, descriptions of the pesticide materials to be incinerated, product specification and material safety data sheets of the pesticides, and the analyses for hazardous constituents completed for the major liquid and solid products.

The Agency reviewed the information submitted by Aptus and based on an assessment of the information provided regarding design and performance capabilities of the incineration system, the Agency believes that the Aptus incinerator is at least as capable as the MIS of generating non-hazardous waste residues from incineration of the pesticide materials. See the RCRA public docket for the proposed amendment for a complete description of each incineration system. EPA proposed to transfer the delisting levels and verification testing requirements developed in 1988 for these wastes with only a few modifications. EPA proposed to lower the delisting level for nickel based on the use of a newer model and health-based level. EPA also proposed to modify several details in the monitoring and testing requirements so that it can continue to verify whether or not the residues from the incinerator meet the delisting levels. EPA is retaining these modifications in today's final rule. For further information on the proposal, see the October 25, 1991 notice.

2. Agency Response to Public Comments

The Agency received comments on the proposed amendment from two interested parties. One commenter supported the Agency's proposed amendment, but felt that the exclusion should not be limited to those materials stored in Byers Warehouse in St. Joseph, Missouri. The commenter believed that the proposed amendment should be applicable to all materials of this type currently held by individuals, private business or governmental bodies.

In response, the Agency notes that the proposed amendment resulted from a delisting petition submitted by Aptus. In its petition, Aptus requested that the Agency amend a previously granted (March 11, 1988) exclusion for wastes that were to be generated by incineration of cancelled pesticide materials stored in Byers Warehouse, using the EPA MIS, so that this exclusion would apply to wastes to be generated from the same materials in its own state-of-the-art incinerator located in Coffeyville, Kansas. Therefore, since the MIS exclusion was limited to only wastes that were to be generated during the incineration of cancelled pesticide materials stored in Byers Warehouse, the proposed amendment also only covered the wastes to be generated from these same materials.

Additionally, before the Agency could consider excluding other similar waste materials, the Agency would require submission of a separate petition which includes waste characterization data (e.g., constituents of concern and their levels in the waste) and waste volume information. Without this information, the Agency cannot determine whether incineration can effectively treat the waste materials and, if treatment is possible, what testing requirements and delisting levels would be appropriate. For example, a waste with higher levels of metals may not be effectively treated by incineration.

The other commenter raised a number of issues concerning the permitting of the incinerator, as well as several concerning the delisting, and requested a public hearing on the proposed amendment. The Agency decided that the issues raised by this commenter did not warrant a public hearing for two reasons. First, many of the issues raised concerned the entirely separate proceedings that led to the decision made by EPA and the State of Kansas to issue the incineration permit to the Aptus facility. Second, the Agency did not require oral presentations in a hearing to respond to the issues that did relate to the proposed delisting. While the Agency provided a written response to the commenter, the specific issues of concern to the commenter and the Agency's responses are also provided below.

The commenter expressed concern that "EPA is proposing to transfer a permit to incinerate hazardous waste and the related delisting without a public hearing." The commenter suggested that EPA was somehow taking a "shortcut" in the proper procedures, and argued that EPA should not "transfer" the permit and delisting to an incinerator at a different location without a hearing for the residents of Kansas.

In response to the above concern over the "transfer" of a permit without a hearing, the Agency would like to point out that permits and delistings address separate issues and are subject to separate procedural requirements. The permit will authorize Aptus to incinerate hazardous wastes under RCRA once the facility completes a successful trial burn. EPA and the State of Kansas issued a permit to Aptus in June of this year only after two public hearings; one prior to the first trial burn in 1989, and a more recent one in June of this year. These hearings were the proper forum for public comments on the decision to allow Aptus to incinerate hazardous wastes, including dioxin wastes, and EPA Region VII and the State of Kansas considered all comments received before issuing the permit.

In a delisting determination, EPA decides whether a particular hazardous waste presents so little risk to human health and the environment that it can be "reclassified" as a nonhazardous waste. Delistings are accomplished through a petition process that requires publication of proposed decisions in the Federal Register. While public hearings are an option, delistings rarely present issues that cannot be addressed adequately through written comments and responses. In fact, although EPA has taken final action on over 200 delisting petitions, it has not found it necessary to hold a hearing for any of them. As noted in the proposed rule, EPA believes that the Aptus incinerator will be at least as effective as the MIS in rendering the waste nonhazardous. Therefore, the proposal to transfer the delisting was justified and was consistent with the facility-specific nature of delisting.

The commenter also stated that the Aptus incinerator had failed its first trial burn, and noted that Missouri did not allow the incineration of the pesticide materials to proceed in the MIS. While these issues are outside the scope of the delisting decision, the Agency provides the following responses.

First, Aptus must complete a trial burn and meet the special standards for dioxin waste before it can incinerate the cancelled pesticide materials. The performance standards that an incinerator must meet in order to treat dioxin wastes are very stringent. Specifically, Aptus must demonstrate 99.9999% destruction and removal efficiency for hazardous constituents that are more difficult to incinerate than the key dioxin compound (TCDD). Second, Missouri did not extend the permit for the MIS in 1988, which would have allowed the cancelled pesticides to be incinerated, due to a prior understanding between Missouri and EPA concerning the limitations placed on the time period the MIS could operate, and the wastes it could treat (see letter from Ron Kucera to John Farlow, January 3, 1990, in the public docket for this notice). The MIS had successfully treated a fairly large volume of dioxin-contaminated materials, and Missouri did not raise any technical reason in denying the permit modification. In any case, Kansas and EPA have fully evaluated the Aptus incinerator and approved the permit for the incineration of dioxin wastes (upon completion of a fully successful trial burn).

In comments related to delisting, the commenter suggested that the ultimate disposal site for the delisted residues should be specified, and indicated that Missouri would not allow disposal of the delisted materials at any of its permitted facilities.

EPA has never specifically designated a disposal site for a delisted waste. In evaluating the ultimate disposal of the delisted waste, EPA assumed a reasonable worst-case disposal in a Subtitle D landfill without any modern engineering barriers. Therefore, EPA believes that the waste, if delisted, may be safely disposed at any typical solid waste landfill. It should also be noted that the delisting is conditional, and would require Aptus to test the residues to ensure that the delisting levels are achieved. EPA has no knowledge that Missouri has refused to allow disposal of delisted residues; however, landfills typically have the option to restrict the wastes they choose to accept. If the residues are delisted, Aptus still must dispose of the residues according to the state regulations for nonhazardous solid waste. In the past, Aptus has chosen to dispose of nonhazardous waste from the incineration of polychlorinated biphenyls (PCBs) in a commercial hazardous waste landfill, and Aptus may decide to dispose of the delisted residues in a similar fashion.

Finally, the commenter stated that a hearing should also be held to determine the justification for allowing the delisting amendment to become effective immediately, rather than after the six month delay typical for RCRA regulations.

EPA proposed to make the delisting effective immediately upon final promulgation under section 3010(b)(1) of RCRA, because the regulated community (*i.e.*, Aptus) does not need the usual six months to come into compliance. Delaying the effective date of a decision to delist these wastes would continue to impose hazardous waste management requirements on residues that EPA has determined were not hazardous. Setting the effective date on the date of publication is standard practice for delistings granted in the past, and does not represent any special exception for the Aptus delisting.

3. Final Agency Decision

For the reasons stated in the proposal and described above, the Agency believes that the wastes to be generated by the incineration of the Byers Warehouse materials in Aptus' incinerator should be excluded from hazardous waste control. The Agency, therefore, is granting a final exclusion to Aptus, Incorporated, located in Coffeyville, Kansas, for its incineration residues described in its petition as EPA Hazardous Waste No. F027.

The exclusion only applies to the kiln residue and spray dryer/baghouse residue generated during the treatment of the cancelled pesticide materials stored in Byers Warehouse. The facility would require a new exclusion if the treatment process is significantly altered, or if other materials are incinerated with the cancelled pesticides, and accordingly, would need to file a new petition. The facility must treat such wastes generated from significantly altered processes (or from co-incineration of other materials) as hazardous until a new exclusion is granted. The separate incineration of any other hazardous waste would also require a new petition for the residues to be nonhazardous.

Although the management of the wastes covered by this petition is relieved from RCRA subtitle C jurisdiction, the generator of a delisted waste must either treat, store, or dispose of the waste in an on-site facility, or ensure that the waste is delivered to an off-site storage, treatment, or disposal facility, either of which is permitted, licensed, or registered by a State to manage municipal or industrial solid waste. Alternatively, a delisted waste may be delivered to a facility which beneficially uses or reuses, or legitimately recycles or reclaims the waste, or treats the waste prior to such beneficial use, reuse, recycling, or reclamation.

III. Limited Effect of Federal Exclusion

The final exclusion being granted today is being issued under the Federal (RCRA) delisting program. States, however, are allowed to impose their own, non-RCRA regulatory requirements that are more stringent than EPA's, pursuant to section 3009 of RCRA. These more stringent requirements may include a provision which prohibits a federally-issued exclusion from taking effect in the State. Because a petitioner's waste may be regulated under a dual system (i.e., both Federal (RCRA) and State (non-RCRA) programs), petitioners are urged to contact their State regulatory authority to determine the current status of their wastes under the State law.

IV. Effective Date

This rule is effective December 27, 1991. The Hazardous and Solid Waste Amendments of 1984 amended section 3010 of RCRA to allow rules to become effective in less than six months when the regulated community does not need the six-month period to come into compliance. That is the case here because this rule reduces, rather than increases, the existing requirements for persons generating hazardous wastes. In light of the unnecessary hardship and expense that would be imposed on this petitioner by an effective date six months after promulgation and the fact that a six-month deadline is not necessary to achieve the purpose of section 3010, EPA believes that this exclusion should be effective immediately upon promulgation. These reasons also provide a basis for making this rule effective immediately under the Administrative Procedures Act, pursuant to 5 U.S.C. 553(d).

V. Regulatory Impact

Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This amendment to a previously granted exclusion is not major since its effect reduces the overall costs and economic impact of EPA's hazardous waste management regulations. This reduction is achieved by excluding wastes generated at a specific facility from EPA's lists of hazardous wastes, thereby enabling the facility to treat its wastes as non-hazardous. There is no additional economic impact, therefore, due to today's rule. This rule is not a major regulation, therefore, no Regulatory Impact Analysis is required.

VI. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act, 5 U.S.C. 601–612, whenever an agency is required to publish a general notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis, which describes the impact of the rule on small entities (i.e., small businesses, small organizations, and small governmental jurisdictions). The Administrator or delegated representative may certify, however, that the rule will not have a significant economic impact on a substantial number of small entities.

This amendment will not have an adverse economic impact on small

VOL 56 ISS 249 DEC 27 1991 UMI

entities since its effect will be to reduce the overall costs of EPA's hazardous waste regulations and is limited to one facility. Accordingly, I hereby certify that this regulation will not have a significant economic impact on a substantial number of small entities. This regulation, therefore, does not require a regulatory flexibility analysis.

VII. Paperwork Reduction Act

Information collection and recordkeeping requirements associated with this final rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511, 44 U.S.C. 3501 *et seq.*) and have been assigned OMB Control Number 2050-0053.

VIII. List of Subjects in 40 CFR Part 261

Hazardous waste, Recycling, and Reporting and recordkeeping requirements.

Dated: December 20, 1991.

Jeffrey D. Denit,

Deputy Director, Office of Solid Waste.

For the reasons set out in the preamble, 40 CFR part 261 is amended as follows:

PART 261—IDENTIFICATION AND LISTING OF HAZARDOUS WASTE

1. The authority citation for part 261 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6921, 6922, and 6938.

2. In table 1 of appendix IX to part 261 the entry "EPA's Mobile Incineration System (MIS), McDowell, MO," is revised to read as follows:

Appendix IX—Wastes Excluded Under §§ 260.20 and 260.22

TABLE 1.—WASTES EXCLUDED FROM NONSPECIFIC SOURCES

Facility and address	Waste description
Aptus, Inc., Coffeyville, Kansas.	Kiln residue and spray dryer/baghouse residue (EPA Hazardous Waste No. F027) generated during the treatment of cancelled pesticides containing 2,4,5-T and Silvex and related materials by Aptus' incinerator at Coffeyville, Kansas after December 27, 1991, so long as: (1) The incinerator is monitored continuously and is in compliance with operating permit conditions. Should the incinerator fail to comply with the permit conditions relevant to the mechanical operation of the incinerator, Aptus must test the residues generated during the run when the failure occurred according to the requirements of Conditions (2) through (4), regardless of whether or not the demonstration in Condition (5) has been made. (2) A minimum of four grab samples must be taken from each hopper (or other container) of kiln residue generated during each 24 hour run; all grabs collected during a given 24 hour run must then be composited to form one composite sample. A minimum of four grab samples must also be taken from each hopper (or other container) of spray dryer/baghouse residue generated during each 24 hour run; all grabs collected during a given 24 hour run must then be composited to form one composite sample. Prior to the disposal of the residues from each 24 hour run, a TCLP leachate test must be performed on these composite samples and the leachate analyzed for the TC toxic metals, nickel, and cyanide. If arsenic, chromium, lead or silver TC leachate test results exceed 1.6 ppm, barium levels exceed 32 ppm, cadmium or selenium levels exceed 0.3 ppm, mercury levels exceed 0.07 ppm, nickel levels exceed 10 ppm, or cyanide levels exceed 6.5 ppm, the wastes must be retreated to achieve these levels or must be disposed in accordance with Subtitle C of RCRA. Analyses must be performed according to SW-846 methodologies. (3) Aptus must generate, prior to the disposal of the residues, verification data from each 24 hour run for each treatment residue (i.e., kiln residue, spray dryer/baghouse residue) to demonstrate that the maximum allowable treatment residue concentrations listed below are not exceeded. Samples must be collected as specified in Condition (2). Analyses must be performed according to SW-846 methodologies. Any residues which exceed any of the levels listed below must be retreated or must be disposed of as hazardous. Kiln residue and spray dryer/baghouse residue must not exceed the following levels: Aldrin ..... 0.015 ppm Benzene ..... 9.7 ppm Benzo(a)pyrene ..... 0.43 ppm Benzo(b)fluoranthene ..... 1.8 ppm Chlordane ..... 0.37 ppm Chloroform ..... 5.4 ppm Chrysene ..... 170 ppm Dibenz(a,h)anthracene ..... 0.083 ppm 1,2-Dichloroethane ..... 4.1 ppm Dichloromethane ..... 2.4 ppm 2,4-Dichlorophenol ..... 480 ppm Dichlorvos ..... 260 ppm Disulfaton ..... 23 ppm Endosulfan I ..... 310 ppm Fluorene ..... 120 ppm Indeno(1,2,3,cd)-pyrene ..... 330 ppm Methyl parathion ..... 210 ppm Nitrosodiphenylamine ..... 130 ppm Phenanthrene ..... 150 ppm Polychlorinated biphenyls ..... 0.31 ppm Tetrachloroethylene ..... 59 ppm 2,4,5-TP (silvex) ..... 110 ppm 2,4,6-Trichlorophenol ..... 3.9 ppm

(4) Aptus must generate, prior to disposal of residues, verification data from each 24 hour run for each treatment residue (*i.e.*, kiln residue, spray dryer/baghouse residue) to demonstrate that the residues do not contain tetra-, penta-, or hexachlorodibenzo-p-dioxins or furans at levels of regulatory concern. Samples must be collected as specified in Condition (2). The TCDD equivalent levels for the solid residues must be less than 5 ppt. Any residues with detected dioxins or furans in excess of this level must be retreated or must be disposed of as acutely hazardous. SW-846 Method 8290, a high resolution gas chromatography and high resolution mass spectroscopy (HRGC/HRMS) analytical method must be used. For tetra- and penta-chlorinated dioxin and furan homologs, the maximum practical quantitation limit must not exceed 15 ppt for the solid residues. For hexachlorinated dioxin and furan homologs, the maximum practical quantitation limit must not exceed 37 ppt for the solid residues.
(5) The test data from Conditions (1), (2), (3), and (4) must be kept on file by Aptus for inspection purposes and must be compiled, summarized, and submitted to the Director for the Characterization and Assessment Division, Office of Solid Waste, by certified mail on a monthly basis and when the treatment of the cancelled pesticides and related materials is concluded. The testing requirements for Conditions (2), (3), and (4) will continue until Aptus provides the Director with the results of four consecutive batch analyses for the petitioned wastes, none of which exceed the maximum allowable levels listed in these conditions and the director notifies Aptus that the conditions have been lifted. All data submitted will be placed in the RCRA public docket.
(6) Aptus must provide a signed copy of the following certification statement when submitting data in response to the conditions listed above: "Under civil and criminal penalty of law for the making or submission of false or fraudulent statements or representations, I certify that the information contained in or accompanying this document is true, accurate, and complete. As to the (those) identified section(s) of this document for which I cannot personally verify its (their) truth and accuracy,I certify as the company official having supervisory responsibility for the persons who, acting under my direct instructions, made the verification that this information is true, accurate, and complete."

BILLING CODE 6560-50-M

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 67

Federal Insurance Administration; Final Flood Elevation Determinations

AGENCY: Federal Emergency Management Agency.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are determined for the communities listed below.

The base (100-year) flood elevations are the basis for the floodplain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

EFFECTIVE DATE: The date of issuance of the Flood Insurance Rate Map (FIRM) showing base (100-year) flood elevations, for the community. This date may be obtained by contacting the office where the maps are available for inspection indicated on the table below.

ADDRESSES: See table below.

FOR FURTHER INFORMATION CONTACT: William R. Locke, Chief, Risk Studies Division, Federal Insurance Administration, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-2754.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency gives notice of the final determinations of flood elevations for each community listed. Proposed base flood elevations or proposed modified base flood elevations have been published in the **Federal Register** for each community listed.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1968 (title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 44 CFR part 67. An opportunity for the community or individuals to appeal proposed determination to or through the community for a period of ninety (90) days has been provided.

The Agency has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Pursuant to the provisions of 5 U.S.C. 605(b), the Administrator, to whom authority has been delegated by the Director, Federal Emergency Management Agency, hereby certifies for reasons set out in the proposed rule that the final flood elevation determinations, if promulgated, will not have a significant economic impact on a substantial number of small entities. Also, this rule is not a major rule under terms of Executive Order 12291, so no regulatory analyses have been prepared. It does not involve any collection of information for purposes of the Paperwork Reduction Act.

List of Subjects in 44 CFR Part 67

Flood insurance, Flood plains.

[Ex Parte No. 55 (Sub-No. 84)]

RIN 3120-AB68

Safety Fitness Policy

AGENCY: Interstate Commerce Commission.

ACTION: Denial of petition to reopen; discontinuance of proceeding.

SUMMARY: The Commission denies a petition to reopen this proceeding filed by the Transportation Lawyers Association (TLA). Petitioner's challenge to the Commission's decision not to adopt independent safety fitness standards for certain licensing applicants otherwise exempt from the U.S. Department of Transportation's safety fitness regulations fails to establish material error, to introduce new evidence, or to demonstrate changed circumstances such as would warrant reopening this proceeding under 49 CFR 1115.3(b). To ensure that small vehicle operators have in place meaningful safety programs, however, the decision reiterates and clarifies the Commission's commitment to modify the standard licensing application form (Form OP-1) in a manner that will address with greater precision the safety fitness profiles of such applicants. The Commission's final rules implementing significant revisions to its safety fitness policy in the licensing and finance dockets, were published at 56 FR 46733 (1991).

EFFECTIVE DATE: This decision is effective on December 27, 1991.

FOR FURTHER INFORMATION CONTACT: Suzanne Higgins O'Malley (202) 927-5610 and Richard B. Felder (202) 927-5610 [TDD for hearing impaired: (202) 927-5721].

SUPPLEMENTARY INFORMATION: We disagree with TLA's suggestion that the Commission has in any way abrogated its safety fitness oversight responsibility and impermissibly deferred to DOT's safety oversight jurisdiction. Rather, we affirm our prior conclusion, as announced in earlier stages of this proceeding, that it is neither necessary nor appropriate for the Commission to assume a formal safety review and evaluation role for those carriers that are exempt by DOT regulation from the Federal safety fitness standards—*i.e.*, those referenced by petitioner that operate vehicles transporting 15 or fewer passengers and property carriers operating vehicles having a gross vehicle weight rating of 10,000 pounds or less.

In denying the petition to reopen, we advise TLA that the Commission is not the appropriate forum for consideration of the operational safety profiles of carriers exempt from Federal safety fitness regulations and that this proceeding is not the appropriate vehicle for a collateral attack on the sufficiency of Federal safety compliance requirements. The decision denying the petition also directed TLA, should it seek further assurance concerning the safety oversight of otherwise exempt carriers, to raise its concerns before DOT, the agency with primary safety oversight jurisdiction.

This decision will not significantly affect the quality of the human environment or the conservation of energy resources.

Additional information is contained in the Commission's decision denying TLA's petition to reopen Ex Parte No. 55 (Sub-No. 84). To obtain a copy of the full decision, write to, call, or pick up in person from Dynamic Concepts, Inc., room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289-4357/4359. [Assistance for the hearing impaired is available through TDD service (202) 927-5721.]

Decided: December 12, 1991.

By the Commission, Chairman Philbin, Vice Chairman Emmett, Commissioners Simmons, Phillips, and McDonald. Commissioner Phillips commented with a separate expression. Commissioner McDonald dissented with a separate expression. Commissioner Simmons dissented in part with a separate expression.

Sidney L. Strickland, Jr.,

Secretary.

Proposed Rules

Federal Register

Vol. 56, No. 249

Friday, December 27, 1991

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 929

[Docket No. AO-341-45; FV-89-109]

Cranberries Grown in States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York; Secretary's Decision and Referendum Order on Proposed Further Amendment of Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule and referendum order.

SUMMARY: This decision proposes amendments to the marketing agreement and order for cranberries grown in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York and provides cranberry producers and processors with the opportunity to vote in a referendum to determine if they favor the proposed amendments. The proposed amendments were submitted by the Cranberry Marketing Committee (Committee), the agency responsible for local administration of the marketing order program. The proposed changes would: (1) Authorize the Committee to conduct research and development projects; (2) provide a method whereby annual allotments are calculated on the basis of sales histories and add provisions regarding excess cranberries; (3) limit tenure for Committee members; (4) require handlers to pay assessments on the weight of acquired cranberries; (5) add a definition of barrel; and (6) make other miscellaneous changes that would be consistent with the proposed amendments. These changes are being proposed to improve the administration, operation and functioning of the marketing agreement and order program.

DATES: The referendum shall be conducted from January 13-31, 1992. The representative period for the purpose of the referendum herein ordered is September 1, 1990, to August 31, 1991.

FOR FURTHER INFORMATION CONTACT: Patricia A. Petrella, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, PO Box 96456, Room 2525-S, Washington, DC 20090-6456, telephone (202) 720-9920.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Notice of Hearing issued on January 2, 1990, and published in the **Federal Register** on January 4, 1990 (55 FR 295). Recommended Decision and Opportunity to File Written Exceptions issued on January 15, 1991, and published in the **Federal Register** on January 18, 1991 (56 FR 1938). Reopening of the period for filing written exceptions issued on March 5, 1991, and published in the **Federal Register** on March 11, 1991 (56 FR 10189). The exception period was reopened until March 15, 1991.

This administrative action is governed by the provisions of sections 556 and 557 of title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291 and Departmental Regulation 1512-1.

Preliminary Statement

These proposed amendments were formulated on the record of a public hearing held in Plymouth, Massachusetts, on January 17, 1990; Cherry Hill, New Jersey, on February 6, 1990; Wisconsin Rapids, Wisconsin, on February 13, 1990; and Portland, Oregon, on February 15, 1990, to consider the proposed amendment of the Marketing Agreement and Order No. 929, regulating the handling of cranberries grown in 10 States, hereinafter referred to collectively as the "order." The hearing was held pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), hereinafter referred to as to the Act, and the applicable rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders (7 CFR part 900). The Notice of Hearing contained several amendment proposals submitted by the Cranberry Marketing Committee (Committee) established under the order to assist in local administration of the marketing order.

The proposals would: (1) Authorize the Committee to conduct research and development projects; (2) provide a method whereby annual allotments are calculated on the basis of sales histories and add provisions regarding excess cranberries; (3) limit tenure provisions for Committee members; (4) require handlers to pay assessments on the weight of acquired cranberries; and (5) add a definition of barrel. The Department of Agriculture proposed that it be authorized to make any necessary conforming changes.

Upon the basis of evidence introduced at the hearing and the record thereof, the Administrator of the Agricultural Marketing Service (AMS) on January 15, 1991, filed with the Hearing Clerk, U.S. Department of Agriculture, a Recommended Decision and Opportunity to File Written Exceptions thereto by February 19, 1991. The Department received a request that the USDA provide more time for interested persons to analyze the recommended decision and file exceptions. Therefore, the Department reopened the period for filing written exceptions until March 15, 1991 (56 FR 10189). One exception was received from Mr. David M. Farrimond, Manager of the Committee, who raised the following concerns regarding: (1) The inclusion of reporting and accounting requirements under the authority for production research and development; (2) the submission of a grower report by January 15; (3) an agreement between growers and handlers on the disposition of unused annual allotment; (4) the calculation of sales histories on leased or transferred acreage; (5) established cranberry acreage; and (6) staggered terms of office for Committee members.

Small Business Considerations

In accordance with the provisions of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Administrator of the AMS has determined that this action would not have a significant economic impact on a substantial number of small entities. Small agricultural producers have been defined by the Small Business Administration (SBA) (13 CFR 121.601) as those having annual receipts of less than $500,000. Small agricultural service firms which include handlers

VOL
56
ISS
249
DE
27
1991
UMI

under this order, are defined as those with annual receipts of less than $3.5 million.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders and rules issued thereunder are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both the RFA and the Act have small entity orientation and compatibility. Interested persons were invited to present evidence at the hearing on the probable impact that the proposed amendments to the order would have on small businesses.

During the 1988–89 crop year, approximately 30 handlers were regulated under Marketing Order No. 929. In addition, there are about 950 growers of cranberries in the regulated area. The Act requires the application of uniform rules on regulated handlers. Since handlers covered under the cranberry marketing order are predominantly small businesses, the order itself is tailored to the size and nature of these small businesses. Marketing orders, and amendments thereto, are unique in that they are normally brought about through group action of essentially small entities for their own benefit. Thus, both the RFA and the Act are compatible with respect to small entities.

The proposed amendments to the marketing agreement and order include a provision authorizing the Committee to conduct production research and development projects. Presently, the cranberry marketing order authorizes only marketing research and development projects which are designed to assist, improve or promote the distribution and consumption of cranberries. Production-related research conducted on cranberries is usually performed through agricultural extension stations of state universities and colleges. Recent cutbacks in state funding to universities have caused concern with the cranberry industry that production research could be jeopardized, severely restricted or delegated to a lower priority in the future.

Cranberry growers today are encountering increased problems related to production yields. These include not only weather-related problems and diseases caused by fungi and insects but also increasing environmental concerns, e.g., water and chemical usage and expansion into wetlands. More and more, Federal and state laws have been implemented which restrict the use of chemicals and oversee water use. In addition, it is becoming more difficult to expand production in wetlands which are protected by federal and state laws. Research projects which address these concerns would benefit all cranberry growers and could help ensure adequate supplies and increased quality of cranberries to consumers.

The proposed changes to replace the current allotment base program with a sales history program are intended to reduce values currently associated with allotment base and reduce barriers to entry to cranberry production and sales. The changes which are intended to reduce barriers to entry are consistent with the Department's 1982 Guidelines for Fruit, Vegetable, and Specialty Crop Marketing Orders (Guidelines). Also included under this issue are definitions of sales history, established cranberry acreage and the term handle; modification of the sections of the marketing order regarding transfers, interhandler transfers, and annual allotment; and the addition of new order sections concerning excess cranberries.

Under this proposal, a grower's sales history would be calculated based on such grower's sales, expressed as an average of the best four of the previous six years. Each year, a grower's sales history would be automatically recalculated by the Committee with the newest crop year's sales being added and the oldest crop year's sales being dropped from the six-year period. Sales history would be transferred with the acreage on which it was earned, thus ensuring that a buyer or lessee receives sales history on acreage which is bought or leased. If there is no sales history or less than four years of sales history, sales history would be computed based on the number of years of actual sales until four years of sales is reached or the Committee would use the state average yield multiplied by the grower's cranberry acreage to calculate the grower's allotment. There are also provisions to not penalize a grower who loses a crop for three consecutive years because of natural disasters.

Under the proposed allotment program, when a marketable quantity and an allotment percentage have been established, growers would deliver all of their cranberries to handlers. Handlers could handle only the total of the annual allotments of all growers delivering cranberries to them. Cranberries in excess of those received under allotment would be called excess cranberries and would be able to be used only in noncommercial and/or noncompetitive markets.

The proposal to limit tenure for Committee members would allow for different and more contemporary ideas to be represented on the Committee and would be consistent with the Department's Guidelines. Currently, Committee members may serve for unlimited terms of office. This proposal would limit the terms of office. This proposal would limit the terms of office that Committee members may serve to three consecutive two-year terms of office. The terms of alternate members would not be limited Members serving three consecutive terms would again become eligible to serve on the Committee by not serving for one full term as either a member or an alternate member. This proposal could encourage and foster, to the maximum extent possible, broad-based participation by all industry members of the regulated community in the administration of the marketing order.

The proposal to add a requirement for handlers to pay assessments on the weight of acquired cranberries would require that all cranberries delivered to a handler, with the exception of excess cranberries, be assessed. Currently an assessment rate per 100-pound barrel is applied to the total barrels of cranberries a handler handled, i.e., canned, frozen, or dehydrated. However, fresh cranberries usually experience a loss in weight, called shrinkage, between the time they are received by the handler and the time they are actually handled. Therefore, the weight lost to shrinkage is not assessed. The Committee recommended that cranberries be assessed based on their weight when acquired by the handler prior to shrinkage. Thus, handlers would be assessed on all cranberries received, with the exception of excess cranberries, and assessments due to shrinkage would not be lost.

The proposal to add a definition of barrel would reflect current usage of this term in the industry. The marketing order does not include a definition of the term barrel. The term "barrel," which is equal to 100 pounds of cranberries, is used and understood by growers, processors, and handlers. Growers report their sales on a yearly basis in barrels and handlers report the number of cranberries acquired from growers and the disposition of such cranberries during the crop year in barrels.

The proposal to make other miscellaneous changes that would be consistent with the proposed amendments is necessary so that all sections of the order would be consistent if any or all of the amendments are adopted. These changes include deleting and redesignating certain sections of the order.

All of these changes are designed to enhance the administration and functioning of the marketing agreement and order to the benefit of the industry. Accordingly, it is determined that the proposed revisions of the order would not have a significant economic impact on handlers or growers.

In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 35), the reporting and recordkeeping provisions that are included in the proposed amendments have been submitted to the Office of Management and Budget (OMB). Any forms associated with these provisions could not be used prior to OMB approval.

Findings and Conclusions

The material issues, findings and conclusions, rulings, and general findings and determinations included in the Recommended Decision set forth in the January 16, 1991, issue of the Federal Register (56 FR 1938) are hereby approved and adopted subject to the following additions and modifications:

Based upon the exception filed by Mr. Farrimond, the findings and conclusions in material issue number 1 of the Recommended Decision, concerning the authority for production research and development, are amended by adding the following paragraph after the thirteenth paragraph of material issue number 1 to read as follows:

The exception received from Mr. Farrimond indicated that the record evidence did not oppose the Committee's modification to include reporting and accounting requirements for researchers conducting research projects on behalf of the Committee. Rather, the record showed that the reporting and accounting requirements should be flexible. The Committee agrees with the researchers regarding flexibility of these provisions. Mr. Farrimond's exception raised no further information to reverse the Department's position on this issue. The amendatory language in the Recommended Decision authorized the Committee to establish rules and regulations, as necessary, for the implementation and operation of the proposed amendment. Rules and regulations, which are established through informal rulemaking, can be accomplished through a notice and comment period which is a much shorter and less expensive process than the formal rulemaking procedure which is required to amend an order provision. The establishment of rules and regulations should provide adequate flexibility as supported by the testimony. Therefore, Mr. Farrimond's exception is denied.

Based upon the exception filed by Mr. Farrimond, the findings and conclusions in material issue number 2 of the Recommended Decision, concerning the calculation of annual allotments on the basis of sales histories, are amended by adding the following two paragraphs after the 16th paragraph of material issue number 2 to read as follows:

The exception received by Mr. Farrimond objected to the Department's modification to the amendatory language in the Recommended Decision regarding the submission of the production and eligibility report by producers to the Committee for the purpose of calculating sales histories. The Department proposed the following language in § 929.48(b) of the Recommended Decision to provide "for each grower who wishes to market cranberries under the marketing order shall file a report with the Committee by January 15 of each crop year * * *" Mr. Farrimond pointed out that the marketing order does not preclude growers from marketing their crop. Mr. Farrimond also asserted that the language implies that growers are prohibited from marketing their crop without filing a report with the Committee. The Department has revised the amendatory language in § 929.48(b) as appropriate. The language "to allow the committee to complete a sales history for each grower" is also added to the section for clarity.

However, that portion of the exception that recommended an amendment to the end of § 929.48(b) to provide, "failure to provide the committee with such report may result in the grower not receiving credit for the barrels sold during that crop year," is not adopted. The Recommended Decision has already indicated that such failure to submit a report by January 15 could result in a grower not receiving credit for barrels sold during the crop year. Including this language in the order provision itself is not necessary.

In addition, § 929.48(a)(5) is revised for the purposes of clarifying the amendatory language. That section will now provide for growers who have unused allotment and received a sales history calculated pursuant to § 929.48(a)(5) shall forfeit such unused allotment. The record indicates that growers or handlers should not be able to utilize the unused allotment since it was not actually earned by such grower.

Further, the following revisions to the findings and conclusions in the Recommended Decision are also made based upon the above referenced exception filed by Mr. Farrimond. The phrase "but would not be able to market the cranberries" is deleted from material issue number 2, 9th paragraph, 2nd sentence, of the Recommended Decision. Also, the 22nd paragraph, 2nd sentence under material issue number 2 is revised by deleting the phrase "and they would be eligible for an annual allotment immediately which enables them to sell their cranberries during a year when a marketable quantity has been established."

Based upon the exception filed by Mr. Farrimond, the findings and conclusions in material issue number 2 of the Recommended Decision, concerning the calculation of annual allotments on the basis of sales histories, are further amended by adding the following two paragraphs after the 49th paragraph of material issue number 2 to read as follows:

Mr. Farrimond stated in his exception that the words "equal to their" in § 929.49(f) had been deleted from the amendatory language. These words were included in the Notice of Hearing and were erroneously deleted from the Recommended Decision.

Mr. Farrimond also objected to the sentence in § 929.49(f) which would authorize growers to enter into an agreement with handlers as to the disposition of their unused annual allotment. The record evidence indicated that growers shall transfer all unused annual allotment to their handler or handlers. Handlers would then equitably apportion such unused allotment among those growers having excess cranberries. Mr. Farrimond stated that the two criteria are conflicting and allowing growers to enter into an agreement on the disposition of their unused allotment could cause a monetary value to be assigned to such unused allotment. The evidence supports Mr. Farrimond's exception; therefore, the sentence regarding the agreement between the grower and handler on the disposition of unused allotment is deleted from the Recommended Decision. Therefore, in accordance with Mr. Farrimond's exception, the amendatory language in § 929.49(f) is so modified.

Based upon the exception filed by Mr. Farrimond, the findings and conclusions in material issue number 2 of the Recommended Decision, concerning the calculation of annual allotments on acreage that is leased or transferred are further amended by adding the following two paragraphs after the 24th paragraph of material issue number 2 to read as follows:

Mr. Farrimond also objected to the provision in § 929.50(a)(5) which

VOL 56 ISS 249 DEC 27 1991 UMI

concerns the determination of sales history associated with cranberry acreage being leased or transferred during a year of nonregulation. The method for determining sales history proposed in § 929.50(a)(5) is inconsistent with the proposed formula in § 929.48 and the record evidence. Mr. Farrimond correctly points out that the evidence supports the determination of sales history on the basis of the formula in § 929.48 because that formula would also be used to calculate the sales history on leased or transferred cranberry acreage. Therefore, in accordance with Mr. Farrimond's exception, the amendatory language in § 929.50(a)(5) is revised.

Mr. Farrimond's exception stated that there appear to be inconsistencies in filing requirements between paragraphs (a) (2), (3), and (4) of § 929.50. This section provides for the transfer of sales history when leasing or purchasing cranberry acreage. The evidence supports that no transfer of sales history will be recognized unless both the transferee and transferor notify the Committee in writing. While the evidence supports this requirement, the amendatory language in § 929.50(a)(3) of the Recommended Decision specifies that either the seller or lessor of cranberry acreage shall provide the Committee with the completed transfer forms. The record evidence further indicated that it is not always possible to obtain a completed tranfer form from both parties involved in the transfer. This could cause delays and impede the committee's ability to calculate a sales history for the buyer. Therefore, § 929.50(a)(3) should be revised by replacing the word "and" with "or", and adding a proviso to §929.50(a)(4) to allow the Committee to recognize the filing of only one form from one of the parties if unusual circumstances exist. Therefore, in accordance with Mr. Farrimond's exception, the amendatory language is revised accordingly.

Based upon the exception filed by Mr. Farrimond, the findings and conclusions in material issue number 2 of the Recommended Decision, concerning the calculation of annual allotments on the basis of sales histories, are further amended by adding the following paragraph after the 40th paragraph of material issue number 2 to read as follows:

Mr. Farrimond's exception also favored the deletion of the term "established cranberry acreage;" however, he noted an inconsistency in § 929.48(a)(4) where the term is used. Therefore, in accordance with Mr. Farrimond's exception, the term "established cranberry acreage" is therefore deleted in the amendatory language under § 929.48(a)(4).

Based upon the exception filed by Mr. Farrimond, the findings and conclusions in material issue number 3 of the Recommended Decision, concerning tenure requirements for Committee members, are amended by adding the following paragraph after the fourth paragraph of material issue number 3 to read as follows:

Mr. Farrimond's exception favored tenure requirements of three consecutive two-year terms of office for Committee members. However, he objected to staggering the terms of office for Committee members. The record evidence, however, supported staggering the terms of office. As stated above, staggering the terms of office would preclude the loss of all or most of the Committee members at one time due to tenure limitations. Mr. Farrimond stated in his exception that staggering the terms of office for District 1 and District 2 could have an adverse impact on the Committee's independent member representation, since there are only a small number of independent growers in District 2. However, if no other qualified candidate can be found to serve on the Committee from that district, the Secretary has the authority to exempt the Committee member whose tenure has expired from the tenure requirements. Thus, Mr. Farrimond's exception is denied.

Rulings on Exceptions

In arriving at the findings and conclusions and the regulatory provisions of this decision, the exceptions to the Recommended Decision were carefully considered in conjunction with the record evidence. To the extent that the findings and conclusions and the regulatory provisions of this decision are at variance with the exceptions, such exceptions are denied.

Marketing Agreement and Order

Annexed hereto and made a part hereof are two documents entitled, respectively, "Order Amending the Order Regulating the Handling of Cranberries Grown in 10 States" and "Marketing Agreement as Amended, Regulating the Handling of Cranberries Grown in 10 States." These documents have been decided upon as the detailed and appropriate means of effectuating the foregoing findings and conclusions.

It is hereby ordered, That this entire decision be published in the **Federal Register**. The regulatory provisions of the marketing agreement are identical to those contained in the order as hereby proposed to be amended by the annexed order which is published with this decision.

Referendum Order

It is hereby directed that a referendum be conducted in accordance with the procedure for the conduct of referenda (7 CFR 900.400 *et seq.*) to determine whether the issuance of the annexed order amending the order regulating the handling of cranberries grown in 10 States is approved or favored by producers, as defined under the terms of the order, who during the representative period were engaged in the production of cranberries grown in 10 States.

The representative period for the conduct of such referendum is hereby determined to be September 1, 1990, through August 31, 1991.

The agents of the Secretary to conduct such referendum are hereby designated to be Anne M. Dec, Patricia A. Petrella and Maureen T. Pello, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Washington, DC 20250-6456, telephone (202) 720-9920.

List of Subjects in 7 CFR Part 929

Cranberries, Marketing agreements, Reporting and recordkeeping requirements.

Signed at Washington, DC, on December 18, 1991.

Jo Ann R. Smith,

Assistant Secretary, Marketing and Inspection Services.

Order Amending the Order Regulating the Handling of Cranberries Grown in Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York [1]

Findings and Determinations

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the order; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings and Determinations Upon the Basis of the Hearing Record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure effective thereunder (7 CFR part 900), a public hearing was held upon the proposed amendments to the Marketing Agreement and Order No. 929 (7 CFR part 929), regulating the handling of cranberries grown in 10 States.

Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The order, as amended, as hereby proposed to be further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The order, as amended, as hereby proposed to be further amended, regulates the handling of cranberries grown in the production area in the same manner as, and is applicable only to persons in the respective classes of commercial and industrial activity specified in the marketing order upon which hearings have been held;

(3) The order, as amended, as hereby proposed to be further amended, is limited in application to the smallest regional production area which is practicable, consistent with carrying out the declared policy of the Act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the Act;

(4) The order, as amended, as hereby proposed to be further amended, prescribes, in so far as practicable, such different terms applicable to different parts of the production area as are necessary to give due recognition to the differences in the production and marketing of cranberries grown in the production area; and

(5) All handling of cranberries grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

Order Relative to Handling

It is therefore ordered, That on and after the effective date hereof, all handling of cranberries grown in 10 States shall be in conformity to, and in compliance with, the terms and conditions of the said order as hereby proposed to be amended as follows:

Except for the previously noted changes, the provisions of the proposed marketing agreement and the order amending the order contained in the Recommended Decision issued by the Administrator on January 15, 1991, and published in the **Federal Register** on January 18, 1991, shall be and are the terms and provisions of this order amending the order and are set forth in full herein.

1. The authority citation for 7 CFR part 929 continues to read as follows:

Authority: Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674.

PART 929—CRANBERRIES GROWN IN THE STATES OF MASSACHUSETTS, RHODE ISLAND, CONNECTICUT, NEW JERSEY, WISCONSIN, MICHIGAN, MINNESOTA, OREGON, WASHINGTON, AND LONG ISLAND IN THE STATE OF NEW YORK

2. Section 929.10 is revised as follows:

§ 929.10 Handle.

(a) *"Handle"* means (1) to can, freeze, or dehydrate cranberries within the production area or (2) to sell, consign, deliver, or transport (except as a common or contract carrier of cranberries owned by another person) fresh cranberries or in any other way to place fresh cranberries in the current of commerce within the production area or between the production area and any point outside thereof in the United States or Canada.

(b) The term *"handle"* shall not include: (1) The sale of nonharvested cranberries; (2) the delivery of cranberries by the grower thereof to a handler having packing or processing facilities located within the production area; (3) the transportation of cranberries from the bog where grown to a packing or processing facility located within the production area; or (4) the cold storage or freezing of excess cranberries for the purpose of temporary storage during periods when an annual allotment percentage is in effect prior to their disposal, pursuant to 929.59.

§ 929.13 [Removed]

3. Section 929.13 is removed.

4. A new § 929.13 is added to read as follows:

§ 929.13 Sales history.

Sales history means the number of barrels of cranberries established for a grower by the committee pursuant to section 929.48.

5. Section 929.15 is revised to read as follows:

§ 929.15 Annual allotment.

A grower's annual allotment for a particular crop year is the number of barrels of cranberries determined by multiplying such grower's sales history by the allotment percentage established pursuant to § 929.49 for such crop year.

§ 929.16 [Removed]

6. Section 929.16 is removed and reserved.

7. A new § 929.17 is added to read as follows:

§ 929.17 Barrel.

"Barrel" means a quantity of cranberries equivalent to 100 pounds of cranberries.

8. Section 929.21 is revised to read as follows:

§ 929.21 Term of office.

The term of office for each member and alternate member of the committee shall be for two years, beginning on August 1 of each even-numbered year and ending on the second succeeding July 31. Members and alternate members shall serve the term of office for which they are selected and have been qualified or until their respective successors are selected and have been qualified. Beginning on August 1 of the even-numbered year following the adoption of this amendment, committee members shall be limited to three consecutive terms: *Provided*, That committee members representing Districts 1 and 2 shall be limited to two consecutive terms of office for the initial period following adoption of this amendent. The consecutive terms of office for alternate members shall not be limited. Members serving three consecutive terms may become eligible to serve on the committee by not serving for one full term as either a member or an alternate member, unless specifically exempted by the Secretary.

9. Section 929.41 is revised to read as follows:

§ 929.41 Assessments.

(a) As a handler's pro rate share of the expenses which the Secretary finds are reasonable and likely to be incurred by the committee during a fiscal period, a handler shall pay to the committee assessments on all cranberries acquired as the first handler thereof during such period, except as provided in § 929.55: *Provided*, That no handler shall pay assessments on excess cranberries as provided in § 929.57. The payment of assessments for the maintenance and functioning of the committee may be required under this part throughout the period it is in effect, irrespective of whether particular provisions thereof are suspended or become inoperative.

(b) The Secretary shall fix the rate of assessment to be paid by each handler during a fiscal period in an amount designated to secure funds sufficient to cover the expenses which may be incurred during such period and to accumulate and maintain a reserve fund equal to approximately one fiscal period's expenses. At any time during or

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

VOL 56 ISS 249 DEC 27 1991 UMI

after the fiscal period, the Secretary may increase the assessment rate in order to secure funds sufficient to cover any later finding by the Secretary relative to the expenses which may be incurred. Such increase shall be applied to all cranberries acquired during the applicable fiscal period. In order to provide funds for the administration of the provisions of this part during the first part of a fiscal year, before sufficient operating income is available from assessments, the committee may accept the payment of assessments in advance and may also borrow money for such purposes.

(c) If a handler does not pay such assessment within the period of time prescribed by the committee, the assessment may be increased by either a late payment charge, or an interest charge, or both, at rates prescribed by the committee, with the approval of the Secretary.

10. Section 929.45 is revised to read as follows:

§ 929.45 Research and development.

(a) The committee, with the approval of the Secretary, may establish or provide for the establishment of production research, marketing research, and market development projects designed to assist, improve, or promote the marketing, distribution, consumption, or efficient production of cranberries. The expense of such projects shall be paid from funds collected pursuant to § 929.41, or from such other funds as approved by the Secretary.

(b) The committee may, with the approval of the Secretary, establish rules and regulations as necessary for the implementation and operation of this section.

§ 929.48 [Removed]

11. Section 929.48 is removed.

12. A new § 929.48 is added to read as follows:

§ 929.48 Sales history.

(a) Determination of sales history. (1) The initial sales history shall be computed by the committee for each grower using the best four out of six years of such grower's sales history, which shall include all commercial sales from the first complete crop year following adoption of this amendment, plus the prior five years' history of commercial sales, except as otherwise provided in paragraph (a)(5) of this section. For a grower with four years or less of commercial sales history, the initial sales history shall be computed by the committee using all available years of such grower's commercial sales history.

(2) A new sales history shall be computed for each grower after each crop year during which no volume regulation was established, in the same manner as for the initial sales history, except that the most recent crop year shall be used instead of the earliest crop year, and except as otherwise provided in paragraph (a)(4) of this section. The committee, with the approval of the Secretary, may, by regulation, alter the number and identity of years to be used in computing these subsequent sales histories.

(3) A new sales history shall be calculated for each grower after each crop year, during which a volume regulation has been established, using a formula determined by the committee, with the approval of the Secretary.

(4) Beginning with the first complete crop year following the adoption of this section, if a grower has no commercial sales from such grower's cranberry acreage for three consecutive crop years due to forces beyond the grower's control, the committee shall compute a level of commercial sales for the fourth year for that acreage using an estimated production, obtained by crediting the grower with the average sales from the preceding three years during which sales occurred. Any and all relevant factors regarding the grower's lost production may be considered by the committee prior to establishing a sales history for such acreage.

(5) The committee shall compute a sales history for a grower who has no history of sales associated with such grower's cranberry acreage during a crop year when a volume regulation has been established, using the greater of the following: (i) The total estimated commercial sales from a grower's cranberry acreage, or (ii) The state acreage yield per acre multiplied by the grower's cranberry producing acreage. *Provided,* That a grower having unused allotment and received a sales history computed under either of these methods shall forfeit such unused allotment.

(b) Grower report. Each grower shall file a report with the committee by January 15 of each crop year, indicating the total acreage harvested, the total commercial cranberry sales in barrels from such acreage, and the amount of any new or renovated acreage planted, to allow the committee to compute a sales history for each grower.

(c) The committee may establish, with the approval of the Secretary, rules and regulations necessary for the implementation and operation of this section.

13. Section 929.49 is revised to read as follows:

§ 929.49 Marketable quantity, allotment percentage and annual allotment.

(a) Marketable quantity and allotment percentage. If the Secretary finds, from the recommendation of the committee or from other available information, that limiting the quantity of cranberries purchased from or handled on behalf of growers during a crop year would tend to effectuate the declared policy of the Act, the Secretary shall determine and establish a marketable quantity for the crop year.

(b) The marketable quantity shall be apportioned among growers by applying the allotment percentage to each grower's sales history, established pursuant to section 929.48. Such allotment percentage shall be established by the Secretary and shall equal the marketable quantity divided by the total of all growers' sales histories. Except as provided in paragraph (f) of this section, no handler shall purchase or handle on behalf of any grower cranberries not within such grower's annual allotment.

(c) In any crop year in which the production of cranberries is estimated by the committee to be equal to or less than its recommended marketable quantity, the committee may recommend and the Secretary may increase or suspend the allotment percentage applicable to that year. In the event it is found that market demand is greater than the marketable quantity previously set, the committee may recommend and the Secretary may increase such quantity.

(d) Issuance of annual allotments. The committee shall require all growers to qualify for their allotment by filing with the committee, on or before April 15 of each year, a form wherein growers include the following information: The location of their cranberry producing acreage from which their annual allotment will be produced; the amount of acreage which will be harvested; changes in location, if any, of annual allotment; and such other information, including a copy of any lease agreement, as is necessary for the committee to administer this part. On or before June 1, the committee shall issue to each grower an annual allotment determined by applying the allotment percentage established pursuant to paragraph (b) of this section to the grower's sales history.

(e) On or before June 1 of any year in which an allotment percentage is established by the Secretary, the committee shall notify each handler of the annual allotment that can be handled for each grower whose total crop will be delivered to that handler. In cases where a grower delivers a crop to more than one handler, such grower's annual allotment will be apportioned equitably among the handlers.

(f) Growers who do not produce cranberries equal to their computed annual allotment shall transfer their unused allotment to such growers' handlers. The handler shall equitably allocate the unused annual allotment to growers with excess cranberries who deliver to such handler. Unused annual allotment remaining after all such transfers have occurred shall be transferred to the committee pursuant to paragraph (g) of this section.

(g) Handlers who receive cranberries more than the sum of their growers' annual allotments have "excess cranberries," pursuant to § 929.59, and shall so notify the committee. Handlers who have remaining unused allotment pursuant to paragraph (f) of this section are "deficient" and shall so notify the committee. The committee shall equitably distribute unused allotment to all handlers having excess cranberries.

(h) The committee may establish, with the approval of the Secretary, rules and regulations necessary for the implementation and operation of this section.

14. Section 929.50 is revised to read as follows:

§ 929.50 Transfers.

(a) Transfers to another grower. A grower who owns cranberry acreage on which a sales history has been established may transfer the acreage and sales history to another grower. When transfers of acreage occur, transfers of sales history will be made under the following conditions:

(1) A lease agreement between the owner of the cranberry producing acreage and a lessee: Terms of such lease agreement shall be filed with the committee prior to the committee recognizing such transfer. The lease agreement filed with the committee shall include the following information: (i) Name of owner and lessee; (ii) Starting and ending dates of the lease; (iii) Amount of acreage transferred; and (iv) The amount of sales history transferred.

(2) Total sale of cranberry acreage. When there is a sale of a grower's total cranberry producing acreage, the seller and buyer shall file a completed transfer form with the committee and the buyer will have immediate access to the sales history computation process.

(3) Partial sale or lease of cranberry acreage. When less than the total cranberry producing acreage is sold or leased, sales history associated with the portion of the acreage being sold or leased shall be transferred with the acreage. The seller and lessor shall provide the committee with a completed transfer or lease form outlining such distribution of acreage and sales history between the parties. Such transfer or lease form shall include that percentage of the sales history, as defined in § 929.48(a)(1), attributable to the acreage being transferred or leased.

(4) No transfer shall be recognized by the committee unless the tranferee and transferor notify the committee in writing: *Provided That,* if unusual circumstances exist, the Committee may recognize a transfer when only one form from the transferee or transferor is filed with the committee.

(5) In a year of nonregulation, in the absence of any sales history associated with the cranberry acreage being transferred or leased, the committee shall determine the buyer's or lessee's sales history pursuant to § 929.48 of the order.

(6) During a year when a volume regulation has been established, no transfer or lease of cranberry producing acreage, without accompanying sales history, shall be recognized until the committee is in receipt of a completed transfer or lease form.

(b) The committee may establish, with the approval of the Secretary, rules and regulations, as needed, for the implementation and operation of this section.

15. Amend § 929.52 by revising paragraph (a) to read as follows:

§ 929.52 Issuance of regulations.

(a) The Secretary shall regulate, in the manner specified in this section, the handling of cranberries whenever the Secretary finds, from the recommendations and information submitted by the committee, or from other available information, that such regulation will tend to effectuate the declared policy of the Act. Such regualation shall limit the total quantity of cranberries which may be handled during any fiscal period either by fixing the free and restricted percentages, which percentages shall be applied to cranberries acquired by handlers during such fiscal period in accordance with § 929.54, or by establishing an allotment percentage in accordance with § 929.49.

* * * * *

16. Section 929.55 is revised to read as follows:

§ 929.55 Interhandler transfer.

(a) Transfer or cranberries from one handler to another may be made without prior notice to the committee, except during a period when a volume regulation has been established. If such transfer is made between handlers who have packing or processing facilities located within the production area, the assessment and withholding obligations provided under this part shall be assumed by the handler who agrees to meet such obligation. If such transfer is to a handler whose packing or processing facilities are outside of the production area, such assessment and withholding obligation shall be met by the handler residing within the production area.

(b) All handlers shall report all such transfers to the committee on a form provided by the committee four times a year or at other such times as may be recommended by the committee and approved by the Secretary.

(c) The committee may establish, with the approval of the Secretary, rules and regulations necessary for the implementation and operation of this section.

17. A new § 929.59 is added to read as follows:

§ 929.59 Excess cranberries.

(a) Whenever the Secretary establishes an allotment percentage pursuant to § 929.52, handlers shall be notified by the committee of such allotment percentage and shall withhold from handling such cranberries in excess of the total of their growers' annual allotments obtainted during such period. Such withheld cranberries shall be defined as "excess cranberries" after all unused allotment has been allocated.

(1) Excess cranberries received by a handler shall be made available for inspection by the committee or its representatives from the time they are received until final disposition is completed. Such excess cranberries shall be identified in such manner as the committee may specify in its rules and regulations with the approval of the Secretary.

(2) All matters dealing with handler-held excess cranberries shall be in accordance with such rules and regulations established by the committee, with the approval of the Secretary.

(b) Prior to January 1, or such other date as recommended by the committee and approved by the Secretary, handlers holding excess cranberries shall submit to the committee a written plan outlining procedures for the systematic disposal of such cranberries in the outlets prescribed in § 929.61.

(c) Prior to March 1, or such other date as recommended by the committee and approved by the Secretary, all excess

VOL

cranberries shall be disposed of pursuant to 929.61.

~~§§ 929.60–929.63 [Redesignated as §§ 929.62–929.65]~~

~~§§ 929.65–929.75 [Redesignated as §§ 929.67–929.77]~~

18. Redesignate §§ 929.60, 929.61, 929.62, and 929.63 of *Reports and Records* as §§ 929.62, 929.63, 929.64, and 929.65, respectively. In addition, redesignate §§ 929.65, 929.66, 929.67, 929.68, 929.69, 929.70, 929.71, 929.72, 929.73, 929.74, and 929.75 of *Miscellaneous Provisions* as §§ 929.67, 929.68, 929.69, 929.70, 929.71, 929.72, 929.73, 929.74, 929.75, 929.76, and 929.77, respectively.

19. A new § 929.60 is added to read as follows:

§ 929.60 Handling for special purposes.

Regulations in effect pursuant to §§ 929.10, 929.41, 929.47, 929.48, 929.49, 929.51, 929.52, or 929.53 or any combination thereof, may be modified, suspended, or terminated to facilitate handling of excess cranberries for the following purposes.

(a) Charitable institutions;

(b) Research and development projects described pursuant to section 929.61;

(c) Any nonhuman food use;

(d) Foreign markets, except Canada; and

(e) Other purposes which may be recommended by the committee and approved by the Secretary.

20. A new § 929.61 is added to read as follows:

§ 929.61 Outlets for excess cranberries.

(a) Noncommercial outlets. Excess cranberries may be disposed of only in the following noncommercial outlets that the committee finds, with approval of the Secretary, meet the requirements outlined in paragrpah (c) of this section:

(1) Charitable institutions; and

(2) Research and dedvelopment projects approved by the U.S. Department of Agriculture for the development of foreign and domestic markets, including, but not limited to, dehydration, radiation, freeze drying, or freezing of cranberries.

(b) Noncompetitive outlets. Excess cranberries may be sold to outlets that the committee finds, with the approval of the Secretary, are noncompetitive with established markets for regulated cranberries and meet the requirements outlined in paragraph (c) of this section. These outlets include: (1) Any nonhuman food use; and (2) Foreign markets, except Canada.

(c) Requirements for diversion. The following requirements, as applicable, shall be met by the handler diverting excess cranberries into noncompetitive or noncommercial outlets:

(1) Diversion to charitable institutions. A statement from the charitable institution shall be submitted to the commitee showing the quantity of cranberries received and certifying that the cranberries will be utilized by the institution;

(2) Diversion to research and development projects. A report shall be given to the committee describing the project, quantity of cranberries diverted, and date of disposition;

(3) Division to a nonhuman food use. Notification shall be given to the committee at least 48 hours prior to such disposition; and

(4) Diversion to foreign markets, except Canada. A copy of the on-board bill of lading shall be submitted to the committee showing the amount of cranberries loaded for export.

(d) The storage and disposition of all excess cranberries withheld from handling shall be subject to the supervision and accounting control of the commitee.

(e) The committee, with approval of the Secretary, may establish as needed rules and regulations for the implementation and operation of this section.

Dated: December 18, 1991.

Jo Ann R. Smith,

Assistant Secretary, Marketing and Inspection Services.

UNITED STATES DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

Marketing Agreement, As Amended, Regulating the Handling of Cranberries Grown in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York

The parties hereto, in order to effectuate the declared policy of the Agricultural Marketing Agreement Act of 1937, as amended, hereinafter referred to as the "Act" (7 U.S.C. 601–674), and in accordance with the applicable rules of practice and procedure governing proceedings to formulate marketing agreements and orders (7 CFR part 900), desire to enter into this agreement amending the amended marketing agreement regulating the handling of cranberries grown in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York; and each party hereto agrees that the handling of cranberries shall be in conformity to, and in compliance with, the provisions of the said marketing agreement, as amended, and as hereby further amended in the following respects:

The provisions of §§ 929.1 to 929.75, inclusive, of Order No. 929, as amended (7 CFR part 929), regulating the handling of cranberries grown in the States of Massachusetts, Rhode Island, Connecticut, New Jersey, Wisconsin, Michigan, Minnesota, Oregon, Washington, and Long Island in the State of New York, and as further amended by the order annexed to and made a part of the decision of the Secretary of Agriculture with respect to proposed further amendment of the aforesaid marketing agreement and order, are hereby incorporated into this agreement as if set forth in full herein; and the specified provisions as further amended by said annexed order, plus the following additional provisions, shall be, and the same hereby are, the terms and conditions hereof:

Section 929.76 *Counterparts.* This agreement may be executed in multiple counterparts, and when one counterpart is signed by the Secretary, all such counterparts shall constitute, when taken together, one and the same instrument as if all signatures were contained in one original.

Section 929.77 *Additional parties.* After the effective date hereof, any handler may become a party to this agreement if a counterpart thereof is executed by such handler and delivered to the Secretary. This agreement shall take effect as to such new contracting party at the time such counterpart is delivered to the Secretary, and the benefits, privileges, and immunities conferred by this agreement shall then be effective as to such new contracting party.

Section 929.78 *Order with marketing agreement.* Each contracting handler hereby requests the Secretary to issue, pursuant to the Act, an order regulating the handling of cranberries in the same manner as is provided for this agreement.

The undersigned hereby authorizes the Director or Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service, United States Department of Agriculture, to correct any typographical errors which may have made in this agreement amending the marketing agreement.

IN WITNESS WHEREOF, the contracting parties, acting under the provisions of the Act, for the purpose and subject to the limitations therein contained, and not otherwise, have hereto set their respective signatures and seals.

BILLING CODE 3410-02-M

Food Safety and Inspection Service

9 CFR Parts 318 and 381

[Docket No. 88–033E]

RIN 0583–AA95

Finished Products Inspection

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Proposed rule; reopening of comment period.

SUMMARY: On September 24, 1991, the Food Safety and Inspection Service (FSIS) published a proposed rule to amend the Federal meat and poultry products inspection regulations to allow canning establishments more flexibility in complying with the regulatory requirements concerning finished product inspection of thermally-processed shelf stable canned product. FSIS has received a request to extend the comment period for an additional 30 days. FSIS has determined that the request should be granted. Therefore, FSIS is reopening the comment period for an additional 30 days.

DATE: Comments must be received on or before: January 27, 1992.

ADDRESSES: Written comments to: Policy Office, Attn: Linda Carey, FSIS Hearing Clerk, room 3171, South Agriculture Building, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250. Oral comments as provided by the Poultry Products Inspection Act should be directed to Mr. William C. Smith, at (202) 720–3840.

FOR FURTHER INFORMATION CONTACT: Mr. William C. Smith, Director, Processed Products Inspection Division, Science and Technology, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250. Area Code (202) 720–3840.

SUPPLEMENTARY INFORMATION: Currently, quality control programs regarding finished product inspection of thermally-processed shelf stable canned products must comply with specific requirements of sections 318.309 and 381.309 of the Federal meat and poultry products inspection regulations. The Agency received two petitions from the National Food Processors Association (NFPA) to amend the Federal meat and poultry products inspection regulations to allow canning establishments more latitude in complying with the requirements contained in sections 318.309 and 381.309 of the Federal meat and poultry products inspection regulations.

On September 24, 1991, FSIS published a proposed rule (56 FR 48131) to amend the Federal meat and poultry products inspection regulations to allow quality control programs to differ from current regulatory requirements. Such programs must be determined to be equivalent to the current regulatory requirements or meet the intent of such requirements which is to provide assurance of the safety and stability of canned products.

Interested persons were given until November 25, 1991, to comment on this proposed rule. FSIS has received a request to extend the comment period to allow more time to review the proposal and submit comments. The Agency is interested in receiving such information pertaining to this proposed rule and is, therefore, reopening the comment period for an additional 30 days.

Done at Washington, DC, on: December 23, 1991.

Ronald J. Prucha,

Acting Administrator.

BILLING CODE 3410-DM-M

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 31 and 32

RIN 3150—AD34

Requirements for the Possession of Industrial Devices Containing Byproduct Material

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission (NRC) is proposing to amend its regulations governing the safe use of byproduct material in certain measuring, gauging, or controlling devices. The proposed changes, among other things, would require general licensees who posses these devices to provide the NRC information about the identification of devices and the people responsible for the devices. Further, specific licensees who are distributors of generally licensed devices under 10 CFR 31.5 would be required to use a uniform format when submitting the quarterly transfer reports to NRC. The proposed rule is intended to ensure that general licensees are aware of and understand the requirements for the possession of devices containing byproduct material. This awareness will better assure that general licensees will comply with the requirements for proper handling and disposal of generally licensed devices and presumably reduce the potential for incidents that could result in unnecessary radiation exposure to the public.

DATES: The comment period expires March 12, 1992. Comments received after this date will be considered if it is practicable to do so, but the NRC is able to ensure consideration only for comments received on or before this date.

ADDRESSES: Mail written comments to the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch. Deliver comments to One White Flint North, 11555 Rockville Pike, Rockville, MD, between 7:30 am and 4:15 pm on weekdays. Copies of the draft regulatory analysis, as well as copies of the comments received on the proposed rule, may be examined at the NRC Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC.

FOR FURTHER INFORMATION CONTACT: Joseph J. Mate, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492–3795.

SUPPLEMENTARY INFORMATION:

Background

On February 12, 1959 (24 FR 1089), the Atomic Energy Commission amended its regulations to provide a general license for the use of byproduct material contained in certain lumious, measuring, gauging, and controlling devices. Under the current requirements for possession of a general license, certain persons may receive and use a device containing byproduct material if the device has been manufactured and distributed in accordance with the specifications contained in a specific license issued by the NRC or by an Agreement State. A specific license is issued based upon a determination by a regulatory authority that the safety features of the device and the instructions for safe operation are adequate and meet regulatory requirements. The general licensee is required to comply with the safety instructions contained in or referenced on the label of the device and to have the testing or servicing of the device performed by an individual authorized to manufacture, install, or service these devices. A generally licensed device is a "black box," that is, the radioactive material is contained in a sealed source usually within a shielded device. The device is designed with inherent radiation safety features so that it can be used by persons with no radiation training or experience. Thus, the general license policy is a mechanism to

VOL
56
ISS
249
DE
27
1991
UMI

simplify the license process so that a case-by-case determination of the adequacy of the radiation training or experience of each user is not necessary.

Discussion

There are about 600,000 devices that contain byproduct material is use by about 35,000 licensees under the Commission's general license regulatory program. General licensees have not been contacted by NRC on a regular basis because of the relatively small radiation risk posed by generally licensed devices. These devices have survived fires and explosions on many occasions without a total loss of shielding. They have been damaged by molten steel, and hit by construction vehicles with only minor losses in radiation shielding while maintaining the integrity of the source capsule.

Nonetheless, there have been a number of occurrences where devices containing radioactive material have not been properly handled or disposed of and resulted in radiation exposure of the public. Although no significant public health and safety hazards resulted from these incidents, if proper handling and disposal procedures had been followed, these avoidable exposures would not have occurred. For example, one or more cesium-type gauges were mixed in with some scrap metal that was melted down to form steel and the entire batch of steel was contaminated. In another instance, a static eliminator bar with 22.5 millicuries of americium-241 was sent to a sanitary landfill over which the NRC has no jurisdiction. There have been other types of incidents involving NRC generally licensed devices including damaged devices, leaking or contaminated sources, and equipment malfunctions. However, lose of accountability, as occurred above, remains the most frequent incident and the predominant concern.

Because of these occurrences, the NRC's Office of Nuclear Material Safety and Safeguards (NMSS) conducted a radiological risk assessment addressing storage of devices in warehouses, disposal in scrap yards, incineration of waste, melting in a smelter, and disposal in a landfill. NMSS included in the risk assessment an incident at a steel company in 1983 (discussed in NUREG–1188, "The Auburn Steel Company Radioactive Contamination Incident") that probably represents a worst-case scenario for generally licensed gauging devices. Although individual doses were low and within prescribed limits for exposure of members of the public, they nevertheless represent unnecessary additional public exposure that could have been avoided. In addition, the cleanup costs were in excess of four million dollars with additional costs incurred for the staff efforts of regulatory agencies.

In consideration of both the risk assessment and incidents like those noted above, the NRC conducted a three-year sampling (1984 thru 1986) of general licensees (taken from the vendor's quarterly reports) to determine whether there was an accounting problem with gauge users under general licenses, and if so, what remedial action might be necessary. The sampling was conducted both by telephone calls and site visits. The sampling revealed several areas of concern regarding the use of radioactive material under the general license provisions. On the basis of the sampling, the NRC concluded that is: (1) A lack of awareness of appropriate regulations on the part of the user (general licensee) and (2) inadequate handling and accounting for these generally licensed devices. The NRC further concluded that these two problems could be remedied by more frequent and timely contact between the general licensee and the NRC. This conclusion by the NRC provides the basis for the regulatory changes proposed in this action.

An estimated 70,000 Agreement State licensees use the types of sources and devices covered by the amendments being proposed today for the NRC's general licensees. Consequently, the States will play an important role in achieving improved regulatory oversight on a national basis. Many of the States already have accountability programs in place. The Agreement States participated in the development of this rule and indicated agreement with the concept of the proposed rule. Specific comments from the Agreement States were adopted except for suggestions that the NRC charge general licensees fees and that there is no need for a standard format for submitting information. The fee issue will be addressed separately. The proposed rule provides flexibility in the use of the standard format.

The Commission is considering making the amendments a matter of compatibility for the States. The NRC staff has suggested that the amendments be categorized as Division 2 level of compatibility. This level of compatibility requires that States address provisions in NRC regulations relating to basic principles of radiation safety and regulatory functions without necessarily using identical language. States may also adopt requirements more restrictive than NRC rules under this level of compatibility. The Commission would appreciate comments on this suggestion.

An estimated 35,000 persons use certain measuring, gauging, or controlling devices under the NRC's general license. NRC regulations that affect these general licensees' responsibilities and that are presently being amended are 10 CFR 31.2, 31.4, 31.5, and 31.6. Under 10 CFR 31.2, "Terms and Conditions," all general licensees are subject to certain provisions of part 30 and also parts 19, 20, and 21. The proposed revision to § 31.2 would also subject all general licensees to the requirements of 10 CFR 30.9, "Completeness and Accuracy of Information," which imposes certain requirements regarding the completeness and accuracy of the information submitted to the NRC by licensees not now imposed upon general licensees.

Section 31.4 of 10 CFR part 31, "Information Collection Requirements: OMB approval," lists the various sections of part 31 that contain approved information collection requirements. Paragraph (b) of § 31.4 is being amended to add § 31.6 to the approved listing.

Section 31.5, "Certain measuring, gauging or controlling devices," provides for a general licensee to acquire, receive, possess, use, or transfer byproduct materials. It also specifies the responsibilities of general licensees regarding the use of byproduct materials. Under the proposed revisions a new paragraph (c)(11) would be added to require the general licensee to provide specific information to the NRC upon request. This information would include the complete name and address; specific information about the device, such as manufacturer, model number, and number of devices; name, title, and telephone number of the person responsible for controlling the use of the device; the address where the device is located or used; and whether the specific requirements of paragraph (c) of § 31.5 have been met. In addition, a proposed revision to paragraph (b) of § 31.5 would delete all references to specific licenses issued by Agreement States that authorize distribution of devices to persons generally licensed by Agreement States.

The registration and verification system contained in the proposed amendments to 10 CFR parts 31 and 32 will include all general licensees, including those who previously acquired radioactive sources. If older sources are transferred, they would be subject to the same requirements as newer sources and the registration system is intended

to capture them. General licensee transfers of sources are limited to either transfer to specific licensees or other general licensees by the existing provisions of 10 CFR 31.5(c) (8) and (9). In both cases, licensees must notify the NRC of the transfers. If the specific licensee is a 10 CFR part 32 or Agreement State equivalent distributor, the reporting requirements of the proposed rule would apply to any subsequent transfers. The current NRC data base, although limited, includes identification of general licensees who acquired gauges as early as 1959. The NRC staff plans to contact these licensees and any new general licensee as part of the enhanced oversight effort.

At present, 10 CFR 31.6, "General license to install devices generally licensed in § 31.5," provides a general license to certain specific licensees from Agreement States to install or service devices used under § 31.5. The current regulation, 10 CFR 31.6, is not clear with respect to time restrictions. 10 CFR 150.20(b)(3), imposes a 180-day-per-calendar-year limitation on the activities of Agreement State Licensees in non-Agreement States. The proposed amendments to § 31.6 would remove this restriction for § 31.5 licensees. This change will be convenient to the NRC, Agreement States, and manufacturers because it will reduce and simplify paper work without increasing the risk to public health and safety. The proposed § 31.6(a) would require the general licensee holding a specific license from an Agreement State to report to the NRC all persons receiving a device from the licensee, as specified in the accompanying proposed revision to § 32.52. Proposed § 31.6(d) would require the licensee to supply each of the recipients of a generally licensed device a copy of the general license contained in § 31.5. Proposed § 31.6(e) would require that written instructions and precautions be provided to persons servicing a generally licensed device. Proposed § 31.6(f) would also require a person performing routine installation/servicing/relocation of these devices to notify the appropriate NRC regional office at least 3 working days prior to the start of the activities. This notification would allow for a level of periodic inspection of those activities that intentionally place a worker in direct contact with the device or an unshielded radiation source. It is not intended that the prior notification requirement apply in cases where a radiological hazard due to an accident or a malfunction of the device exists. To be consistent with the proposed modifications, the section heading would be amended to read "General license to distribute, install, and service devices generally licensed in § 31.5."

10 CFR 32.51a, "Same: Conditions of licenses," presently imposes conditions on applicants for a specific license to manufacture or initially transfer generally licensed devices to general licensees. The addition of proposed paragraph (c) to § 32.51a would require such specific licensees to provide recipient users of generally licensed devices with written instructions and precautions to ensure that the devices are used safely. In addition, these specific licensees would be required to provide those users with information regarding testing requirements, transfer and reporting requirements, and disposal options for the devices being transferred.

10 CFR 32.52, "Material transfer reports and records," currently requires specific licensees authorized to distribute devices to general licensees to file transfer reports with the NRC on a quarterly basis. The revised regulation would prescribe the format to be used when submitting transfer reports to the NRC. The proposed format would provide more detailed and complete information about the general licensee to whom the device is transferred. The format is presented in proposed subpart E, § 32.310. Licensees who do not use the prescribed format would be permitted to provide all of the information required by the format on a clear and legible record. In addition, specific licensees would be required to identify a person responsible for meeting the requirements associated with the possession of the generally licensed device rather than simply identifying a point of contact at the general licensee's location.

After receipt of the quarterly transfer reports from the specific licensee under § 32.52, the NRC would send letters to the general licensees who received the devices during the preceding reporting period requesting them to verify in writing that they had purchased the devices containing byproduct material and that they understand the requirements of the general license. The general licensee under proposed § 31.5(c)(11)(ii) would be required to respond to the NRC by letter and to verify safety-related information about the device and its location. Thereafter, notices would be sent periodically to the general licensees requesting that they verify that they still have the device, verify the safety-related information, and remind them of their regulatory responsibilities in using the device. The frequency of these letters may range from 1 to 3 years. Any failure to respond or any reports of lost devices would initiate NRC follow-up action. This contact between the NRC and the general licensee would allow the NRC to validate and update the information currently contained in the data base that the NRC maintains for its general licensees.

Although these proposed requirements would impose additional costs on licensees, the Commission has estimated these to be nominal (on the order of $10 per device). Accordingly, the Commission believes that the increased compliance by general licensees and confidence in the appropriateness of the general license program potentially afforded by these new requirements outweigh this cost. Nonetheless, the Commission particularly requests comments on this matter.

At the time of the final rulemaking on this matter, the Commission intends to provide for an interim enforcement policy to supplement the current Enforcement Policy in 10 CFR part 2, appendix C, to address violations arising from the proposed regulations. The interim policy would remain in effect for one cycle of the notice and response program, approximately three years. Under the existing NRC Enforcement Policy, significant violations such as those involving lost sources may result in escalated action including civil penalties. The interim policy would provide that in the initial phase of the implementation of a notice and response program, enforcement action would not normally be taken for violations identified by a licensee in submitting information pursuant to the proposed regulation provided appropriate corrective action is initiated. This change from the Commission's normal enforcement policy in 10 CFR part 2, appendix C, is to remove any disincentive to identify deficiencies caused by a concern of potential enforcement action. This action would be taken to encourage general licensees to search their facilities to assure sources are located, to determine if applicable requirements have been met, and to develop appropriate corrective action when deficiencies are found. However, enforcement action will be considered for violations involving the failure to provide the information requested or take appropriate corrective actions or willful violations including the submittal of false information. Sanctions in those situations may include civil penalties as well as orders to limit or revoke the

VOL
56
ISS

1991
UMI

authority to possess radioactive sources under a general license.

Environmental Impact: Categorical Exclusion

The NRC has determined that the proposed regulations are the type of action described in the categorical exclusion 10 CFR 51.22(c)(3)(iii). Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this proposed regulation.

Paperwork Reduction Act Statement

The proposed rule amends the information collection requirements that are subject to the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). This proposed rule has been submitted to the Office of Management and Budget for review and approval of the paperwork requirements.

The public reporting burden for this collection of information is estimated to average about 20 minutes per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Information and Records Management Branch (MNBB-7714), U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-3019, (3150-0016 and 3150-0001), Office of Management and Budget, Washington, DC 20503.

Regulatory Analysis

The NRC has prepared a draft regulatory analysis of this proposed regulation. The analysis examines the cost and benefits of the alternatives considered by the NRC. The draft analysis is available for inspection in the NRC Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC. Single copies of the draft analysis may be obtained from Joseph J. Mate, Officer of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone: 301-492-3795.

Regulatory Flexibility Certification

Based on information available at this stage of the rulemaking proceeding and in accordance with the Regulatory Flexibility Act, 5 U.S.C. 605(b), the NRC certifies that, if promulgated, this rule will not have a significant economic impact on a substantial number of small entities. The NRC has adopted size standards that classify a small entity as one whose gross annual receipts do not exceed $3.5 million over a 3-year period. The proposed rule affects about 35,000 persons using products under this general license, many of whom would be classified as a small entity. However, the NRC believes that the economic impact of the proposed requirements on any general licensee would be negligible. The proposed rule is being issued to better ensure that the general licensees understand and comply with regulatory responsibilities regarding the generally licensed radioactive devices in their possession.

Backfit Analysis

The NRC has determined that the backfit rule, 10 CFR 50.109, does not apply to these proposed rules and therefore a backfit analysis is not required because these proposed amendments do not involve any provisions that would impose backfits as defined in 10 CFR 50.109(a)(1).

List of Subjects in:

10 CFR Part 31

Byproduct material, Criminal penalties, Labeling, Nuclear materials, Packaging and containers, Radiation protection, Reporting and recordkeeping requirements, and Scientific equipment.

10 CFR Part 32

Byproduct material, Criminal penalties, Labeling, Nuclear materials, Radiation protection, Reporting and recordkeeping requirements, and Scientific equipment.

For the reasons set out in the preamble and under the authority of the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and 5 U.S.C. 553, the NRC is proposing to adopt the following amendments to 10 CFR parts 31 and 32.

PART 31—GENERAL DOMESTIC LICENSES FOR BYPRODUCT MATERIAL

1. The authority citation for part 31 is revised to read as follows:

Authority: Secs. 81, 161, 183, 68 Stat. 935, 948, 954, as amended (42 U.S.C. 2111, 2201, 2233); secs. 201, as amended, 202, 88 Stat. 1242, as amended, 1244 (42 U.S.C. 5841, 5842).

Section 31.6 also issued under sec. 274, 73 Stat. 688 (42 U.S.C. 2021).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 31.5 (c)(1)-(3) and (5)-(9), 31.6, 31.8(c), 31.10(b), and 31.11(b), (c), and (d) are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201(b); and §§ 31.5 (c)(4), (5), (8), and (11), 31.6 (d)-(f), and 31.11(b) and (e) are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

2. Section 31.2 is revised to read as follows:

§ 31.2 Terms and Conditions.

The general licenses provided in this part are subject to the provision of §§ 30.9, 30.14(d), 30.34(a) to (e), 30.41, 30.51 to 30.63, and parts 19, 20, and 21 of this chapter [1] unless indicated otherwise in the language of the general license.

3. In § 31.4 paragraph (b) is revised to read as follows:

§ 31.4 Information collection requirements: OMB approval.

* * * * *

(b) The approved information collection requirements contained in this part appear in §§ 31.5, 31.6, 31.8, and 31.11.

* * * * *

4. In § 31.5, paragraph (b) is revised and paragraph (c)(11) is added to read as follows:

§ 31.5 Certain measuring, gauging, or controlling devices.[2]

* * * * *

(b) The general license in paragraph (a) of this section applies only to byproduct material contained in devices that have been manufactured or initially transferred and labeled in accordance with the specifications contained in a specific license issued pursuant to § 32.51 of this chapter or in accordance with the specifications contained in the general license of § 31.6.

(c) * * *

(11) Shall respond within 30 calendar days of receipt of a request from the Nuclear Regulatory Commission to verify the following information and any other such information as may be requested by the Commission as it relates to the general license. Further, the general licensee shall notify the Director of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington DC 20555 within 30 calendar days if any of the requested information should change.

(i) Name and complete address of the general licensee.

(ii) Identification of specific information about the device, such as: the manufacturer, model number, the number of devices, type of isotope, and who has performed what service on the device since the last report concerning the device was submitted to the NRC.

(iii) Name, title, and telephone number of the person who is responsible for the device and for ensuring compliance with the appropriate regulations and requirements.

(iv) Address at which the device is located or used.

(v) Whether the requirements of § 31.5(c)(1) through (c)(10) have been met.

* * * * *

5. Section 31.6 is amended by revising the section heading and the introductory paragraph and by adding paragraphs (a), (d), (e), and (f) to read as follows:

§ 31.6 General license to distribute, install, and service devices generally licensed in § 31.5.

Any person who holds a specific license by an Agreement State authorizing the holder to manufacture, distribute, install, or service devices described in § 31.5 within the Agreement State is hereby granted a general license to distribute, install, or service the devices in any non-Agreement State for an unlimited period of time and a general license to distribute, install, or service the devices in offshore waters, as defined in § 150.3(f), provided that:

(a) The Agreement State licensee files the appropriate transfer reports as required by paragraphs (a) and (b) of § 32.52.

* * * * *

(d) The person shall furnish a copy of the general license contained in § 31.5 of this chapter to each person who is responsible for the byproduct material and for ensuring compliance with the appropriate regulations and requirements.

(e) The person shall provide the individual responsible for service of the device with written instructions and precautions necessary to ensure its safe installation, operation, and service. These instructions shall include leak-testing requirements, transfer and reporting requirements, disposal options, including possible costs and reporting requirements for lost or damaged devices.

(f) The person performing routine service/installation or relocation of devices shall notify the appropriate NRC Regional Office listed in Appendix D of part 20 of this chapter at least 3 working days prior to engaging in such activities in Non-Agreement States. The notification shall include the date and location of the activity that will be performed. Prior notification does not apply in cases where a radiological hazard due to an accident or malfunction of the device exists.

PART 32—SPECIFIC DOMESTIC LICENSES TO MANUFACTURE OR TRANSFER CERTAIN ITEMS CONTAINING BYPRODUCT MATERIAL

6. The authority citation for part 32 continues to read as follows:

Authority: Secs. 81, 161, 182, 183, 68 Stat. 935, 948, 953, 954, as amended (42 U.S.C. 2111, 2201, 2232, 2233); sec. 201, 88 Stat. 1242, as amended (42 U.S.C. 5841).

For the purposes of sec. 223, 68 Stat. 958, as amended (42 U.S.C. 2273); §§ 32.13, 32.15 (a), (c), and (d), 32.19, 32.25 (a) and (b), 32.29 (a) and (b), 32.54, 32.55 (a), (b), and (d), 32.58, 32.59, 32.62, and 32.210 are issued under sec. 161b, 68 Stat. 948, as amended (42 U.S.C. 2201 (b)); and §§ 32.12, 32.16, 32.20, 32.25(c), 32.29(c), 32.51a, 32.52, 32.56, and 32.210 are issued under sec. 161o, 68 Stat. 950, as amended (42 U.S.C. 2201(o)).

7. Section 32.51a is amended by adding paragraph (c) to read as follows:

§ 32.51a Same: Conditions of licenses.

* * * * *

(c) Furnish the individuals identified under § 31.5(c)(11) or § 31.6(d) with written instructions and precautions necessary to ensure safe installation, operation, and service of the device. These instructions must include the leak-testing requirements, transfer and reporting requirements, disposal options including possible costs, and reporting requirements for lost or damaged devices.

8. Section 32.52 is revised to read as follows:

§ 32.52 Same: Material transfer reports and records.

Each person licensed under § 32.51 or § 31.6 to initially transfer devices to generally licensed persons shall:

(a) Report quarterly to the Director of the Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and send a copy of the report to the appropriate NRC regional office listed in appendix D of part 20 of this chapter all transfers of such devices to persons for use under the general license in § 31.5 of this chapter. The report must be provided either in the format presented in subpart E, § 32.310, "Transfer Report Format," or on a clear and legible record as long as all of the data required by the format is included. If one or more intermediate persons temporarily possesses the device at the intended place of use prior to its possession by the user, the report must include the same information for each intermediary as in subpart E, § 32.310, and clearly designate that person as an intermediary. If no transfers have been made to persons generally licensed under § 31.5 during the reporting period, the report must so indicate. The report must cover each calendar quarter and must be filed within 30 days of the end of the calendar quarter.

(b) Report quarterly to the responsible Agreement State agency all transfers of such devices to persons for use under a general license in an Agreement State's regulations that are equivalent to § 31.5. The report must be provided either in the format in subpart E, § 32.310, "Transfer Report Format," or on a clear and legible record as long as all of the data required by the format is included. If one or more intermediate persons temporarily possesses the device at the intended place of use prior to its possession by the user, the report must include the same information for each intermediary as in subpart E, § 32.310, and clearly designate that person as an intermediary. If no transfers have been made to persons generally licensed under § 31.5 during the reporting period, the report must so indicate. The report must cover each calendar quarter and must be filed within 30 days of the end of the calendar quarter.

(c) Keep records of all transfers of such devices for each general licensee and in compliance with the above reporting requirements of § 32.52. Records required by this section must be maintained for a period of 5 years from the date of the recorded event.

9. Subpart E, § 32.310 is added to 10 CFR part 32 to read as follows:

Subpart E—Report of Transfer of Byproduct Materials

§ 32.310 Transfer Report Format.

This section contains the format required by § 32.52.

BILLING CODE 7590-01-M

[1] Attention is directed particularly to the provisions of the regulations in part 20 of this chapter that relate to the labeling of containers.

[2] Persons possessing byproduct material in devices under a general license in § 31.5 before January 15, 1975, may continue to possess, use, or transfer that material in accordance with the labeling requirements of § 31.5 in effect on January 14, 1975.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 91-CE-73-AD]

Airworthiness Directives; deHavilland Model DHC-3 Otter Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD) that would be applicable to deHavilland Model DHC-3 Otter airplanes that have a Servo-Aero Engineering 20000 Series Kit installed on a Pratt & Whitney PT6A-135/135A engine. This proposed action would require a one-time inspection to ensure existence and correct assembly of the fuel condition lever lock, and, if not existent or incorrectly assembled, installation in accordance with the applicable service information. If the fuel condition lever lock is not existent or incorrectly assembled, inadvertent engine shutdown could occur. The actions specified in this proposed AD are intended to prevent loss of control of the airplane caused by inadvertent engine shutdown.

DATES: Comments must be received on or before February 3, 1992.

ADDRESSES: Servo-Aero Engineering Service Bulletin SB001, dated July 24, 1990, may be obtained form Servo-Aero Engineering Inc., 37 Mortensen Avenue, Salinas, California 93905; Telephone (408 422-7866). This information also may be examined at the Rules Docket at the address below. Send comments on the proposal in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 91-CE-73-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

FOR FURTHER INFORMATION CONTACT: Mr. Chinh Vuong, Aerospace Engineer, FAA, Los Angeles Aircraft Certification Office, 3329 E. Spring Street, Long Beach, California 90808-2425; Telephone (213) 988-5264; Facsimile (213) 988-5210.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 91-CE-73-AD, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

Transport Canada, which is the airworthiness authority for Canada, recently notified the FAA that an unsafe condition may exist on certain deHavilland Model DHC-3 Otter airplanes that have a Servo-Aero Engineering 20000 Series Kit installed on a Pratt & Whitney PT6A-135/135A engine. Transport Canada advises that some of the Pratt & Whitney Canada PT6A-135/135A engines that have been modified in accordance with either Supplemental Type Approval (STA) SA 89-32 or Supplemental Type Certificate (STC) SA 3777NM do not have a fuel condition lever lock installed. If the fuel condition lever lock is not installed or is incorrectly assembled, then the engine can inadvertently shutdown and result in loss of control of the airplane.

Servo-Aero Engineering Inc. has issued Service Bulletin SB001, dated July 24, 1991, which specifies instructions for installing the fuel condition level lock, part number (P/N) 20037-16. Transport Canada classified this service bulletin as mandatory and issued Transport Canada AD DV-912-16, dated June 11, 1991, in order to assure the airworthiness of these airplanes in Canada. The airplanes are manufactured in Canada and are type certificated for operation in the United States. Pursuant to a bilateral airworthiness agreement, Transport Canada has kept the FAA totally informed of the above situation.

The FAA has examined the findings of Transport Canada, reviewed all available information, and determined that AD action is necessary for products of this type design that are certificated for operation in the United States. Since this condition could exist or develop in other deHavilland Model DHC-3 Otter airplanes that have a Servo-Aero Engineering 20000 Series Kit installed on a Pratt & Whitney PT6A-135/135A engine of the same type design, the proposed AD would require a one-time inspection to ensure existence and correct assembly of the fuel condition lever lock, and, if not existent or incorrectly assembled, installation in accordance with the instructions in Servo-Aero Service Bulletin SB001, dated July 24, 1991.

It is estimated that 2 airplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 4 hours per airplane to accomplish the proposed action, and that the average labor rate is approximately $55 an hour. Parts are provided by the manufacturer at no cost. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $440.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034), February 26, 1979); and (3) if

VOL 56 ISS 249 DEC 27 1991 UMI

promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of its may be obtained by contacting the Rules Docket at the location provided under the caption "**ADDRESSES**".

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend 14 CFR part 39 of the Federal Aviation Regulations as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g); and 14 CFR 11.89.

§ 39.13 [AMENDED]

2. Section 39.13 is amended by adding the following new AD:

deHavilland: Docket No. 91–CE–73–AD.

Applicability: Model DHC–3 Otter airplanes (all serial numbers) that have a Servo-Aero Engineering 20000 Series Kit installed on a Pratt & Whitney PT6A–135/135A engine, certificated in any category.

Compliance: Required within the next 100 hours time-in-service after the effective date of this AD, unless already accomplished.

To prevent loss of control of the airplane caused by inadvertent engine shutoff, accomplish the following:

(a) Visually inspect the Pratt & Whitney PT6A–135/135A engine to ensure that a fuel condition lever lock, part number (P/N) 20037–18, is installed and ensure that it is correctly assembled in accordance with the instructions in Servo-Aero Service Bulletin SB001, dated July 24, 1990.

(1) If a fuel condition lever lock is installed and is correctly assembled in accordance with the instructions in Servo-Aero Service Bulletin SB001, dated July 24, 1990, return the airplane to service.

(2) If a fuel condition lever lock is not installed or is not assembled in accordance with the instructions in Servo-Aero Service Bulletin SB001, dated July 24, 1990, prior to further flight, install a fuel condition lever position lock, (P/N) 20037–18, in accordance with the instructions in Servo-Aero Service Bulletin SB001, dated July 24, 1990.

(b) Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate the airplane to a location where the requirements of this AD can be accomplished.

(c) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Los Angeles Aircraft Certification Office, 3329 E. Spring Street, Long Beach, California 90806–2425. The request should be forwarded through an FAA Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles Aircraft Certification Office.

(d) All persons affected by this directive may obtain copies of the document referred to herein upon request to Servo-Aero Engineering Inc., 37 Mortensen Avenue, Salinas, California 93905; or may examine this document at the FAA, Central Region, Office of the Assistant Chief Counsel, room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on December 19, 1991.

Barry D. Clements,

Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[PS–78–91]

RIN 1545–AQ07

Procedure for Monitoring Compliance with Low-Income Housing Credit Requirements

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to the requirement that State allocation plans provide a procedure for State and local housing credit agencies to monitor for compliance with the requirements of section 42 of the Internal Revenue code and report any noncompliance to the Internal Revenue Service. These regulations affect State and local housing credit agencies, owners of buildings or projects for which the low-income housing credit is claimed, and taxpayers claiming the low-income housing credit.

DATES: Written comments must be received by February 25, 1992. Requests to appear at a public hearing scheduled for March 4, 1992, and outlines of oral comments must be received by February 19, 1992. See notice of hearing published elsewhere in this issue of the **Federal Register**

ADDRESSES: Send comments, requests to appear at the public hearing, and outlines to: Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, (Attn: CC:CORP:T:R (PS–78–91), room 5228), Washington, DC 20044. In the alternative, comments, requests to appear at the public hearing, and outlines may be hand delivered to: CC:CORP:T:R (PS–78–91), Internal Revenue Service, room 5228, 1111 Constitution Ave., NW., Washington, DC 20224. The public hearing will be held in the Internal Revenue Service Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Ave., NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulations, Paul F. Handleman, (202) 377–6349 (not a toll-free call). Concerning the hearing, Bob Boyer, Regulations Unit, (202) 566–3935 (not a toll–free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. 3504 (h)). Comments on the collection of information should be sent to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, T:FP, Washington, DC 20224.

The collection of information in this proposed regulation is contained in § 1.42–5. This information is required by the Internal Revenue Service because State and local housing credit agencies are required under section 42 (m)(1)(B)(iii) to monitor for compliance with the requirements of section 42 and report any noncompliance to the Internal Revenue Service. Noncompliance is reported by the agencies on form 8823, Low-Income Housing Credit Agencies Report of Noncompliance. Form 8823 was submitted to the Office of Management and Budget under control number 1545–1204. The likely respondents/recordkeepers are individuals, State and local governments, business or other for-profit institutions, nonprofit institutions, and small businesses or organizations.

These estimates are an approximation of the average time expected to be necessary for the collection of information. They are based on such information as is available to the Internal Revenue Service. Individual respondents/recordkeepers may require greater or less time, depending on their particular circumstances. Estimated total reporting and/or recordkeeping burden: 18,750 hours. The estimated annual burden per State or local government respondent/recordkeeper varies from 10 hours to 1,500 hours, with an estimated average of 250 hours. The estimated annual burden for all other respondent/recordkeepers varies from .5 hours to 3 hours, with an estimated average of 1 hour. Estimated number of State or local government respondents/recordkeepers: 55. Estimated number of all other respondents/recordkeepers: 5,000. Estimated annual frequency of State or local government responses (for reporting requirement only): As necessary. Estimated annual frequency of all other responses (for reporting to State or local government requirement only): 1.

Background

This document contains amendments to the Income Tax Regulations (26 CFR part 1) under section 42 of the Internal Revenue Code of 1986. These amendments are proposed to provide guidance on section 42 (m)(1)(B)(iii). Section 42 (m)(1)(B)(iii), which was amended and renumbered by the Revenue Reconciliation Act of 1990, is effective on January 1, 1992, and applies to all buildings placed in service for which the low-income housing credit determined under section 42 is, or has been, allowable at any time.

Section 42 provides for a low-income housing credit that may be claimed as part of the general business credit under section 28. The credit determined under section 42 is allowable only to the extent the owner of a qualified low-income building receives a housing credit allocation from a State or local housing credit agency ("Agency"), unless the building is exempt from the allocation requirement by reason of section 42 (h)(4)(B). Under section 42 (m)(1)(A), the housing credit dollar amount for any building is zero unless the amount was allocated pursuant to a qualified allocation plan of the Agency. Similarly, under section 42 (m)(1)(D), the housing credit dollar amount for any project qualifying under section 42 (h)(4) is zero unless the project satisfies the requirements for allocation of a housing credit dollar amount under the qualified allocation plan of the Agency. Under section 42 (m)(1)(B)(iii), an allocation plan is not qualified unless it contains a procedure that the Agency (or an agent of, or private contractor hired by, the Agency) will follow in monitoring compliance with the provisions of section 42 and notifying the Internal Revenue Service of any noncompliance of which the Agency becomes aware.

Explanation of Provisions

A. In General

The proposed regulations provide guidance on section 42(m)(1)B)(iii). Under the proposed regulations, an allocation plan meets the requirement of section 42(m)(1)(B)(iii) if it includes a monitoring procedure that contains, in substance, all of the provisions specified in the regulations.

The specified provisions are minimum requirements; a monitoring procedure may contain additional provisions or requirements. Moreover, the language, form, and order of the specified provisions as set forth in the regulations need not be exactly duplicated in an allocation plan in order for the plan to include a monitoring procedure as required by the regulations. As long as the substance of the provisions specified in the regulations is contained in the allocation plan as a whole, the allocation plan includes the monitoring procedure required by the regulations.

B. Provisions of Monitoring Procedure

1. In General

Under the regulations, a monitoring procedure must contain recordkeeping and record retention provisions, certification and review provisions, an auditing provision, and provisions for notifying owners and the Internal Revenue Service of noncompliance or lack of certification.

2. Recordkeeping and Record Retention

A monitoring procedure must require the owner of a low-income housing project to keep records for each building in the project showing the total number of residential rental units in the building, the percentage of low-income units in the building, the rent charged on each residential rental unit in the building, the low-income unit vacancies in the building and the rentals of the next available units, the low-income certification of each low-income tenant and documentation to support that certification, and the character and use of the nonresidential portion of the building included in the building's eligible basis under section 42(d) (*e.g.*, tenant facilities that are available on a comparable basis to all tenants and for which no separate fee is charged for use of the facilities, or facilities reasonably required by the project). These records should already be kept by all owners, since they are necessary to calculate how much credit, if any, can be claimed.

A monitoring procedure must require the records for a building to be kept a minimum of 6 years beyond the end of the compliance period of the building. The records should be kept until this date in any event, because a portion of the credit claimed for a building may be recaptured during the compliance period under certain circumstances.

3. Certification and Review

A monitoring procedure must require the owner of a low-income housing project to certify at least annually to the Agency under penalty of perjury that the project meets the requirements of the 20–50 test under section 42(g)(1)(A), the 40–60 test under section 42(g)(1)(B), or the 25–60 test under sections 42(g)(4) and 142(d)(6) for New York City, whichever minimum set-aside test is applicable to the project, and the 15–40 test under sections 42(g)(4) and 142(d)(4)(B) for "deep rent skewed" projects, if applicable to the project. In addition, the monitoring procedure must require the owner to certify to the Agency under penalty of perjury that the owner has received an annual low-income certification from each low-income tenant and documentation to support that certification, that each low-income unit is rent-restricted under section 42(g)(2), that all units in the project are for use by the general public and are used on a nontransient basis, that each building in the project is suitable for occupancy taking into account local health, safety, and building codes, that there has been no change in any building's eligible basis under section 42(d) (or that there has been a change, with an explanation of the nature of the change), that all tenant facilities included in the eligible basis of any building in the project are provided on a comparable basis without a separate fee to all tenants in the building, that if a low-income unit in the project becomes vacant during the year reasonable attempts are made to rent that unit to tenants having a qualifying income and while the unit is vacant no units of comparable or smaller size are rented to tenants not having a qualifying income, and that if the income of tenants of low-income units increases above the limit allowed in section 42(g)(2)(D)(ii), the next available unit of comparable or smaller size will be rented to tenants having a qualifying income. Periodic certifications for a building must be required at least through the end of the building's 15-year compliance period.

In addition to requiring periodic certifications, a monitoring procedure must provide that the Agency will review, in at least one of two ways, certain records kept by low-income housing project owners. The monitoring procedure must require (1) that the owner of a low-income housing project

VOL 56 ISS 249 DEC 27 1991 UMI

send to the Agency each year a copy of the annual low-income certification from each low-income tenant and a copy of the documentation the owner has received to support that certification, or (2) that the Agency inspect a reasonable number of low-income housing projects each year, and that the inspection include at a minimum a review on-site of the tenant low-income certifications for that year and the documentation the owner has received to support those certifications. If an Agency chooses to include the second of these review provisions in its monitoring procedure, the low-income housing projects to be inspected must be chosen in a manner that will not give owners advance notice that their records for a particular year will or will not be inspected. However, an Agency may give an owner reasonable notice that an inspection will occur so that the owner may assemble records.

A monitoring procedure may, however, exempt from the certification and review provisions certain buildings that are subject to other monitoring programs than that required under section 42(m)(1)(B)(iii). Buildings that may be exempted are buildings financed the Farmers Home Administration (FmHA) under its section 515 program and buildings of which 50 percent or more of the aggregate basis (taking into account the building and the land) is financed with the proceeds of tax-exempt bonds. However, the monitoring procedure must require the owner of any exempted building to certify to the Agency on at least an annual basis under penalty of perjury that the building complies with the requirements for FmHA assistance or tax-exempt bond financing, as applicable, and that the minimum set-aside, income, rent and suitability-for-occupancy requirements of section 42 are also met. Additionally, the monitoring procedure must require the owner of an exempted building to inform the Agency if the owner would be unable to make one or more of the required certifications.

4. Auditing

A monitoring procedure must provide that the Agency has the right to perform an audit of any low-income building at least during the 15-year compliance period of the building. An audit includes an inspection of the building as well as a review of the records described in the recordkeeping portion of the regulations. The auditing provision is required in addition to the review of low-income certifications and documentation described above.

5. Notification

A monitoring procedure must provide that the Agency is to notify the owner of a low-income housing project in writing as soon as possible if the Agency does not receive the required certification, or if the Agency discovers on audit, inspection or review, or in some other manner, that the project is not in compliance with the provisions of section 42.

A monitoring procedure must provide that the owner has an opportunity to supply missing certification or to correct noncompliance within a correction period. The correction period must be specified in the monitoring procedure and cannot exceed 90 days from the date of the notice to the owner. However, a monitoring procedure may provide for extensions of up to six months, but only if the extension is based on a determination by the Agency that there is good cause for granting the extension.

A monitoring procedure must provide that the Agency is to notify the Internal Revenue Service of an owner's noncompliance or failure to certify no later than 45 days after the end of the allowed time for correction, whether or not the noncompliance or failure to certify is corrected. The Agency is to notify the Internal Revenue Service by filing Form 8823, Low-Income Housing Credit Agencies Report of Noncompliance. The Agency must explain on Form 8823 the nature of the noncompliance or failure to certify and indicate whether the owner has corrected the noncompliance or failure to certify.

If a building goes entirely out of compliance with section 42, so that no credit is allowable for the building for the taxable year or in any future taxable year during the compliance period, the Agency need not file Form 8823 in every subsequent year to report the noncompliance. Instead, the Agency may file a single Form 8823 for the building when the Agency becomes aware that the building has gone entirely out of compliance, provided that the Agency reports on the form that the building is entirely out of compliance and will not be in compliance in the future.

C. Agency Delegation of Monitoring Function

Section 42(m)(1)(B) and § 1.42–5(f) allow an Agency to retain an agent or other private contractor to perform compliance monitoring. In this event, the agent or other private contractor may be delegated the functions of the Agency to monitor compliance, except for the responsibility of filing Form 8823. For example, the agent or other private contractor may be delegated the responsibility of inspecting low-income housing projects each year, the right to inspect buildings and audit records, and the responsibility of notifying building owners of noncompliance. The agent or other private contractor must notify the Agency of any noncompliance or failure to certify and the Agency must, in turn, notify the Internal Revenue Service no later than 45 days after the end of the allowed time for correction.

An Agency that delegates compliance monitoring to an agent or other private contractor must use reasonable diligence to ensure that the agent or other private contractor properly performs the delegated monitoring functions. In addition, delegation by an Agency of compliance monitoring functions to an agent or other private contractor does not relieve the Agency of its obligation to notify the Internal Revenue Service of any noncompliance of which the Agency becomes aware.

D. Fees

The proposed regulations do not address any issues relating to Agency fees. However, nothing in section 42 prohibits an Agency from charging a fee for covering the Agency's administrative expenses in monitoring for compliance.

E. Effective Date

These proposed regulations are proposed to be effective on the later of June 30, 1992 or 90 days after these regulations are published in final form. However, the requirement of section 42(m)(1)(B)(iii) that allocation plans provide a monitoring procedure is effective January 1, 1992. Thus, allocation plans must comply with the statutory monitoring requirement as of that date.

Both section 42(m)(1)(B)(iii) and these regulations apply to all buildings placed in service for which the low-income housing credit is, or has been, allowable at any time. Neither section 42(m)(1)(B)(iii) or these regulations, however, require monitoring for whether a building or project is in compliance with the requirements of section 42 prior to January 1, 1992.

These proposed regulations contain minimum compliance monitoring requirements and in no way preclude an Agency from formulating and applying monitoring procedures that are stricter than those set forth in these regulations. For example, an Agency may wish to require that other types of records be kept by owners of low-income housing projects, or other certifications be made, in addition to those described in the regulations, or an Agency may wish to do regular on-site inspections of projects and audits of any records required to be kept.

Special Analyses

It has been determined that these rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Comments and Requests to Appear at Public Hearing

Before adopting these proposed regulations, consideration will be given to any written comments that are timely submitted (preferably a signed original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. A public hearing will be held on March 4, 1992. See notice of hearing published elsewhere in this issue of the Federal Register.

Drafting Information

The principal author of these regulations is Paul F. Handleman, Office of the Assistant Chief Counsel (Passthroughs and Special Industries), Internal Revenue Service. However, other personnel from the Service and the Treasury Department participated in their development.

List of Subjects in 26 CFR 1.37–1 through 1.44A–1

Credits, Income taxes, Reporting and Recordkeeping requirements.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority for part 1 is amended by adding the following citation:

Authority: Sec. 7805, 68A Stat. 917 (26 U.S.C. 7805) * * * Section 1.42–5 is also issued under 26 U.S.C. 42(n) * * *

Par. 2. New § 1.42–5 is added to read as follows:

§ 1.42–5 Monitoring compliance with low-income housing credit requirements.

(a) *Compliance monitoring requirement*—(1) *In general.* Under section 42(m)(1)(B)(iii), an allocation plan is not qualified unless it contains a procedure that the State or local housing credit agency ("Agency") (or an agent of, or other private contractor hired by, the Agency) will follow in monitoring for noncompliance with the provisions of section 42 and in notifying the Internal Revenue Service of any noncompliance of which the Agency becomes aware.

(2) *Requirements for a monitoring procedure.* A procedure for monitoring for noncompliance under section 42(m)(1)(B)(iii) must contain—

(i) The recordkeeping and record retention provisions of paragraph (b) of this section;

(ii) The certification and review provisions of paragraph (c) of this section;

(iii) The auditing provision of paragraph (d) of this section; and

(iv) The notification-of-noncompliance provisions of paragraph (e) of this section.

A monitoring procedure will meet the requirements of section 42(m)(1)(B)(iii) if it contains the substance of these provisions. The particular order and form of the provisions in the allocation plan is not material. A monitoring procedure may contain additional provisions or requirements.

(b) *Recordkeeping and record retention provisions*—(1) *Recordkeeping provision.* Under the recordkeeping provision, the owner of a low-income housing project must be required to keep records for each qualified low-income building in the project showing—

(i) The total number of residential rental units in the building;

(ii) The percentage of residential rental units in the building that are low-income units;

(iii) The rent charged on each residential rental unit in the building;

(iv) The low-income unit vacancies in the building and the rentals of the next available units;

(v) The income certification of each low-income tenant;

(vi) Documentation to support each low-income tenant's income certification (for example, a copy of the tenant's federal income tax return, Forms W–2, or verifications of income from third parties such as employees or state agencies paying unemployment compensation); and

(vii) The character and use of the nonresidential portion of the building included in the building's eligible basis under section 42(d) (*e.g.*, tenant facilities that are available on a comparable basis to all tenants and for which no separate fee is charged for use of the facilities, or facilities reasonably required by the project).

(2) *Record retention provision.* Under the record retention provision, the owner of a low-income housing project must be required to retain the records described in paragraph (b)(1) of this section for each building in the project for at least 6 years beyond the end of the compliance period of the building.

(c) *Certification and review provisions*—(1) *Certification.* Under the certification provision, the owner of a low-income housing project must be required to certify to the Agency that—

(i) The project meets the requirements of the 20–50 test under section 42(g)(1)(A), the 40–60 test under section 42(g)(1)(B), or the 25–60 test under sections 42(g)(4) and 142(d)(6) for New York City, whichever minimum set-aside test is applicable to the project, and the 15–40 test under sections 42(g)(4) and 142(d)(4)(B) for "deep rent skewed" projects, if applicable to the project;

(ii) The owner has received an annual income certification from each low-income tenant and documentation to support that certification;

(iii) Each low-income unit in the project is rent-restricted under section 42(g)(2);

(iv) All units in the project are for use by the general public and are used on a nontransient basis;

(v) Each building in the project is suitable for occupancy, taking into account local health, safety, and building codes;

(vi) There has been no change in the eligible basis (as defined in section 42(d)) of any building in the project, or that there has been a change, and the nature of the change;

(vii) All tenant facilities included in the eligible basis under section 42(d) of any building in the project, such as swimming pools, other recreational facilities, and parking areas, are provided on a comparable basis without charge to all tenants in the building;

(viii) If a low-income unit in the project becomes vacant during the year, reasonable attempts are made to rent that unit to tenants having a qualifying income and while the unit is vacant no units of comparable or smaller size are rented to tenants not having a qualifying income; and

(ix) If the income of tenants of a low-income unit in the project increases above the limit allowed in section 42(g)(2)(D)(ii), the next available unit of

VOL
56
ISS
249
DE
27
1991
UMI

comparable or smaller size in the project will be rented to tenants having a qualifying income.

(2) *Review.* Under the review provision, a monitoring procedure must require—

(i) An owner of a low-income housing project to submit to the Agency each year a copy of the annual income certification from each low-income tenant and a copy of the documentation the owner has received to support that certification, or

(ii) The Agency to inspect a reasonable number of low-income housing projects each year, and review on-site the low-income tenant income certifications for that year and the documentation the owner has received to support those certifications.

If a monitoring procedure includes the review provision described in paragraph (c)(2)(ii) of this section, the low-income housing projects to be inspected must be chosen in a manner that will not give owners of low-income housing projects advance notice that their records for a particular year or will not be inspected. However, an Agency may give an owner reasonable notice that an inspection will occur so that the owner may assemble records, for example, 30 days advance notice of inspection. See paragraph (d) of this section for the auditing provision that is required to be included in all monitoring procedures.

(3) *Exceptions for certain buildings.* A monitoring procedure may provide that the certification and review provisions required under paragraphs (c) (1) and (2) of this section do not apply to certain low-income buildings subject to other monitoring programs. The following buildings may be exempted from paragraphs (c) (1) and (2) of this section:

(i) Buildings financed by the Farmers Home Administration (FmHA) under its section 515 program; and

(ii) Buildings of which 50 percent or more of the aggregate basis (taking into account the building and the land) is financed with the proceeds of obligations the interest on which is exempt from tax under section 103.

If a monitoring procedure exempts a building from paragraphs (c) (1) and (2) of this section, the procedure must require the owner of the building to certify to the Agency that the building complies with the requirements for FmHA assistance or tax-exempt bond financing, as applicable, and that the building also meets the minimum set-aside, income, rent, and suitability-for-occupancy requirements of section 42. Additionally, the monitoring procedure must require the owner of an exempted building to inform the Agency if the owner would be unable to make one or more of the certifications otherwise required under paragraph (c)(1) of this section.

(4) *Frequency and form of certification.* A monitoring procedure must require the certifications of paragraphs (c) (1) and (3) of this section to be made at least annually through the end of the 15-year compliance period under section 42(i)(1) and to be made underpenalty of perjury.

(d) *Auditing provision.* Under the auditing provision, the Agency must have the right to perform an audit of any low-income housing project at least through the end of the compliance period of the buildings in the project. An audit includes an inspection of nay building in the project, as well as a review of the records described in paragraph (b)(1) of this section. The auditing provision of this paragraph (d) is required in addition to any inspection of low-income certifications and documentation under paragraph (c)(2) of this section.

(e) *Notification-of-noncompliance provisions*—(1) *In general.* Under the notification-of-noncompliance provisions, the Agency must be required to give the notice described in paragraph (e)(2) of this section to the owner of a low-come housing project and the notice described in paragraph (e)(3) of this section to the Internal Revenue Service.

(2) *Notice to owner.* The Agency must be required to provide prompt written notice to the owner of a low-income housing project if the Agency does not receive the certification described in paragraph (c)(1) or (3) of this section or discovers on audit, inspection, or review, or in some other manner, that the project is not in compliance with the provisions of section 42.

(3) *Notice to Internal Revenue Service.* The Agency must be required to file Form 8823, Low-Income Housing Credit Agencies Report of Noncompliance, with the Internal Revenue Service no later than 45 days after the end of the correction period (as described in paragraph (e)(4) of this section, including extensions permitted under that paragraph), whether or not the noncompliance or failure to certify is corrected. The Agency must explain on Form 8823 the nature of the noncompliance or failure to certify and indicate whether the owner has corrected the noncompliance or failure to certify. If an Agency reports on Form 8823 that a building has gone entirely out of compliance and will not be in compliance at any time in the future, the Agency need not file Form 8823 in subsequent years to report that building's noncompliance.

(4) *Correction period.* The correction period shall be that period specified in the monitoring procedure during which an owner must supply any missing certifications and bring the project into compliance with the provisions of section 42. The correction period is not to exceed 90 days from the date of the notice to the owner described in paragraph (e)(2) of this section. An Agency may extend the correction period for up to six months, but only if the Agency determines there is good cause for granting the extension.

(f) *Delegation of authority*—(1) *Agencies permitted to delegate compliance monitoring functions.* An Agency may retain an agent or other private contractor to perform compliance monitoring. In this case, the agent or other private contractor may be delegated the functions of the Agency to monitor compliance, except for the responsibility of notifying the Internal Revenue Service under paragraph (e)(3) of this section. For example, the agent or other private contractor may be delegated the responsibility of reviewing tenant certifications and documentation under paragraph (c)(2) of this section, the right to inspect buildings and audit records as described in paragraph (d) of this section, and the responsibility of notifying building owners of lack of certification or noncompliance under paragraph (e)(2) of this section. However, the agent or other private contractor must notify the Agency of any noncompliance or failure to certify.

(2) *Limitations.* An Agency that delegates compliance monitoring to an agent or other private contractor must use reasonable diligence to ensure that the agent or other private contractor properly performs the delegated monitoring functions. Delegation by an Agency of compliance monitoring functions to an agent or other private contractor does not relieve the Agency of its obligation to notify the Internal Revenue Service of any noncompliance of which the Agency becomes aware.

(g) *Liability.* Compliance with the requirements of section 42 is the responsibility of the owner of the building for which the credit is allowable. The Agency's obligation to monitor for compliance with the requirements of section 42 does not make the Agency liable for an owner's noncompliance.

(h) *Effective date.* Allocation plans must comply with these regulations as of the later of June 30, 1992, or 90 days after these regulations are published as final regulations. The requirement of section 42 (m)(1)(B)(iii) that allocation plans contain a procedure for monitoring for noncompliance becomes effective on January 1, 1992, and applies to buildings placed in service for which a low-income housing credit is, or has been, allowable at any time. Thus, allocation plans must comply with section 42 (m)(1)(B)(iii) prior to the effective date of these regulations. Section 42 (m)(1)(B) and these regulations do not require monitoring for whether a building or project is in compliance with the requirements of section 42 prior to January 1, 1992.

Fred T. Goldberg, Jr.,

Commissioner of Internal Revenue.

BILLING CODE 4830-01-M

26 CFR Part 1

[PS-78-91]

RIN 1545-AQ07

Procedure for Monitoring Compliance With Low-Income Housing Credit Requirements; Hearing

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of public hearing on proposed regulations.

SUMMARY: This document provides notice of a public hearing on proposed Income Tax Regulations relating to the requirement that State allocation plans provide a procedure for State and local housing credit agencies to monitor for compliance with the requirements of section 42 of the Internal Revenue Code and report any noncompliance to the Internal Revenue Service.

DATES: The public hearing will be held on Wednesday, March 4, 1992, beginning at 10 a.m. Requests to speak and outlines of oral comments must be received by Wednesday, February 19, 1992.

ADDRESSES: The public hearing will be held in the IRS Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC. Requests to speak and outlines of oral comments should be submitted to the Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC: CORP:T:R (PS-78-91), room 5228, Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: Bob Boyer of the Regulations Unit, Assistant Chief Counsel (Corporate), 202-377-9231, (not a toll-free number).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is regulations that contain amendments to the Income Tax Regulations (26 CFR part 1), under section 42 of the Internal Revenue Code. These amendments are proposed to provide guidance on section 42(m)(1)(B)(iii). These regulations appear in this issue of the **Federal Register.**

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit not later than Wednesday, February 19, 1992, an outline of the oral comments/testimony to be presented at the hearing and the time they wish to devote to each subject.

Each speaker (or group of speakers representing a single entity) will be limited to 10 minutes for an oral presentation exclusive of the time consumed by the questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the persons testifying. Copies of the agenda will be available free of charge at the hearing.

By direction of the Commissioner of Internal Revenue:

Dale D. Goode,

Federal Register Liaison Officer, Assistant Chief Counsel (Corporate).

Disclosure of Tax Return Information for Purposes of Quality or Peer Reviews

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations under section 7216(b)(3) relating to disclosures of tax return information for purposes of conducting quality or peer reviews. The proposed regulations would expand the purposes for which a quality or peer review may be conducted to include evaluating, monitoring and improving the quality of a tax return preparer's accounting and auditing services. These regulations are proposed under changes to the applicable law made by the Omnibus Budget Reconciliation Act of 1989.

DATES: Written comments must be received by May 1, 1992. A public hearing has been scheduled for June 3, 1992. Requests to speak at the hearing, along with outlines of oral comments must be received by May 20, 1992. See the notice of hearing published elsewhere in this issue of the **Federal Register**.

ADDRESSES: Send comments and requests for a public hearing to the Internal Revenue Service, Attn: CC: CORP:T:R: [IA-98-91] P.O. Box 7604, Ben Franklin Station NW., Washington, DC 20044.

FOR FURTHER INFORMATION CONTACT: David L. Meyer, Attorney-Advisor, Office of the Assistant Chief Counsel (Income Tax and Accounting) at 202-566-5985 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

This document contains proposed amendments to the Regulations on Procedure and Administration (26 CFR part 301) under section 7216(b)(3) of the Internal Revenue Code. Section 7216(b)(3) was amended by section 7739(a) of the Omnibus Budget Reconciliation Act of 1989 ("OBRA 1989") (Pub. L. No. 101-239, 103 Stat. 2106, 2404) to require the issuance of regulations addressing the disclosure of tax return information for the purposes of quality or peer reviews.

On December 28, 1990, the Service issued regulations under section 7216(b)(3) in proposed and temporary form. (55 FR 53313, 55 FR 53295). Comments were received from the public and a public hearing was held on those regulations on June 3, 1991. The final regulations are published elsewhere in this issue of the **Federal Register** without any substantive change.

Explanation of Provision

The proposed regulations issued under section 7216(b)(3) on December 28, 1990, defined a quality or peer review as a review that is undertaken to evaluate, monitor, and improve the quality and accuracy of a tax return preparer's tax preparation services. Some commentators suggested that this definition is too restrictive. They noted that some preparers must undergo a review of their auditing and accounting services to satisfy government concerns. While these reviews are only incidentally related to tax return preparation, tax return information sometimes must be disclosed to properly complete the review. These commentators are concerned that this definition will not allow these reviews to be accomplished. In response to these comments, the proposed regulations issued today would expand the definition of a quality or peer review to include accounting and auditing services. These amendments are proposed to be effective on December 28, 1990.

Special analyses

It has been determined that these rules are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required. It has also been determined that section 553(b) of the Administrative Procedures Act (5 U.S.C. chapter 5) and the Regulatory Flexibility Act (5 U.S.C. chapter 6) do not apply to these regulations, and, therefore, an initial Regulatory Flexibility Analysis is not required. Pursuant to section 7805(f) of the Internal Revenue Code, a copy of these regulations will be submitted to the Chief Counsel on Advocacy of the Small Business Administration for comment on their impact on small business.

Comments and Public Hearing

The Service intends to hold the public hearing on these regulations on June 3, 1992. Before adopting these proposed regulations, consideration will be given to any written comments that are timely submitted (preferably an original and eight copies) to the Internal Revenue Service. All comments will be available for public inspection and copying. See notice of public hearing published elsewhere in this issue of the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is David L. Meyer, Office of Assistant Chief Counsel, Income Tax and Accounting, Internal Revenue Service. However personnel from other offices of the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 301

Administrative practice and procedure, Alimony, Bankruptcy, Child Support, Continental shelf, Courts, Crime, Disclosure of information, Employment taxes, Estate taxes, Excise taxes, Filing requirements, Gift tax, Income taxes, Investigations, Law enforcement, Oil pollution, Penalties, Pensions, Reporting and recordkeeping requirements, Statistics, Taxes.

Proposed Amendments to the Regulations

For the reasons set forth in the preamble, 26 CFR part 301 is proposed to be amended as follows:

PART 301—[AMENDED]

Paragraph 1. The authority for part 301 continues to read in part:

Authority: Sec. 7805, I.R.C. 1954; 68A Stat. 917; 26 U.S.C. 7805 * * *.

Par. 2. Section 301.7216-2, paragraph (o), is amended by revising the third sentence to read as follows:

§ 301.7216-2 Disclosure or use without formal consent of taxpayer.

* * * * * * *

(o) * * * A quality or peer review is a review that is undertaken to evaluate, monitor, and improve the quality and accuracy of a tax return preparer's tax preparation, accounting and auditing services. * * *

* * * * * * *

Fred T. Goldberg, Jr.,

Commissioner of Internal Revenue.

BILLING CODE 4830-01-M

DEPARTMENT OF DEFENSE

Office of the Secretary

32 CFR Part 169a

[DoD Instruction 4100.33]

Commercial Activities Program Procedures

AGENCY: Office of the Secretary, DoD.

ACTION: Proposed rule.

SUMMARY: The Department of Defense is proposing to revise this part to incorporate substantive changes to part 169a required by OMB revisions and DoD guidance. This part establishes procedures and criteria for use by the Department of Defense to determine whether DoD commercial activities should be performed by DoD personnel in-house or by contract with commercial sources.

DATES: Written comments on this proposed rule must be received on or before February 24, 1992.

ADDRESSES: Forward comments to the Office of the Assistant Secretary of Defense (Production and Logistics), Installations, Housing and Services, The Pentagon, room 3E787, Washington, DC 20301.

FOR FURTHER INFORMATION CONTACT: Mr. Earl DeHart, telephone 703-756-5641.

SUPPLEMENTARY INFORMATION: Part 169a was published in the Federal Register on October 7, 1985 (50 FR 40804) establishing the procedures for DoD commercial activities. Comments will be available for public inspection by request. Because of the anticipated number of comments, the Department of Defense does not plan to acknowledge or respond to individual comments. However, the Department of Defense will respond to comments in the preamble of the final rule.

List of Subjects in 32 CFR Part 169a

Armed forces; Government procurement.

Accordingly, it is proposed that 32 CFR part 169a be amended as follows:

PART 169a [AMENDED]

1. The authority citation for part 169a is proposed to be revised to read as follows:

Authority: 5 U.S.C. 301 and 552.

2. Footnote 1 is proposed to be revised to read as follows: "Copies may be obtained, at cost, from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161."

3. Section 169a.2 is proposed to be amended by revising paragraphs (d)(5) through (7) and adding new paragraphs (d)(8) through (11) to read as follows:

§ 169a.2 Applicability and scope.

* * * * * * *

(d) * * *

(5) Does not apply when contrary to law, executive orders, or any treaty or international agreement.

(6) Does not apply in times of a declared war or military mobilization.

(7) Does not provide authority to enter into contracts.

(8) Does not apply to conduct of research and development, except for severable in-house CAs that support research and development, such as those listed in appendix A to this part.

(9) Does not justify conversion to contract solely to avoid personnel ceilings or salary limitations.

(10) Does not authorize contracts that establish an employer-employee relationship between the Department of Defense and contractor employees as described in FAR 37.104.

(11) Does not establish and shall not construed to create any substantive or procedural basis for anyone to challenge any DoD action or inaction on the basis that such action or inaction was not in accordance with this part, except as specifically set forth in § 169a.6(c)(7).

3a. In Appendix A, footnotes 13 and 14 are redesignated as footnotes 1 and 2.

3b. Footnotes 5-12 are proposed to be redesignated as footnotes 6-13.

4. Section 169.4 is proposed to be revised to read as follows:

§ 169a.4 Policy.

(a) *Ensure DoD Mission Accomplishment.* The implementation of this part shall consider the overall DoD mission and the defense objective of maintaining readiness and sustainability to ensure a capability for mobilizing the defense and support structure.

(b) *Retain Governmental functions In-House.* Certain functions that are inherently governmental in nature, and intimately related to the public interest, mandate performance by DoD personnel only. These functions are not in competition with commercial sources; therefore, these functions shall be performed by DoD personnel.

(c) *Rely on the Commercial Sector.* DoD Components shall rely on commercially available sources to provide commercial products and services, except when required for national defense, when no satisfactory commercial source is available, or when in the best interest of direct patient care. DoD Components shall not consider an in-house new requirement, an expansion of an in-house requirement, conversion to in-house, or otherwise carry on any CAs to provide commercial products or services if the products or services can be procured more economically from commercial sources.

(d) *Achieve Economy and Enhance Productivity.* Encourage competition with the objective of enhancing quality, economy, and performance. When performance by a commercial source is permissible, a comparison of the cost of contracting and the cost of in-house performance shall be performed to determine who shall provide the best value for the Government, considering price and other factors included in the solicitation. If the installation commander has reason to believe that it may not be cost effective to make an award under mandatory source programs, section 8(a) of the Small Business Act or any other noncompetitive preferential procurement program, a cost comparison, or any other cost analysis, although not required by OMB Circular A-76, may be performed. Performance history will be considered in the source selection process, and high quality performance should be rewarded.

(e) *Delegate Decision Authority and Responsibility.* DoD Components shall delegate decision authority and responsibility to lower organization levels, giving more authority to the doers, and linking responsibility with that authority. This shall facilitate the work that installation commanders must perform without limiting their freedom to do their jobs. When possible, the installation commanders should have the freedom to make intelligent use of their resources, while preserving the essential wartime capabilities of U.S. support organizations in accordance with DoD Directive 4001.1 [5].

(f) *Share Resources Saved.* When possible, make available to the installation commander a share of any resources saved or earned so that the commander can improve operations or working and living conditions on the installation.

(g) *Provide Placement Assistance.* Provide a variety of placement assistance to employees whose Federal jobs are eliminated through CA competitions.

§ 169a.8 [AMENDED]

4. Section 169a.8 is proposed to be amended by revising "ASD(A&L)" to read "ASD(P&L)".

§ 169a.9 [Amended]

5. Section 169a.9 is proposed to be amended in paragraph (a) introductory text by removing the sentence: "ASD(A&L) shall be notified within 30 days of any such decision."; paragraph (a)(1)(ii) and (iv) by changing "ASD(A&L)" to "ASD(P&L)" each time it appears; and paragraph (a)(2)(i)(A) by changing "DoD FAR Supplement (DFAR)" to Defense FAR Supplement (DFARS)".

6. Section 169a.13 is proposed to be amended by revising the heading and

VOL 56 ISS 249 DEC 27 1991 UMI

paragraphs (a) and (b) to read as follows:

§ 169a.13 CAs involving forty-five or fewer DoD civilian employees.

(a) When adequately justified under the criteria required in Appendix C to this part, CAs involving forty-five or fewer DoD civilian employees may be converted to contract based on simplified cost comparison procedures. Such conversions shall be approved by the DoD Component's central point of contact office having the responsibility for implementation of this part. Part IV of the supplement to OMB Circular A–76 shall be utilized to define the specific elements of cost to be estimated in the simplified cost comparison.

(b) In no case shall any CA involving more than forty-five employees be modified, reorganized, divided, or in any way changed for the purpose of circumventing the requirement to perform a full cost comparison.

* * * * *

§ 169a.15 [Amended]

7. Section 169a.15 is proposed to be amended as follows:

a. Paragraphs (a) and (b) are proposed to be amended by revising "ASD(A&L)" to read "ASD(P&L)".

b. Paragraph (d)(1)(i) is proposed to be amended by revising the first sentence and changing "ASD(A&L)" to "ASD(P&L)".

c. Paragraph (d)(1)(ii) is proposed to be revised.

d. A new paragraph (d)(1)(iii) is proposed to be revised.

e. Paragraphs (d)(2)(ii)(A) and (iii) are proposed to be revised.

f. Paragraph (d)(2)(v) is proposed to be amended by revising "components" to read "DoD components" and "agencies" to "Federal agencies.".

g. Paragraphs (d)(2)(vi) and (vii) are proposed to be amended by removing the word "Regulation" from "DoD Regulation 5220.22–R".

h. Paragraph (d)(4)(i)(C) is proposed to be amended by revising "ASD(A&L)" to read "ASD(P&L)".

i. Paragraph (d)(4)(i)(E) is proposed to be amended by revising "24.5" to read "19.1" and "13.4" to "13.6".

j. Paragraph (d)(4)(i)(H) is proposed to be amended, third sentence, after the word "rates" add "that include PCS costs multiplied by the appropriate support factor."

k. Paragraph (d)(4)(i)(I) is proposed to be added.

l. Paragraphs (d)(4)(ii)(D)(*2*) and (*3*) are proposed to be amended by removing the last sentence; and introductory text of paragraph (d)(4)(ii)(E) is proposed to be amended by revising "Property Disposal Office" to read "Defense Reutilization and Marketing Office".

§ 169a.15 Special considerations.

* * * * *

(d) * * *

(1) * * *

(i) *Congressional Notification.* DoD components shall notify Congress of the intention to do a full cost comparison.

* * *

(ii) DoD components shall, in accordance with Public Law 100–456, at least monthly during the development and preparation of the performance work statement (PWS) and management study, consult with DoD civilian employees who will be affected by the cost comparison and consider the views of such employees on the development and preparation of the PWS and management study. DoD components may consult with such employees more frequently and on other matters relating to the cost comparison. In the case of DoD employees represented by a labor organization accorded exclusive recognition under 5 U.S.C. 7111, consultation with representatives of labor organization satisfies the consultation requirement. Consultation with nonunion DoD civilian employees may be through such means as group meetings. Alternatively, DoD civilian employees may be invited to designate one or more representatives to speak for them. Other methods may be implemented if adequate notice is provided to the nonunion DoD civilian employees and the right to be represented during the consultations is ensured.

(iii) *Local Notification.* It is suggested that upon starting the cost comparison process, the installation make an announcement of the cost comparison, including a brief explanation of the cost-comparison process to the employees of the activity and the community. The installations' labor relations specialist also should be apprised to ensure appropriate notification to employees and their representatives in accordance with applicable collective bargaining agreements. Local Inter-Service Support Coordinators (ISCs) and the Chair of the appropriate Joint Inter-Service Resources Study Group (JIRSG) also should be notified of a pending cost comparison.

(2) * * *

(ii) * * *

(A) Prepare PWS that are based on accurate and timely historical or projected work land data and that provide measurable and verifiable performance standards.

* * * * *

(iii) Guidance on Government property:

(A) For the purposes of this part, Government property is defined in accordance with the FAR, 48 CFR part 45.

(B) The decision to offer or not to offer Government property to a contractor shall be determined by a cost-benefit analysis justifying that the decision is in the best interest of the Government. The determination on Government property must be supported by current, accurate, complete information and be readily available for the independent reviewing activity. The design of this analysis shall not give a decided advantage/disadvantage to either in-house or contract competitors. The management of Government property offered to the contractor shall also be in compliance with FAR, 48 CFR chapter 1.

(4) * * *

(i) * * *

(I) In order to more accurately estimate personnel costs, line 1 (Personnel Costs) shall be completed as follows:

[(Basic Pay × fringe benefit factor**) + (other Pay × Medicare factor)]

** The fringe benefit factor includes cost factors for standard retirement, employee insurance benefits (life and health), Medicare, and miscellaneous fringe benefits.

* * * * *

8. Section 169a.17 is proposed to be amended by revising paragraph (a); paragraph (d)(1) changing "DFAR" to "DFARS"; by revising paragraph (f); paragraph (g)(1) by removing the last sentence; and by adding new paragraph (1) to read as follows:

§ 169a.17 Solicitation considerations.

(a) Every effort must be made to avoid postponement or cancellation of OMB circular A–76 solicitations and when there is no alternative, contracting officers must clearly document the reason(s).

* * * * *

(f) OMB circular A–76 contract, should be terminated at the appropriate time when the Department of Defense has the authority to close or realign installations.

* * * * *

(1) In order to ensure that bonds and/or insurance requirements are being used in the best interest of the Government, as a general rule, requirements (for other than construction related services) above the levels established in the FAR and DFARS should not be included in acquisitions.

9. Section 169a.18 is proposed to be amended by revising (b)(3) to read as follows:

§ 169a.18 Administrative appeal procedures.

* * * * *

(b) * * *

(3) Each DoD Component shall establish an administrative appeal procedure that is independent and objective; Installation Commanders must make available, upon request, the documentation supporting the decision to directly convert activities; appeals to direct conversions must be filed within 30 calendar days after the decision is announced in the Commerce Business Daily and/or Federal Register, and the supporting documentation is made available; an impartial official one level organizationally higher than the official who approved the direct conversion decision will hear the appeal; officials will provide an appeal decision within 30 calendar days of receipt of the appeal.

* * * * *

§ 169a.21 [Amended]

10. Section 169a.21 is proposed to be amended in paragraph (c)(2) by changing "ten" to "forty-five"; paragraph (c)(3), first sentence, add "(while in session)" after the word "Components" and in the second sentence by revising "ASD(A&L)" to read "ASD(P&L)"; paragraph (c)(5) changing "ASD(A&L)" to "Congress (while in session)"; paragraph (c)(6) by changing "50" to "75"; and paragraph (c)(7) changing "ASD(A&L)" to "ASD(P&L)" and by adding the sentence "Also, include the number of studies you expect to complete in the next fiscal year showing total civilian and military FTEs." at the end of the paragraph.

§ 169a.22 [Amended]

11. Section 169a.22 is proposed to be amended in paragraph (b)(1) by changing "OASD(A&L)IA" to "OASD(P&L)" and changing "OASD(A&L)" to "OASD(P&L"; paragraph (b)(2) changing "OASD(A&L)" to "OASD(P&L)".

Appendix A [Amended]

11a. Appendix A is proposed to be amended by redesignating "footnotes 13–14" as "1–2."

12. Appendix B. is proposed to be revised to read as follows:

Appendix B to part 169a—Commercial Activities Inventory Report and Five-Year Review Schedule

A. *General Instructions*

1. Send your inventory reports before 1 January to the Defense Manpower Data Center (DMDC). Use Report Control Symbol "DD–P&L(A) 1540" and send by microcomputer diskette, magnetic tape, or use terminals as a medium.

2. You can use nine-track extended binary coded decimal interchange code (EBCDIC), 1600 or 6250 density, even parity for tape medium. Data records must have 132 characters and block ten logical records to a block. Do not use headers and trailers. Use a tape mark (end of file) to follow the data. Use an external label, on the reel, showing your organization for return. Also, do this for the title of the report, the fiscal year (FY) covered, and the tape attributes.

3. Prior permission for interface requirements must be established between DMDC and the sender when sending by a remote work station terminal.

4. DATA FORMAT:

(In-house DoD commercial activities)

Data element	Tape positions	Field	Data[1]
Designator	1	A	A
Installation		A1	
State, Territory, or Possession	2–3	A1a	N
Place	4–9	A1b	A/N
*Function	10–14	A2	A/N
In-house civilian workload	15–20	A3	N
Military workload	21–26	A4	N
*Reason for in-house operation	49	A8	A
*Most recent year in-house operation approved	50–51	A9	N
*Year DoD CA scheduled for next review	52–53	A10	N
Installation name	76–132	A11	A

[1] A = Alpha; N = Numeric. And A/N data shall be left justified and space filled. N data shall be right justified and zero filled.

* Items marked with an asterisk (*) have been registered in the DoD Data Element Dictionary.

5. When definite coding instructions are not provided, reference must be made to DoD 5000.12–M[2]. Failure to follow the coding instructions contained in this document, or those published in Pub. L. 89–306 makes the DoD component responsible for noncompliance of required consessions in data base communication.

B. ENTRY INSTRUCTIONS

Field	Instruction
A	Enter an A to designate that the data to follow on this record pertains to a particular DoD CA.
A1a	Enter the two-position numeric code for State (Data element reference ST–GA) or State equivalent (federal Information Processing Standards Publication 55–2, as shown in attachment 1 to this appendix.

[2] Copies may be obtained, at cost, from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161.

B. ENTRY INSTRUCTIONS—Continued

Field	Instruction
A1b	Enter the unique alpha-numeric code established by the DoD Component for military installation, named populated place, or related entity where the CA workload was performed during the FY covered by the report. A separate look-up listing or file should be provide showing each unique place code and its corresponding place name or enter the name in field "A11".
A2	Enter the function code from appendix A to this part that best describes that type of CA workload basically performed by the CA covered by this report. Left justify.
A3	Enter total (full- and part-time) in-house civilian workyear equivalents applied to the performance of the function during the FY. Round off to the nearest whole workyear equivalent. (If amount is equal to or greater than .5, round up. If amount is less than .5, round down. Amounts between zero and one should be entered as one). Right justify. Zero fill.
A4	Enter total military workyear equivalents applied to the performance of the function in the FY. Round off to the nearest whole workyear equivalent. (Amounts between zero and one should be entered as one). Right justify. Zero fill.
A8	Enter the reason for in-house operation of the CA, as shown in attachments 1 and 2 of this Appendix.
A9	Enter the last two digits of the most recent FY corresponding to the reason for in-house operation of the CA, as stated in field A8.
A10	Enter the last two digits of the FY the function is scheduled for study or next review. (Data element reference YE–NA.)
A11	Enter the named populated place, or related entity, where the CA workload was performed.

Attachment 1 to Appendix B to Part 169a—Codes for Denoting States, Territories, and Possessions of the United States

a. *Numeric States Codes* (Data element reference ST–GA)

Code	
01	Alabama
02	Alaska
04	Arizona
05	Arkansas
06	California
08	Colorado
09	Connecticut
10	Delaware
11	District of Columbia
12	Florida
13	Georgia
15	Hawaii
16	Idaho
17	Illinois
18	Indiana
19	Iowa
20	Kansas
21	Kentucky
22	Louisiana
23	Maine
24	Maryland
25	Massachuesetts
26	Michigan

84	Howland Island
86	Jarvis Island
89	Kingsman Reff
95	Palmyra Atoll

Attachment 2 to Appendix B to Part 169a—Reasons for In-House Operations

1. *In-House Authorized Reason Codes* (for entry in field A8)

Code	Explanation
A	Indicates that the DOD CA has been retained in-house for national defense reasons in accordance with section 169a.5(b)(1)(i) of this part, other than CAs reported under code "C", below.
C	Indicates that the DoD CA is retained in-house because the CA is essential for training or experience in required military skills, or the CA is needed to provide appropriate work assignments for a rotation base for overseas or sea-to-shore assignments, or the CA is necessary to provide career progression to a needed military skill level in accordance with section 169a.5(b)(1)(i) of this part.
D	Indicates procurement of a product or service from a commercial source would cause an unacceptable delay or disruption of an essential DoD program.
E	Indicates that there is no satisfactory commercial source capable of providing the product or service needed.
F	Indicates that a cost comparison has been conducted and that the Government is providing the product or service at a lower total cost as a result of cost comparison.
G	Indicates that the CA is being performed by DoD personnel now, but decision to continue in-house or convert to contract is pending results of a scheduled cost comparison.
H	Indicates that the CA is being performed by DoD employees now but will be converted to contract because of cost comparison results.
J	Indicates that the CA is performed at a DoD hospital and, in the best interest of direct patient care, is being retained in-house.
N	Indicates that the CA is performed by DoD employees now, but a review is in progress pending a decision. (i.e., base closure, realignment or consolidation).
X	Indicates that the installation Commander is not scheduling this CA for cost study under the provisions of Congressional authority.
Y	Indicates the CA is retained in-house because the cost study exceeded the time limit prescribed by law.
Z	Indicates that a CA is retained in-house for reasons not included above. (i.e., a law, Executive Order, treaty, or international agreement).

2. *Use of Other Codes:* Other codes may be assigned as designated by the ODASD(I).

13. Appendix C is proposed to be revised to read as follows:

Appendix C to Part 169a—Simplified Cost Comparison and Direct Conversion of CAs

A. This appendix provides guidance on procedures to be followed in order to convert a commercial activity employing 45 or fewer DoD civilian employees to contract performance without a full cost comparision. DoD Components may directly convert functions with 10 or fewer civilian employees without conducting a simplified cost comparison. Simplified cost comparisons are to be conducted on activities with 11–45 civilian employees to ensure that cost data are fully considered in decisions on CAs.

B. The proposed direct conversions must meet the following criteria:

1. The activity is currently performed by 10 or fewer civilian employees.

2. The conversion makes sense from a management or performance standpoint.

3. The conversion is cost effective.

4. The installation commander must certify that all affected civilian employees will be offered jobs at that installation, or within the local area, commensurate with their current skills and pay grades. If no such vacancies exist the employees will be offered retraining opportunities for existing or projected vacancies at that installation or within the local area. The employees potential right-of-first-refusal with civilian contractors does not satisfy this requirement.

Attachment 1 of this Appendix is a format for preparing direct conversion requests. Each potential candidate for direct conversion should be reviewed on a case-by-case basis to ensure that both the in-house and contractor cost estimates are as accurate as possible.

C. The following provides general guidance for completion of a simplified cost comparison:

1. Estimated contractor costs should be based on either the past history of similar contracts at other installations or on the contracting officer's best estimate of what would constitute a fair and reasonable price.

2. For activities small in total size (45 or fewer civilian and military personnel):

a. Estimated in-house cost generally should not include overhead costs, as it is unlikely that they would be a factor for a small activity.

b. Similarly, estimated contractor costs generally should not include contract administration, one-time conversion costs, or other contract price add-ons associated with full cost comparisons.

3. For activities large in total size (45 or fewer civilian employees but a significant number of military personnel) all cost elements should be considered for both in-house and contractor estimated costs.

4. In either case, large or small, the 10 percent conversion differential contained in part IV of the supplement to OMB Circular A–76 should be applied.

5. Part IV of the supplement to OMB Circular A–76 shall be utilized to define the specific elements of cost to be estimated and for developing the MEO in the simplified cost comparison.

6. Clearance for CA simplified cost comparison decisions are required for Agencies without their own LA and PA offices. Those Agencies shall submit their draft decision brief to the Deputy Assistant Secretary of Defense, (Installations) room 3E787, the Pentagon, DC 20301 for release to Congress.

7. Provide CA simplified cost comparison approvals containing a certification of the MEO analysis, a copy of the approval to convert, a copy of the cost comparison fact sheet (attachment 1 to this appendix), with back-up data, before conversion to the following:

a. Committee on Appropriations of the House of Representatives and the Senate (11–45 civilian employees only)

b. Copies to the following:

(1) Assistant Secretary of Defense (Legislative Affairs), room 3D918, the Pentagon, Washington, DC 20301.

(2) Assistant Secretary of Defense (Public Affairs), room 2E757, the Pentagon, Washington, DC 20301.

(3) Office of Economic Adjustment, room 4C767, the Pentagon, Washington, DC 20301.

(4) Deputy Assistant Secretary of Defense, (Installations), room 3E787, the Pentagon, Washington, DC 20301. (exception—no copies required from Agencies that do not have legislative and public affairs offices)

8. Certification for all activities involving 11 to 45 DoD civilian employees. The installation commander must certify that the estimated in-house cost for each simplified cost comparison is based on a completed most efficient and cost effective organization analysis. Certification of this MEO analysis, as required by Public Law 101–165 shall be provided to the Committee on Appropriations of the House of Representatives and the Senate before conversion to contract performance.

Attachment 1 to Appendix C to Part 169a–Fact Sheet for Direct Conversions

Title: Direct Conversion for

(Activity/Function)
at

(Installation)
Description of activity:

Number of affected personnel:
CIV
(Authorizations)
MIL
(Authorizations)
Status of affected civilian employees:

(Special considerations such as a number of employees classified as "Section 3310," preference eligible veterans, minorities, handicapped. Also, include number of civilian authorizations currently vacant or filled by temporaries.)
Placement plans for affected civilian employees:

Justification for direct conversion:

(Narrative justification other than cost.)

Direct Conversion (details attached):
Estimated In-House Cost:
—Personnel Cost (including fringe benefits). ____
—Material and Supply Cost ____
—Other In-House Cost (if appropriate). ____
—Total Estimated in-House Cost. ____
Estimated Contractor Cost:
—Estimated Contract Price ____
—Contract Administration (if appropriate). ____
—Other Estimated Contractor Cost (if appropriate). ____
—Total Estimated Contractor Cost. ____
—Conversion Differential (10% of In-House Personnel Cost). ____
Adjusted Contractor Cost ____

Point of Contract:

14. Appendix D is proposed to be revised to read as follows:

Appendix D to Part 169a—Commercial Activities Management Information System (CAMIS)

A. Each DoD Component shall create and manage their A–76 data base. The A–76 data base shall have a comprehensive edit check on all input data in the computerized system. All data errors in the A–76 data base shall be corrected as they are found by the established edit check program. The data elements described in this Appendix represents the DoD minimum requirements.

B. On approval of a full cost comparison, a simplified cost comparison, or a direct conversion CA, the DoD Component shall create the initial entry using the format at attachment 1 of this Appendix for full cost comparisons or attachment 2 of this Appendix for all other conversions. Within 30 days of the end of each quarter the DoD Component shall submit automated tape or diskette, annotated with the number of records submitted and the record length. The data shall be in the format that has been agreed to by the DMDC at least 60 days prior to the end of the quarter. All data shall be in upper case. (TAPE MEDIUM—Use 9 track tape Extended Binary Coded Decimal Interchange Code (EBCDIC) 1600 or 6250 density, even parity). The DMDC shall use the automated data to update the CAMIS. If the DoD Component is unable to provide data in an automated format, the DMDC shall provide quarterly printouts of cost comparison records (CCR) and conversion/comparison records (DCSCCR) that may be annotated and returned within 30 days of the end of each quarter to the DMDC. The DMDC then shall use the annotated printouts to update the CAMIS.

Part I—Cost Comparison

The record for each full cost comparison is divided into six sections. Each of those sections contains information provided by the DoD Components. The first five sections are arranged in a sequence of milestone events occurring during a cost comparison. Each section is completed immediately following the completion of the milestone event. These are as follows:

1. Cost comparison is approved by DoD Component.
2. Solicitation is issued.
3. In-house and contractor costs are compared.
4. Contract is awarded or solicitation is canceled.
5. Contract starts.

The events in paragraphs B.1. through 5 of part I of this appendix are used as milestones because on their completion some elements of significant information on the cost comparison become known.

A sixth section is utilized for tracking historical data after the cost comparison is completed. This section contains data elements on contracts and cost information during the second and third performance period.

The data elements that comprise the six sections in part I, of this appendix, are defined in the CAMIS Entry and Update Instructions, part I of part II of this appendix.

Part II—Direct Conversions and Simplified Cost Comparisons

The record for each direct conversion and simplified cost comparison is divided into six sections. Each of the first five sections is completed immediately following the completion of the following events:

1. DoD component approves CA action.
2. The solicitation is issued.
3. In-house and contractor costs are compared.
4. Contract is awarded or solicitation is canceled.
5. Contract starts.

A sixth section is utilized for tracking historical data after the direct conversion or simplified cost comparison is completed. This section contains data elements on contracts and cost information during the second and third performance period.

The data elements that comprise the six sections in part II, of this appendix, are defined in the CAMIS Entry and Update Instruction, Part II—Direct Conversions and Simplified Cost Comparisons.

Camis Entry and Update Instructions

Part I—Cost Comparisons

The bracketed number preceding each definition in Section One through Six, below, is the DoD data element number. All date fields should be in the format YYMMDD (Data element reference DA–FA).

Section One

Event: DoD Component Approves Conducting a Cost Comparison

All entries in this section of the CCR shall be submitted by DoD Components on approving the start of a cost comparison. These entries shall be used to establish the CCR and to identify the geographical, organizational, political, and functional attributes of the activity (or activities) undergoing cost comparison as well as to provide an initial estimate of the manpower associated with the activity (or activities). The initial estimate of the manpower in this section of the CCR will be, in all cases, those manpower figures identified in the correspondence approving the start of the cost comparison. DoD Components shall enter the following data elements to establish a CCR:

(1) Cost Comparison Number. The number assigned by the DoD Component to uniquely identify a specific cost comparison. The first character of the cost comparison number must be a letter designating the DoD Component as noted in data element (3) of this appendix. The cost comparison number may vary in length from 5 to 10 characters, of which the second and subsequent may be alpha or numeric and assigned under any system desired by the DoD Component.

(2) Announcement and/or Approval Date. Date Congress is notified when required by section 502(a)(2)(A), appendix E, of this part or date DoD Component approves studies with less than 46 FTEs.

(3) DoD component code. Use the following codes to identify the Military Service or

VOL 56 ISS 249 DEC 27 1991 UMI

Defense Agency/Field Activity conducting the cost comparison:

A—Department of the Army
B—Defense Mapping Agency (DMA)
D—Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) (3D1)
D—Washington Headquarters Service (WHS)(3D2)
F—Department of the Air Force
G—National Security Agency/Central Security Service (NSA/CSS)
H—Defense Nuclear Agency (DNA)
J—Joint Chiefs of Staff (including the Joint Staff, Unified and Specified Commands, and Joint Service Schools)
K—Defense Information Systems Agency (DISA)
L—Defense Intelligence Agency (DIA)
M—United States Marine Corps (USMC)
N—United States Navy (USN)
R—Defense Contract Audit Agency (DCAA)
S—Defense Logistics Agency (DLA)
T—Defense Security Assistance Agency (DSAA)
V—Defense Investigative Service (DIS)
W—Uniformed Services University of the Health Sciences (USUHS)
Y—U.S. Army Corps of Engineers (USACE) Civil Works
2—Defense Finance & Accounting Service (DFAS)
3—Defense Commissary Agency (DeCA)

(4) Command Code. The code established by the DoD Component Headquarters to identify the command responsible for operating the CA undergoing cost comparison. A separate look-up listing or file shall be provided to the DMDC showing each unique command code and its corresponding command name. If the DoD Component chooses to submit the look-up table on diskette or tape, the format should be as follows:

Column	Entry
1 through 6 (left justify)	command code.
7	blank.
8 through 10 (left justify)	command code.

(5) Installation Code. The alpha and/or numeric designation established by the DoD Component Headquarters to identify the installation where the CA(s) under cost comparison is and/or are located physically. Two or more codes (for cost comparison packages encompassing more than one installation) should be separated by commas. A separate look-up listing or file shall be provided to the DMDC showing each unique installation code and its corresponding installation name. Also submission of the installation name in each record is allowed. If the DoD Component chooses to submit the look-up listing on diskette or tape, the format shall be as follows:

Column	Entry
1 through 10 (left justify)	installation code.
11	blank.
12 through 80 (left justify)	installation code.

The DMDC shall generate the installation name corresponding to the installation code submitted by the DoD Component, and display it with the code on the CAMIS.

(6) State Code. A two-position numeric code for the State (Data element reference ST–GA.) or State Equivalent (FIPS 55–2), as shown in attachment 1 of appendix B of this part, where element (5) is located. Two or more codes shall be separated by commas.

(7) Congressional District (CD) Code. Number of the CDs where element (5) of this section, is located. If representatives are elected "at large," enter "01" in this data element; for a delegate or resident commissioner (i.e., District of Columbia or Puerto Rico) enter "9." If the installation is located in two or more CDs, all CDs should be entered and separated by commas.

(8) JIRSG Area Code. The JIRSG Area that element (5) of this section, is assigned to for coordination of the DRIS Program, DoD 4000.19–R. This is a four-character alpha and/or numeric data element. For instance, "NO15" is the National Capital Region (NCR) (as published in the "DRIS Point of Contact Directory").

Note: A DoD Component may, at its option, report corresponding multiple values for the following geographical data elements: State code, CD, and JIRSG area code. These values shall be grouped and punctuated, as shown in the example, below, so that the proper relationship can be established between each installation code value and its corresponding set of geographical attribute values.

(5) Installation code	(6) State code	(7) CD code	(8) JIRSG area code
AAAAA,BBBBB,CCCCC	13,06,34	05,06;42,15	S003,WE10,*

When multiple values within a data element are reported for a single installation code, semicolons shall be used to separate each series of values and to indicate correspondence of each series to its respective installation value; commas shall be used to separate the values within a series. When only a single value (within a data element) is reported for each installation, the values shall be separated by commas. To denote an unknown or missing number of a series of values, the asterisk (*) symbol should be used.

The cost comparison package, above, involves three installations: AAAAA, BBBBB, and CCCCC. The first is located in Georgia, the second in California, and the third in New Jersey. AAAAA is in Georgia's 5th and 6th CDs, BBBBB is in California's 42nd CD, and CCCCC is in New Jersey's 15th CD. The first two installations are in JIRSG areas S003, and WE10, respectively. CCCCC is not within a JIRSG area.

(9) Title of Cost Comparison. The title that describes the CA(s) under cost comparison (for instance, "Facilities Engineering Package," "Installation Bus Service," or "Motor Pool"). Use a clear title, not acronyms or function codes in this data element.

(10) DoD Functional Area Code(s). The four- or five- alpha and/or numeric character designators listed in appendix A of this part, that describes the type of CA undergoing cost comparison. There would be one code for a single CA or possibly several codes for a large cost comparison package. A series of codes shall be separated by commas.

(11) Prior Operation Code. A single alpha character that identifies the mode of operation for the activity at the time the cost comparison is started. Despite the outcome of the cost comparison, this code does not change. The coding is as follows:

C—Contract
E—Expansion
I—In-house
N—New requirement

(12) Cost Comparison Status Code. A single alpha character that identifies the current status of the cost comparison. Enter one of the following codes:

B—Broken out. The cost comparison package has been broken into two or more separate cost comparisons. The previous CCR shall be excluded from future updates. (See data element (15) of this section).
C—Complete
P—In progress
X—Canceled. The CCR shall be excluded from future updates.
Z—Consolidated. The cost comparison has been consolidated with one or more other cost comparisons into a single cost comparison package. The CCR for the cost comparison that has been consolidated shall be excluded from future updates. (See data element (15) of this section).

13—Announcement—Personnel Estimate Civilian, and (14) Announcement—Personnel Estimate Military. The number of civilian and military personnel allocated to the CAs undergoing cost comparison when the cost comparison is approved by the DoD Component or announced the Congress. This number in all cases shall be those personnel figures identified in the correspondence announcing the start of a cost comparison and will include authorized positions, temporaries, and borrowed labor. The number is used to give a preliminary estimate of the size of the activity.

15—Revised and/or Original Cost Comparison Number. When a consolidation occurs, create a new CCR containing the attributes of the consolidated cost comparison. In the CCR of each cost comparison being consolidated, enter the cost

comparison number of the new CCR in this data element and code "Z" in data element (12) of this section. In the new CCR, this data element should be blank and data element (12) of this section, should denote the current status of the cost comparison. Once the consolidation has occurred, only the new CCR requires future updates.

When a single cost comparison is being broken into multiple cost comparison, create a new CCR for each cost comparison broken out from the original cost comparison. Each new CCR shall contain its own unique set of attributes; in data element (15) of this section, enter the cost comparison number of the original cost comparison from which each was derived, and in data element (12) of this section, enter the current status of each cost comparison. For the original cost comparison, data element (15) of this section, should be blank and data element (12) of this section, should have a code "B" entry. Only the derivative record entries require future updates.

When a consolidation or a breakout occurs, an explanatory remark shall be entered in data element (57) of this section (such as, "part of SW region cost comparison," or, "separated into three cost comparisons").

(16) PWS Scheduled Completion Date. The date the approved PWS is anticipated to be provided to the contracting officer for solicitation preparation at the start of a cost comparison.

(16A) PWS Actual Completion Date. The date the approved PWS is provided to the contracting officer for solicitation preparation.

Section Two

Event: The Solicitation is Issued

The entries in this section of the CCR provide information on the personnel authorized to perform the workload in the PWS, the number of workyears used to accomplish the workload in the PWS, and the type and kind of solicitation.

The DoD Component shall enter the following data elements at the first quarterly update subsequent to the issuance of the solicitation:

(17) Scheduled Solicitation Issuance Date. The date of solicitation as anticipated at the start of a cost comparison.

(17A) Date Solicitation Issued. The date the solicitation is issued by the contracting officer.

(18) Solicitation-Type Code. A one-character alpha designator that identifies the type of solicitation to obtain contract bids or offers. Use either the CBD as the source document or information received from the contracting officer for this entry. Solicitations under section 8(a) of "The Small Business Act" are negotiated. Enter one of the following codes:

N—Negotiated
S—Sealed Bid

(19) Solicitation-Kind Code. A one-character (or two-character, if "W" suffix is used) alpha designator indicating whether the competition for the contract has been limited to a specific class of bidders or offerors. Use either the CBD as the source document or information received from the contracting officer to enter one of the following codes:

A—Restrict to small business
B—Small Business Administration 8(a) Set Aside
C—"Javits-Wagner-O'Day Act" (JWOD)
D—Other mandatory sources
U—Unrestricted
W—(Optional suffix) Unrestricted after initial restriction

(20) Current Authorized Civilians, and (21) Current Authorized Military. The number of civilian and military authorizations allocated on the DoD Component's manpower documents to perform the work described in the PWS. This number refines the initial authorization estimate (*Section One*, data elements (13) and (14), of this section).

(22) Baseline Annual Workyears Civilian, and (23) Baseline Annual Workyears Military. The number of annual workyears it has taken to perform the work described by the PWS before the DoD Component conducts the MEO study of the in-house organization. Do not include contract monitor requirements. Military workyears include assigned, borrowed, diverted, and detailed personnel.

An annual workyear is the use of 2,087 hours (including authorized leave and paid time off for training). For example, when full-time employees, whose work is completely within the PWS are concerned, "one workyear" normally is comparable to "one employee" or two part-time employees, each working 1,043 hours in a FY. Also include in this total, the workyears for employees who do not work full-time on the work described by the PWS. For example, some portion of the workload is performed by persons from another work center who are used on an as needed basis. Their total hours performing that workload is 4,172 hours. This would be reflected as 2 workyears. Less than one-half a year of effort should be rounded down, and one-half a year or more should be rounded up.

Those workyear figures shall be the baseline for determining the personnel savings identified by the management study.

Section Three

Event: The In-House and the Contractor Costs of Operation are Compared

The entries in this section provide information on the date of the cost comparison (initial decision), the preliminary results, the number of bids or offers received, and the costing method used in the cost comparison.

The DoD Component shall enter the following data elements in the first quarterly update subsequent to the date of the comparison of in-house and contractor costs (date of initial decision):

(24) Scheduled Initial Decision Date. Date the initial decision is scheduled at the start of a cost comparison.

(24A) Actual Initial Decision Date. Date the initial decision is announced. The initial decision is based on the apparent low bid or offer and is subject to preaward surveys and resolution of all appeals and protests. In a sealed bid procurement, the initial decision is announced at bid opening. In a negotiated procurement, the initial decision is announced when the cost comparison is made between the in-house estimate and the proposal of the selected offeror.

(25) Cost Comparison Preliminary Results Code. A one-character alpha designator indicating the results of the cost comparison as announced by the contracting officer at the time the bids or offers are compared. The entities are limited to two possibilities:

C—Contract
I—In-house

(26) Cost Method Code. A one-character numeric designator indicating the procedures under which the cost comparison was and/or is being conducted. Enter one of the following codes:

1—Cost comparison conducted under the incremental costing procedures in effect before 1980.
2—Cost comparison conducted using the full costing procedures in DoD 4100.33–H, April 1980. (superseded September 9, 1985 by DoD Instruction 4100.33).
3—Cost comparison conducted under the alternative costing procedures implemented in the Department of Defense in March 1982.
4—Cost comparison conducted under the new costing procedures in the OMB Circular A–76 published August 4, 1983, and implemented by the Department of Defense in March 1984.

(27) Number of Bids or offers Received. The number of commercial bids or offers received by the contracting officer in response to the solicitation.

Section Four

Event: The Contracting Officer Either Awards the Contract or Cancels the Solicitation

The entries in this section identify the final result, information on the contract, the in-house bid, and costing information from the cost comparison record. The DoD Component shall enter the following data elements in the quarterly update subsequent to the date the contacting officer either awards a contract or cancels the solicitation:

(28) Contract Award or Solicitation Cancellation Date. For conversions to contract, this is the date a contract was awarded in a sealed bid solicitation or the date the contractor was authorized to proceed on a conditional award contract in a negotiated solicitation. For retentions in-house, this is the date the solicitation was canceled (when the contracting officer publishes an amendment to cancel the solicitation).

(29) Cost Comparison Final Result Code. A one-character alpha designator identifying the final result of the comparison between in-house and contractor costs; the contracting officer either awards the contract or cancels the solicitation. Enter one of the following codes:

C—Contact
I—In-house

(30) Decision Rationale Code. A one-character alpha designator that identifies the rationale for awarding a contract or canceling the solicitation. The work shall be performed in-house or by contractor based on cost, for other than cost, or the work shall be performed in-house because no satisfactory commercial source was available (no bids or offers were received or the pre-award survey

VOL 56 ISS 249 DE 27 1991 UMI

resulted in the determination that no commercial sources were responsive or responsible. Enter one of the following codes:

C—Cost
N—No satisfactory commercial source
O—Other

(31) Contract-Type Code. Enter one of the following alpha designators for the type of contract used in the cost comparison. This entry is required for all completed studies regardless of their outcome.

CPAF—Cost Plus Award Fee
CPFF—Cost Plus Fixed Fee
CPIF—Cost Plus Incentive Fee
FFP—Firm Fixed Price
FP–EPA—Fixed Price with Economic Price Adjustment
FPI—Fixed Price Incentive
TM–LH—Time and Material or Labor Hour

(31A) Prime Contractor Size. Enter one of the following:

L—Large business
S—small or small and/or disadvantaged business

(32) MEO Workyears. The number of annual workyears it takes to perform the work described in the PWS after the MEO study has been conducted. This entry will be equal to the number of annual workyears in the in-house bid. For data elements (33) through (36) of this section, enter all data after all adjustments required by appeal board decisions. Do not include the minimum cost differential (line 14 in the CCF or line 16 in the ENRC CCF) in the computation of any of these data elements. If a valid cost comparison was not conducted (i.e., all bidders or offerors disqualified, no bids or offers received, etc.) do not complete data elements (33), (34), and (36) of this section. Explain lack of valid cost data in data element (57) of this section, "DoD Component Comments"

(33) First Performance Period. Expressed in months, the length of time covered by the contract. Do not include any option periods.

(34) Cost Comparison Period. Expressed in months, the total period of operation covered by the cost comparison; this is the period used as the basis for data elements (35) and (36) of this section.

(35) Total In-House Cost ($000). Enter the total cost of in-house performance in thousands of dollars, rounded to the nearest thousand. This is the total of line 9 plus line 22 of the old CCF (line 6 of the new CCF or line 8 of the new ENRC CCF). An entry is required although the activity remains in-house due to absence of a satisfactory commercial source.

(36) Total Contract Cost ($000). Enter the total cost of contract performance in thousands of dollars, rounded to the nearest thousand. This is the total of line 13 of the CCF or line 15 of the ENRC CCF).

(37) Notification Date. The date Congress was notified that the DoD Component intends to convert a CA with 46 or more FTEs to contract performance or the MEO certification date for CAs with 11 to 45 FTEs.

(37A) Scheduled Contract or MEO Start Date. Date of the contract and/or MEO was scheduled to start at the beginning of a cost comparison.

Section Five

Event: The Contract Starts

The entries in this section identify the contract start date and the personnel actions taken as a result of the cost comparison.

The DoD Component shall enter the following date elements in the first quarterly update subsequent to the start of the contract:

(38) Contract/MEO Start Date. The actual date the contractor began operation of the contract or the Government implements the MEO.

(39) Permanent Employees Reassigned to Equivalent Positions. The number of permanent employees who were reassigned to positions of equivalent grade as of the contract start date.

(40) Permanent Employees Changed to Lower Positions. The number of permanent employees who were reassigned to lower grade positions as of the contract start date.

(41) Employees Taking Early Retirement. The number of employees who took early retirement as of the contract start date.

(42) Employees Taking Normal Retirement. The number of employees who took normal retirement as of the contract start date.

(43) Permanent Employees Separated. The number of permanent employees who were separated from Federal employment as of the contract start date.

(44) Temporary Employees Separated. The number of temporary employees who were separated from Federal employment as of the contract start date.

(45) Employees Entitled to Severance Pay. The estimated number of employees entitled to severance pay on their separation from Federal employment as of the contract start date.

(46) Total Amount of Severance Entitlements ($000). The total estimated amount of severance to be paid to all employees, in thousands of dollars, rounded to the nearest thousand, as of the contract start date.

(47) Number of Employees Hired by the Contractor. The number of estimated DoD civilian employees (full-time or otherwise) that will be hired by the contractors, or their subcontractors, at the contract start date.

Administrative Appeal

(48) Filed. Were administrative appeals filed?

N—No
Y—Yes

(49) Source. Who filed the appeal?

B—Both
C—Contractor
I—In-house

(50) Result. Were the appeals finally upheld? (if both appealed, explain result in data element (57) of this section).

N—No
P—Still in progress
Y—Yes

GAO Protest

(51) Filed. Was a protest filed with GAO?

N—No
Y—Yes

(52) Source. Who filed the protest?

B—Both
C—Contractor
I—In-house

(53) Result. Was the protest finally upheld? (explain result in data element (57) of this section).

N—No
P—Still in progress
Y—Yes

Arbitration

(54) Requested. Was there a request for arbitration?

N—No
Y—Yes

(55) Result. Was the case found arbitratible? (explain result in data element (57) of this section).

N—No
P—Still in progress
Y—Yes

General Information

* (56) Total Staff-Hours Expended. Enter the estimated number of staff-hours expended by the installation for the cost comparison. Include direct and indirect hours expended from the time of PWS until a final decision is made.

* (56A) Estimated Cost of Conducting the Cost Comparison. Enter the estimated cost of the total staff-hours identified in data element (56) of this section and non-labor (travel, reproduction costs, etc.) associated with the cost comparison.

(57) DoD Component Comments. Enter comments, as required, to explain situations that affect the conduct of the cost comparison. Where appropriate, precede each comment with the CAMIS data element being referenced.

(58) Effective Date. "As of" date of the most current update for the cost comparison. This data element will be completed by the DMDC.

(59) (Leave blank, for DoD computer program use).

Section Six

Event: Quarter Following Contract and/or Option Renewal

The entries in this section identify original costs, savings, information on subsequent performance periods and miscellaneous contract data. The DoD Component shall enter the following data elements in the first quarterly update annually.

(60) Original Cost of Function(s) ($000). The estimated total cost of functions prior to development of an MEO in thousands of dollars, rounded to the nearest thousand for the base year and option years (Begin entry after 1 October 1989).

(60A) Estimated Dollar Savings ($000). The DoD Component's estimated savings from the cost comparison for the base year plus option

* Data elements (56) and (56A) will only be completed by DoD Components that are participating in the pilot test of these data elements. Staff-hours expended will not include waiting time. The staff-hours expended for the management study phase will not be included or costed, since this is a practice used throughout the organization, irrespective of the A–76 program.

years, in thousands of dollars, rounded to the nearest thousand, for either in-house or contract performance. Documentation will be available at the DoD Component level (Begin entry after 1 October 1989).

(61) Contract or In-House Bid First Performance Period ($000). For studies resulting in continued in-house performance, enter the total in-house cost (Line 6 from the CCF) for the first performance period. For studies resulting in conversion to contract performance, enter the contract price (Line 7 from the CCF) for the first performance period. Figures shall be shown in thousands of dollars, rounded to the nearest thousand.

(61A) Actual Contract Costs First Performance Period ($000). Enter the actual first performance period contract cost including all change orders (Plus changes in the scope of work), in thousands of dollars, rounded to the nearest thousand. No entry is required when the function remained in-house.

(61B) Adjusted Contract Costs First Performance Period ($000). Enter an adjusted first performance period contract cost that includes actual DoL wage increases and costs for omissions and/or errors in the original PWS, but exclude new requirement costs and their associated wage increases, in thousands of dollars, rounded to the nearest thousand (Begin entry after 1 October 1989).

(61C) Adjusted In-House Costs First Performance Period ($000). Enter the total first performance period in-house cost of the MEO, including civil service pay increases, but excluding increases associated with new mission requirements not included in the original scope of work of the function. Show costs in thousands of dollars, rounded to the nearest thousand. Entry is required even if the function went to contract. (Begin entry after 1 October 1989).

(61D) Actual In-House Costs First Performance Period Only ($000). Enter the actual first performance period in-house cost including changes in the scope of work, in thousands of dollars, rounded to the nearest thousand. No entry is required when the function is contracted and is not required for the CAMIS data base for the second and third performance periods (Begin entry after 1 October 1989).

(61E) (Leave blank).

(62) Contract or In-House Bid Second Performance Period ($000). For studies resulting in continued in-house performance, enter the total in-house cost (Line 6 from the CCF) for the second performance period. For studies resulting in conversion to contract performance, enter the contract price (Line 7 from the CCF) for the second performance period. Figures shall be shown in thousands of dollars, rounded to the nearest thousand.

(62A) Actual Contract Costs Second Performance Period ($000). Enter the actual second performance period contract cost including all change orders (Plus changes in the scope of work), in thousands of dollars, rounded to the neatest thousand. No entry is required when the function remained in-house.

(62B) Adjusted Contract Costs Second Performance Period ($000). Enter an adjusted second performance period contract cost that includes actual DoL wage increases and costs for omissions and/or errors in the original PWS, but exclude new requirement costs and their associated wage increases, in thousands of dollars, rounded to the nearest thousand (Begin entry after 1 October 1989).

(62C) Adjusted In-House Costs Second Performance Period ($000). Enter the total second performance period in-house cost of the MEO, including civil service pay increases, but excluding increases associated with new mission requirements not included in the original scope of work of the function. Show costs in thousands of dollars, rounded to the nearest thousand. Entry is required even if the function went to contract (Begin entry after 1 October 1989).

(62D) (Leave blank).

(63) Contract or In-House Bid Third Performance Period ($000). For studies resulting in continued in-house performance, enter the total in-house cost (Line 6 from the CCF) for the third performance period. For studies resulting in conversion to contract performance, enter the contract price (Line 7 from the CCF) for the third performance period. Figures shall be shown in thousands of dollars, rounded to the nearest thousand.

(63A) Actual Contract Costs Third Performance Period ($000). Enter the actual third performance period contract cost including all change orders (Plus changes in the scope of work), in thousands of dollars, rounded to the neareat thousand. No entry is required when the function remained in-house.

(63B) Adjusted Contract Costs Third Performance Period ($000). Enter an adjusted third performance period contract cost that includes actual DoL wage increases and costs for omissions and/or errors in the original PWS, but exclude new requirement costs and their associated wage increases, in thousands of dollars, rounded to the nearest thousand (Begin entry after 1 October 1989).

(63C) Adjusted In-House Costs Third Performance Period ($000). Enter the total third performance period in-house cost of the MEO, including civil service pay increases, but excluding increases associated with new mission requirements not included in the original scope of work of the function. Show costs in thousands of dollars, rounded to the nearest thousand. Entry is required even if the function went to contract (Begin entry after 1 October 1989).

(63D) (Leave blank).

(64) Contractor Change. Enter one of the following alpha designators to indicate whether the contract for the second or third performance period has changed from the original contractor.

N—No, the contractor has not changed.
Y—Yes, the contractor has changed.

Data elements (65) through (66) of this section, are not required if the answer to data element (64), of this section, is no (N).

(65) New Contractor Size (If data element (66), below, contains the alpha designator "T" or "R," no entry is required).

L—New contractor is large business
S—New contractor is small and/or small disadvantaged business.

(66) Reason for Change. DoD Components shall enter one of the following designators listed below, followed by the last two digits of the FY in which the change occurred.

C—Contract workload consolidated with other existing contract workload.
D—New contractor takes over because original contractor defaults.
I—Returned in-house because original contractor defaults within 12 months of start date and in-house bid is the next lowest.
N—New contractor replaced original contractor because Government opted not to renew contract in option years.
R—Returned in-house temporarily pending resolicitation due to contract default, etc.
U—Contract workload consolidated into a larger (umbrella) cost comparison.

(67) Contract Administration Staffing. The actual number of contract administration personnel hired to administer the contract.

Comis Entry and Update Instruction

Part II—Direct Conversions and Simplified Cost Comparisons

The bracketed number preceding each definition in Sections One through Six, of this section is the DoD data element number. All date fields should be in the format YYMMDD (Data element reference DA–FA).

Section One

EVENT: DoD Component Approves the CA Action

All entries in this section of the DCSCC record shall be submitted by DoD Components on approving the start of a cost comparison. These entries shall be used to establish the DCSCC and to identify the geographical, organizational, political, and functional attributes of the activity (or activities) undergoing conversion/comparison as well as to provide an initial estimate of the manpower associated with the activity (or activities). The initial estimate of the personnel in this section of the DCSCC will be, in all cases, those personnel figures identified in the correspondence approving the start of the conversion/comparison. DoD Components shall enter the following data elements to establish a DCSCC:

(1) Direct Conversion/Simplified Cost Comparison Number. The number assigned by the DoD Component to uniquely identify a specific conversion/comparison. The first character of the conversion/comparison number must be a letter designating the DoD Component as noted in data element (3) of this section. The conversion/comparison number may vary in length from 5 to 10 characters, of which the second and subsequent may be alpha or numeric and assigned under any system desired by the DoD Component.

(2) Approval Date. The date the simplified cost comparison or direct conversion was approved.

(3) DoD Component Code. Use the following codes to identify the Military Service or Defense Agency/Field Activity conducting the cost comparison:

A—Department of the Army
B—Defense Mapping Agency (DMA)
C—Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) (3D7)
D—Washington Headquarters Service (WHS) (3D2)

VOL
56
ISS
249
DE
27
1991
UMI

F—Department of the Air Force
G—National Security Agency/Central Security Service (NSA/CSS)
H—Defense Nuclear Agency (DNA)
J—Joint Chiefs of Staff (including the Joint Staff, Unified and Specified Commands, and Joint Service Schools)
K—Defense Information Systems Agency (DISA)
L—Defense Intelligence Agency (DIA)
M—United States Marine Corps (USMC)
N—United States Navy (USN)
R—Defense Contract Audit Agency (DCAA)
S—Defense Logistics Agency (DLA)
T—Defense Security Assistance Agency (DSAA)
V—Defense Investigative Service (DIS)
W—Uniformed Services University of the Health Sciences (USUHS)
Y—U.S. Army Corps of Engineers (USACE) Civil Works
2—Defense Finance & Accounting Service (DFAS)
3—Defense Commissary Agency (DeCA)

(4) Command Code. The code established by the DoD Component Headquarters to identify the command responsible for operating the CA undergoing conversion/comparison. A separate look-up listing or file shall be provided to the DMDC showing each unique command code and its corresponding command name. If the DoD Component chooses to submit the look-up table on diskette or tape, the format should be as follows:

Column	Entry
1 through 6 (left justify)	command code.
7	blank.
8 through 80 (left justify)	command code.

(5) Installation Code. The alpha and/or numeric designation established by the DoD Component Headquarters to identify the installation where the CA(s) under conversion/comparison is and/or are located physically. Two or more codes (for conversion/comparison packages encompassing more than one installation) should be separated by commas. A separate look-up listing or file shall be provided to the DMDC showing each unique installation code and its corresponding installation name. Also submission of the installation name in each record is allowed. If the DoD Component chooses to submit the look-up listing on diskette or tape, the format shall be as follows:

Column	Entry
1 through 10 (left justify)	installation code.
11	blank.
12 through 80 (left justify)	installation name.

The DMDC shall generate the installation name corresponding to the installation code submitted by the DoD Component, and display it with the code on the CAMIS.

(6) State Code. A two-position numeric code for the State (Data element reference ST–GA.) or State Equivalent (FIPS 55–2), as shown in attachment 1 to Appendix B of this part, where data element (5) of this section is located. Two or more codes shall be separated by commas.

(7) Congressional District (CD) Code. Number of the CDs where date element [5] of this section, is located. If representatives are elected "at large," enter "01" in this data element; for a delegate or resident commissioner (i.e., District of Columbia or Puerto Rico) enter "98." If the installation is located in two or more CDs, all CDs should be entered and separated by commas.

(8) JIRSG Area Code. The JIRSG Area that data element [5] of this section is assigned to for coordination of the DRIS Program, DoD 4000.19–R. This is a four-character alpha and/or numeric date element. For instance, "NO15" is the National Capitol Region (NCR) (as published in the "DRIS Point of Contact Directory").

NOTE: A DoD Component may report corresponding multiple values for the following geographical data elements: State, CD, and JIRSG area code. These values shall be grouped and punctuated, as shown in the example, below, so that the proper relationship can be established between each installation code value and its corresponding set of geographical attribute values.

(5) Installation code:
AAAAA,BBBBB,CCCCC.
(6) State code: 13,06,34.
(7) CD code: 05,06;42,15.
(8) JIRSG area code: S003,WE10,*.

When multiple values within a data element are reported for a single installation code, semicolons shall be used to separate each series of values and to indicate correspondence of each series to its respective installation value; commas shall be used to separate the values within a series. When only a single value (within a data element) is reported for each installation, the values shall be separated by commas. To denote an unknown or missing number of a series of values, the asterisk (*) symbol should be used.

The conversion/comparison package, above, involves three installations: AAAAA, BBBBB, and CCCCC. The first is located in Georgia, the second in California, and the third in New Jersey. AAAAA is in Georgia's 5th and 6th CDs, BBBBB is in California's 42nd CD, and CCCCC is in New Jersey's 15th CD. The first two installations are in JIRSG areas S003, and WE10, respectively, CCCCC is not within a JIRSG area.

(9) Title of Conversion/Comparison. The title that describes the CA(s) under conversion/comparison (for instance, "Facilities Engineering Package," "Installation Bus Service," or "Motor Pool"). Use a clear title, not acronyms or function codes in this data element.

(10) DoD Functional Area Code(s). The four- or five- alpha and/or numeric character designators listed in Appendix A of this part, that describes the type of CA undergoing conversion/comparison. This would be one code for a single CA or possibly several codes for a large cost comparison package. A series of codes shall be separated by commas.

(11) Prior Operation Code. A single alpha character that identifies the mode of operation for the activity at the time the conversion/comparison is started. Despite the outcome of the conversion/comparison, this code does not change. The coding is as follows:

C—Contract.
E—Expansion.
I—In-house.
N—New requirement.

(12) Conversion/Comparison Status Code. A single alpha character that identifies the current status of the conversion/comparison. Enter one of the following codes:

B—Broken out. The cost comparison package has been broken into two or more separate cost comparisons. The previous DCSCCR shall be excluded from future updates. (See data element (15) of this section).
C—Complete.
P—In progress.
X—Canceled. The DCSCCR shall be excluded from future updates.
Z—Consolidated. The cost comparison has been consolidated with one or more other cost comparisons into a single cost comparison package. The DCSCCR for the cost comparison that has been consolidated shall be excluded from future updates. (See data element (15) of this section).

(13) Announcement—Personnel Estimate Civilian, and (14) Announcement—Personnel Estimate Military. The number of civilian and military personnel allocated to the CAs undergoing conversion/comparison at the time the start of the conversion/comparison is approved. This number in all cases shall be those personnel figures identified when the conversion/comparison was approved and will include authorized positions, temporaries, and borrowed labor. The number is used to give a preliminary estimate of the size of the activity.

(15) Revised and/or Original Cost Comparison Number. When a consolidation occurs, create a new DCSCC containing the attributes of the consolidated conversion/comparison. In the DCSCC of each conversion/comparison being consolidated, enter the conversion/comparison number of the new DCSCC in this data element and code "Z" in data element (12) of this section. In the new DCSCC, this data element should be blank and data element (12) of this section, should denote the current status of the conversion/comparison. Once the consolidation has occurred, only the new DCSCC requires future updates.

When a single conversion/comparison is being broken into multiple conversion/comparisons, create a new DCSCC for each conversion/comparison broken out from the original conversion/comparison. Each new DCSCC shall contain its own unique set of attributes; in date element (15) of this section, enter the conversion/comparison number of the original conversion/comparison from which each was derived, and in data element (12) of this section, enter the current status of each conversion/comparison. For the original conversion/comparison, data element (15) of this section, should be blank and data element (12) of this section, should have a

code "B" entry. Only the derivative record entries require future updates.

When a consolidation or a breakout occurs, an explanatory remark shall be entered in data element (56) of this section (such as, "part of SW region cost comparison," or, "separated into three cost comparisons").

(16) PWS Scheduled Completion Date. The date the approved PWS is anticipated to be provided to the contracting officer for solicitation preparation at the start of a cost comparison.

(16A) PWS Actual Completion Date. The date the approved PWS is provided to the contracting officer for solicitation preparation.

Section Two

Event: The Solicitation is Issued

The entries in this section of the DCSCC provide information on the personnel authorized to perform the workload in the PWS, the number of workyears used to accomplish the workload in the PWS, and the type and kind of solicitation.

The DoD Component shall enter the following data elements at the first quarterly update subsequent to the issuance of the solicitation:

(17) Scheduled Solicitation Issuance Date. The date of solicitation as anticipated at the start of a cost comparison.

(17A) Date Solicitation Issued. The date the solicitation is issued by the contracting officer.

(18) Solicitation-Type Code. A one-character alpha designator that identifies the type of solicitation used to obtain contract bids or offers. Use either the CBD as the source document or information received from the contracting officer for this entry. Solicitations under section 8(a) of "The Small Business Act" are negotiated. Enter one of the following codes:

N—Negotiated.
S—Sealed Bid.

(19) Solicitation-Kind Code. A one-character (or two-character, if "W" suffix is used) alpha designator indicating whether the competition for the contract has been limited to a specific class of bidders or offerors. Use either the CBD as the source document or information received from the contracting officer to enter one of the following codes:

A—Restrict to small business.
B—Small Business Administration 8(a) Set Aside.
C—"Javits-Wagner-O'Day Act" (JWOD).
D—Other mandatory sources.
U—Unrestricted.
W—(Optional suffix) Unrestricted after initial restriction.

(20) Current Authorized Civilians, and (21) Current Authorized Military. The number of civilian and military authorizations allocated on the DoD Component's manpower documents to perform the work described in the PWS. This number refines the initial authorization estimate (Section One, date elements (13) and (14) of this section).

(22) Baseline Annual Workyears Civilian, and (23) Baseline Annual Workyears Military. The number of annual workyears it has taken to perform the work described by the PWS before the DoD Component conducts the MEO study of the in-house organization. Do not include contract monitor requirements. Military workyears include assigned, borrowed, diverted, and detailed personnel.

An annual workyear is the use of 2,087 hours (including authorized leave and paid time off for training). For example, when full-time employees, whose work is completely within the PWS are concerned, "one workyear" normally is comparable to "one employee" or two part-time employees, each working 1,043 hours in a FY. Also include in this total, the workyears for employees who do not work full-time on the work described by the PWS. For example, some portion of the workload is performed by persons from another work center who are used on an as needed basis. Their total hours performing that workload is 4,172 hours. This would be reflected as 2 workyears. Less than one-half a year of effort should be rounded down, and one-half a year or more should be rounded up.

Those workyear figures shall be the baseline for determining the personnel savings identified by the management study.

Section Three

Event: The In-House and the Contractor Costs of Operation are Compared

The entries in this section provide information on the date of the conversion/comparison (initial decision), the preliminary results, the number of bids or offers received, and the costing method used in the conversion/comparison.

The DoD Component shall enter the following data elements in the first quarterly update subsequent to the date of the comparison of in-house and contractor costs (date of initial decision):

(24) Scheduled Initial Decision Date. Date the initial decision is scheduled at the start of a conversion/comparison.

(24A) Actual Initial Decision Date. Date the initial decision is announced. The initial decision is based on the apparent low bid or offer and is subject to preaward surveys and resolution of all appeals and protests. In a sealed bid procurement, the initial decision is announced at bid opening. In a negotiated procurement, the initial decision is announced when the cost comparison is made between the in-house estimate and the proposal of the selected offeror. In a conversion, the initial decision is announced when the in-house cost estimate is evaluated against proposed contractor proposals.

(25) Cost Comparison Preliminary Results Code. A one-character alpha designator indicating the results of the cost comparison as announced by the contracting officer at the time of the comparison (No entry required for a direct conversion). The entries are limited to two possibilities:

C—Contract.
I—In-house.

(26) Cost Method Code. A one-character numeric designator indicating the procedures under which the conversion/comparison was and/or is being conducted. Enter one of the following codes:

1—Simplified cost comparison conducted under the new costing procedures in the OMB Circular A–76 published August 4, 1983, and implemented by the Department of Defense in March 1984.
2—Direct conversion implemented by the Department of Defense in October 1988.

(27) Number of Bids or Offers Received. The number of commercial bids or offers received by the contracting officer.

Section Four

Event: The Contracting Officer Either Awards the Contract or Cancels the Solicitation

The entries in this section identify the final result, information on the contract, the in-house bid, and costing information from the direct conversion/simplified cost comparison fact sheet.

The DoD component shall enter the following data elements in the first quarterly update subsequent to the date the contracting officer either awards a contract or cancels the solicitation:

(28) Contract Award or Solicitation Cancellation Date. For conversions to contract, this is the date a contract was awarded in a sealed bid solicitation or the date the contractor was authorized to proceed on a conditional award contract in a negotiated solicitation. For retentions in-house, this is the date the solicitation was canceled (when the contracting officer publishes an amendment to cancel the solicitation).

(29) Cost Comparison Final Result Code. A one-character alpha designator identifying the final result of the comparison between in-house and contractor costs; the contracting officer either awards the contract or cancels the solicitation. Enter one of the following codes:

C—Contract.
I—In-house.

(30) Decision Rationale Code. A one-character alpha designator that identifies the rationale for awarding a contract or canceling the solicitation. The work shall be performed in-house or by contractor based on cost, for other than cost, or the work shall be performed in-house because no satisfactory commercial source was available (no bids or offers were received or the pre-award survey resulted in the determination that no commercial sources were responsive or responsible). Enter one of the following codes:

C—Cost.
N—No satisfactory commercial source.
O—Other.

(31) contract-Type Code. Enter one of the following alpha designators for the type of contract used in the cost comparison. This entry is required for all completed studies, regardless of their outcome.

CPAF—Cost Plus Award Fee.
CPFF—Cost Plus Fixed Fee.
CPIF—Cost Plus Incentive FEE.
FFP—Firm Fixed Price.
FP-EPA—Fixed Price with Economic Price Adjustment.
FPI—Fixed Price Incentive.
TM-LH—Time and Material or Labor Hour.

(31A) Prime Contractor Size. Enter one of the following:

VOL 56 ISS 249 DEC 27 1991 UMI

L—Large business.
S—Small or small and/or disadvantaged business.

(32) MEO Workyears. The number of annual workyears it takes to perform the work described in the PWS after the MEO study has been conducted. This entry will be equal to the number of annual workyears in the in-house bid (No entry required for a direct conversion).

For data elements (33) through (36) of this section, enter all data after all adjustments required by appeal board decisions. Do not include minimum cost differential in the computation of any of these data elements. If a valid conversion/comparison was not conducted (i.e., all bidders or offerors disqualified, no bids or offers received, etc.) do not complete data elements (33), (34) and (36) of this section. Explain lack of valid cost data in data element (56) of this section, "DoD Component Comments".

(33) First Performance Period. Expressed in months, the length of time covered by the contract. Do not include any option periods.

(34) Conversion/Comparison Period. Expressed in months, the total period of operation covered by the conversion or cost comparison; this is the period used as the basis for data elements (35) and (36) of this section.

(35) Total In-House Cost ($000). Enter the total estimated cost of in-house performance for the base year plus option years, in thousands of dollars, rounded to the nearest thousand. An entry is required although the activity remains in-house due to absence of a satisfactory commercial source (No entry required for a direct conversion).

(36) Total Contract Cost ($000). Enter the total estimated cost of contract performance for the base year plus option years, in thousands of dollars, rounded to the nearest thousand.

(37) Notification Date. The date the MEO certification is sent to Congress. DoD Components shall enter a date when data element (20) of this section, contains a figure greater than 10 (No entry required for a direct conversion).

(37A) Scheduled Contract or MEO Start Date. Date the contract and/or MEO was scheduled to start at the beginning of a conversion/comparison.

Section Five

Event: The Contract Starts

The entries in this section identify the contract start date and the personnel actions taken as a result of the conversion/comparison.

The DoD Component shall enter the following data elements in the first quarterly update subsequent to the start of the contract:

(38) contract/MEO Start Date. The actual date the contractor began operation of the contract or the Government implements the MEO.

(39) Permanent Employees Reassigned to Equivalent Positions. The number of permanent employees who were reassigned to positions of equivalent grade as of the contract start date.

(40) Permanent Employees Changed to Lower Positions. The number of permanent employees who were reassigned to lower grade positions as of the contract start date.

(41) Employees Taking Early Retirement. The number of employees who took early retirement as of the contract start date.

(42) Employees Taking Normal Retirement. The number of employees who took normal retirement as of the contract start date.

(43) Permanent Employees Separated. The number of permanent employees who were separated from Federal employment as of the contract start date.

(44) Temporary Employees Separated. The number of temporary employees who were separated from Federal employment as of the contract start date.

(45) Employees Entitled to Severance Pay. The estimated number of employees entitled to severance pay on their separation from Federal employment as of the contract start date.

(46) Total Amount of Severance Entitlements ($000). The total estimated amount of severance to be paid to all employees, in thousands of dollars, rounded to the nearest thousand, as of the contract start date.

(47) Number of Employees Hired by the Contractor. The number of estimated DoD civilian employees (full-time or otherwise) that will be hired by the contractors, or their subcontractors, at the contract start date.

Administrative Appeal

(48) Filed. Were administrative appeals filed?

N—No.
Y—Yes.

(49) Source. Who filed the appeal?

B—Both.
C—Contractor.
I—In-House.

(50) Result. Were the appeals finally upheld? (if both appealed, explain result in data element (56) of this section).

N—No.
P—Still in Progress.
Y—Yes.

GAO Protest

(51) Filed. Was a protest filed with GAO?

N—No.
Y—Yes.

(52) Source. Who filed the protest?

B—Both.
C—Contractor.
I—In-House.

(53) Result. Was the protest finally upheld? (explain result in data element (56) of this section).

N—No.
P—Still in Progress.
Y—Yes.

Arbitration

(54) Requested. Was there a request for arbitration?

N—No.
Y—Yes.

(55) Result. Was the case found arbitratible? (explain result in data element (56) of this section).

N—No.
P—Still in Progress.
Y—Yes.

General Information

(56) DoD Component Comments. Enter comments, as required, to explain situations that affect the conduct of the conversion/comparison. Where appropriate, precede each comment with the CAMIS data element being referenced.

(57) Effective Date. "As of" date of the most current update for the conversion/comparison. This data element will be completed by the DMDC.

(58) (Leave blank, for DoD computer program use).

Section Six

Event: Quarter Following Contract and/or Option Renewal

The entries in this section identify original costs, savings, information on subsequent performance periods and miscellaneous contract data. The DoD Component shall enter the following data elements in the first quarterly update annually.

(59) Actual Contract Cost First Performance Period ($000). Enter the actual contractor cost for the first performance period, in thousands of dollars, rounded to the nearest thousand.

(60) Actual Contract Cost Second Performance Period ($000). Enter the actual contractor cost for the second performance period, in thousands of dollars, rounded to the nearest thousand.

(61) Actual Contract Cost Third Performance Period ($000). Enter the actual contractor cost for the third performance period, in thousands of dollars, rounded to the nearest thousand.

(62) Contractor Change. Enter one of the following alpha designator to indicate whether the contract for the second or third performance period has changed from the original contractor.

N—No, the contractor has not changed.
Y—Yes, the contractor has changed.

Data elements (63) through (64) of this section, are not required if the answer to data element (62) of this section, is no (N).

(63) New Contractor Size (If data element (64) of this section contains the alpha designator "T" or "R," no entry is required).

L—New contractor is large business.
S—New contractor is small and/or small disadvantaged business.

(64) Reason for Change. DoD Components shall enter one of the following designators listed below, followed by the last two digits of the FY in which the change occurred.

C—Contract workload consolidated with other existing contract workload.
D—New contractor takes over because original contractor defaults.
I—Returned in-house because of original contractor defaults; etc., within 6 months of start date and in-house bid is the next lowest.

N—New contractor replaced original contractor because Government opted not to renew contract in option years.

R—Returned in-house temporarily pending resolicitation due to contract default, etc.

U—Contract workload consolidated with other existing contract workload.

(65) Contract Administration Staffing. The actual number of contract administration personnel hired to administer the contract.

BILLING CODE 3810–01–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 80 and 86

[FRL–4087–8]

Control of Air Pollution From New Motor Vehicles and New Motor Vehicle Engines: Evaporative Emission Regulations for Gasoline- and Methanol-Fueled Light-Duty Vehicles and Light-Duty Trucks and Heavy-Duty Vehicles

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public workshop; changed date.

SUMMARY: This notice announces a change in the date for the public workshop related to EPA's proposed evaporative emission control regulations.

DATES: The public workshop will be held on January 28, 1992. It will start at 9 a.m. and will continue throughout the day as long as necessary to complete testimony. Comments will be accepted until February 11, 1992.

ADDRESSES: The public workshop will be at Ulrich Hall, Domino's Farms, 24 Frank Lloyd Wright Dr., Ann Arbor, Michigan 48105 (telephone 313–930–5032).

FOR FURTHER INFORMATION CONTACT: Mr. Alan Stout, Standards Development and Support Branch, Emission Control Technology Division, U.S. Environmental Protection Agency, 2565 Plymouth Road, Ann Arbor, Michigan 48105. Telephone: (313) 741–7805.

For copies of support documents, contact: Ms. Margaret Borushko, (313) 668–4272.

SUPPLEMENTARY INFORMATION: On December 17, 1991 EPA published a notice in the **Federal Register** announcing a public workshop related to EPA's proposed evaporative emission control regulations (56 FR 65461). In response to requests from the Association of International Automobile Manufacturers and the Motor Vehicle Manufacturers Association, EPA is changing the date of the workshop from January 8, 1992 to January 28, 1992.

The official record of the workshop will be kept open for 14 days following the workshop to allow submission of rebuttal and supplementary testimony.

Mr. Richard D. Wilson, Director of the Office of Mobile Sources, will be the presiding officer of the workshop. A court reporter will be present at the workshop to make a transcript of the proceedings and a copy will be placed in the docket. Anyone desiring a copy of the transcript should make individual arrangements with the court reporter at the time of the workshop.

Dated: December 20, 1991.

Michael Shapiro,

Acting Assistant Administrator for Air and Radiation.

RIN 2127–AE29

Federal Motor Vehicle Safety Standards, Electric Vehicles

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: This advance notice of proposed rulemaking requests comments on potential safety-related issues associated with the use of electric vehicles and solicits ideas on whether NHTSA should, and if so how it might, address those problems through possible new and amended Federal Motor Vehicle Safety Standards. The purpose of this notice is to solicit comments to help NHTSA determine what existing Standards may need modification to meet the needs associated with the introduction of significant numbers of electric vehicles and what new Standards may have to be written specifically for electric vehicles.

DATES: The comment closing date for the advance notice is March 27, 1992.

ADDRESSES Comments should refer to the docket number and notice number shown above and be submitted in writing to: Docket Section, National Highway Traffic Safety Administration, room 5109, 400 Seventh Street SW., Washington, DC 20590. Docket hours are 9:30 a.m. to 4 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Samuel Daniel, Office of Rulemaking, NHTSA (202–366–4921).

SUPPLEMENTARY INFORMATION:

I. Introduction

The National Highway Traffic Safety Administration (NHTSA) is reviewing the safety needs of electrically powered vehicles (EVs) and considering possible rulemaking. The agency is taking this action in response to the increasing attention being given EVs as a means of achieving a cleaner and healthier environment. Due primarily to Federal and State requirements based upon environmental considerations, EVs appear likely to be introduced into the nation's motor vehicle fleet in significant numbers within the next 3 to 5 years.

NHTSA has twice previously reviewed the Federal Motor Vehicle Safety Standards (FMVSS) to determine their appropriateness for electric vehicles and published the findings in response to Congressional requirements. On those occasions, the agency concluded that all FMVSS are applicable to EVs although some of the crash avoidance standards may have to be revised because they contain text specifically addressing internal combustion engines or engine components. The agency also concluded that additional safety standards may be required by unique EV safety hazards. Most of these unique problems concern battery re-charging and the management of battery materials during a collision.

No rulemaking was initiated by the agency following those earlier reviews because the prospect of significant numbers of EVs being produced was much more uncertain than it is now.

The purpose of this advance notice is to seek comments on any existing safety standards that may need to be amended to address EV safety problems, and any new standard that may need to be developed specifically for EVs. Under the National Traffic and Motor Vehicle Safety Act of 1966 (the Act), NHTSA is responsible for establishing safety standards for new vehicles and equipment to reduce motor vehicle accidents, deaths, and injuries. NHTSA is issuing this notice now because it wishes to have any necessary safety standards in place as soon as possible to support the safe introduction and operation of EVs. To delay rulemaking until significant production of EVs actually begins could not only fail to prevent avoidable safety problems, but also disrupt and impede the development and commercialization of EVs.

II. Background

The federal government has been involved in activities designed to stimulate the development and marketing of EVs since 1976 when the Electric and Hybrid Vehicle Research, Development, and Demonstration Act (Pub. L. 94–413) was enacted. Pursuant to that law, the Department of Energy (DOE) has sponsored the development of several hundred EVs and evaluated their performance over the past 10 years.

Public Law 94–413 also required the Department of Transportation (DOT) to conduct a study of the current and future applicability of the FMVSS and regulations to electric and hybrid vehicles. NHTSA published a study of EV safety requirements in 1978 entitled "Applicability of Federal Motor Vehicle Safety Standards to Electric and Hybrid Vehicles." The study found that most existing FMVSS were suitable, although some containing reference to internal combustion engines or engine components would require modifications. The study also determined that new FMVSS may be necessary to address safety hazards unique to EVs. Specifically, it identified one standard addressed to isolating the electrical system from the occupant compartment to reduce the electric shock hazard, and another to the management of battery systems to reduce the potential for electrolyte spillage and explosion during a crash.

In 1988, the Alternative Motor Fuels Act (Pub. L. 100–494) was enacted. It included a requirement for a review by DOT, DOE, and the Environmental Protection Agency (EPA) of their respective regulations and a report identifying those rules or standards that are barriers to introduction of EVs into commerce. DOT's report to Congress in response to Public Law 100–494 is titled "Federal Regulations Needing Amendment to Stimulate the Production and Introduction of Electric/Solar Vehicles." The report, published in January 1990, reviewed EVs with respect to NHTSA safety regulations and procedures. The study concluded that EV performance (*i.e.*, range and acceleration) has been the major obstacle to the introduction of EVs into the marketplace and that federal safety standards have not been a significant obstacle. The initial cost of EVs has been another deterrent since it is not competitive with that of conventional internal combustion engine vehicles due, in large part, to low production volumes. The review reached many of the same conclusions regarding the applicability of the FMVSS to EVs that were reported in 1978 in response to Public Law 94–413. The principal conclusions in the later report were that existing standards for brakes, tires, and windshield defrosting and defogging will probably need to be modified so that they are suitable as they apply to EVs. The report also concluded that new standards might be required, primarily in the area of crashworthiness, to address the safety problems that electric propulsion systems might pose during a collision. The three areas of concern were the potential for electric shock hazard, occupant contact with toxic electrolytes, and battery system explosion.

Interest in the suitability of Federal regulations as they affect EVs has increased in the last several years in response to the efforts of many major foreign and domestic automobile manufacturers to develop electrically powered passenger cars, trucks, and multi-purpose vehicles (MPV). The manufacturers are also preparing to build demonstration vehicles for evaluation in 2 to 3 years. However, at this time, detailed information concerning EV development by other than major manufacturers is difficult to obtain. Small manufacturers, and companies which convert conventional vehicles to electric power have built and tested prototype EVs in the recent past and made public their intent to market EVs in the near future. The electrical energy storage systems for the initial models planned for introduction in the next 2 years will primarily be advanced lead-acid batteries. Considerable research has been conducted on sodium and zinc-based batteries as well as several other systems. It is anticipated that production EV's with these types of battery systems will be built in 4 to 6 years.

The primary impetus for the introduction of large numbers of EVs into the U.S. marketplace is a regulation of the California Air Resources Board. Similar regulations are under consideration by other States. The California regulation requires that not less than two percent of a manufacturer's sales in the State (roughly 40,000 vehicles total) must be zero emission vehicles (ZEVs), beginning in model year 1998. This requirement will increase to 10 percent or roughly 200,000 vehicles beginning in model year 2003. The definition of a ZEV is a vehicle that emits no exhaust or evaporative emission of any kind. Currently, the electric vehicle is the only vehicle which meets these requirements. The only other alternative fuel expected to meet the ZEV requirements is hydrogen fuel cells. However, this technology is still in the research and development stage.

III. Potential Problem Areas and Possible Solutions

As stated earlier, the purpose of this notice is to solicit comments to help NHTSA determine whether and how the existing FMVSS should be modified to improve their suitability for EVs, and to determine the types of any new standards that may be developed to address unique EV safety hazards.

Information and comments are requested from users and suppliers, manufacturers, government agencies, and all other interested persons. Commenters should bear in mind that the Federal motor vehicle safety standards established by NHTSA under the Vehicle Safety Act are performance-oriented standards. In commenting on a particular option or in responding to a particular question, commenters are requested to provide all relevant and factual information to support their conclusions or opinions. This should include, but not be limited to, statistical data, estimated costs and benefits, necessary manufacturer lead times, and the availability of technology. Accident data should also be provided including data related to vehicle fires, injuries, and fatalities. The sources of such information should be identified.

NHTSA emphasizes that this is an advance notice of proposed rulemaking. If the agency were ultimately to issue a final rule, it would do so only after first issuing a notice of proposed rulemaking seeking further comments.

VOL 56 ISS 249 DE 27 1991 UMI

A. Modifications to FMVSS to Improve Suitability

The FMVSS are organized into three main categories covering crash avoidance, crashworthiness, and post crash factors. Based on studies and reviews of the FMVSS's concerning their suitability for EVs, NHTSA has concluded that EVs should comply with the intent or purpose of all existing FMVSS. Several standards may require modifications, however, as some aspects of them are premised on types of technology, *e.g.*, internal combustion engines, not found in EVs. Specific comments are sought on how these standards might be modified. In addition, compliance of EVs with several existing safety standards is difficult, if not impossible, due to the characteristics of current EV designs, *e.g.*, range limitations, lack of on-board heat source, limited auxiliary power. Specific comments are sought on whether the performance requirements of these standards should be reduced for EVs, and, if so, what performance requirements would be appropriate. These issues are discussed in greater detail below.

Crash Avoidance Standards

1. FMVSS No. 102, *Transmission Shift Lever Sequence, Starter Interlock, and Transmission Braking Effect.* EVs with multi-speed transmissions that are not equipped with regenerative braking may have difficulty complying with the transmission braking provision of Standard No. 102 which requires transmission braking effects at speeds under 25 mph for automatic multi-speed transmissions.

The questions for which NHTSA seeks comment are:

(a) Should EVs be required to comply with the transmission braking effect requirements of Standard No. 102?

(b) What percentage of EVs are likely to be equipped with multi-speed automatic transmissions?

2. FMVSS No. 103, *Windshield Defrosting and Defogging Systems.* One provision of Standard No. 103 requires the defrosting and defogging system of a vehicle to be capable of melting specific amount of windshield ice within a specified time period after allowing a time period for engine warm-up. In the past, some EVs equipped with an on-board combustion heater have used them for defrosting and defogging systems, although there is no record of an Ev meeting the requirements of this portion of the standard. However, for EVs, the reference to engine warm-up is meaningless and may require revision.

The questions for which NHTSA seeks comments are:

(a) How should Standard No. 103 be modified to reflect the fact that an engine-warm-up period may not be needed and a warm-up time period for a combustion heater may need to be substituted?

(b) Should the requirements of Standard No. 103 be revised for EVs? If so, what requirements for EV defrosting and defogging would be appropraite? What effect would these modifications to Standard No. 103 have on EV safety?

3. FMVSS No. 105, *Hydraulic Brake Systems.* Standard No. 105 specifies requirements for hydraulic service brakes and associated parking brake systems. One of the standard's provisions is that the vehicle be placed in neutral for some of the tests. For EVs with direct drive systems and/or regenerative braking, this test procedure may be difficult to follow.

The questions for which NHTSA seeks comment are: do the test procedures of Standard No. 105 need to be modified for EVs equipped with regenerative braking and/or direct drive transmissions? If so, what should the modifications be?

Crashworthiness Standards

4. FMVSS No. 204, *Steering Control Rearward Displacement.* Standard No. 204 specifies the maximum rearward displacement of the steering control system during a 30 mph rigid barrier collision. It is anticipated that EVs converted from internal combustion engine (ICE) vehicles may have problems complying with Standard No. 204 and some, if not all, of the other crashworthiness standards that contain the rigid barrier crash test procedure. The converted EVs are usually at least 10 percent heavier than the ICE vehicle from which they were derived. This is potentially significant because the weight increase may result in more overall deformation of the EV during the crash test. Increased overall frontal deformation would increase the likelihood that the requirements of Standard No. 204 would not be met. For EVs having difficulty meeting the requirements of this standard, NHTSA notes that the Vehicle Safety Act provides that a manufacturer may apply for a 2-year temporary exemption for up to 2,500 vehicles per year on the basis that an exemption would facilitate the development and field evaluation of low-emission motor vehicles.

The question for which the agency seeks comments is: should NHTSA consider seeking an amendment of the Vehicle Safety Act that would increase the number of vehicles that the exemption covers per year and would lengthen, from 2 years to 3 years, the maximum term allowed for exemptions greater on the basis of substantial economic hardship? These amendments might facilitate the production of these low-emission vehicles.

5. FMVSS No. 208, *Occupant Crash Protection.* Standard No. 208 places limits on the head, thorax, and leg impact responses of test dummies placed in front outboard seats during a 30 mph rigid barrier crash test. Many EVs that are designed and built as EVs (and not converted from ICE to electric propulsion) are small and light. There is concern that many such vehicles may have problems meeting the requirements of Standard No. 208 due to limited crash energy management capability. As previously stated, EVs converted from ICE vehicles may have problems complying with the standards that contain barrier crash test procedures because of the weight increase that often occurs as a result of the conversion. Previous studies of the suitability of the FMVSS for EVs have concluded that compliance with the barrier crash test standards may present problems, but is practicable and necessary for safety. There are few crash test data available on late model EVs with which to objectively assess the stability of those existing vehicles to meet the requirements of the barrier crash test standards. For EVs needing significant modifications to meet the requirements of Standard No. 208, use of the temporary exemption procedure as an interim measure might be appropriate.

The questions for which the agency seeks comment are:

(a) See the question under paragraph 5 above.

(b) If the number of exempted vehicles per year were increased for EVs, what would be the overall effect on the safety for occupants of these vehicles?

Post-Crash Standards

6. FMVSS No. 301, *Fuel System Integrity.* Standard No. 301 specifies requirements for the integrity of motor vehicle fuel systems by limiting fuel spillage and fuel spillage rates for vehicles after rollover, frontal barrier, and rear moving barrier tests. Since many EVs may contain combustion heaters with a tank and lines, the agency concluded in its previous studies of the suitability of the FMVSS for EVs that EVs should meet the requirements of Standard No. 301. The fire and explosion hazard that results from spilled fuel may be greater for EVs because of the large number of ignition sources compared to ICE vehicles. As to battery liquids, although most electrolytes are not nearly as likely to ignite, they are generally highly corrosive and toxic.

The questions for which the agency seeks comment are:

(a) Should EVs comply with Standard No. 301 as it is presently written, or should it be modified for EVs? If Standard No. 301 should be amended for EVs, what should those modifications be?

(b) Should requirements similar to the fuel spillage and fuel spillage rate requirements of Standard No. 301 be adopted to regulate the spillage of liquid electrolyte?

B. New Standards To Address Potentially Unique Electric Vehicle Safety Hazards

New federal EV safety standards may be needed to address potential safety hazards associated with routine servicing of the vehicles, re-charging of the battery systems, and crashworthiness and crash avoidance problems. Routine service and re-charging safety hazards can result from the possibility of a malfunction of the propulsion system such as a short circuit. Unique crash avoidance safety hazards may result primarily from the operational characteristics of EVs. For example, most of the drive motors make very little noise compared to internal combustion engines. This may result in a safety hazard for pedestrians, particularly when an EV is backing up. Also, acceleration performance of some EVs, which has been poor in comparison to conventional vehicles, may cause these vehicles to pose a safety hazard when operating on limited access roads and while merging into high speed traffic. Crashworthiness safety hazards unique to EVs may be primarily associated with the possibility that battery system components, chemicals, and electrical energy may not be contained during a collision. DOE adopted several crash avoidance and crashworthiness safety regulations (10 CFR part 475) to address unique EV safety hazards. EVs purchased by DOE under its development and demonstration program mandated by Public Law 94–413, The Electric and Hybrid Vehicle Research, Development, and Demonstration Act, were required to comply with these regulations. The DOE safety regulations form the basis for several questions that this notice asks below.

1. New Standards To Address Safety Hazards Associated with Maintenance and Re-Charging

The questions for which the agency seeks comment are:

(a) Should NHTSA consider rulemaking that would standardize cables, connectors, receptacles, transformers, and procedures involved in the re-charging of the traction or propulsion battery systems? If so, have standards for these devices and procedures been adopted by the U.S. Military, Society of Automotive Engineers (SAE), American National Standard/Electronic Industries Association (ANSI), or any other organization that would adequately reduce the re-charging safety hazards and thus be suitable to serve as a basis for NHTSA rulemaking?

(b) Should a procedure be standardized through NHTSA rulemaking for disabling the main drive power circuitry during routine EV maintenance in order to minimize the danger of shock, explosion or fire being caused by carelessness or inexperience? If so, are there currently regulations in existence that effectively address this problem and thus would be suitable to serve as a basis for NHTSA rulemaking?

2. New Standards To Address Unique Crash Avoidance Safety Hazards

The questions for which the agency seeks comment are:

(a) Should NHTSA consider a requirement for an audible signal that operates when an EV's transmission is in reverse? Such a signal would increase the likelihood that any pedestrian in the vicinity of a backing EV is aware of the vehicle's movements.

(b) Should NHTSA consider rulemaking that would require battery vents to have flame barrier provisions to inhibit battery explosions?

(c) Should NHTSA develop a regulation to require venting of the battery compartment in order to minimize the safety hazards that may result from an accumulation of explosive gases?

(d) Should the agency consider developing a standard to require that EV's have a device that positively disconnects the battery and that is operable from the normal operator position?

(e) Should lower bound limits be placed on the accelerator and velocity performance of EVs to ensure that they have some minimum capability of operating in a traffic mix that includes conventional vehicles?

(f) Since some EVs may have a single speed transmission which would allow the vehicles to operate at the same speed in reverse as they do in forward, should NHTSA consider a regulation that places a limit on maximum reverse speed? If so, what should this speed be?

(g) For EVs with a single speed transmission (Standard No. 102 applies to multi-speed transmissions), should NHTSA consider a regulation to require these vehicles to have a braking effect at any speed less than 25 mph? If so, what should the deceleration rate be? Would the effects of regenerative braking, for vehicles so equipped, be enough to satisfy this requirement?

(h) Should the agency consider a regulation requiring EVs to have a warning device, located in the direct forward view of the driver, that operates in the event of an electrical malfunction in the propulsion system?

3. New Standards To Address Potentially Unique EV Crashworthiness Safety Hazards

The questions for which the agency seeks comment are:

(a) Should NHTSA consider issuing a standard to require that the electric propulsion circuit be electically isolated from the other conductive portions of the vehicle sufficiently to prevent injury due to a person's contacting any portion of the electric propulsion circuit while in contact with other portions of the vehicle?

(b) Should NHTSA require that EVs be capable of complying with the requirements of Standard No. 208, *Occupant Crash Protection,* and Standard No. 301, *Fuel System Integrity,* without battery material intruding into the vehicle's occupant compartment?

(c) Should NHTSA consider rulemaking to require that all battery materials remain outside the occupant compartment but inside the vehicle during a barrier crash test at a speed less than 30 mph? If so, what crash test speeds should be considered?

(d) Should NHTSA consider requirements to limit the spillage and spillage rate of liquid electrolytes during a barrier collision with requirements similar to the fuel spillage and fuel spillage rates specified in Standard No. 301, *Fuel System Integrity*?

(e) Should NHTSA consider requirements to limit exposure to battery elements that operate at temperatures in excess of a specified value. If so, what should the compliance test for such a requirement be?

(f) Should NHTSA consider developing a standard to require EVs to have a device which automatically disconnects the propulsion battery

circuitry in the event of a high energy crash?

Rulemaking Analyses

Executive Order 12291 (Federal Regulation) and DOT Regulatory Policies and Procedures

This advance notice of proposed rulemaking is not subject to Executive Order 12291.

However, the subject matter of the advance notice is considered "significant" under DOT's regulatory policies and procedures. The notice concerns a matter of substantial public interest. NHTSA believes that most, if not all, of the EVs being built for demonstration purposes incorporate features that address some or all of the potential safety problems discussed in this notice. The fact greatly reduces the potential cost of compliance with whatever standards NHTSA may ultimately adopt. Based on available information, the agency believes that the costs associated with various potential requirements discussed in this notice might not be significantly more than those now being incurred by manufacturers of existing electrically powered vehicles if no standards were developed. However, the impacts of this action can only be estimated with a significant degree of precision when the agency decides which, if any, of the various requirements will form the basis for a rule. Therefore, a full preliminary regulatory evaluation (PRE) for this notice has not been prepared. One of the purposes of this advance notice is to seek comments and information from the public on the costs, benefits, and feasibility of the various options and thus provide the basis for a more definitive evaluation at the next stage of this proceeding.

Executive Order 12612 (Federalism)

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612 "Federalism" and it has been determined that the advance notice does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

National Environmental Policy Act

The agency will review proposals for rulemaking that arise from this advance notice to determine whether they would have a significant effect upon the environment for the purposes of the National Environmental Policy Act.

Regulatory Flexibility Act

Review of this advance notice under the Regulatory Flexibility Act is not required because the Act does not apply to an advance notice of proposed rulemaking. Should the agency decide to proceed with a notice of proposed rulemaking, review of that notice under the Regulatory Flexibility Act will be made at that time

Comments

NHTSA solicits public comments on this notice. It is requested but not required that 10 copies be submitted.

All comments must not exceed 15 pages in length, 49 CFR 553.21. Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a letter setting forth the information specified in the agency's confidential business information regulation, 49 CFR part 512.

All comments received before the close of business on the comment closing date indicated above will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered. Comments on the notice will be available for inspection in the docket. NHTSA will continue to file relevant information as it becomes available in the docket after the closing date and it is recommended that interested persons continue to examine the docket material.

Those persons desiring to be notified upon receiprt of their comments in the docket should enclose a self addressed stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

A regulatory information number (RIN) is assigned to each regulatory action listed in the United Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

Authority: 15 U.S.C. 1392, 1401, 1407; delegations of authority at 49 CFR 1.50 and 501.8.

Issued: December 23, 1991.

Barry Felrice,

Associate Administrator for Rulemaking.

RIN 2127-AD73

Anthropomorphic Test Dummy; Side Impact Protection

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Advance notice of proposed rulemaking (ANPRM).

SUMMARY: In October 1990, NHTSA amended Standard No. 214, *Side Door Strength*, to add procedures and performance requirements for a new dynamic test. In the test, a passenger car must provide protection to the thoracic and pelvic regions of a specified side impact dummy (SID) in a full-scale crash test. NHTSA indicated at the time of the side impact final rule that if ongoing studies demonstrated that two alternative dummies, BioSID and/or EuroSID, compared satisfactorily to SID, it would consider proposing those dummies as alternative devices in the future. NHTSA is issuing this ANPRM to request comments on the desirability and need for specifying alternative dummies in Standard No. 214, and to obtain relevant technical data which could be used to support development of a possible NPRM.

DATES: Comments must be received on or before March 12, 1992.

ADDRESSES: Comments should refer to the docket and notice numbers above and be submitted (preferably in 10 copies) to: Docket Section, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590. Docket hours are 9:30 a.m. To 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Mr. Stan Backaitis, Office of Vehicle Safety Standards, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590 (202-366-4912).

SUPPLEMENTARY INFORMATION:

Background

On October 30, 1990, NHTSA published in the **Federal Register** (55 FR 45765) a final rule which amended Standard No. 214, *Side Door Strength*, to add procedures and performance requirements for a new dynamic test. In the test, a passenger car must provide protection to the thoracic and pelvic regions of a specified side impact dummy (SID) in a full-scale crash test in which the car (known as the "target" car) is struck in the side by a moving deformable barrier simulating another vehicle. The new requirements are phased-in by an annually increasing percentage of each manufacturing's production beginning on September 1, 1993, with full implementation effective September 1, 1996.

The test procedure includes placing anthropomorphic test dummies in the outboard front and rear seats of the target car. For the thorax, the performance limit is expressed in terms of an injury criterion known as the Thoracic Trauma Index (dummy) or TTI(d). This injury criterion represents the average of peak acceleration values measured on the lower spine and the greater of the acceleration values of the upper and lower ribs of the tests dummy. For the pelvis, the performance limit is specified in terms of the peak acceleration measured on the pelvis of the test dummy.

The October 1990 final rule was the culmination of more than a decade of research by the agency, beginning in the late 1970's. One of the major projects of that research was developing a side impact dummy (SID) that would be an appropriate human surrogate for measuring injury risk in a side impact. The agency considered whether the human injury risk of the particular impact situation could be determined from measurement of responses obtained from SID, and whether those specific responses possess biofidelity of response with human beings. The term "biofidelity" refers to how well a test dummy duplicates the responses of a human being in an impact.

TTI(d) and pelvic acceleration were developed by the agency, using cadaver tests, as empirical criteria for measuring injury risk in side impacts. The bases for these injury criteria are fully discussed in the October 1990 final rule amending Standard No. 214, TTI(d) and pelvic acceleration predict the probability of differing levels of thoracic injury and pelvic fracture, respectively, that a person would experience in a real-world crash. It should be noted that the two injury criteria do not address all types of injuries in a side impact. For example, they do not address head injuries or some types of abdominal injuries.

In order for SID, or any other test dummy, to be considered an appropriate human surrogate for measuring TTI(d) and pelvic acceleration in the side test procedure, the TTI(d) and pelvic acceleration measurements obtained from the dummy must be correlated to those which would be obtained if a human being were subjected to the same impact conditions. In developing SID, NHTSA examined the biofidelity of the SID's thorax and pelvic acceleration responses by a number of means, including simulated vehicle crash tests. The agency also carefully considered the durability and reliability of SID, its repeatability and reproducibility, and other factors to ensure its appropriateness for use in the standard No. 214 dynamic test. The basis for adopting SID is fully discussed in a companion final rule to the Standard No. 214 amendment, also published in the **Federal Register** (55 FR 45757) on October 30, 1990.

As part of its side impact rulemaking, NHTSA considered two alternative dummies to SID, EuroSID and BioSID. The EuroSID dummy was developed by a group of European research organizations under the auspices of the European Experimental Vehicles Committee (EEVC). The first EuroSID prototype dummy was completed in 1986. General Motors (GM) developed the BioSID dummy, in cooperation with the Society of Automotive Engineers. The first BioSID prototype dummy was completed in 1989.

In specifying the use of SID in the side impact final rule, NHTSA recognized that both BioSID and EuroSID have potential advantages over SID to the extent that they can provide considerably more measurements to assess injuries in side impact crashes than those available on SID. The agency also recognized that specification of EuroSID might help promote international harmonization. However, BioSID and EuroSID were still under development at the time of the side impact final rule, and NHTSA did not believe that the potential advantages of those dummies should lead to a delay in the rulemaking. The SID dummy was ready at the time of the final rule, and the agency concluded that a final rule specifying SID could result in significant safety benefits.

Purpoe of ANPRM

NHTSA indicated at the time of the side impact final rule that if ongoing studies demonstrated that BioSID and/or EuroSID compared satisfactorily to SID, it would consider proposing those dummies as alternative devices in the future. NHTSA is issuing this notice to request comments on the desirability and need for specifying alternative dummies in Standard No. 214, and to obtain relevant technical data which could be used to support development of a possible NPRM.

Alternative Test Dummies

The BioSID and EuroSID dummies were designed to meet different biomechanical response corridors than the SID. While the SID was designed to ensure biofidelity with respect to TTI(d) and pelvic acceleration only, the other dummies were designed to more extensive biomechanical response corridors developed by the International Standards Organization (ISO). NHTSA notes that while BioSID and EuroSID were not designed to the biomechanical response corridors of SID, initial evaluations of BioSID and EuroSID indicate acceptable biofidelity with respect to TTI(d) and pelvic acceleration. See Chapter IIIB of the agency's Final Regulatory Impact Analysis for the October 1990 final rule.

Based on a combination of pendulum, body-drop and sled tests, the ISO has defined biomechanical response corridors for the thorax, spine, pelvis, head, neck, chest displacement, shoulder and abdomen. Since BioSID and EuroSID are designed to have biofidelity in a larger number of areas, and provide for considerably more measurements to assess injuries in side impact crashes than those available on SID, they offer possible advantages for research purposes or for assessing aspects of a vehicle's side impact performance not currently addressed by Standard No. 214.

NHTSA and others have conducted considerable research concerning BioSID and EuroSID. In January 1990, in order to make an initial assessment of the suitability of these dummies for impact testing and to establish whether they can distinguish different impact environments, NHTSA conducted sled tests in which the dummies impacted flat walls which were padded with foams of various degrees of stiffness. The same tests were also conducted using SID. The BioSID and EuroSID produced acceleration responses having the same directional trends as the SID. There was very little difference between the three dummies in the choice of an optimal padding, the typical environment expected in future passenger cars. The differences in responses became progressively larger as the dummies impacted increasingly softer and harder surfaces.

VOL 56 ISS 249 DEC 27 1991 UMI

NHTSA discontinued tests with EuroSID after discovery of certain mechanical and functional shortcomings. For example, the ribs were bottoming out, i.e., reaching maximum deflection capability, in the sled tests, which may have invalidated deflection measurements. Also, the EuroSID specifications have changed since NHTSA tested the prototype.

EEVC is conducting a new test program of EuroSID which was scheduled for completion during the summer of 1991. NHTSA understands the EEVC will make the test data publicly available as soon as possible. Once NHTSA receives the test data from EEVC, it will place the information in the docket.

During 1990, NHTSA conducted a number of additional tests using BioSID. The tests evaluated repeatability, reproducibility, and durability. The agency also conducted five vehicle crash tests. Also during 1990, the Motor Vehicle Manufacturers Association (MVMA) conducted a comparative evaluation of BioSID and SID in a series of 12 vehicle crash tests. The MVMA tests are reported in the following paper: K. L. Campbell, R. J. Wasko, S. E. Hensen, "Analysis of Side Impact Test Data Comparing SID and BioSID," SAE 902319, Proceedings, 34th Stapp Conference, SAE, Warrendale, PA, November 1990.

The BioSID tested by NHTSA appeared to have adequate repeatability of TTI(d) and pelvic acceleration impact responses and, for two dummies tested, acceptable reproducibility. The BioSID also appeared to have adequate durability. NHTSA notes, however, that its BioSID test experience was limited to only two dummies.

While the BioSID appeared to be a relatively consistent test tool during sled tests, NHTSA has some concerns about the results of its and MVMA's vehicle crash tests. In at least one of the five NHTSA tests, the data trace contains unusually high rib impact acceleration. The acceleration was considerably above the mean range of comparable responses measured in other vehicles under the same test conditions and appeared inconsistent with spine acceleration measurements. A similar such high impact response occurred during the MVMA tests. NHTSA has, to date, been unable to explain the causes for the high rib impact responses in those tests.

The results of NHTSA's research on EuroSID and BioSID are set forth in a six-volume research report entitled "Evaluation of the BioSID and EuroSID." The report will be made available for public inspection in the agency's Technical Reference Division. The agency notes that only the first volume of the six-volume report contains data on the EuroSID. NHTSA could not complete further tests with the EuroSID due to the dummy's functional limitations discussed previously. However, the EEVC is continuing the test program with the upgraded EuroSID (EuroSID I). The EEVC data from those tests will be made available to the public as soon as they are received by NHTSA. Other information concerning EuroSID and BioSID has been placed in dockets 79-04, 88-06 and 88-07.

Possible Specification of EuroSID and BioSID in Standard No. 214

The possible specification of alternative dummies to SID in Standard No. 214 raises a number of issues. Since EuroSID and BioSID allow assessment of more types of potential injuries than SID, there could be safety advantages if manufacturers design their vehicles using one of those dummies. Moreover, permitting the use of EuroSID might promote international harmonization.

There are, however, possible disadvantages in permitting multiple dummies. Some of these are illustrated by the agency's experience in specifying the use of two alternative dummies in Standard No. 208, *Occupant Crash Protection*. Based on that experience, NHTSA is planning to propose specifying the exclusive use of one dummy in that standard.

Standard No. 208 originally specified only one test dummy, the Hybrid II dummy. The agency later allowed use of a newer, more advanced test dummy, the Hybrid III dummy. See 51 FR 26688; July 25, 1986. This dummy has the capability of monitoring almost four times as many injury-indicating parameters as the Hybrid II dummy.

In deciding to permit use of the Hybrid III dummy, the agency found that the two types of dummies were essentially equivalent, i.e., when both types of test dummies were tested in vehicles, only minimal differences in test results were shown between the two types of dummies. The importance of equivalence is that vehicles which pass or fail Standard No. 208 using one type of dummy will achieve essentially the same result using the other type of dummy. Based on this finding of equivalence, the agency permitted the manufacturers to specify either type of dummy for Standard No. 208 compliance testing.

There are, however, slight differences in test results using the two equivalent dummies. In practice, these slight differences may affect the compliance test results in marginal cases. For instances, a manufacturer may have used one or the other dummy type for its certification and advised the agency to use that same dummy tape in the agency's compliance testing. However, if the agency obtains a marginal noncompliance for the vehicle using this test dummy, the manufacturer may conduct a subsequent test of the same vehicle with the other dummy type. Assuming that the vehicle passes using the other dummy type, the manufacturer can then inform the agency that it has changed its mind and now wishes to certify the vehicle with this different dummy type. In this case, the agency would have to conduct repetitive crash testing with the other type of test dummy for that vehicle. The repetitive testing represents an unnecessary expenditure of agency resources (both funds and staff time).

This source of potential variability and repetitive testing is eliminated by simply specifying one particular type of test dummy. For this reason, the agency believes that Standard No. 214 should ultimately specify only one dummy. It may, however, be appropriate to specify more than one test dummy in Standard No. 214 for an interim period.

NHTSA notes that, in requesting comments on alternative dummies, it is not at this time contemplating changing the existing injury criteria specified in Standard No. 214, i.e., TTI(d) and pelvic acceleration, nor is it contemplating major changes in the specified test procedure, such as going from full scale vehicle tests to a composite test procedure. The agency is also not contemplating any changes to the SID dummy. The agency therefore requests that commenters address the issue of alternative dummies in the context of the existing injury criteria and test procedure.

In order to obtain comments on the desirability and need for specifying alternative dummies in Standard No. 214, and to obtain relevant technical data which could be used to support development of a possible NPRM, NHTSA is requesting comments and data from interested persons. To aid the agency in obtaining useful comments, this notice asks a number of questions and makes a number of requests for data. Fro easy reference, the questions or requests are numbered consecutively throughout the document. Commenters need not limit themselves to addressing the specific questions asked in this notice but are instead encouraged to address in addition any issues that NHTSA should consider in regard to permitting the use of alternative dummies in Standard No. 214.

In proving a comment on a particular matter or in responding to a particular question, interested persons are requested to provide any relevant factual information to support their conclusions or options, including but not limited to test data, statistical and cost data, and the source of such information.

A. Desirability of Specifying Alternative Dummies

1. Is there a need to specify alternative dummies in Standard No. 214, given the availability of SID for side impact protection assessment?

2. What benefits could be obtained by specifying one or more alternative dummies?

3. If manufacturers had the option of using alternative dummies to SID for certifying compliance with Standard No. 214, would they use them? If so, which one and for what purposes? Would they use the dummies to assess the potential for types of injuries not addressed by Standard No. 214?

4. Assuming that one of the major benefits of specifying alternative dummies is that manufacturers could design their vehicles in light of supplemental injury measurements not covered by Standard No. 214, should the agency consider specifying additional requirements, based on such measurements, in Standard No. 214? If not, would the manufacturers use those supplemental measurements in the absence of requirements? If the agency should consider such requirements, what requirements should be considered, and why? Which of the two alternative dummies is capable of making the necessary measurements for such requirements? Should any additional injury indicating measurements, if proposed, be time limited and/or excluded, such as the data after barrier separation? In answering this question, please provide any available data that would support specification of additional requirements, including the biomechanical basis for the injury criteria and estimates of benefits.

5. What problems could result from specification of multiple dummies in Standard No. 214? What are the legal, design, competitive, and cost implications? Would manufacturers attempt to ensure that their vehicles complied with the standard using each of the dummies? Assuming that there would be at least some differences in the measurements obtained by different dummies, would manufacturers choose for particular models the dummy which gives the most favorable test results?

6. To what extent would specifying alternative dummies promote international harmonization? Which of the dummies would promote international harmonization? What would have to be done by NHTSA/other regulatory authorities to achieve harmonization in this area?

7. Is NHTSA correct in its view that Standard No. 214 should ultimately specify only one dummy? If so, should the single dummy specified for some future time be other than SID? What approach should the agency follow in reaching that result? Should the agency permit multiple dummies for a specified period of time, and specify a single dummy at the end of that time? Taking into account consideration of vehicle leadtimes, how long a transition period should be provided? What single dummy should ultimately be specified? What specific problems might result if manufacturers found it necessary to use multiple alternative dummies during the transition period?

8. Both BioSID and EuroSID are more complicated than SID and involve higher costs. How should higher costs be considered in deciding whether to permit the use of these dummies, and in deciding whether to ultimately specify the sole use of one of these dummies? Please provide estimates of the costs associated with BioSID and EuroSID, including calibration and maintenance costs, and of any product cost increases that would be associated with use of these alternative test dummies.

B. Adequacy of EuroSID and BioSID

9. How adequate are EuroSID and BioSID for assessing TTI(d) and pelvic acceleration?

10. How should NHTSA assess the biofidelity, with respect to TTI(d) and pelvic acceleration, of EuroSID and BioSID? Would the SID biomechanical response corridors represent a sufficient assessment? Should any or all of the ISO biomechanical response corridors be used to assess biofidelity?

11. How should NHTSA assess the repeatability, reproducibility and reliability of EuroSID and BioSID? What information/data are available in these areas? Are the pendulum and sled impact severity ranges specified in the BioSID documentation adequate?

12. How adequate are EuroSID and BioSID for assessing the potential for injuries other than those addressed by TTI(d) and pelvic acceleration? In answering this question, please address biofidelity, repeatability, reproducibility and reliability, and indicate what information/data are available in these areas. Is it important for BioSID and EuroSID to have biofidelity for injury measurements not covered by Standard No. 214's requirements?

13. What experiences have users had with BioSID and EuroSID? Have users been satisfied with the mechanical and measurement integrity of the dummies in the Standard No. 214 test environment? Have any problems occurred with these dummies? In answering this question, please discuss how many dummies have been used and in what test environments.

14. Is the response of any one dummy more sensitive to positional placement and/or adjustment in a given seating position? If so, please identify the position for each dummy and also the measurement or the set of measurements that contribute to the sensitivity. Is the response of any one dummy particularly insensitive or sensitive to protrusions into the passenger compartment and their locations? If so, what set of measurements are affected and what are the injury criteria implications? What are the impact response and kinematic sensitivities of EuroSID and BioSID in off-axis (off-lateral) impacts? Is there evidence of changes in response due to binding, friction, or differences in inertial properties and, if so, how significant are they in the assessment of injury potential?

15. Repeated exposures to impact sometimes cause shifts in responses due to component deterioration. Have users of alternative dummies identified any components which have caused instability of impact responses? If so, please indicate the components and provide supporting data.

16. Please provide estimates on the durability of BioSID and EuroSID and the frequency of expected component replacements.

17. The pelvic "H" point plug in the BioSID dummy requires replacement after every impact. Does this cause any problems?

18. The BioSID specifications require dummy operation at a considerably narrower temperature range than SID. Please discuss whether the narrower temperature operating environment would create any problems for users.

19. If BioSID or EuroSID were specified as the sole dummy for use in Standard No. 214, would there be any sourcing problems?

C. Equivalence of EuroSID and BioSID to SID

20. How should NHTSA assess the equivalence of EuroSID and BioSID to SID, i.e., the extent to which the test results obtained using these alternative dummies are the same as obtained when

VOL 56 ISS 249 DEC 27 1991 UMI

using SID? Can equivalence be assessed using sled tests only? What ranges of impact speeds and padding stiffness should be used in such tests? Should vehicle crash tests also be used in assessing equivalency?

21. If BioSID and/or EuroSID produce different TTI(d) or pelvic acceleration measurements than SID, is it still possible to establish equivalence? Could transfer functions be developed to normalize the responses of alternative dummies to the SID response level? If so, please discuss the rationale, procedures and data that would be needed for such development. Alternatively, should the agency consider different performance levels for different dummies?

D. Other Issues

22. If NHTSA decided to permit use of BioSID and/or EuroSID, what injury assessment sensors, in addition to those provided on SID, should the dummies incorporate?

23. What calibration requirements should the agency consider for BioSID and EuroSID? Should calibrations be limited to the lateral direction or should other impact directions be considered? Please provide recommendations for other calibration requirements, including specified impact and direction, and supporting rationale.

Potential Regulatory Impacts

NHTSA has considered the potential burdens and benefits associated with specifying alternative test dummies in Standard No. 214. This ANPRM is not subject to Executive Order 12291. However, NHTSA believes that this advance notice is a "significant" rulemaking action under the Department of Transportation regulatory policies and procedures, since it concerns a matter in which there is substantial public interest.

The agency believes that the economic and other effects of specifying alternative test dummies in Standard No. 214 would be minimal. This belief is based on the assumption that the agency could make a finding of equivalence between the alternative dummies and SID. If the agency should specify the sole use of a different dummy than SID, it would provide sufficient leadtime to enable manufacturers to incorporate use of the new dummy in their normal design cycles. While BioSID and EuroSID would likely involve somewhat higher costs than SID, the costs associated with dummies are a very small part of the overall costs associated with the side impact dynamic requirements. The agency has determined that the cost impacts associated with this rulemaking action are so minimal that a full regulatory evaluation is not required.

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612, and it has been determined that it does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Public Comments

NHTSA solicits public comments on this notice. It is requested but not required that 10 copies be submitted.

All comments must not exceed 15 pages in length. (49 CFR 553.21). Necessary attachments may be appended to these submissions without regard to the 15-page limit. This limitation is intended to encourage commenters to detail their primary arguments in a concise fashion.

If a commenter wishes to submit certain information under a claim of confidentiality, three copies of the complete submission, including purportedly confidential business information, should be submitted to the Chief Counsel, NHTSA, at the street address given above, and seven copies from which the purportedly confidential information has been deleted should be submitted to the Docket Section. A request for confidentiality should be accompanied by a cover letter setting forth the information specified in the agency's confidential business information regulation. 49 CFR part 512.

All comments received before the close of business on the comment closing date indicated above for the advance proposal will be considered. To the extent possible, comments filed after the closing date will also be considered. Comments on the advance proposal will be available for inspection in the docket.

The NHTSA will continue to file relevant information as it becomes available in the docket after the closing date. It is therefore recommended that interested persons continue to examine the docket for new material.

Those persons desiring to be notified upon receipt of their comments in the docket should enclose a self-addressed, stamped postcard in the envelope with their comments. Upon receiving the comments, the docket supervisor will return the postcard by mail.

A regulatory information number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading of this document can be used to cross reference this action with the Unified Agenda.

50 CFR Part 17

RIN 1018-AB73

Endangered and Threatened Wildlife and Plants; Proposed Endangered Status for the Giant Garter Snake

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Fish and Wildlife Service (Service) proposes to list the giant garter snake (*Thamnophis gigas*) as an endangered species pursuant to the Endangered Species Act of 1973, as amended (Act). This snake inhabits localized wetland habitats in portions of the Central Valley of California. The species is endangered by habitat loss caused by numerous factors, primarily urbanization, agricultural, and flood control activities. This proposal, if made final, would extend the Act's protective provisions to this animal. The service seeks data and comments from the public on this proposal.

DATES: Comments from all interested parties must be received by February 25, 1992. Public hearing requests must be received by February 10, 1992.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Field Supervisor, Sacramento Field Office, U.S. Fish and Wildlife Service, 2800 Cottage Way, room E-1803, Sacramento, California 95825-1846. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Peter Sorensen (see **ADDRESSES** section) at 916/978-4866 or FTS 460-4866.

SUPPLEMENTARY INFORMATION:

Background

The giant garter snake (*Thamnophis gigas*) is one of the largest garter snakes, reaching a total length of at least 140 centimeters (cm) (55 inches (in)) (Van Denburgh 1922). Females are slightly longer and proportionately heavier (typically 500-700 grams (g)) (1.0-1.4 pounds (lb)) than males (George Hansen, independent researcher, pers. comm., 1991). Dorsal background coloration is brownish with a checkered pattern of black spots, separated be a yellow dorsal stripe and two light colored lateral stripes. Prominence of the three yellow strips is geographically variable. First described by Fitch (1940) as a subspecies of the northwestern garter snake (*Thamnophis ordinoides gigas*), the status of the giant garter snake, along with the of other western garter snakes, has undergone several taxonomic revisions including its placement as a subspecies of the western terrestrial garter snake (*Thamnophis elegans*) (Johnson 1947, Fox 1951), and then the western aquatic garter snake (*Thamnophis couchii*) (Fox and Dessauer 1965, Lawson and Dessauer 1979). In 1987, it was accorded the status of a full species, (*Thamnophis gigas*) (Rossman and Stewart 1987).

Endemic to valley floor wetlands in the Sacramento and San Joaquin valleys of California, the giant garter snake inhabits sloughs, ponds, small lakes, low gradient streams, and other waterways, such as irrigation and drainage canals, where it feeds primarily on small fishes and frogs. Habitat requisites consist of (1) adequate water during the snake's active season (early-spring through mid-fall) to provide food and cover, (2) emergent, herbaceous wetland vegetation, such as cattails and bulrushes, for escape cover and foraging habitat during the active season, (3) grassy banks and openings in waterside vegetation for basking, and (4) higher elevation uplands for cover and refuge from flood waters during the snake's dormant season in the winter (California Department of Fish and Game (CDFG), unpubl. data). Giant garter snakes typically are absent from larger rivers and other water bodies that support large, predatory fish, and from wetlands with sand, gravel, or rock substrates (*ibid.*). Riparian woodlands with excessive shade do not provide suitable habitat because of the lack of basking sites and/or prey populations.

The giant garter snake inhabits small mammal burrows above prevailing flood elevations throughout its winter dormancy period (November to mid-March). Giant garter snakes typically select burrows with sunny aspects (along south and west facing slopes). Upon emergence, males immediately begin wandering in search of mates (George Hansen, pers. comm., 1991). The breeding season extends through March and April, and females give birth to live young from late July through early September (*ibid.*). Clutch size is variable, ranging from 10 to 46 young (*ibid.*). At birth, young average about 25 cm (10 in) and 3-5 g (0.1-0.18 ounces (oz)). Upon birth, young immediately scatter in search of food. In rice growing regions, young snakes are found more commonly in rice fields than in adjoining irrigation and drainage canals (*ibid.*). Although growth rates are variable, young typically more than double in size by 1 year of age (*ibid*). Sexual maturity averages 3 years of age in males and 5 years for females (*ibid.*).

Fitch (1940) described the historical range of the species as extending from the vicinity of Sacramento and Contra Costa Counties southward to Buena Vista Lake, near Bakersfield in Kern County. Prior to 1970, the giant garter snake was recorded historically from only 16 localities (Hansen and Brode 1980). With five of these localities clustered in and around Los Banos, Merced County, the paucity of early records makes it difficult to determine precisely the species' former range. Nonetheless, these records coincide with the historical distribution of wetland habitats. Reclamation of wetlands for agricultural and other purposes has extirpated the species from the southern portion of its range, including the former Buena Vista Lake and Kern Lake in Kern County, and probably also the historic Tulare Lake and other wetlands in Kings and Tulare Counties.

The current range of the giant garter snake extends from near Burrell, Fresno County, northward to the vicinity of Gridley, Butte County, (Hansen and Brode 1980). Unpublished studies sponsored by the California Department of Fish and Game indicate that giant garter snake populations currently are distributed in the rice production zones of Sacramento, Sutter, Butte, Colusa, and Glenn Counties; within portions of the Yolo Bypass and Putah Creek in Yolo County; along the eastern fringes of the Sacramento-San Joaquin River delta from the Laguna Creek-Elk Grove region of central Sacramento County southward to the Stockton area of San Joaquin County; in the north and south Grasslands district of Merced County; and in the Mendota area of Fresno County.

Within these regions, giant garter snake populations occur discontinuously in isolated patches of valley floor habitat, often in association with agricultural water delivery and drainage facilities. Extant populations are clustered in 11 areas, geographically and genetically isolated from one another (CDFG, unpubl. information). The species has been extirpated from 5 of the 16 localities known to exist prior to 1970. The 11 extant population clusters largely coincide with historical riverine flood basins throughout the Central Valley. Some of these clusters consist of numerous subpopulations, whereas others are limited to as few as one or two populations. The degree of genetic interchange within each of these 11 clusters is variable, depending on the number and quality of movement corridors connecting the constituent populations. Although other undiscovered populations probably remain, some of the known populations within these clusters probably have disappeared since their discovery (*ibid.*). Most known giant garter snake populations appear to support few individuals due to limited extent and quality of habitat (*ibid*).

The species appears absent from most or all of the northern portion of the San Joaquin Valley, where the floodplain of the San Joaquin River is restricted to a relatively narrow trough by alluvium from tributary rivers and streams. This apparent 100 kilometer (km) (62 mile (mi)) gap in its distribution separates populations in Merced County from those along the eastern fringes in the Sacramento-San Joaquin River delta (the Delta) in San Joaquin County (Hansen and Brode 1980). Suitable habitat for the giant garter snake has been eliminated from essentially all of the Delta (CDFG, unpubl. data).

On September 18, 1985, the Service published the Vertebrate Wildlife Notice of Review (50 FR 37958), which included the giant garter snake as a category 2 candidate species for possible future listing as threatened or endangered. Category 2 candidates are those species for which information contained in Service files indicates that proposing to list is possibly appropriate but additional data is needed to support a listing proposal. In the January 6, 1989, Animal Notice of Review (54 FR 554), the Service again included the giant garter snake as a category 2 candidate, soliciting information on the status of this species. On September 12, 1990, the California-Nevada Chapter of the American Fisheries Society petitioned the Service to list the giant garter snake as an endangered species. The Service published a 90-day petition finding on March 22, 1991 (56 FR 12146), which

VOL

1991
UMI

concluded that the petition presented substantial information indicating that listing may be warranted. The decision to propose this species for listing is based on information contained in the petition, referenced in the petition, and otherwise available to the Service. This proposal constitutes the final finding on the petitioned action.

Summary of Factors Affecting the Species

Section 4 of the Act and regulations (50 CFR part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal Lists of threatened and endangered species. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the giant garter snake (*Thamnophis gigas*) (Fitch) are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of Its Habitat or Range

Examination of the historical localities from which giant garter snakes were recorded and the historic losses of wetland habitats throughout the Central Valley indicates that the current distribution and abundance of the species is much reduced from former times. As discussed above, agricultural and flood control activities have extirpated the giant garter snake from the southern one third of its range in former wetlands associated with the historic Buena Vista, Tulare, and Kern lakebeds. These lakebeds once provided the largest single block of wetland habitat in California. These shallow lakes, typically less than 12 meters (m) (40 feet (ft)) deep, supported vast expanses of ideal giant garter snake habitat, consisting of cattail and bulrush dominated marshes. Tulare and Buena Vista lakebeds alone covered over 2,000 square km (over 800 square mi) indicating that suitable habitat was prevalent over much of the San Joaquin Valley (San Joaquin Valley Drainage Program 1990).

Vast expanses of bulrush and cattail floodplain habitat also typified much of the Sacramento Valley historically (Hinds 1952). Prior to reclamation activities beginning in the mid to late 1800's, about 80 percent of the Sacramento Valley was subject to seasonal overflow flooding in broad, shallow flood basins that provided expansive areas of giant garter snake habitat (*ibid.*).

Several other studies on the historical and current extent of wetlands in the Central Valley shed additional light on the extent of decline in giant garter snake habitat. Of the estimated 1.6 million hectares (ha) (4.0 million acres (ac)) of wetlands originally present throughout the Central Valley, about 101,175 to 153,300 ha (250,000 to 378,800 ac) (6 to 9 percent) currently remain (Jones and Stokes Associates 1987, U.S. Fish and Wildlife Service (USFWS) 1989). Because much of the current wetland acreage consists of artificial habitats (e.g., managed duck hunting clubs, irrigation drainwater evaporation ponds), the loss of natural wetland communities probably exceeds 99 percent (Jones and Stokes Associates 1987). About 36,000 ha (88,963 ac) support emergent vegetation suitable for the giant garter snake (Kempka and Kollasch 1990). Field studies indicate, however, that giant garter snakes are absent from most areas with seemingly suitable habitat (CDFG, unpubl. data). This may be a result of habitat fragmentation and/or the presence of predatory fish. Therefore, only a small percentage of extant wetlands provides habitat for the giant garter snake.

A number of land use practices and other human activities currently threaten the survival of the giant garter snake throughout its range. Although some giant garter snake populations have survived in artificial habitats created by agricultural and flood control activities, many of these altered wetlands are now threatened with rapid urban development. Within the range of the species, development of several new cities are proposed, including three in San Joaquin County, one in Stanislaus County, and one in Sutter County. Numerous other expansions of existing cities are proposed as well (see below). Although the potential impact of these new and expanded cities on the giant garter snake is unknown at this time because environmental studies are as yet incomplete, these project proposals occur in areas of known or potential habitat.

The largest extant population inhabits extensive agricultural lands in the American Basin, a large flood basin at the confluence of the Sacramento and American Rivers, in Sacramento and Sutter Counties. Throughout this area, reconnaissance level surveys (USFWS 1991) indicate that about 570 ha (1,400 ac) of giant garter snake habitat exist in the form of man-made irrigation channels and drainage ditches, as well as an undetermined acreage of suitable habitat within nearly 5,260 ha (13,000 ac) of adjoining rice fields. The giant garter snake also uses an undetermined amount of habitat at higher elevations to escape from winter flooding during the inactive winter phases of the snake's like cycle. The U.S. Army Corps of Engineers (Corps) and local project sponsors are proposing a minimum of 400-year flood protection for this 22,260 ha (55,000 ac) agricultural area, as part of its American River Watershed Investigation. The U.S. Fish and Wildlife Service (USFWS 1991) anticipates that this flood control proposal would result in the conversion of most or all of this area to urban land uses within the next 50 years. Absent adequate mitigation, this project could extirpate the giant garter snake from the American Basin (CDFG, unpubl. information).

Other future and ongoing activities throughout the American Basin also may adversely impact the species. These include the North Natomas Community Drainage System, proposed by the City of Sacramento, which could eliminate or degrade about 42 km (26 miles) of giant garter snake habitat along existing canals and ditches, and additional rice field habitat (CDFG, unpubl. information). Potential effectiveness of a proposed mitigation plan remains undetermined. Although at the conceptual planning stage, the proposed Sutter Bay project at the north end of the American Basin could eliminate or degrade about 68 km (42 miles) of giant garter snake habitat associated with existing agricultural land (*ibid*). The proposed South Sutter Industrial Center, located near the Sutter Bay project, could eliminate another 14.5 km (9.0 miles) of aquatic habitat. The Sacramento Metropolitan Airport is proposing about 777 ha (1,920 ac) of development on agricultural and vacant lands that potentially could result in major adverse impacts to the species, including the loss of about 14.5 km (9.0 miles) of canal habitat and 607 ha (1,500 ac) of rice fields, as well as the disruption of movement corridors (*ibid*). Any highway improvement or construction projects, or the planned extension of the Sacramento Regional Transit system in this area, also increases the likelihood for major impacts to the species, including elevated mortality from increased traffic on local roads and highways.

In West Sacramento, Yolo County, local governments and the Corps are proposing the Sacramento Metropolitan Area Investigation, a 400-year flood protection project for over 3,240 ha (8,000 ac) of agricultural lands (USFWS, unpubl. information). As in the American Basin, improved flood protection would enable urban development to occur in agricultural lands throughout the 100-year life of the project. Within the study area, an estimated 45 km (28 miles) of small waterway habitat potentially inhabited by the giant garter snake would be threatened.

In the Laguna Creek-Elk Grove region of Sacramento County, residential developments and associated stream channelization and road improvement projects pose a severe threat to the few populations known to still survive in this region. These proposed and ongoing projects, sponsored by private interests and local governments, include 11 residential developments. Other proposals in Sacramento County that could adversely affect the giant garter snake include the closure of Mather Air Force Base; the North Delta Water Management Project, proposed by the California Department of Water Resources; and other residential developments.

Elsewhere, numerous other proposed or ongoing projects could adversely affect the giant garter snake. These include new and expanded residential developments in six counties, and wastewater treatment plant expansions, landfill expansions, water development projects, drainwater conveyance projects, and flood control projects in the San Joaquin Valley.

Ongoing maintenance of aquatic habitats for flood control and agricultural purposes poses additional threats to the giant garter snake throughout its range. Local agencies routinely control vegetative cover along canal banks and stream courses to maintain water conveyance capabilities. These activities eliminate or prevent the establishment of habitat characteristics required by this cover dependent species. Because many giant garter snake populations currently are restricted to such artificially created and maintained habitats, these vegetation control activities fragment and isolate available habitat, and prevent dispersal of snakes among habitat units.

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Although giant garter snakes do not seem to be particularly popular among reptile collectors, the species has been found for sale in pet shops (John Brode, CDFG, pers. comm., 1991). Federal listing could raise the value of the giant garter snake within reptilian trade markets and increase the threat of unauthorized collection above current levels. Even limited interest in the species among collectors could pose a serious threat to smaller populations that contain few individuals.

C. Disease or Predation

The real or potential impact of disease on the giant garter snake is unknown. However, contamination of irrigation and drainage canals with agricultural and urban pollutants could affect the health of resident giant garter snakes. Less healthy individuals may be more prone to disease and infection.

A number of native mammals and birds are known or likely predators of giant garter snakes, including raccoons, skunks, opossums, foxes, hawks, egrets, and herons. Giant garter snakes of all sizes commonly are found scarred or injured, apparently from attacks by herons and egrets (George Hansen, pers. comm., 1991). In general, giant garter snakes have adapted physically and behaviorally to withstand predation levels from these animals. However, in situations where giant garter snake habitats have become fragmented, isolated, and otherwise impacted by human activities, increased predatory pressure may become excessive, especially where alien species, such as rats and feral and domestic house cats and dogs are introduced. These additional threats likely become particularly acute where urban development immediately abuts giant garter snake habitat. Although the actual impact of predation under such situations has not been studied, the likelihood for serious impact exists.

To date, studies indicate that the giant garter snake is typically absent from waters supporting large predatory fishes. Although most adult giant garter snakes are too large to represent suitably sized prey items for large fish, subadult snakes undoubtedly sustain mortality rates high enough to prevent sustainable populations. The artificial introduction of such alien game fish species as striped bass, largemouth bass, sunfish, crappie, and various catfish species, combined with the elimination of suitable shoreline vegetative cover from stream channelization and levee construction projects, may have contributed to the elimination of the giant garter snake from many areas throughout its former range, particularly in the Sacramento-San Joaquin River delta.

D. The Inadequacy of Existing Regulatory Mechanisms

The primary cause of the decline in giant garter snake numbers is believed to be the loss of habitat from human activities. Federal, State, and local laws and regulations have not proven adequate to arrest the historical and ongoing losses of giant garter snake habitat.

The National Environmental Policy Act and section 404 of the Clean Water Act represent the primary Federal laws that could afford some protection for the giant garter snake. These laws, however, do not protect candidate species *per se*. Nationwide Permit Number 26 (33 CFR part 330.5(a)(26)) was established by the Corps to facilitate issuance of permits for discharges of fill material into wetlands up to 4.0 ha (10 ac). For project proposals falling under Nationwide Permit 26, the Corps has been reluctant to withhold authorization unless a listed threatened or endangered species is known to be present, regardless of the significance of other wetland resources. Candidate species receive no special consideration. This situation may be attributable in part to the absence of any requirement to assess cumulative impacts of implementing this regulation on wetlands and candidate species such as the giant garter snake.

Pursuant to 33 CFR 323.4, the Corps also has promulgated regulations that exempt various farming, forestry, and maintenance activities from the regulatory requirements of section 404. Based on past jurisdictional determinations conducted by the Corps, many of the irrigation and drain water canals, and other agricultural wetlands, such as rice fields that provide giant garter snake habitat, are not subject to section 404 regulation. For example, in the recent jurisdictional determination for the American River Watershed Investigation, the Corps found that the 373 km (232 miles), totalling 515 ha (1,272 ac) of canal and waterway habitat in the American Basin, only 153 ha (379 ac) constituted jurisdictional wetlands. Moreover, most maintenance activities on agricultural lands are not subject to State laws or local ordinances. Thus, legal mechanisms often are not available to protect giant garter snake populations inhabiting artificially created and maintained wetlands.

The California Environmental Quality Act and California Endangered Species Act are the primary environmental legislation at the State level that potentially benefit giant garter snakes. The snake was listed as a threatened species by the State in 1971. Although these State laws provide a measure of protection to the species and have resulted in the formulation of mitigation measures to reduce or offset impacts for projects proposed in certain giant garter snake habitats, these laws do not adequately protect the species in all cases. Numerous activities do not fall under the purview of this legislation, such as projects proposed by the Federal government, and State statutory

VOL 56 ISS 249 DEC 27 1991 UMI

exemptions. Further, these laws at times are not adequately enforced. Where overriding social and economic considerations can be demonstrated, these laws allow project proposals to go forward, even in cases where the continued existence of the species may be jeopardized, or where adverse impacts are not mitigated to a point of insignificance.

Five of the known populations occur on State and Federal lands managed for wildlife purposes. These are: Gray Lodge Waterfowl Management Area, Kesterson National Wildlife Refuge (NWR), San Luis NWR, Los Banos Wildlife Area, and Mendota Wildlife Area. Although the giant garter snake populations in these areas appear relatively secure, these populations may be vulnerable to potentially incompatible management practices and flooding. For example, recent surveys indicate that giant garter snake population levels have not recovered from the effects of heavy flooding in 1986 at Mendota Wildlife Area (CDFG, unpubl. data).

E. Other Natural or Manmade Factors Affecting its Continued Existence

As discussed under Factors A, C, and D, agricultural activities affect giant garter snakes positively and negatively. Most of the historical habitat loss was caused by the diking and draining of wetlands for agricultural purposes. Agricultural conversions, including maintenance activities, incrementally continue to eliminate giant garter snake habitat. Particularly in the southern portion of its range, intensive control of vegetation along water delivery and drainage facilities progressively is eliminating remaining habitat and preventing reestablishment of former habitat. Application of fertilizers and pesticides, although not yet studied as potential threats to the species, could degrade water quality and reduce prey populations to the extent that giant garter snake populations are reduced or eliminated. In addition, selenium contamination of irrigation drainwater throughout portions of the San Joaquin Valley may pose a threat to some populations.

On the other hand, the species is known to inhabit irrigation and drainage canals where adequate vegetative cover remains. In fact, the majority of known populations occur in artificial wetlands associated with agricultural land uses. This is particularly true in certain rice production areas, where giant garter snakes inhabit water management facilities and adjoining rice fields. As described above, the largest extant population of giant garter snakes occurs in association with rice production areas of the American Basin. The seasonal drying of rice ponds and canals incidentally may benefit the giant garter snake by preventing establishment of populations of large predatory fish.

The recent 5-year drought in California has resulted in drying of many seasonal wetlands that potentially provide habitat for the giant garter snake during "normal" water years. Some populations inhabiting seasonal and intermittent wetlands probably have become extirpated or greatly reduced by this prolonged drought. In response to State-wide water shortages for agricultural, municipal, and industrial uses, water management agencies, including the California Department of Water Resources and U.S. Bureau of Reclamation, have announced major reductions in delivery for agricultural uses (Grubb 1991). Reduced levels of water delivery for agricultural purposes could adversely impact giant garter snake populations dependent upon agricultural water. In addition, the Department of Water Resources has begun acting as a broker to facilitate transfer of water from districts with extra supplies to those with inadequate reserves (Schnitt 1991). Water districts from around the State are offering to purchase water from water districts in rice production regions of the Sacramento Valley with superior water rights (*ibid.*). If such transactions are approved, these additional reductions in water delivery could accentuate the impact of drought on the giant garter snake.

Some giant garter snake populations also are vulnerable to adverse effects from flooding. As described above, giant garter snakes seek habitat at higher elevations in which to retreat during the winter dormancy period. Flooding of these retreat areas exposes inactive snakes to the threat of drowning and increased predation. Past, proposed, and ongoing projects have reduced greatly the availability of winter retreat habitat. Surveys conducted after the heavy flooding associated with the February 1986 storm indicated that several giant garter snake populations throughout the southern and central regions of its range had been eliminated or greatly reduced because of a lack of winter retreat habitat (CDFG, unpubl. data).

Livestock grazing also represents a threat to the species. The giant garter snake requires dense vegetative cover in proximity to foraging and basking areas in which to seek refuge from predators and other forms of disturbance. The attraction of livestock to water sources appears to have contributed to the elimination and reduction of the quality of available habitat throughout portions of the species' range (George Hansen, unpubl. report, 1982).

Habitat loss throughout the range of the giant garter snake has resulted in a patchwork of fragmented and isolated habitat remnants. Because of small population size and limited habitat availability, most of the remaining populations appear vulnerable to extirpation from unpredictable environmental, genetic, and demographic events. Island biogeographic theory suggests that extinction rates increase as habitat size decreases and distance from neighboring populations increases. Most remaining giant garter snake populations are small and geographically isolated from one another. These factors predispose such populations to mortality and emigration rates that exceed birth and immigration rates. Further, as remaining habitat units decrease in size, edge effects become increasingly important; smaller habitats have less space available to buffer adverse impacts from outside influences, such as predation, human disturbance, livestock grazing, or chemical contamination. In addition, giant garter snake populations in smaller habitat fragments often are more susceptible to the effects of chance environmental events, such as fire, flooding, and drought.

The breeding of closely related individuals can cause genetic problems in small populations, particularly the expression of deleterious genes (known as inbreeding depression). Individuals and populations possessing deleterious genetic material are less able to cope with environmental conditions and adapt to environmental change. Further, small populations are subject to the effects of genetic drift (the random loss of genetic variability). This phenomenon also reduces the ability of individuals and populations to successfully respond to environmental stresses. Overall, these genetic factors could influence the survivability of the many smaller, genetically isolated giant garter snake populations.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred course of action is to list the giant garter snake as endangered. The current restriction of most giant garter snake populations to small patches of variable quality, privately-owned habitat, and the numerous ongoing and proposed development projects within its range are imminent threats to the species. Because the giant garter snake is in danger of extinction throughout all or a significant portion of its range, it fits the definition of endangered as defined by the Act. Critical habitat is not being designated for this species for reasons discussed in the "Critical Habitat" section of this rule.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that, to the maximum extent prudent and determinable, the Secretary designate critical habitat concurrently with determining a species to be endangered or threatened. The Service finds that designation of critical habitat is not presently prudent for the giant garter snake. Five giant garter snake populations occur on wildlife refuges managed by the Service or California Department of Fish and Game. These agencies are aware of the presence of the species and the importance of protecting the giant garter snake and its habitat. However, most populations on private lands typically contain low numbers of individuals and occur in small patches of variable quality habitat. This situation renders the species vulnerable to acts of vandalism, such as trapping, habitat manipulation, poisoning, or collection, which could seriously deplete population levels and cause irreparable harm. Although fish eating snakes are relatively difficult to keep in captivity, giant garter snakes have been found for sale in pet shops (John Brode, pers. comm., 1991). Considering that rare and listed species typically generate high levels of demand relative to supply in reptilian trade markets, the Service anticipates that the threat of unauthorized collection would increase were the giant garter snake to be listed by the Federal government. Publication of maps and precise descriptions delineating critical habitat areas would likely lead to increased collection of this species and violation of section 9 of the Act.

As discussed above under Factor D, many of the artificially created habitats inhabited by giant garter snakes, such as irrigation and drainage canals, do not fall under Federal jurisdiction. Absent jurisdiction by Federal agencies, designation of critical habitat on private land does not afford additional protection to listed species. Where Federal jurisdiction does extend to populations on private lands, habitat protection will be addressed through the recovery process under section 4 of the Act and through the formal consultation requirements under section 7 of the Act. Therefore, the Service finds that designation of critical habitat is not prudent at this time, because such designation would increase the degree of threat from vandalism and collecting and because it is unlikely to aid in conservation of the giant garter snake.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain activities. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Act provides for possible land acquisition and cooperation with the State and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is subsequently listed, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

Giant garter snake populations inhabiting wetlands on private and public lands would fall under the regulatory jurisdiction of the Corps, pursuant to section 404 of the Clean Water Act and section 10 of the Rivers and Harbors Act. As described under Factor A above, numerous commercial developments currently are proposed in known and likely giant garter snake habitat. Pursuant to 33 CFR 330.5(b)(3), project proposals in giant garter snake habitat otherwise allowed under nationwide permit authority would be subject to scrutiny under section 7 of the Endangered Species Act and imposition of special permit conditions needed to avoid and/or offset impacts incurred by the projects. Pursuant to 33 CFR part 325, individual permits, letters of permission, and regional permits issued by the Corps also would be subject to consultation requirements under section 7 of the Act. In addition, any water development projects proposed by Federal agencies, such as the Department of the Army and U.S. Bureau of Reclamation, would fall under the purview of section 7 of the Act. The American River Watershed Investigation, Sacramento Metropolitan Area Investigation, and the Merced County Streams project, among other Federal project proposals, may require modifications to avoid and/or offset impacts to the giant garter snake should this listing proposal be made final. As discussed above, the giant garter snake is known to occur on several waterfowl management areas owned by the State or Federal government. Habitat manipulation and recreational activities on these areas may be affected by the regulatory requirements of sections 7, 9, and 10 of the Act.

The Act and its implementing regulations found at 50 CFR 17.21 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take (including harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, collect, or attempt any such conduct), import or export, transport in interstate or foreign commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Regulations governing permits are at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities. In some instances, permits may be issued for a specified time to relieve undue economic hardship that would be suffered if such relief were not available.

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, comments or

VOL 56 ISS 249 DEC 27 1991 UMI

suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning this proposed rule are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to this species;

(2) The location of any additional populations of this species and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range, distribution, and population size of this species; and

(4) Current or planned activities in the subject area and their possible impacts on this species.

Any final decision on this proposal will take into consideration the comments and any additional information received by the Service, and such communications may lead to a final regulation that differs from this proposal.

The Act provides for a public hearing on this proposal, if requested. Requests must be received within 45 days of the date of publication of the proposal. Such requests must be made in writing and addressed to the Field Supervisor at the Sacramento Field Office (see **ADDRESSES** section).

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Act. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Proposed Regulations Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend part 17 subchapter B of chapter I, title 50 of the Code Federal Regulations, as set forth below:

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500, unless otherwise noted.

2. It is proposed to amend § 17.11(h) by adding the following, in alphabetical order under REPTILES, to the list of Endangered and Threatened Wildlife:

§ 17.11 Endangered and threatened wildlife.

* * * * *

(h) * * *

Species		Historic range	Vertebrate population where endangered or threatened	Status	When listed	Critical habitat	Special rules
Common name	Scientific name

DEPARTMENT OF AGRICULTURE

Forms Under Review by Office of Management and Budget

December 20, 1991.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act [44 U.S.C. Chapter 35) since the last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from:

Food Safety and Inspection Service

[Docket No. 90–025N]

Livestock and Poultry Connected With Biotechnology Research

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This notice (1) reaffirms a previously published policy statement concluding that animals involved in biotechnology experiments are research animals and are, therefore, subject to the existing regulations for livestock and poultry used for research, and (2) advises that the Food Safety and Inspection Service (FSIS) will inspect for food use livestock and poultry which were involved in such research but which are not genetically modified products of biotechnology. This notice is intended to accommodate public interest in Federal oversight of food applications of biotechnology.

EFFECTIVE DATE: December 27, 1991.

FOR FURTHER INFORMATION CONTACT: Dr. Marvin A. Norcross, Deputy Administrator, Science and Technology, Food Safety and Inspection Service, U.S. Department of Agriculture, Washington, DC 20250, (202) 205–0495.

SUPPLEMENTARY INFORMATION: The livestock and poultry addressed by this notice are those derived from attempts to bring about genetic improvements by transgenesis. Currently, this is usually done by injecting deoxyribonucleic acid (DNA) into fertilized eggs. Such experiments result in only a small proportion of animals being born with the intended genetic change. Currently, over 90 percent of the animals resulting from such experiments do not contain the intended gene. Because the genetic change is not present in these animals to distinguish them from the original animal line, they are not, in fact, transgenic.

In 1986, USDA published a statement of policy in the **Federal Register** (51 FR 23336) concerning research and the regulation of biotechnology applications in agriculture, including meat and poultry products. The policy statement (51 FR 23343) outlined how existing regulations would apply to food animals subjected to or resulting from biotechnology. It concluded that animals used in gene transfer experiments were subject to the experimental animal regulations, 9 CFR 309.17 and 9 CFR 381.75, because they were treated with a chemical such as injected DNA or other nucleic acid vector. This notice reaffirms that notice, specifically with regard to animals produced as a result of gene transfer experiments.

The experimental animal regulations specify that approval must be obtained from FSIS before experimental animals may be presented for slaughter under the Federal meat and poultry products inspection regulations. Thus, the sponsor or investigator of covered experiments must submit data or a summary evaluation of data to demonstrate that the products of livestock or poultry will not be adulterated. Points to consider in demonstrating that particular transgenic animal lines are not adulterated will be made available in 1992. For nontransgenic livestock or poultry derived from transgenic experiments, the data should be submitted to FSIS and would have to show that the animals to be slaughtered for food use do not have the experimental transgene and consequently are equivalent to the parental line and thus, are not adulterated as a result of the experiment. Given the current and continuously evolving technology in this area, there are likely to be a variety of ways in which to demonstrate that an intended g...tic change has not occurred in the animals. The Agency will issue guidelines concerning what would be considered sufficient data, or an acceptable summary evaluation of such data. These guidelines will be provided by the Science and Technology Program, upon request.

Written approval of requests to present experimental animals for slaughter, if granted, will be provided by the Deputy Administrator, Inspection Operations. Upon presentation for Federal inspection of experimental animals that have been approved for slaughter, they would then be subjected to the same inspection procedures and regulations as food animals from traditional production practices.

Done at Washington, DC, on: November 12, 1991.

Ronald J. Prucha,
Acting Administrator.
[FR Doc. 91–30960 Filed 12–26–91; 8:45 am]
BILLING CODE 3410–DM–M

Forest Service

Revocation of Exemption; Eagle Lake Ranger District, Lassen National Forest

AGENCY: Forest Service, USDA.

ACTION: Notice for Revocation of Exemption from Appeal, Salvage and Fuel Reduction Environmental Assessment, Eagle Lake Ranger District, Lassen National Forest.

SUMMARY: The Forest Service is revoking the previous exemption from appeal regarding the decision to sell dead and dying trees that are being killed by the combined effects of severe drought and bark beetles. The project objectives were to reduce the fire hazard, to recover the value of the timber, and to rehabilitate the affected areas. The Salvage and Fuel Reduction Environmental Assessment (EA) has been prepared for all compartments of the Eagle Lake Ranger District, Lassen National Forest, which are located west of the community of Susanville, California

The Lassen National Forest initially identified a higher than normal level of tree mortality occuring throughout the Forest as a result of five years of below normal precipation.

The Forest Supervisor determined through environmental analysis, which included public scoping, that there was good cause to expedite the project. Consideration was given to the fact that the removal of dead and dying timber as soon as possible was essential if the timber is to be utilized, its value to be recovered, and the fire hazard to be reduced.

Subsequent to the Lassen National Forest Supervisor's request for exemption and my granting of the request, published in the **Federal Register** on Tuesday, October 29, 1991, management priorities have been adjusted on the Eagle Lake Ranger District, Lassen National Forest.

On December 10, 1991, the Lassen National Forest informed the Regional Office (Region 5) that as a result of the shift in priorities the Forest will not offer a salvage timber sale under the Salvage and Fuel Reduction EA until approximately June, 1992.

It is my conclusion that the basis for originally granting the exemption from appeals no longer exists. Therefore, it is my decision to revoke the exemption of October 29, 1991. Upon publication of the Decision Notice for the Salvage and Fuel Reduction Environmental Assessment for the Eagle Lake Ranger District, Lassen National Forest, the decision shall be subject to appeal as provided under 36 CFR part 217 *et seq.*

EFFECTIVE DATE: This decision will be effective December 27, 1991.

FOR FURTHER INFORMATION CONTACT: Questions about this decision should be addressed to Joe Barratt, Acting Timber Management Staff Director, Pacific Southwest Region, Forest Service, USDA Forest Service, 630 Sansome Street, San Francisco, CA 94111 at (415) 705–2648, or to Leonard Atencio, Forest Supervisor, Lassen National Forest, 55 South Sacramento Street, Susanville, CA 96130 at (916) 257–2151.

ADDITIONAL INFORMATION: The Cooperative Forestry Assistance Act of 1978 authorizes the Secretary of Agriculture to enhance the growth and maintenance of forests, promote the stability of forest-related industries and employment associated therewith, aid in forest fire prevention and control, conserve the forest cover on watersheds, and protect recreational apportunities and other forest resources.

The environmental analysis for this proposal was documented in the Salvage and Fuel Reduction Environmental Assessment. Public participation in the analysis was solicited through Public Notice published in the Lassen County Times on February 19, 1990.

Additionally, scoping letters were sent to various individuals, businesses, and state and private organizations, soliciting their concerns about the project during February of 1991. Comments received were considered in the issues, range of alternatives and the management requirements and mitigation measures developed. The project files and related maps are available for public review at the Eagle Lake Ranger District, Susanville, California.

VOL 56 ISS 249 DEC 27 1991 UMI

Dated: December 19, 1991.

Edward Whitmore,

Acting Deputy Regional Forester.

[FR Doc. 91-30916 Filed 12-26-91; 8:45 am]

BILLING CODE 3410-11-M

Far East Salvage and Recovery Project, Boise National Forest, Boise County, Idaho; Intent To Prepare an Environmental Impact Statement

AGENCY: Forest Service, USDA.

ACTION: Notice of Intent to prepare an environmental impact statement.

SUMMARY: The Forest Service will prepare an environmental impact statement (EIS) for a salvage and recovery project in the Grandgean-South Fork Payette River area of the Lowman Ranger District, Boise National Forest. The area is approximately 80 miles northeast of Boise, Idaho.

The agency invites written comments and suggestions on the scope of the analysis. The agency also hereby gives notice of the environmental analysis and decision-making process that will occur on the proposal so that interested and affected people are aware of how they may participate and contribute to the final decision.

DATES: The proposal has been previously scoped by a public meeting and two mailings. The public meeting was held at the Boise National Forest Supervisor's Office, Boise Idaho, at 7 p.m. on December 11, 1991. The Lowman Ranger District mailed a scoping letter on September 27, 1991, and an additional scoping letter on November 7, 1991, to people who may be affected by the decision. In addition, a legal notice was published in the Idaho World on October 9, 1991. Comments recieved from this scoping meeting, the letters, and the notice, will be incorporated into the analysis process.

Additional written comments concerning the proposal are encouraged. To be considered in the Draft Environmental Impact Statement (DEIS), comments should be submitted on or before January 27, 1992.

ADDRESSES: Submit written comments to: District Ranger, Lowman, Ranger District, Boise National Forest, HC77 Box 3020, Lowman, Idaho 83637.

FOR FURTHER INFORMATION CONTACT: Direct questions about the proposed action and EIS to Dautis Pearson, Project leader, Lowman Ranger District, 208-259-361.

SUPPLEMENTARY INFORMATION: The purpose of the proposed action is to implement the Boise National Forest Land Resource Management Plan by increasing the growth and yield of timber stands through salvage harvesting of insect killed trees, pheremone baiting of insects to assist in control, and reforestation of mortality, stands. The project is located in the Grandjean and South Fork Payette River area of the Boise National Forest.

Alternatives to the proposal will consider lesser amounts of individual activities and varius combinations of the activities. The most significant differences between alternatives will be: (1) In any inventoried roadless area is treated; and (2) the amount of inventoried roadless area that is treated. A No Action (the project will not take place) alternative will also be considered in the analysis.

As lead agency, the Forest Service will analyze and document direct, indirect and cumulative environmental effects of the range of alternatives. Each alternative will include mitigation measures and monitoring requirements.

The EIS will tier to the Boise National Forest Land and Resource Management Plan (Forest Plan) FEIS (1990) which has specified goals, objectives, desired future conditions, management area direction and standards for the project area. The project area is located in the Upper South Fork Payette River Management Area. Direction for this area has emphasis on wildlife, timber, range, and visuals.

Preliminary issues for the proposal that have been identified to date include the following:

1. Fisheries habitat would need to be maintanined or improved.
2. Threatened, Endangered, and Sensitive plant and animal species would need to be assessed.
3. Soils and hydrology would need to be analyzed for impacts.
4. Timber harvest may alter visual quality and affect the undeveloped character of a part of the Ten Mile/Black Warrior Inventoried Roadless Area.
5. The beetle infestation and resulting mortality are occurring over a large area and may be impacting the potential for future harvest or recovery of forest products.

The scoping process for this project is intended to further define these and other preliminary issues.

Federal, State and local agencies, potential purchasers, and other organizations and individuals who may be interested in or affected by the decision are invited to participate in the scoping process. This process includes:

—Identifying significant issues.
—Determining potential cooperating agencies.
—Identifying groups or individuals interested or affected by the decision.

The analysis is expected to take approximately three months. The draft environmental impact statement (DEIS) is scheduled to be completed and available for public review in February, 1992. The final environmental impact statement and Record of Decision are scheduled to be completed by April, 1992.

Morris Huffman, District Ranger, Lowman Ranger District, Boise National Forest, is the responsible official.

The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency's notice of availability appears in the **Federal Register.** It is very important that those interested in the proposed action participate at that time. To be the most helpful, comments on the DEIS should be as specific as possible and may address the adequancy of the statement or the merits of the alternatives discussed (see The Council on Environmental Quality Regulations for Implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3).

In addition, Federal court decisions have established that reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewers' position and contents. *Vermont Yankee Nuclear Power Corp.* v. *NRDC,* 435 U.S. 519, 553 (1978). Enviornmental objections that could have been raised at the draft stage may be waived if not raised until after completion of the final environmental impact statement. *City of Angoon* v. *Hodel,* (9th Circuit, 1986) and *Wisconsin Heritages, Inc.* v. *Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to insure that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the FEIS.

Dated: December 17, 1991.

Morris D. Huffman,

District Ranger, Lowman Ranger District, Boise National Forest.

[FR Doc. 91-30932 Filed 12-26-91; 8:45 am]

BILLING CODE 3410-11-M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 548]

Approval for Expansion of Foreign-Trade Zone 153, San Diego, CA

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), and the Foreign-Trade Zones Board Regulations (15 CFR part 400), the Foreign-Trade Zones Board (the Board) adopts the following Resolution and Order:

Whereas, the City of San Diego, California, Grantee of Foreign-Trade Zone No. 153, has applied to the Board for authority to expand its general-purpose zone within the Otay Mesa area in San Diego, California, within the San Diego Customs Port of entry;

Whereas, the application was accepted for filing on January 10, 1991, and notice inviting public comment was given in the **Federal Register** on January 22, 1991 (Docket 2–91, 56 FR 2160);

Whereas, an examiners committee has investigated the application in accordance with the Board's regulations and recommends approval;

Whereas, the expansion is necessary to improve and expand zone services in the San Diego area; and,

Whereas, the Board has found that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations are satisfied, and that approval of the application is in the public interest;

Now therefore, the Board hereby orders:

That the Grantee is authorized to expand its zone in accordance with the application filed on January 10, 1991. The grant does not include authority for manufacturing operations, and the Grantee shall notify the Board for approval prior to the commencement of any manufacturing or assembly operations. The authority given in this Order is subject to settlement locally by the District Director of Customs and the Army District Engineer regarding compliance with their respective requirements relating to foreign-trade zones.

Signed at Washington, DC, this 16th day of December, 1991.

Alan M. Dunn,

Assistant Secretary of Commerce for Import Administration, Chairman, Committee of Alternates Foreign-Trade Zones Board.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 91-30975 Filed 12-26-91; 8:45 am]

BILLING CODE 3510-DS-M

[Order No. 547]

Resolution and Order Approving the Application of the County of Monroe, New York, for a Special-Purpose Subzone at the Auto Components Plant of GM/DELCO in Rochester, New York

Proceedings of the Foreign-Trade Zones Board, Washington, DC.

Resolution and Order

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board has adopted the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the County of Monroe, New York, grantee of FTZ 141, filed with the Foreign-Trade Zones Board (the Board) on October 2, 1990, requesting special-purpose subzone status at the automobile parts manufacturing plant of General Motors Corporation, Delco Products Division, located in Rochester, New York, the Board, finding that the requirements of the Foreign-Trade Zones Act, as amended, and the FTZ Board's regulations are satisfied, and that the proposal is in the public interest, approves the application.

The Secretary of Commerce, as Chairman and Executive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

Grant of Authority To Establish a Foreign-Trade Subzone in Rochester, NY

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment, operation, and maintenance of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes", as amended (19 U.S.C. 81a–81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized and empowered to grant to corporations the privilege of establishing, operating, and maintaining foreign-trade zones in or adjacent to ports of entry under the jurisdiction of the United States:

Whereas, the Board's regulations (15 CFR Part 400) provide for the establishment of special-purpose subzones when existing zone facilities cannot serve the specific use involved, and where a significant public benefit will result;

Whereas, the County of Monroe, New York, grantee of Foreign-Trade Zone No. 141, has made application (filed October 2, 1990, FTZ Docket 39–90, 55 FR 43018, 10/25/90) in due and proper form to the Board for authority to establish a special-purpose subzone at the automobile components manufacturing plant of General Motors Corporation, Delco Products Division, located in Rochester, New York;

Whereas, notice of said application has been given and published, and full opportunity has been afforded all interested parties to be heard; and,

Whereas, the Board has found that the requirements of the Act and the Board's regulations are satisfied;

Now, therefore, in accordance with the application filed October 2, 1990, the Board hereby authorizes the establishment of a subzone at the GM/Delco plant in Rochester, New York, designated on the records of the Board as Foreign-Trade Subzone No. 141C at the location mentioned above and more particularly described on the maps and drawings accompanying the application, said grant of authority being subject to the provisions and restrictions of the Act and the Regulations issued thereunder, to the same extent as though the same were fully set forth herein, and also to the following express conditions and limitations:

Activation of the subzone shall be commenced within a reasonable time from the date of issuance of the grant, and prior thereto, any necessary permits shall be obtained from Federal, State, and municipal authorities.

Officers and employees of the United States shall have free and unrestricted access to and throughout the foreign-trade subzone in the performance of their official duties.

The grant shall not be construed to relieve responsible parties from liability for injury or damage to the person or property of others occasioned by the construction, operation, or maintenance of said subzone, and in no event shall the United States be liable therefore.

The grant is further subject to settlement locally by the District Director of Customs and District Army Engineer with the Grantee regarding compliance with their respective requirements for the protection of the revenue of the United States and the installation of suitable facilities.

VOL 56 ISS 249 DEC 27 1991 UMI

In witness whereof, the Foreign-Trade Zones Board has caused its name to be signed and its seal to be affixed hereto by its Chairman and Executive Officer or his delegate at Washington, DC, this 16th day of December, 1991, pursuant to Order of the Board.

Alan M. Dunn,

Assistant Secretary of Commerce for Import Administration, Chairman, Committee of Alternates Foreign-Trade Zones Board.

BILLING CODE 3510-DS-M

[Order No. 552]

Resolution and Order Regarding the Application of the Port of Houston Authority Approving With Restrictions Special-Purpose Subzone Status at the Phibro Refining, Inc., Refinery in Houston, Texas and Disapproving Subzone Status for the Phibro Refinery in Texas City, Texas; Proceedings of the Foreign-Trade Zones Board, Washington, DC

Resolution and Order

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) adopts the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the Port of Houston Authority, grantee of FTZ 84, filed with the Foreign-Trade Zones Board (the Board) on May 18, 1990, requesting special-purpose subzone status at the oil refineries of Phibro Refining, Inc., (formerly Hill Petroleum Company) located in Houston and Texas City, Texas, the Board, finding (1), in regard to the Houston site, that the requirements of the FTZ Act, as amended, and the Board's regulations would be satisfied and that the proposal would be in the public interest if approval were subject to the following restrictions: foreign crude oil used as fuel for the refinery shall be dutiable; and, privileged foreign status shall be elected on foreign crude oil and other foreign merchandise admitted to the subzone, approves that part of the application subject to the foregoing restrictions; and, finding (2), in regard to the Texas City site, that such requirements would not be satisfied because approval of that part of the proposal would not be in the public interest, disapproves that part of the application.

The approval of the Houston site is subject to the FTZ Act and the FTZ Board's regulations (as revised, 56 FR 50790–50808, 10/8/91), including § 400.28. The Secretary of Commerce, as Chairman and Executive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

Board Order and Grant of Authority Establishing a Foreign-Trade Subzone in Houston, Texas and Disapproving Subzone Status for a Proposed Site in Texas City, Texas

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment * * * of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a–81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized to grant to corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs ports of entry;

Whereas, the Board's regulations (15 CFR part 400) provide for the establishment of special-purpose subzones;

Whereas, the Port of Houston Authority, grantee of FTZ 84, has made application (filed 5–18–90, FTZ Docket 19–90, 55 FR 22053, 5–31–90) to the Board for authority to establish special-purpose subzones at the oil refineries of Phibro Refining, Inc., (formerly Hill Petroleum Company) in Houston, and Texas City, Texas;

Whereas, notice of said application has been given and published, and full opportunity has been afforded all interested parties to be heard; and,

Whereas, the Board has found that the requirements of the Act and the Board's regulations are satisfied with respect to the request for subzone status at the Houston refinery, but that such requirements are not satisfied with respect to the request for subzone status at the Texas City refinery;

Now, Therefore, the Board hereby authorizes the establishment of a subzone at the Phibro refinery in Houston, Texas, designated on the records of the Board as Foreign-Trade Subzone 84F, at the location described in the application, subject to the Act and the Board's Regulations (as revised, 56 FR 50790–50808, 10/8/91), including § 400.28, and to the restrictions in the resolution accompanying this action, and disapproves the request for subzone status at the Phibro Refinery in Texas City, Texas.

Signed at Washington, DC, this 20th day of December, 1991, pursuant to Order of the Board.

Francis J. Sailer,

Acting Assistant Secretary of Commerce for Import Administration, Chairman, Committee of Alternates, Foreign-Trade Zones Board.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-DS-M

[Order No. 553]

Resolution and Order Approving With Restrictions the Application of the Port of Houston Authority for a Subzone at the Heating and Cooling Equipment Manufacturing Plant of Goodman Manufacturing Corporation in Houston, Texas

Proceedings of the Foreign-Trade Zones Board, Washington, D.C.

Resolution and Order

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) adopts the following Resolution and Order:

The Board, having considered the matter, hereby orders:

After consideration of the application of the Port of Houston Authority, grantee of Foreign-Trade Zone 84, filed with the Foreign-Trade Zones Board (the Board) on February 19, 1991, requesting special-purpose subzone status for the heating and cooling equipment manufacturing plant of Goodman Manufacturing Corporation in Houston, Texas, within the Houston Customs port of entry, the Board, finds that the requirements of the Foreign-Trade Zones Act, as amended, and the Board's regulations would be satisfied, and that the proposal would be in the public interest, if approval were subject to the restrictions listed below, approves the application, subject to the following two restrictions:

1. Privileged foreign status (19 CFR 146.41) shall be elected on all foreign steel mill products admitted to the subzone; and,

2. Privileged foreign status shall be elected on all foreign merchandise admitted to the subzone for use in the production of central-type (unitary) heating and/or air-conditioning products.

The approval is subject to the FTZ Act and the FTZ Board's regulations (as revised, 56 FR 50790–50808, 10–8–91), including § 400.28. The Secretary of Commerce, as Chairman and Executive Officer of the Board, is hereby authorized to issue a grant of authority and appropriate Board Order.

Grant of Authority for Subzone Status at the Goodman Manufacturing Corporation Plant in Houston, Texas

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment * * * of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a–81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized and empowered to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs port of entry;

Whereas, the Board's regulations (15 CFR part 400) provide for the establishment of subzones when existing zone facilities cannot serve the specific use involved, and where a significant public benefit will result;

Whereas, the Port of Houston Authority, Grantee of Foreign-Trade Zone No. 84, has made application (filed 2–19–91, FTZ Docket 11–91, 56 FR 9667, 03–07–91) to the Board for authority to establish a subzone at the heating and cooling equipment manufacturing plant of Goodman Manufacturing Corporation in Houston, Texas;

Whereas, notice of said application has been given and published, and full opportunity has been afforded all interested parties to be heard; and,

Whereas, the Board has found that the requirements of the Act and the Board's regulations would be satisfied and that the proposal would be in the public interest if approval were given subject to the restrictions in the resolution accompanying this action;

Now, therefore, in accordance with the application filed February 19, 1991, the Board hereby authorizes the establishment of a subzone at the Goodman Manufacturing Corporation plant in Houston, Texas, designated on the records of the Board as Foreign-Trade Subzone 84G, at the location described in the the application, subject to the restrictions in the resolution accompanying this action, and to the Act and the Board's regulations (as revised, 56 FR 50790–50808, 10–8–91), including Section 400.28.

Signed this 20th day of December, 1991, pursuant to Order of the Board.

Francis J. Sailer,

Acting Assistant Secretary of Commerce for Import Administration, Chairman, Committee of Alternates Foreign-Trade Zones Board.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-DS-M

International Trade Administration

[A-533-803]

Notice of Postponement of Preliminary Antidumping Duty Determination: Bulk Ibuprofen From India

AGENCY: Import Administration, International Trade Administration, Commerce.

EFFECTIVE DATE: December 27, 1991.

FOR FURTHER INFORMATION CONTACT: Stephanie L. Hager or Paulo F. Mendes, Office of Countervailing Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377–5055 or (202) 377–5050, respectively.

Postponement

On August 20, 1991, the Department of Commerce ("the Department") initiated an antidumping duty investigation of bulk ibuprofen from India. The notice stated that we would issue our preliminary determination on or before January 7, 1992 (56 FR 42026, August 26, 1991).

On December 11, 1991, counsel for petitioners requested that the Department postpone the preliminary determination in this investigation until 210 days after the date on which the antidumping petition was filed. We find no compelling reason to deny petitioner's request. Therefore, pursuant to 19 CFR 353.15(c), we are postponing the date of the preliminary determination in this investigation until not later than February 26, 1992. The U.S. International Trade Commission is being advised of this postponement in accordance with section 733(f) of the Tariff Act of 1930, as amended ("the Act").

This notice is published pursuant to section 733(c)(2) of the Act and 19 CFR 353.15(d).

Dated: December 19, 1991.

Francis J. Sailer,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[A-508-604]

Industrial Phosphoric Acid From Israel; Preliminary Results of Antidumping Duty Administrative Review and Intent To Revoke in Part; Antidumping Duty Order

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review and intent to revoke in part the antidumping duty order.

SUMMARY: In response to requests by the petitioner and one respondent, the Department of Commerce has conducted an administrative review of the antidumping duty order on industrial phosphoric acid from Israel. The review covers two manufacturers/exporters of this merchandise to the United States and the period August 1, 1989 through July 31, 1990.

We preliminarily determine the dumping margin for Negev Phosphates to be zero. Provided that this conclusion remains unchanged in the final results of this review, and that we are satisfied that Negev Phosphates is not likely to sell the subject merchandise at less than fair value in the future, the Department intends to revoke the antidumping duty order with respect to Negev Phosphates upon publication of these final results.

Because Haifa Chemicals did not respond to the Department's questionnaire, we are using best information otherwise available for cash deposit and appraisement purposes. As best information for Haifa Chemicals, we preliminarily determine the dumping margin to be 6.82 percent *ad valorem*, the highest dumping margin for any company under the order. We invite interested parties to comment on these preliminary results and intent to revoke.

EFFECTIVE DATE: December 27, 1991.

FOR FURTHER INFORMATION CONTACT: Gayle Longest or Maria MacKay, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–2786.

SUPPLEMENTARY INFORMATION:

Background

On August 6, 1990, the Department of Commerce (the Department) published in the **Federal Register** a notice of "Opportunity to Request Administrative Review" (55 FR 32279) of the antidumping duty order on industrial phosphoric acid from Israel (52 FR 31057, August 19, 1987) for the period August 1, 1989 through July 31, 1990. On

VOL
56
ISS
249
DE
27
1991
UMI

August 29, 1990, FMC Corporation and Monsanto Company, the petitioners, requested an administrative review of two manufacturers/exporters, Negev Phosphates, Ltd., and Haifa Chemicals, Ltd. On August 31, 1990, Negev Phosphates also requested a review. We initiated the review of the two manufacturers/exporters on September 24, 1990 (54 FR 39032). A timely request for revocation from the antidumping duty order was submitted by Negev Phosphates. The Department has now conducted the administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of Review

Imports covered by the review are shipments of industrial phosphoric acid (IPA). This merchandise is currently classifiable under item number 2809.20.00 of the Harmonized Tariff Schedule (HTS). The HTS item number is provided for convenience and Customs purposes. The written description remains dispositive.

The review covers Negev Phosphates, Ltd., and Haifa Chemicals, Ltd., two manufacturers/exporters to the United States of Israeli industrial phosphoric acid, and the period August 1, 1989 through July 31, 1990. For Haifa Chemicals, which did not respond to the Department's questionnaire, we used best information available for assessment of antidumping duties and cash deposit purposes. Best information is the highest margin for a company under the order, 6.82 percent.

United States Price

As provided in section 772(b) of the Tariff Act, we used the purchase price of the subject merchandise to represent United States price since the merchandise was purchased by an unrelated U.S. customer directly from the foreign manufacuturer prior to importation. We calculated purchase price sales based on the unpacked, C&F prices to unrelated purchasers in the United States. We made deductions, where applicable, for brokerage/handling, foreign inland freight, and ocean freight.

Sales which entered the United States between August 1, 1989 and December 31, 1989 have been assessed countervailing duties; therefore, they are entitled to an upward adjustment to United States price pursuant to section 772(d)(1)(D) of the Tariff Act. See Industrial Phosphoric Acid From Israel; Final Results of Countervailing Duty Administrative Review, 56 FR 50854 (October 9, 1991). Therefore, we have increased Negev's U.S. price by the amount of the company's export subsidies found in the 1989 administrative review of the countervailing duty order on Israeli industrial phosphoric acid. For the period January 1, 1990 through July 31, 1990, countervailing duties have not been assessed on entries of the merchandise under review; therefore, we cannot make an adjustment to United States price at this time. See *Serampore Industries Pvt. Ltd. et. al.* v. *United States*, 11 CIT 866, 675 F. Supp. 1354 (1987); see also Final Results of Antidumping Duty Administrative Review; Certain Iron Construction Castings From India, 55 FR 40697 (October 4, 1990).

Foreign Market Value

In calculating foreign market value, the Department used home market price, as defined in section 773 of the Act, since sufficient quantities of such or similar merchandise were sold in the home market to provide a basis for comparison. Home market price was based on the packed, ex-factory or delivered price to all purchasers in the home market. Where applicable, we made adjustments for inland freight, and differences in packing, direct selling and credit expenses.

Preliminary Results of Review

As a result of our comparison of United States price to foreign market value, we preliminarily determine that the following margins exist for the period August 1, 1989 through July 31, 1990:

Manufacturer/exporter	Margin (percent)
Negev Phosphates	0.00
Haifa Chemicals	6.82
All others	0.00

Negev Phosphates has had sales at not less than fair value for at least three consecutive years. In addition, as provided in 19 CFR 353.25(a)(2)(iii), Negev Phosphates has agreed in writing to an immediate suspension of liquidation and reinstatement of the order if circumstances develop which indicate that Israeli industrial phosphoric acid exported to the United States by Negev Phosphates is being sold at less than fair value. Therefore, we intend to revoke the antidumping order on Israeli industrial phosphoric acid with respect to Negev Phosphates. If this partial revocation is made final, it will apply to all unliquidated entries of this merchandise produced by Negev Phosphates and exported to the United States entered, or withdrawn from warehouse, for consumption, on or after August 1, 1990.

Parties to the proceeding may request disclosure and interested parties may request a hearing not later than 10 days after the date of publication of this notice. Interested parties may submit written arguments in case briefs on these preliminary results within 30 days of the date of publication. Rebuttal briefs, limited to arguments raised in case briefs, may be submitted seven days after the time limit for filing the case brief. Any hearing, if requested, will be held seven days after the scheduled date for submission of rebuttal briefs. Copies of case briefs and rebuttal briefs must be served on interested parties in accordance with 19 CFR 353.38(e).

The Department will publish the final results of the administrative review including the results of its analysis of issues raised in any case or rebuttal briefs or at a hearing.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Furthermore, the following deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise from Israel entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rate for the reviewed companies which remain subject to the order will be that established in the final results of this administrative review; (2) for merchandise exported by manufacturers or exporters not covered in this review but covered in previous reviews or the original less-than-fair-value investigation, the cash deposit rate will continue to be the company-specific rate published in the final determination covering the most recent period; (3) if the exporter is not a firm covered in this review, previous reviews, or the original investigation, but the manufacturer is, the cash deposit rate will be that established for the manufacturer of the merchandise in the final results of this review, or if not covered in this review, the most recent review period or the original investigation; and (4) the cash deposit rate for any future entries from all other manufacturers or exporters who are not covered in this or prior administrative reviews, and who are unrelated to the reviewed firms or any previously reviewed firm will be the "All Others" rate established in the final results of this administrative review. This rate represents the highest rate for any firm in the administrative review (whose shipments to the United States were reviewed), other than those firms receiving a rate based entirely on best information available. These deposit requirements, when imposed, shall remain in effect until the publication of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: December 17, 1991.

Francis J. Sailer,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

[A-122-813]

Preliminary Determination of Sales at Less Than Fair Value: Nepheline Syenite From Canada

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 27, 1991.

FOR FURTHER INFORMATION CONTACT: John Gloninger, Office of Antidumping Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377-2778.

PRELIMINARY DETERMINATION:

Background

Since the notice of initiation on August 1, 1991 (56 FR 37526), the following events have occurred.

On August 22, 1991, the Department of Commerce (the Department) presented its questionnaire to Unimin Canada Ltd., which accounted for at least 60 percent of known exports to the United States during the period of investigation (POI), in accordance with 19 CFR 353.42(b).

On August 26, 1991, the International Trade Commission (ITC) preliminarily determined that there is a reasonable indication that a regional industry in the United States is being materially injured by reason of imports of nepheline syenite (NS) from Canada (56 FR 43938).

On September 9 and 26, 1991, we received responses to the Department's questionnaire. We issued deficiency letters on September 26 and October 21, 1991, and received responses on October 11 and November 5, 1991. We issued a supplementary deficiency letter on November 7, 1991, and received a response to it on November 19, 1991. On November 27, 1991, we received revised computer responses from Unimin.

On December 9, 1991, counsel for Pittsburgh Corning Corporation entered a notice of appearance in the investigation and submitted comments challenging the standing of the petitioner, The Feldspar Corporation (TFC). On September 19, 1991, Unimin requested a suspension agreement, pursuant to article 4.2 of the GATT Antidumping Code, which requires the Department to give respondents in a regional industry case the opportunity to enter into a suspension agreement before any antidumping duties can be levied. On November 20, 1991, Unimin submitted a draft suspension agreement for the Department to consider. On December 17, 1991, TFC submitted to the Department its comments concerning the Unimin draft agreement. We are considering both of these issues and will decide them in a subsequent determination in this proceeding.

Scope of Investigation

The product covered by this investigation is nepheline syenite. For purposes of this investigation, nepheline syenite is a coarse crystalline rock consisting principally of feldspathic minerals (*i.e.*, sodium-potassium feldspars and nepheline), with little or no free quartz, and ground no finer than 140 mesh.

Nepheline syenite is currently classifiable under item 2529.30.0010 of the Harmonized Tariff Schedule (HTS). Although the HTS subheading is provided for convenience and customs purposes, our written description of the scope of this proceeding is dispositive.

Period of Investigation

The POI is February 1, 1991, through July 31, 1991.

Such or Similar Comparisons

We have determined for purposes of the preliminary determination that the product covered by this investigation comprises a single category of "such or similar" merchandise.

Fair Value Comparisons

To determine whether sales of NS from Canada to the United States were made at less than fair value, we compared the United States price to the foreign market value (FMV), as specified in the "United States Price" and "Foreign Market Value" sections of this notice. We compared U.S. sales of NS to sales of identical and similar NS sold in Canada.

United States Price

We based United States price on purchase price, in accordance with section 772(b) of the Tariff Act of 1930, as amended (the Act), because all U.S. sales were made to unrelated parties prior to the importation into the United States. Exporter's sales price methodology is not appropriate because the subject merchandise was not introduced into the inventory of Unimin's related U.S. selling agent, this was the customary commercial channel for sales of this merchandise between Unimin and its U.S. customers, and the selling agent acted only as a processor of sales-related documentation and a communication link with unrelated U.S. customers.

We calculated purchase price based on packed, f.o.b. plant and delivered prices. We made deductions, where appropriate, for foreign inland freight, inland freight, marine insurance, loading, U.S. brokerage and handling, and railcar leasing costs in accordance with section 772(d)(2) of the Act. In addition, we made deductions for discounts, rebates and post-sale price adjustments. In accordance with section 772(d)(1)(C) of the Act, we added to the United States price the amount of the Canadian value-added tax that would have been collected had the Canadian government taxed the exports.

Foreign Market Value

In order to determine whether there were sufficient sales of NS in the home market to serve as a viable basis for calculating FMV, we compared the volume of home market sales of NS to the volume of third country sales of NS, in accordance with section 773(a)(1) of the Act. Unimin had a viable home market with respect to sales of NS during the POI.

We calculated FMV based on delivered prices to unrelated customers in the home market. We made deductions, where appropriate, for rebates, inland freight, railcar leasing, loading costs, and post-sale price adjustments. We deducted home market packing costs and added U.S. packing costs, in accordance with section 773(a)(1) of the Act.

Pursuant to 19 CFR 353.56 of the Department's regulations, we made circumstance of sale adjustments, where appropriate, for differences in credit expenses. We recalculated Unimin's imputed credit expenses incurred on home market and U.S. sales net of discounts and rebates. We recalculated credit expenses on those home market and U.S. sales for which Unimin had not

VOL 56 ISS 249 DE 27 1991 UMI

received payment as of the date of its last deficiency response, using the average credit period reported for all sales for which payment had been received. Although Unimin borrowed in both markets, the U.S. interest rate was the lowest rate in both markets. Therefore, we have used Unimin's short-term U.S. interest rate to impute credit expenses on home market sales. This use of the lowest interest rate in both markets is consistent with the Court of Appeal's decision in LMI-La Metalli Industriale, S.P.A. v. United States (LMI), 912 F.2d 455 (Fed. Cir. 1990). We also made a circumstance of sale adjustment for differences in the amounts of value-added taxes.

Lastly, we made an adjustment for physical differences in merchandise, where appropriate, in accordance with 19 CFR 353.57.

Currency Conversion

We made currency conversions based on the official exchange rates in effect on the dates of the U.S. sales as certified by the Federal Reserve Bank.

Verification

As provided in section 776(b) of the Act, we will verify the information used in making our final determination.

Suspension of Liquidation

In accordance with section 733(d)(1) of the Act, we are directing the Customs Service to suspend liquidation of all entries of NS from Canada that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. The Customs Service shall require a cash deposit or posting of a bond equal to the estimated preliminary dumping margin, as shown below. The suspension of liquidation will remain in effect until further notice. The weighted-average dumping margins are as follows:

Manufacturer/producer/exporter	Margin percentage
Unimin Corp.	9.61
All others	9.61

ITC Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination.

If our final determination is affirmative, the ITC will determine whether these imports are materially injuring, or threaten material injury to, the U.S. industry before the later of 120 days after the date of this preliminary determination or 45 days after our final determination.

Public Comment

In accordance with 19 CFR 353.38, case briefs or other written comments in at least ten copies must be submitted to the Assistant Secretary for Import Administration no later than February 7, 1992, and rebuttal briefs no later than February 12, 1992. In accordance with 19 CFR 353.38(b), we will hold a public hearing, if requested, to give interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. Tentatively, the hearing will be held on February 14, 1992, at 9:30 a.m. at the U.S. Department of Commerce, room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Parties should confirm by telephone the time, date, and place of the hearing 48 hours before the scheduled time.

Interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Import Administration, U.S. Department of Commerce, Room B-099, within ten days of the publication of this notice in the **Federal Register**. Requests should contain: (1) the party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. In accordance with 19 CFR 353.38(b), oral presentations will be limited to issues raised in the briefs.

This determination is published pursuant to section 733(f) of the Act (19 U.S.C. 1673b(f)) and 19 CFR 353.15.

Dated: December 19, 1991.

Francis J. Sailer,

Acting Assistant Secretary for Import Administration.

[A-201-504]

Porcelain-on-Steel Cooking Ware From Mexico; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review.

SUMMARY: In response to requests by two respondents and the petitioner, the Department of Commerce has conducted an administrative review of the antidumping duty order on porcelain-on-steel cooking ware from Mexico. The review covers two manufacturers/exporters of this merchandise to the United States and the period December 1, 1989 through November 30, 1990. The preliminarily results indicate dumping margins exist. We invite interested parties to comment on these preliminary results.

EFFECTIVE DATE: December 27, 1991.

FOR FURTHER INFORMATION CONTACT: Lorenza Olivas or Maria McKay, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2686.

SUPPLEMENTARY INFORMATION:

Background

On December 12, 1990, the Department of Commerce (the Department) published in the **Federal Register** a notice of "Opportunity to Request Administrative Review" (55 FR 51139) of the antidumping duty order on porcelain-on-steel cooking ware from Mexico for the period December 1, 1989 through November 30, 1990. On December 26, 1990, respondents Acero Porcelanizado, S.A. de C.V. (APSA) and CINSA, S.A. de C.V., requested an administrative review. On December 27, 1990, petitioner General Housewares Corporation also requested an administrative review. We initiated the review on January 30, 1991 (56 FR 3445). The Department has now conducted that administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Tariff Act).

Scope of Review

Imports covered by this review are shipments of porcelain-on-steel cooking ware, including tea kettles, which do not have self-contained electric heating elements. All of the foregoing are constructed of steel and are enameled or glazed with vitreous glasses. This merchandise is currently classifiable under Harmonized Tariff Schedule (HTS) item number 7323.94.00. Kitchenware currently entering under HTS item number 7323.94.00.10 is not subject to the order. The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

The review covers two manufacturers/exporters, APSA and CINSA, of Mexican porcelain-on-steel cooking ware.

United States Price

In calculating United States price, the Department used purchase price and exporter's sales price, as defined in section 772 of the Tariff Act. For those sales made directly to unrelated parties prior to importation into the United States, we based the United States price on purchase price, in accordance with section 772(b) of the Act. In those cases where sales were made through a related sales agent in the United States to an unrelated purchaser prior to the date of importation, we also used purchase price as the basis for determining United States price. For the latter sales, the Department determined that purchase price was the appropriate determinant of United States price because the merchandise was shipped directly from the manufacturer to the unrelated buyers, without being introduced into the inventory of the related selling agent. Moreover, direct shipment from the manufacturers to the unrelated buyers was the customary commercial channel for sales of this merchandise between the parties involved. Finally, the related selling agent located in the United States acted only as a processor of sales-related documentation and a communication link with the unrelated U.S. buyers.

Where all the above elements are met, we regard the routine selling functions of the exporter as merely having been relocated geographically from the country of exportation to the United States, where the sales agent performs them. Whether these functions take place in the United States or abroad does not change the substance of the transactions or the functions themselves.

Where sales to the first unrelated purchaser occurred after importation into the United States, we based U.S. price on exporter's sales price, in accordance with section 772(c) of the Tariff Act. Purchase price and exporter's sales price were based on the packed, f.o.b. price to unrelated purchasers in the United States. We made adjustments, where applicable, for brokerage, user fees, foreign inland freight and insurance, discounts and rebates, direct and indirect selling expenses, commissions, credit and U.S. Customs duties. An addition to U.S. price was made for value added taxes not imposed by reason of exportation.

Sales which entered the United States between December 1, 1989 and December 31, 1989, have been assessed countervailing duties; therefore, they are entitled to an upward adjustment to the U.S. price pursuant to section 772(d)(1)(D) of the Tariff Act. Therefore, we have increased the U.S. price by the amount of the export subsidies found in the concurrent countervailing duty review. For the period January 1, 1990 through November 30, 1990, countervailing duties have not yet been assessed for the merchandise under review; therefore, we have not made an adjustment to the United States price at this time.

Foreign Market Value

In calculating foreign market value, the Department used home market price, as defined in section 773 of the Tariff Act, for APSA. We also used home market price for CINSA, when sufficient quantities of such or similar merchandise were sold in the home market, at or above the cost of production, to provide a basis for comparison. Home market price was based on the packed, ex-factory or delivered price to related and unrelated purchasers in the home market. Where applicable, we made adjustments for inland freight and insurance, credit expenses, discounts, rebates, commissions, indirect U.S. selling expenses to offset those home market commissions, and home market indirect selling expenses up to the amount of U.S. indirect selling expenses. We used constructed value for CINSA's home market models for which there were insufficient sales at or above the cost of production. Constructed value consisted of the sum of materials, fabrication, overhead, general expenses, profit, and U.S. packing. In accordance with section 773(e)(1)(B), we used the actual amount of general expenses because those amounts were more than the statutory minimum of ten percent. We used the actual amount of profit because it exceeded the statutory minimum of eight percent.

Preliminary Results of the Review

As a result of our review, we preliminarily determine the dumping margins to be:

Manufacturer/exporter	Time period	Margin (percent)
APSA	Dec. 1, 1989 to Nov. 30, 1990.	3.12
CINSA	Dec. 1, 1989 to Nov. 30, 1990.	6.27
All others	Dec. 1, 1989 to Nov. 30, 1990.	6.27

Parties to the proceeding may request disclosure and interested parties may request a hearing not later than 10 days after publication of this notice. Interested parties may submit written arguments in case briefs on these preliminary results within 30 days of the date of publication. Rebuttal briefs, limited to arguments raised in case briefs, may be submitted seven days after the time limit for filing the case brief. Any hearing, if requested, will be held seven days after the scheduled date for submission of rebuttal briefs. Copies of case briefs and rebuttal briefs must be served on interested parties in accordance with 19 CFR 353.38(e). Representatives of parties to the proceeding may request disclosure of proprietary information under administrative protective order no later than 10 days after the representative's client or employer becomes a party to the proceeding, but in no event later than the date the case briefs are due.

The Department will publish the final results of the administrative review including the results of its analysis of issues raised in any case or rebuttal brief or at a hearing.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions directly to the Customs Service.

Further, the following deposit requirements will be effective upon publication of the final results of this administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided by section 751(a)(1) of the Tariff Act: (1) The cash deposit rate for the reviewed companies will be that established in the final results of this administrative review; (2) for merchandise exported by manufacturers or exporters not covered in this review but covered in previous reviews or the original less-than-fair-value investigation, the cash deposit rate will continue to be the company-specific rate published in the final results or final determination covering the most recent period; (3) if the exporter is not a firm covered in this review, previous reviews, or the original investigation, but the manufacturer is, the cash deposit rate will be that established for the manufacturer of the merchandise in the final results of this review, or if not covered in this review, the most recent review or the original investigation; and (4) the cash deposit rate for any furture entries from all other manufacturers or exporters who are not covered in this or prior administrative reviews, and who are unrelated to the reviewed firm or any previously reviewed firm, will be the "all other" rate established in the final results of this administrative review. This rate represents the highest rate for any firm in the administrative review (whose shipments to the United States were reviewed), other than those firms receiving a rate based entirely on best information available.

VOL 56 ISS 249 DEC 27 1991 UMI

These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: December 20, 1991.

Francis J. Sailer,

Acting Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-M

Articles of Quota Cheese; Annual Listing of Foreign Government Subsidies

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Publication of annual list of foreign government subsidies on articles of quota cheese.

SUMMARY: The Department of Commerce, in consultation with the Secretary of Agriculture, has prepared its annual list of foreign government subsidies on articles of quota cheese. We are publishing the current listing of those subsidies that we have determined exist.

EFFECTIVE DATE: January 1, 1992.

FOR FURTHER INFORMATION CONTACT: Patricia W. Stroup or Michael Rollin, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230, telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION: Section 702(a) of the Trade Agreements Act of 1979 ("the TAA") requires the Department of Commerce ("the Department") to determine, in consultation with the Secretary of Agriculture, whether any foreign government is providing a subsidy with respect to any article of quota cheese, as defined in section 701(c)(1) of the TAA, and to publish an annual list and quarterly updates of the type and amount of those subsidies.

The Department has developed, in consultation with the Secretary of Agriculture, information on subsidies (as defined in section 702(h)(2) of the TAA) being provided either directly or indirectly by foreign governments on articles of quota cheese. The appendix to this notice lists the country, the subsidy program or programs, and the gross and net amount of each subsidy on which information is currently available.

The Department will incorporate additional programs which are found to constitute subsidies, and additional information on the subsidy programs listed, as the information is developed.

The Department encourages any person having information on foreign government subsidy programs which benefit articles of quota cheese to submit such information in writing to the Assistant Secretary for Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

This determination and notice are in accordance with section 702(a) of the TAA (19 U.S.C. 1202 note).

Dated: December 17, 1991.

Francis J. Sailer,

Acting Assistant Secretary for Import Administration.

Appendix

QUOTA CHEESE SUBSIDY PROGRAMS

Country	Program(s)	Gross [1] subsidy (¢/lb.)	Net [2] subsidy (¢/lb.)
Belgium	European Community (EC) restitution payments.	42.8	42.8

Certain Textiles and Textile Products From Argentina; Determination Not To Revoke Countervailing Duty Order

AGENCY: International Trade Administration/Import Administration Department of Commerce.

ACTION: Notice of determination not to revoke countervailing duty order.

SUMMARY: The Department of Commerce is notifying the public of its determination not to revoke the countervailing duty order on certain textiles and textile products from Argentina, specifically, men's and boys' woolen garments.

EFFECTIVE DATE: December 27, 1991.

FOR FURTHER INFORMATION CONTACT: Lorenza Olivas or Anne D'Alauro, Office of Countervailing Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377-2786.

SUPPLEMENTARY INFORMATION: On November 4, 1991, the Department of Commerce (the Department) published in the **Federal Register** (56 FR 56407) its intent to revoke the countervailing duty order on certain textiles and textile products from Argentina (48 FR 53421; November 16, 1978). In accordance with 19 CFR 355.25(d)(4)(iii), the Secretary of Commerce will conclude that an order is no longer of interest to interested parties and will revoke the order if no interested party objects to revocation or requests an administrative review by the last day of the fifth anniversary month. We had not received a request for an administrative review of the order for the last four consecutive annual anniversary months.

On November 12, 1991, the petitioner, the Amalgamated Clothing and Textile Workers Union, objected to our intent to revoke the order. Therefore, we no longer intend to revoke the order.

This notice is in accordance with 19 CFR 355.25(d).

Dated: December 23, 1991.

Barbara E. Tillman,

Acting Deputy Assistant, Secretary for Compliance.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Coastal Zone Management: Federal Consistency Appeal by José R. Pérez-Villamil From an Objection by the Puerto Rico Planning Board

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of decision.

On November 20, 1991, the Secretary of Commerce (Secretary) issued a decision in the consistency appeal of José R. Pérez-Villamil (Appellant). The Appellant had applied to the U.S. Army Corps of Engineers (Corps) for a permit to construct a pier in an ecologically sensitive area which supports endangered and threatened sea turtles, near Tamarindo Bay, on Culebra Island, Puerto Rico. In conjunction with the Federal permit application, the Appellant submitted to the Corps for review of the Puerto Rico Planning Board (PRPB), the Commonwealth of Puerto Rico's (Commonwealth) coastal management agency, under section 307(c)(3)(A) of the Coastal Zone Management Act of 1972, as amended (CZMA), 16 U.S.C. 1456(c)(3)(A), a certification that the proposed activity is consistent with the Commonwealth's Federally-approved Coastal Management Program.

On July 24, 1989, the PRPB objected to the Appellant's consistency certification for the proposed project on the ground that the proposed pier is not in accordance with the Commonwealth's Coastal Management Program policies that protect sea turtle habitats. The PRPB did not recommend any alternatives to the proposed pier. Under CZMA section 307(c)(3)(A) and 15 CFR 930.131 (1988), the PRPB's consistency objection precludes the Corps from issuing a permit for the activity unless the Secretary finds that the activity is either consistent with the objectives or purposes of the CZMA (Ground I) or necessary in the interest of national security (Ground II).

Upon consideration of the information submitted by the Appellant, the Commonwealth and interested Federal agencies, the Secretary made the following findings pursuant to 15 CFR 930.121(b): the proposed pier will cause adverse effects on the resources of the coastal zone, when performed separately or in conjunction with other activities, substantial enough to outweigh its contribution to the national interest. Accordingly, the proposed project is not consistent with the objectives or purposes of the CZMA. Because the Appellant's proposed project failed to satisfy the requirements of Ground I, and the Appellant did not plead Ground II, the Secretary did not override the Commonwealth's objection to the Appellant's consistency certification, and consequently, the proposed project may not be permitted by Federal agencies. Copies of the decision may be obtained from the contact person listed below.

FOR ADDITIONAL INFORMATION CONTACT: Roger B. Eckert, Attorney-Adviser, Office of the Assistant General Counsel for Ocean Services, National Oceanic and Atmospheric Administration (NOAA), U.S. Department of Commerce, 1825 Connecticut Avenue, NW., Suite 603, Washington, DC 20235, (202) 606-4200.

Mid-Atlantic Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Mid-Atlantic Fishery Management Council (Council) and its Committees will meet on January 7-9, 1992, at the Radisson Philadelphia Airport, 500 Stevens Drive, Philadelphia, PA, 19113; telephone: 215-521-5900.

Council.—The Council will begin its regular meeting on January 8 at 8 a.m., and should adjourn for the day at approximately 3:45 p.m. This session will be followed by an Executive Committee meeting.

On January 9 the Council will reconvene at 8 a.m., and should adjourn at approximately 11 a.m. In addition to reviewing committee reports, the Council will consider approval of crew member permitting and other fishery management matters as deemed necessary. The Council may also go into closed session (not open to the public) to discuss personnel and/or national security matters.

Committees.—On January 7 the Council's Surf Clam and Ocean Quahog Committee will meet from 10-12 p.m., the Seafood Committee will meet from 1-3 p.m., and the Information and Education Committee will meet at 3:10 p.m. On January 9 at 1 p.m., the Atlantic States Marine Fisheries Commission's Habitat Committee will meet, following adjournment of Council meeting.

For more information, contact John Bryson, Executive Director, Mid-Atlantic Fishery Management Council, room 2115, Federal Building, 300 South New Street, Dover, DE 19901, telephone: (302) 674-2331.

Dated: December 20, 1991.

BILLING CODE 3510–22–M

CONSUMER PRODUCT SAFETY COMMISSION

Notification of Request for Approval of Collection of Information, Compliance Survey of the Bicycle Industry

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for approval through September 30, 1992, of a collection of information in the form of a survey of firms which manufacture or import bicycles. The purpose of this survey is to assess the over-all level of compliance with regulations which establish safety requirements for bicycles (16 CFR 1500.18(a)(12) and part 1512). These regulations were issued under provisions of the Federal Hazardous Substances Act (15 U.S.C. 1261, 1261) to eliminate or reduce unreasonable risks of death or serious personal injury associated with bicycles. The regulations are applicable to bicycles introduced into interstate commerce after May 11, 1976, and establish safety requirements for the frame, wheels, front fork, brakes, reflectors, and other components of a bicycle. The survey of the bicycle industry is part of a comprehensive plan to assess compliance by regulated industries with 70 rules enforced by the Commission. The Commission will use the information obtained from the survey of the bicycle industry to establish priorities for enforcement of mandatory standards and regulations which the Commission administers. Information obtained from this survey will also be used to support appropriate legal action against any firm which has manufactured or imported bicycles failing to comply with the requirements of the bicycle safety regulations.

Additional Details About the Request for Approval of a Collection of Information

Agency address: Consumer Product Safety Commission, Washington, DC 20207.

Title of information collection: Survey of Compliance with the Requirements for Bicycles in 16 CFR 1512.

Type of request: New request.

Frequency of collection: One time.

General description of respondents: Manufacturers and importers of bicycles.

Estimated number of respondents: 65.

Estimated average number of hours per respondent: 8.

Estimated number of hours for all respondents: 520.

Comments: Comments on this request for extension of approval of information collection requirements should be addressed to Elizabeth Harker, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503; telephone: (202) 395–7340. Copies of the request for extension of information collection requirements are available from Francine Shacter, Office of Planning and Evaluation, Consumer Product Safety Commission, Washington, DC 20207; telephone: (301) 504–0416.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable.

Dated: December 23, 1991.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

DEPARTMENT OF DEFENSE

Department of the Army

Army Science Board; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Date of Meeting: 13 January 1992.

Time: 1300–1700 hours.

Place: Pentagon, Washington, DC.

Agenda

Members of the C31 Issue Group of the Army Science Board will meet in the Pentagon to begin work on a new study entitled, "Command and Control on the Move." The primary objective of the meeting will be to finalize the Terms of Reference for the study and to determine the general study plan. This meeting will be open to the public. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. The ASB Administrative Officer, Sally Warner, may be contacted for further information at (703) 695–0781/0782.

Sally A. Warner,

Administrative Officer, Army Science Board.

DEFENSE NUCLEAR FACILITIES SAFETY BOARD

[Recommendation 91–6]

Radiation Protection for Workers and the General Public at DOE Defense Nuclear Facilities

AGENCY: Defense Nuclear Facilities Safety Board.

ACTION: Notice; recommendation.

SUMMARY: The Defense Nuclear Facilities Safety Board has made a recommendation to the Secretary of Energy pursuant to 42 U.S.C. 2286a concerning radiation protection for workers and the general public at DOE defense nuclear facilities. The Board requests public comments on this recommendation.

DATES: Comments, data, views, or arguments concerning this recommendation are due on or before January 27, 1992.

ADDRESSES: Send comments, data, views, or arguments concerning this recommendation to: Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW, suite 700, Washington, DC 20004.

FOR FURTHER INFORMATION CONTACT: Kenneth M. Pusateri or Carole J. Council, at the address above or telephone (202) 208–6400.

Dated: December 20, 1991.

John T. Conway,

Chairman.

Radiation Protection for Workers and the General Public at DOE Defense Nuclear Facilities

Dated: December 19, 1991.

[Recommendation 91–6]

The Board and its staff have conducted extensive reviews of radiation protection programs at Department of Energy (DOE) Headquarters and several DOE sites in the defense nuclear facilities complex. In particular, the Savannah River Site (SRS) health and radiological protection programs have been reviewed on several occasions.

After an inquiry into worker exposures to tritiated water from a moderator water spill at the site, the Board transmitted a report to the Secretary of Energy on May 31, 1991, which reviewed the management and radiation protection issues, as well as other factors that DOE and its contractor identified as root causes of the spill. Before completion of that report, the Board had directed its staff to continue review of technical radiation protection issues that had been surfaced during the inquiry. In October, 1990, the Board's staff reviewed the SRS radiation protection program, which is included by SRS within what are commonly referred to as Health Protection (HP) program and Health Physics program. Board staff conducted follow-up reviews in February and April, 1991. Staff reports based on the October, 1990, and February, 1991, trips were provided to DOE's Defense Programs personnel in letters from the Board dated November 1, 1990, and June 10, 1991, respectively. In its transmittal letter of June 10, 1991, the Board indicated it was giving consideration to the possibility of developing recommendations to the Secretary of Energy in the radiation protection area after further Board review.

On June 20, 1991, representatives from DOE's Defense Programs, the DOE Savannah River Site Special Projects Office, and the operating contractor at SRS briefed the Board and its staff on radiation protection program issues. As a followup to that briefing, the Board conducted a site visit at SRS in July, 1991. During that visit, Board Members interviewed SRS HP personnel and supervisors.

The most recent Board staff assessment of DOE's radiation protection program and the operating contractor's HP program at SRS occurred during the period September 27 through October 10, 1991. The Board's staff reviewed relevant documents, attended briefings and discussions with DOE and operating contractor personnel at DOE Headquarters and at SRS, and observed selected evolutions at reactor and nonreactor facilities.

Other independent organizations and committees have documented required improvements in DOE's radiation protection program, including the Institute for Nuclear Power Operations (INPO) in December 1990, the Advisory Committee on Nuclear Facility Safety in Section 5 of its final report dated November 13, 1991, and the final DOE Operational Readiness Review (ORR) team in its report for Savannah River's K-reactor dated November, 1991.

Primarily as a result of these assessments at Savannah River, but also because of other reviews at Rocky Flats Plant and elsewhere in the defense nuclear facilities complex, the Board has found a need for increased DOE attention in five major areas: (1) DOE management and leadership in radiation protection programs; (2) radiation protection standards and practices at defense nuclear facilities; (3) training and competence of Health Physics technicians and supervisors; (4) analysis of Reported Occurrences and correction of radiation protection program deficiencies; and (5) understanding and attention to radiation protection issues by individuals in DOE and its contractor organizations.

Therefore, the Board recommends that:

1. The Secretary of the Department of Energy expeditiously issue a formal statement of the Department's radiological health and safety policy. Among the subjects that should be considered for inclusion are:

a. The goals of the Department's radiation protection program.

b. Potential sources of guidance and bases for the radiological protection standards adopted by, or to be adopted by, DOE.

c. A reaffirmation, by the Secretary of Energy, of DOE's full commitment to the "As Low As Reasonably Achievable" (ALARA) principle for both occupationally exposed personnel and the general public, which emphasizes the various commitments to radiological protection contained elsewhere in DOE rules, orders, and other requirements.

2. DOE review existing radiation protection training programs, and develop and implement a plan for an expanded training program that includes consideration of the following elements:

a. Comparison with guidance on training contained in "Guide to Good Practice in Radiation Protection Training," Training Resources and Data Exchange (TRADE) Oak Ridge Associated Universities (ORAU) 88/4–99 and "Guidelines for Training and Qualification of Radiological Protection Technicians," Institute of Nuclear Power Operations (INPO), INPO 87–088. While the Board does not necessarily endorse all of the guidance contained in these documents, it believes they are important sources of professional and commercial information on training which can be productively used by DOE in identifying improvements for DOE's programs.

b. Delineation of the level of knowledge, skills, abilities, and other qualifications necessary for each generic radiation protection personnel position within the DOE complex, based on professional and industry standards and guidance. This should include association and/or interaction with professional health physics organizations such as the Health Physics Society and American Board of Health Physics certification for appropriate personnel and managers.

c. Determination of the current level of knowledge of radiation protection managers, professionals, supervisors, and technicians, by means of written, oral, and practical examinations.

d. Delineation of the existing and supplemental training necessary to ensure that radiation protection personnel meet the qualifications of their respective positions.

e. Evaluation of individuals after supplemental training to ensure that they meet the qualifications for their positions.

f. Continuing radiation protection training requirements and retention testing.

g. Delineation of existing and supplemental training for workers, contractors, and subcontractors, other than radiation protection personnel, necessary to ensure adequate radiation protection for those workers.

3. The Department critically examine its existing infrastructure for radiation protection program development and implementation at DOE Headquarters to determine if resource, organizational, or managerial changes are needed to (a) emphasize the priority and importance of the radiation protection program to assuring public health and safety; (b) communicate the importance of the radiation protection program from the highest level of management to all appropriate Department personnel; (c) expand the radiation protection program and increase program resources to facilitate the rapid development and implementation of radiological protection standards throughout the defense nuclear facility complex; and (d) make other changes as are warranted.

4. The Department examine the corresponding radiation protection organizational units at DOE's principal Operations and Field Offices and DOE contractor organizations to determine if those organizations' radiation protection programs' infrastructure, responsibilities, and resources can be strengthened to expedite implementation of radiological

VOL 56 ISS 249 DEC 27 1991 UMI

protection standards. A critical aspect of DOE's review should be an assessment of management's involvement and effectiveness in implementing radiation protection programs and management's ability to communicate the steps to be taken to implement an effective radiation protection program to all levels within relevant DOE and contractor units, particularly within line organizations.

5. DOE focus its efforts relating to reporting of occurrences to enhance the usefulness of the Occurrence Reporting (OR) system as a tool for enhancing radiological health and safety at DOE facilities, by emphasizing determination of root causes and management follow-up of lessons learned.

6. DOE compare (a) its operating contractor practices and procedures, and (b) DOE radiological protection standards with the guidance used by other government, commercial, and professional organizations. The documents which DOE should use for this study and comparison include, at a minimum, this listed in the attachment to those recommendation. While the Board does not necessarily endorse any of the listed documents in their entirety, it believes they are important sources of government, commercial, and professional opinion on radiological protection standards, procedures, and practices. As such, they serve as valuable tools for identifying improvements needed in DOE's programs.

7. After completion of the study recommended in item 6, DOE identify any supplemental measures that are necessary or appropriate to compensate for the differences identified between practices which conform to the guidance enumerated above and actual operating contractor practices; and between standards and procedures listed and DOE standards and procedures for radiation protection at defense nuclear facilities.

John T. Conway,
Chairman.

Appendix—Transmittal Letter to the Secretary of Energy

December 19, 1991.

The Honorable James D. Watkins,
Secretary of Energy, Washington, DC 20585.

Dear Mr. Secretary: On December 19, 1991, the Defense Nuclear Facilities Safety Board, in accordance with 42 U.S.C. 2286a(5), approved Recommendation 91–6 which is enclosed for your consideration. The Board is aware that the Department has just proposed rules in the Federal Register concerning Radiation Protection for Occupational Workers. 56 FR 64334 (Dec. 9, 1991). Recommendation 91–6 deals with radiation protection issues throughout the DOE defense nuclear facilities complex.

42 U.S.C. 2286d(a) requires the Board, after receipt by you, to promptly make this recommendation available to the public in the Department of Energy's regional public reading rooms. The Board believes the recommendation contains no information which is classified or otherwise restricted. To the extent this recommendation does not include information restricted by DOE under the Atomic Energy Act of 1954, 42 U.S.C. 2161–68, as amended, please arrange to have this recommendation promptly placed on file in your regional public reading rooms.

The Board intends to publish this recommendation in the **Federal Register**.

Sincerely,

John T. Conway,
Chairman.

BILLING CODE 6820–KD–M

[Recommendation 91–5]

Power Limits for K-Reactor Operation at the Savannah River Site

AGENCY: Defense Nuclear Facilities Safety Board.

ACTION: Notice; recommendation.

SUMMARY: The Defense Nuclear Facilities Safety Board has made a recommendation to the Secretary of Energy pursuant to 42 U.S.C. 2286a concerning power limits for K–Reactor Operation at the Savannah River Site. The Board requests public comments on this recommendation.

DATES: Comments, data, views, or arguments concerning this recommendation are due on or before January 27, 1992.

ADDRESSES: Send comments, data, views, or arguments concerning this recommendation to: Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW., suite 700, Washington, DC 20004.

FOR FURTHER INFORMATION CONTACT: Kenneth M. Pusateri or Carole J. Council, at the address above or telephone (202) 208–6400.

Dated: December 20, 1991.

John T. Conway,
Chairman.

Power Limits for K-Reactor Operations at the Savannah River Site

Dated: December 19, 1991.

[Recommendation 91–5]

The Defense Nuclear Facilities Safety Board (the Board) has been conducting an ongoing review of the bases and criteria for the operational plans for the K-reactor at the Savannah River Site. These plans currently include limitation of the power of the reactor to 30 percent of the historical full power, or to approximately 720 megawatts (MW). The information reviewed has been provided to the Board in numerous briefings and documents, including the Savannah River K Production Reactor Safety Analysis Report (WSRC–SA–10003).

The Board concluded on the basis of this information that operation of the K-reactor at a power level not exceeding 30 percent of the nominal historical maximum power would impose no undue risk to public health and safety assuming that all other improvement measures established as necessary for startup have been completed and effectively implemented. In this connection, the Board has been stationing members of its staff and some of its outside experts at the Savannah River Site during the period of restart to monitor the activities during restart and initial power ascension of the K-reactor with the initial reactor configuration.

Information in the K–14–1 Core Operations Report (September, 1991), and some of the Reactor Operations Management Plan (ROMP) closure packages implies that at a later time the Department of Energy may wish to increase the operating power level of the K-reactor above the 30 percent value. However, the Board is of the opinion that the existing information on the effectiveness of the engineered safety features, especially those that would be relied on in the event of a large loss-of-coolant accident, does not at present support operation at a power level much above the 30 percent value. The Board considers that justification of any increase in power would require further refinement of the thermal-hydraulic evidence on the cooling capability of the emergency cooling systems under accident conditions. Therefore, pursuant to 42 U.S.C. 2286b(d), DOE shall inform the Board well before any decision to increase the reactor's power level above 30 percent of the historical value of its maximum full power. Furthermore, if such an increase in operating power is to be contemplated by the DOE, the Board recommends that:

1. The DOE should conduct more definitive studies on the thermal-hydraulic methodology, criteria, and experimental test program used in analyzing performance of core cooling of the K-reactor during unusual conditions that could prevail during accidents. These studies should more fully reflect prototypical geometry and accident conditions (temperature, flow, pressure, and configuration).

2. Any proposal to operate the K-reactor at a level above the 30 percent value should be supported by accident analysis based on the thermal-hydraulic methodology revised in accordance with the above.

3. The evaluation model for analysis of postulated loss of coolant accidents should be documented and controlled in accordance with the procedures described in 10 CFR 50.46 (1991). Similar controls should be implemented for models used in analyzing non-LOCA accidents.

John T. Conway.

Appendix—Transmittal Letter to the Secretary of Energy

December 19, 1991.

The Honorable James D. Watkins,
Secretary of Energy, Washington, DC 20585.

Dear Mr. Secretary: On December 19, 1991, the Defense Nuclear Facilities Safety Board, in accordance with 42 U.S.C. 2286a(5), approved Recommendation 91–5 which is enclosed for your consideration.

42 U.S.C. 2286d(a) requires the Board, after receipt by you, to promptly make this recommendation available to the public in the Department of Energy's regional public reading rooms. The Board believes the recommendation contains no information which is classified or otherwise restricted. To the extent this recommendation does not include information restricted by DOE under the Atomic Energy Act of 1954, 42 U.S.C. 2161–68, as amended, please arrange to have this recommendation promptly placed on file in your regional public reading rooms.

The Board intends to publish this recommendation in the **Federal Register**.

DEPARTMENT OF EDUCATION

National Assessment Governing Board; Teleconference Meeting

AGENCY: National Assessment Governing Board; Education.

ACTION: Notice of meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming teleconference meeting of the Executive Committee of the National Assessment Governing Board. This notice also describes the functions of the Board. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATES: January 13, 1992.

TIME: 11 a.m. (e.t.)

PLACE: National Assessment Governing Board, suite 7322, 1100 L Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Roy Truby, Executive Director, National Assessment Governing Board, suite 7322, 1100 L Street, NW., Washington, DC, 20005–4013, telephone: (202) 357–6938.

SUPPLEMENTARY INFORMATION: The National Assessment Governing Board is established under section 406(i) of the General Education Provisions Act (GEPA) as amended by section 3403 of the National Assessment of Educational Progress Improvement Act (NAEP Improvement Act), title III–C of the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 (Pub. L. 100–297), (20 U.S.C. 1221e–1).

The Board is established to advise the Commissioner of the National Center for Education Statistics on policies and actions needed to improve the form and use of the National Assessment of Educational Progress, and develop specifications for the design, methodology, analysis, and reporting of test results. The Board also is responsible for selecting subject areas to be assessed, identifying the objectives for each age and grade tested, and establishing standards and procedures for interstate and national comparisons. The Executive Committee of the National Assessment Governing Board will meet via teleconference call on January 13, 1992 at 11 a.m. (et). The proposed agenda includes: (1) Discussion of the status of the Memorandum of Understanding detailing the Board's relationship with the Department of Education; (2) review of the Reporting and Dissemination Committee's recommendations regarding the NCES plans for disseminating the new NAEP reports; and (3) review of the National Academy of Education's evaluation of NAEP. Records are kept of all Board proceedings and are available for public inspection at the U.S. Department of Education, National Assessment Governing Board, suite 7322, 1100 L Street, NW., Washington, DC, from 8:30 a.m. to 5 p.m.

Dated: December 20, 1991.

Diane Ravitch,
Assistant Secretary and Counselor to the Secretary.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Wetlands Involvement Notification for Proposed Construction of an Industrial Waste Landfill at the Department of Energy's Y–12 Plant, Oak Ridge, TN

AGENCY: Department of Energy.

ACTION: Notice of wetlands involvement and opportunity to comment.

SUMMARY: The Department of Energy (DOE) proposes to construct a new landfill for disposal of industrial waste and dewatered bottom ash at the Y–12 Plant on the Oak Ridge Reservation (ORR) in Oak Ridge, Tennessee. All activities related to the proposed project would occur within a restricted area of about 20 hectares (50 acres) on federally owned property.

In accordance with the DOE Regulations for Compliance With Floodplains/Wetlands Environmental Review Requirements (10 CFR part 1022), DOE will prepare a wetlands assessment which will be incorporated into the Environmental Assessment (EA) being prepared for the proposed landfill.

SUPPLEMENTARY INFORMATION: The proposed landfill would provide additional landfill capacity for disposal of industrial wastes generated by the

VOL
56
ISS
249
DE
27
1991
UMI

three major facilities operated at ORR—the Oak Ridge Y–12 Plant, the inactive Oak Ridge Gaseous Diffusion Plant, and the Oak Ridge National Laboratory (ORNL)—and would bring disposal of coal ash from the Y–12 Steam Plant into environmental compliance with the Tennessee Water Quality Control Act. The landfill would be developed on two disposal areas, totaling approximately 20 hectares (50 acres), on the East Chestnut Ridge site. Site preparation would include clearing, grading, and fencing; construction of access roads; and onsite disposal of construction spoils. Construction would require the dredging and filling of two wetland areas. One wetland is permanently flooded; the other wetland contains water only seasonally. The wetlands are classified as palustrine open-water wetlands and are approximately 0.15 acres and 0.05 acres in size.

The proposed action includes the construction of a 0.5-acre replacement pond that would replace the wetland functions of the two existing wetlands. The replacement pond would be located northwest of the proposed landfill site. Run-off from the landfill would be diverted from the replacement pond, and all run-off accepted by the replacement pond would be from offsite.

The proposed action would be carried out in coordination with the Environmental Protection Agency, the U.S. Army Corps of Engineers, and the Tennessee Department of Environmental Conservation. Maps and further information are available from DOE at the address shown below.

DATES: Any comments are due on or before January 13, 1992.

ADDRESS: Send comments to: Joy L. Sager, Environmental Engineer, Waste Management and K–25 Operations Division (EW–92), U.S. Department of Energy, Post Office Box 2001, Oak Ridge, Tennessee 37831–8541, phone number (615) 576–0850. Fax comments to: (615) 576–5333.

Paul D. Grimm,

Principal Deputy Assistant Secretary for Environmental Restoration and Waste Management.

Federal Energy Regulatory Commission

[Docket No. JD92–02043T; West Virginia–9]

State of West Virginia; NGPA Notice of Determination by Jurisdictional Agency Designating Tight Formation

December 19, 1991.

Take notice that on December 16, 1991, the West Virginia Department of Commerce, Labor and Environmental Resources (West Virginia) submitted the above-referenced notice of determination pursuant to § 271.703(c)(3) of the Commission's regulations, that the Maxton/Maxon Sandstone (Maxton) in Matheny and McGraws Quadrangles, qualifies as a tight formation under section 107(b) of the Natural Gas Policy Act of 1978 (NGPA). The Maxton within the designated area consists of three successive Mauch Chunk Group sandstones, referred to as the "Upper Maxton", the "Middle Maxton" and the "Lower Maxton". The designated quadrangles in the notice are found in Raleigh and Wyoming Counties, West Virginia.

West Virginia previously filed to designate the Maxton Sandstone and the Big Lime as tight formations. On January 23, 1984, West Virginia withdrew the Maxton portion of its recommendation. See Order No. 372 (27 FERC ¶ 61,198), issued May 9, 1984 in Docket No. RM79–76–134 (West Virginia–2).

The notice of determination also contains West Virginia's findings that the referenced portion of the Maxton/Maxon Sand Formation meets the requirements of the Commission's regulations set forth in 18 CFR part 271.

The application for determination is available for inspection, except for material which is confidential under 18 CFR § 275.206, at the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington DC 20426. Persons objecting to the determination may file a protest, in accordance with 18 CFR 275.203 and 275.204, within 20 days after the date this notice is issued by the Commission.

Lois D. Cashell,

Secretary.

[Docket No. CP92–223–000]

National Fuel Gas Supply Corp.; Order Granting Request for Waiver and Clarifying Prior Order

Issued December 19, 1991.

Before Commissioners: Martin L. Allday, Chairman; Charles A. Trabandt, Elizabeth Anne Moler, Jerry J. Langdon and Branko Terzic.

On December 9, 1991, National Fuel Gas Supply Corporation filed a petition for waiver of the requirement in § 2.55(b) of the regulations that interstate pipelines notify the Commission at least 30 days prior to commencing construction activities to replace existing facilities.[1] We will grant the request.

As a result of statements made by the National Fuel in its request for waiver, we will also clarify a portion of Order No. 555.[2]

[1] Section 2.55(b), 18 CFR 2.55(b) (1990), was amended, effective August 2, 1990, to adopt the notification requirements for replacement of existing facilities. See Interim Revisions to Regulations Governing Construction of Facilities Pursuant to section 311 and Replacement Facilities, Order No. 525, FERC Statutes and Regulations, Regulations Preambles 1986–1990 ¶ 30,895 (1990), and Order No. 525–A, 53 FERC ¶ 61,140 (1990).

[2] Docket No. RM90–1–000, Revisions to Regulations Governing Transportation under

Continued

Request for Waiver

National Fuel states that it owns and operates a 6-inch transmission line, known as Line Q, in Warren County, Pennsylvania that supplies gas to approximately 1,500 people in and around the Town of Tidioute. Tidioute can be served by gas coming out of a small nearby storage field or gas brought in over Line Q. Line Q crosses the Allegheny River.

On August 22, 1991, a valve failed near the south bank of the Allegheny River in the Allegheny National Forest due to the collapse of a hillside.

On August 23, National Fuel filed with the Commission an emergency gas transaction notice under § 284.264(b)(1) that described its plan to effectuate permanent repairs of Line Q within 60 days.[3] After further analysis of the repairs that would be required, on October 31, National Fuel filed an amendment to the emergency gas transaction notice that described a revised replacement plan. In its revised plan, National Fuel states that it intends to replace approximately 330 feet of Line Q with line that goes around the part of the hill having stability problems. National Fuel also states that it intends to bore about 300 feet of replacement line through the bedrock underneath the steepest part of the hillside. National Fuel estimates that the project will cost $132,000.

National Fuel states that Line Q has remained blocked since August 22 because it has not been able to obtain the necessary permission to begin construction activities to repair Line Q in the Allegheny National Forest. The only gas now reaching Tidioute comes from the nearby storage field. National Fuel alleges that "(m)uch of Tidioute" would be without gas service if the line from the storage field were to fail.

On November 6, National Fuel filed a petition for waiver to extend the emergency transaction for another 60 days.[4] (The original 60-day period had expired.) National Fuel, however, states that it is concerned that "if its petition (to extend the emergency transaction) was granted now giving (it) an additional 60 days beginning back in October, it would not be possible to complete the project (especially the 300 foot bore under the hillside) by December 26 (120 days after National (Fuel's) original notice was filed)." [5] Thus, National Fuel has filed this request for waiver of § 2.55(b). National Fuel contends that it will begin replacing facilities on December 9 under the emergency regulations in § 284.261 and will continue replacing facilities after December 26 under § 2.55(b).

National Fuel's petition describes the facilities to be replaced and the environmental mitigation procedures to be used as required by § 2.55(b). We have reviewed National Fuel's petition and determined that good cause exists to grant the request for waiver. Accordingly, National Fuel's waiver request is granted.

Clarification

In its request for waiver, National Fuel states that the "30-day notice requirement was abolished upon the issuance of Order No. 555." National Fuel further states that it "has not filed any 30-day notices for replacement projects commenced under § 2.55(b) after September 20, 1991," the date Order No. 555 was issued.[6]

In the interim rule in Order No. 525, we stated that the "interim rule is effective only until a final rule is issued in Docket No. RM90–1–000." [7] In Order No. 555, we stated that the "interim rule (Order No. 525) expires upon issuance of the final rule in this proceeding." [8] Order No. 555 was scheduled to become effective on November 19. On November 13, 1991, we issued an order that postponed the effective date of Order No. 555 until 30 days after publication in the **Federal Register** of an order on rehearing because of Order No. 555's "broad and potentially significant impact on the natural gas industry." [9]

Order No. 555 was issued on September 20, 1991. Numerous parties, including National Fuel, filed for rehearing of various provisions in that order and many parties requested a stay. We will address these requests in a rehearing order. Since an order on rehearing is contemplated, no final order has been issued in the proceedings in Docket No. RM90–1–000. Consequently, the interim rule in Order No. 525 remains in effect. Thus, interstate pipelines must continue to comply with the 30-day notice requirement in § 2.55(b) and 284.11(b) until a final order on rehearing is issued in Docket No. RM90–1–000 and the final order is made effective. Although this issue has arisen in a specific case, it obviously has generic applicability. Accordingly, we are directing the Secretary of the Commission to arrange for the publication of this order in the **Federal Register**.

The Commission orders:

(A) The notification requirement in § 2.55(b) of the regulations is waived to permit National Fuel to commence the replacement of facilities described in the petition.

(B) The interim rule in Order No 525 will remain in effect until a final order is issued in Docket No. RM90–1–000 and the final order is made effective.

By the Commission.

Lois D. Cashell,

Secretary.

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before January 27, 1992.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 260-2740.

SUPPLEMENTARY INFORMATION:

Office of Solid Waste and Emergency Response

Title: RCRA Hazardous Waste Permit Application and Modification, part A (ICR No. 262.04; OMB No. 2050-0034). This is a renewal of a currently approved collection.

Abstract: This ICR discusses the requirements for owners and operators of hazardous waste treatment, storage, and disposal facilities (TSDFs) submitting part A permit applications or part A permit modifications as required by section 3005 of the Resource Conservation and Recovery Act (RCRA). The requirements for submitting and modifying a part A permit application are codified at 40 CFR part 270.

The RCRA permit application asks for the characteristics and conditions of the site and of the hazardous waste handled. The information requested includes general facility information (name, mailing address, location), a description of the hazardous waste activity, a topographic map, and a brief description of the nature of business. The application must be revised if certain changes are made to a facility.

EPA uses the information in the part A permit application for a variety of purposes, to include: Identifying the person(s) legally responsible for hazardous waste activity, determining which facilities require permits under more than one program, assessing potential for the facility to pollute nearby ground and surface waters, and defining the specific wastes a facility is legally allowed to handle for different purposes.

Burden Statement: The public reporting burden for this collection is estimated to average 12 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Respondents: Owners and operators of hazardous waste treatment, storage, and disposal facilities.

Estimated Number of Respondents: 825.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 9,942 hours.

Frequency of Collection: One-time permit application.

Send comments regarding the burden estimate, or any other aspect of this collection of information, including suggestions for reducing the burden, to: Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (PM-223Y), 401 M Street, SW., Washington, DC 20460, and Jonathan Gledhill, Office of Management and Budget, Office of Information and Regulatory Affairs, 725 17th St., NW., Washington, DC 20503.

Dated: December 19, 1991.

Paul Lapsley,

Director, Regulatory Management Division.
